ASX RELEASE

17 November 2026
Technology One Limited (ASX: TNE)

TechnologyOne Appoints new CFO

BRISBANE, 17 November 2026 – TechnologyOne (ASX: TNE) announced today that Brian Gillespie has been appointed as Chief Financial Officer to commence in January 2027.

Brian was most recently the CEO of power company CS Energy which followed Group Executive roles with Orica, GroundProbe and DP World. Before that Brian spent thirteen years as a Partner with Deloitte and PwC where he developed his reputation for operational excellence and financial performance improvement.

Chief Executive Officer, Edward Chung, said: "I am delighted to welcome Brian to the team at TechnologyOne. Brian's global experience and passion for technology, customers, and growth makes him an ideal addition to our leadership team as Chief Financial Officer. Brian's insights and leadership capability will strengthen our executive team as we continue to deliver world leading software solutions for our customers and community."

Mr Chung also said, "I would also like to thank Giovanni Rizzo, who has acted in the role since 1 August 2026. Giovanni's contribution during this interim period has been outstanding, and we sincerely appreciate his leadership, dedication and commitment to ensuring continuity and stability throughout the transition. Giovanni has also been promoted to a newly created role of VP Finance with expanded responsibilities."

- Ends -

Authorised for release by the CEO and Chair.

About TechnologyOne

TechnologyOne (ASX: TNE) is Australia's largest enterprise software provider and one of the nation's top 100 ASX-listed organisations, with a global presence.

We provide intelligent SaaS ERP solutions that transform organisations and make life simple for our community in the AI era. Deeply integrated and simple to use, our solutions are available on any device, anywhere, at any time.

TechnologyOne SaaS+ (Solution as a Service) brings together software, implementation, support, and updates in one all-inclusive offering.

Over 1,300 leading government agencies, local councils, higher education institutions, health and community service providers, asset-intensive businesses, financial services firms, and corporates use our software.

Since 1987, we've delivered enterprise software that evolves with new and emerging technologies, so our customers can focus on their business, not their technology.
