---

## Trump tariffs

- Trade negotiations are driving volatility in markets and share prices in the immediate term
- Current policy uncertainty significantly affects business decision making
- Consequential earnings downgrades seem likely, though hard to quantify currently
- Ultimate tariff levels likely higher than previous, weighing on economic growth and increasing inflation
- Uncertain environment persists – what changes next?

Diversified Australian and New Zealand Equities – capital and fully franked dividend growth over the long term

MER 0.15%

Grossed up dividend yield

5.3%

\$10.1 billion

5.3%

\$385 million

Managing four funds with different investment objectives adds significantly to the effectiveness of the investment process and idea generation

No external funds management business taking a management and/or performance fees

Total FUM of approximately \$12 billion

Dividend yields based on share price on 30 April 2025

# A Closer Look at our Investment Approach

---

## Attributes of a high-quality company that we seek:

- Unique assets that are hard to replicate or have an Industry leadership position (or developing one)
- Sustainability of competitive advantage
- Not unduly burdened by external risk factors
- Conservative balance sheets (low debt)
- Consistency of earnings
- Run by effective, passionate management with ownership alignment

## Why this matters:

- The presence of these factors drives a competitive advantage
- Which leads to high return on capital
- And allows for reinvestment opportunities to drive growth
- Which allows for market share capture – and further enhancement of leadership position
- Which combines to deliver long term shareholder value creation

---

We seek to buy these companies when we identify long term value and reduce or exit when they no longer meet these characteristics.

---

# Australian Foundation Investment Company

## Portfolio Performance – to 30 April 2025

Per annum returns. Assumes the full benefit of franking credits.  
Only includes franking that has been paid out.  
Past performance is not indicative of future performance.

## Recent Dividend History

AFIC’s franking reserve balance (in part enabled by the LIC structure) ensures we can pay a consistent dividend even through volatile times.

# Attractive Total Returns Over the Long-term

## AFIC NTA vs S&P ASX 200 Accumulation Index

**\$10k in AFIC → \$167k**

**\$10k in the Index → \$138k**

Excludes the benefit of franking.

# Mirrabooka Portfolio Performance – Per Annum Returns to 30 April 2025\*

● Net asset per share growth plus dividends, including franking

● S&P/ASX Mid Cap 50 and Small Ordinaries Accumulation Indices, including franking

\* Assumes an investor can take full advantage of the franking credits. Mirrabooka's portfolio return is also calculate after management fees, income tax and capital gains tax on realised sales of investments. It should be noted that Index returns for the market do not include management expenses or tax.

Past performance is not indicative of future performance.

# Mirrabooka Rights Issue

---

- 1 for 7 Rights Issue – Non Renounceable. Raising up to approximately \$85 million.
- Issue price of \$3.06\* – approximately 5% discount to current share price.
- New shares entitled to dividend of 6.5 cents with results in July<sup>^</sup>. Paid in August.
- Shareholders can apply for more than their entitlement but may be subject to scale back.
- Entitlement Offer closes 2 June 2025.

\*Equal to the average of the weekly estimated pre-tax value of the net tangible asset backing per Mirrabooka share over the period from Friday, 4 April 2025 to Friday, 2 May 2025 (inclusive)

<sup>^</sup>The amount, and payment, of this final dividend remains subject to approval by the Mirrabooka Directors at the time of approval of the annual financial statements of Mirrabooka in July 2025

# Rationale for raising additional capital

---

- Market volatility – we have seen greater opportunities arise in early 2025, positioning for more
  - Replenishing capital – since our first special dividend in 2013, \$81 mil paid out in cash dividends and Capital Gains Tax, net of capital raised through DRPs and SPPs
  - Investment flexibility – tax effective portfolio repositioning as selected stock weightings can be reduced without selling down holdings
  - Mirrabooka shareholders have consistently expressed interest in supporting further capital raising
  - Significant franking credit reserves to support dividend capacity on additional shares
  - Scale – absence of FUM linked fees means shareholders benefit from reduced MER
-

# Greater investment opportunities – stock purchases in 2025 YTD

\$72 million of purchases across 40 stocks, largest below:
