About Blaze Minerals

Blaze Minerals is a mineral exploration company focussed on identifying and developing high-margin, high-grade, and high-value ore deposits in highly prospective regions.

The Company has a highly prospective base metals project in the Republic of the Congo:

- **Loulombo Project, the Republic of the Congo:** The Loulombo Project comprises a total of 195 square kilometres over two granted exploration licenses located 150 kilometres west of Brazzaville, inclusive of the Mimpala Target, a potentially high-grade discovery which has reported exceptional results from preliminary field activities.

The Company has two projects in Uganda:

- **Ntungamo Project, Uganda:** The Ntungamo Project is adjacent to the Mwirasandu Mine, the largest producing tin mine in Uganda, and highly prospective for critical minerals such as gallium and rubidium.
- **Mityana Project, Uganda:** The Mityana Project is the site of a historic open-cut tantalite mine.
