DELOREAN CORPORATION APPLIES FOR PRACTICAL COMPLETION ON BIOENERGY FACILITY FOR YARRA VALLEY WATER

HIGHLIGHTS:

Delorean Corporation Limited (ASX: DEL) (“Delorean” or “the Company”) is pleased to announce that it has formally notified and requested Yarra Valley Water for “Practical Completion” of the construction of Yarra Valley Water’s Lilydale bioenergy facility in Victoria.

The notification and request made by Delorean under the terms of the contract with Yarra Valley Water demonstrates that Delorean is satisfied it has completed all construction elements necessary for the bioenergy facility to run in Island Mode, prior to the grid connection scheduled for 2H FY26.

Delorean will now facilitate Yarra Valley Water whilst they work through the formal customer contractual process of confirming Practical Completion. Once Practical Completion is granted, it triggers the release of Delorean’s performance guarantees and the commencement of the Operations & Maintenance (O&M) phase of the contract, valued at approximately \$8 million over the initial two and half year term.

About the Lilydale Facility

The Yarra Valley Water Lilydale facility will process an average 55,000 Tonnes per annum of organic waste through anaerobic digestion to produce renewable baseload electricity. This will supply Yarra Valley Water’s adjacent sewage treatment plant and recycled water pump station, with surplus exported to the grid. The facility also produces a biofertiliser by-product to be repurposed for agricultural land use.

Key outcomes include processing approximately 55,000 tonnes of food waste each year, generating more than 39,000 kWh of renewable electricity per day, and achieving an annual reduction of around 24,700 tonnes of CO₂ emissions.

The facility incorporates a comprehensive suite of processing infrastructure including depackaging equipment, biodigestion, biogas purification, energy generation and wastewater treatment — delivered to stringent water utility standards.

About Delorean Corporation Limited

Delorean Corporation is a leading Australian bioenergy company. Delorean specialises in the design, build, ownership and management of bioenergy infrastructure. In addition to bioenergy power generation, Delorean also operates in the energy retail market. Delorean Corporation is a vertically integrated company positioned in two high growth industries; renewable energy and waste management.

Delorean Corporation comprises an Engineering Division, Infrastructure Division and Energy Retail Division. Through these divisions Delorean Corporation has the inhouse capability to deliver bioenergy projects across the full lifecycle, from project conception to completion, processing organic waste, generating renewable energy and monetising the sale of green electricity, heat and gas.

DEL's projects produce renewable energy whilst reducing the volume of waste going to landfill, utilising a model that generates multiple revenue streams.
