

QUARTERLY ACTIVITY REPORT

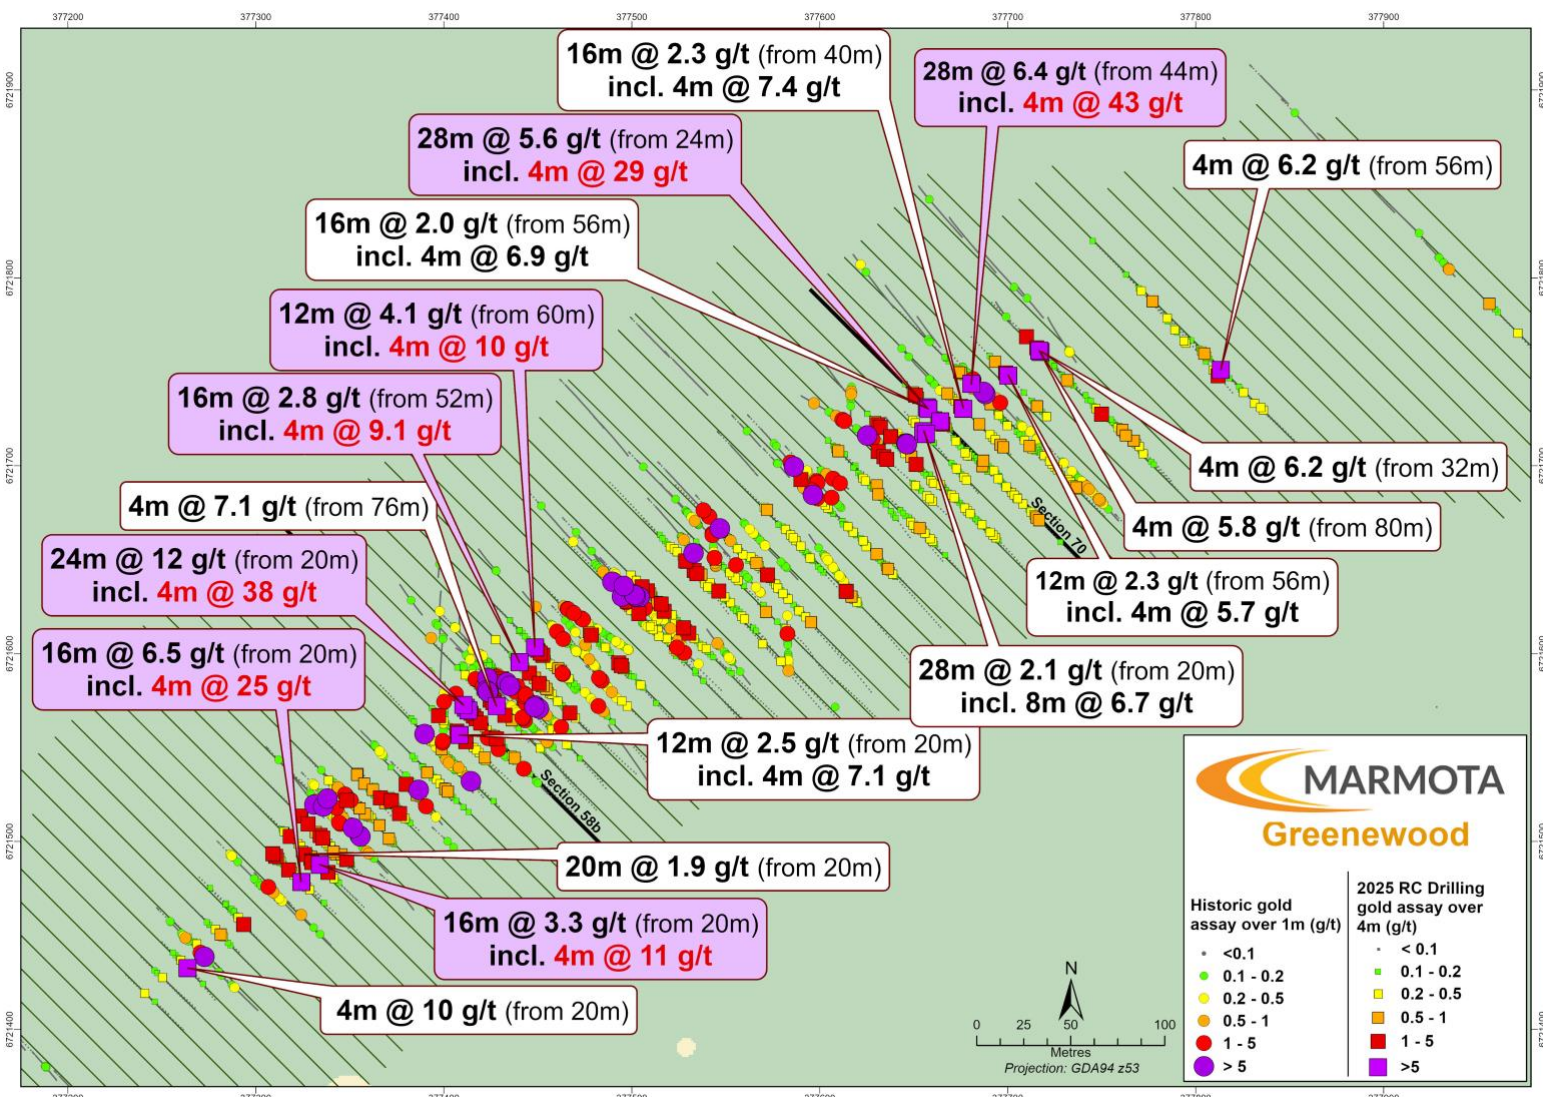

September QUARTER 2025

ASX: MEU

1. Gawler Gold

Maiden drilling at Greenwood yields bonanza gold grades

Marmota's maiden drilling program at the Greenwood gold discovery, carried out during the quarter, is yielding some of the best gold results seen in the Gawler Craton since the discovery of the Challenger deposit in 1995. It features **bonanza gold grades and thick intervals, close to surface**. Marmota's maiden drilling program has clearly delineated a **nearly continuous high-grade discovery at Greenwood**, along a mineralised zone that now extends over 900m in strike [see ASX: MEU 9 Oct 2025].

Mineralisation at Greenwood features bonanza grade intersections, close to surface and at both ends of the deposit (cross-section 58b and 70). The results (see also Figure 1) show the continuity of the high grades across the deposit.

Greenewood gold: Maiden MEU program (July/Aug 2025)

- RC Drill program: 146 holes
- Total RC drilling: 15,480m
- Average hole depth: ~ 106m
- Drilling completed: 28 Aug 2025 [ASX:MEU 28 Aug 2025]

Key Points

- Greenewood is located ~35km NW of Marmota's flagship Aurora Tank gold deposit and ~ 30km NE of the Challenger Gold Mine [see [Figure 3](#) and [Figure 5](#)].
- Greenewood is part of the Golden Moon JV. Marmota has 90% ownership (via its 100% owned subsidiary Half Moon Pty Ltd) [see ASX:MEU 9 April 2024]. Ministerial Consent was granted in June 2025 [ASX:MEU 23 June 2025].
- Greenewood only had ~ 7,000 metres of RC drilling since its discovery, prior to Marmota's maiden program.
- Marmota's drilling represents the first drilling at Greenewood since 2018.
- Greenewood's proximity to Marmota's flagship Aurora Tank gold discovery (100% owned) creates obvious economies of scope and scale that are patently attractive [see [Figure 3](#)].
- Marmota's Aurora Tank gold discovery features outstanding gold intersections including multiple bonanza gold grades close to surface, superb recoveries in metallurgical testwork [ASX:MEU 28 April 2025], with excellent potential for low-cost, low capex open pit heap leach gold production

New Paradigm for Growth

As a result of the program, Greenewood has grown to an approximately 900-metre long zone of near continuous mineralisation that was only subjected to a brief period of exploration by the previous owners. This was interrupted for non-geological reasons in 2018 — leaving an abundance of possibilities for increasing the dimensions of the mineralisation.

Prior to the recent drilling, Marmota carried out a review authored by Dr Kevin Wills [see ASX:MEU 17 June 2025] that identified an abundance of open sections, open intersections, untested mineralisation at shallow depth and possibilities for significant extensions.

Results from Marmota's maiden program have demonstrated that these concepts were valid, with results to date identifying numerous high-grade shoots, some with considerable length, *far exceeding the best results from the initial discovery*. This is a new paradigm for Greenewood. The results featuring bonanza grades and multiple thick intervals further validate the new model.

“Arc of Six” gold deposits

The Greenwood gold deposit is one of the “Arc of Six” gold deposits, along the flanks of the major ‘Y’-shaped gravity anomaly in the NW Gawler Craton. The “Arc of Six” gold deposits include, in geographic order (in a clockwise direction: see Fig. 3):

- The Challenger Mine (which produced over a million ounces of gold)
- Mainwood
- Greenwood
- Campfire Bore
- Golf Bore and
- Aurora Tank gold deposits.

Marmota owns all five of the unmined gold deposits (either 100% or 90%).

2. Gawler Gold: Project Manager appointed

During the quarter [ASX: MEU 17 Sept 2025], Marmota appointed highly experienced resources executive Paul Richardson to the new position of **Gawler Gold – Project Manager**.

Mr Richardson's key focus is to develop Marmota's arc of adjacent Gawler gold deposits, commencing with Aurora Tank which is the most advanced.

Key Points

- Mr Richardson is a highly regarded mineral processing engineer with more than 36 years' experience in managing mining and mineral processing operations, including open pit and underground mining, and mineral processing via flotation, gravity, electrostatic, magnetic, CIL and heap leach operations throughout Australasia and Africa.
- Mr Richardson's previous roles include General Manager for Mount Gibson Gold, General Manager for Pacmin Mining (Carosue Dam gold mine) and Manager (Operations) for St Barbara Mines.
- He has managed multi-disciplined teams ranging in size from 10 to 450 employees, with managerial experience in Superintendent, Resident Manager, General Manager and Project Director roles.
- He specialises in taking projects into production, including managing scoping studies and feasibility studies.

Marmota Executive Chairman, Dr Colin Rose, said:

“ Paul has been engaged with the express purpose of taking our Gawler Gold project to production. His skills and experience will be invaluable as we seek to unlock their full value. He has held numerous senior positions across the mining and processing spheres, giving him the knowledge we need to realise that value for our shareholders. The potential of our Gawler project continues to grow with every round of drilling, as shown by our maiden drilling at the Greenwood deposit yielding bonanza grades. We have an outstanding opportunity and we look forward to working with Paul to maximise it. ”

3. Titanium Discovery at Muckanippie

During the quarter [see ASX: MEU 2 Sept 2025], Marmota engaged titanium and mineral sands expert Richard Stockwell (Principal Geologist, Placer Consulting Pty Ltd) to advise on and assist in the development of Marmota's Titanium Discovery at Muckanippie and ensure all work and results conform to the industry's leading reporting guidelines (*e.g.* JORC 2012). Richard will assist in the planning and design of follow-up drill programs on the discovery and Marmota's neighbouring tenements and lead the geo-metallurgical characterisation, resource estimation and resource development at Muckanippie.

Key Points

- Mr Stockwell is a specialist detrital minerals (incl. mineral sands) geologist with demonstrated success in generative exploration, resource development, due-diligence and feasibility studies and operational support at detrital mineral sand projects throughout Australasia and Africa.
- He is a fellow of the Australian Institute of Geoscientists with 25 years of relevant industry experience.
- Mr Stockwell has been involved in the discovery and development of some of the world's largest mineral sands deposits, including high-value leucoxene and rutile deposits.

Richard Stockwell said:

“ The high HM (Heavy Mineral) grade and broad intercept widths place the Marmota Muckanippie titanium mineral sands project amongst the most significant new discoveries globally.

I look forward to working with the Marmota team in developing the MEU titanium mineral sands discovery, in an emerging titanium-rich province in South Australia. ”

4. Fundamentals

Marmota's fundamentals are **performing superbly**.

Gold continues to surge to near record all-time highs. In Marmota's June quarterly, just 15 months ago, it was noted that gold had reached over A\$3500 per ounce. Since then, it has broken through A\$4000 per ounce, through A\$5000 an ounce, and is now trading at around A\$6300 at the time of press.

Gold price per ounce in Australian dollars over the last 5 years

The upside for Marmota's Gawler gold project is obvious, particularly given that Aurora Tank is so advanced. The Company is further delighted with its acquisition of all the NW Gawler gold projects in 2020, the benefits of which are now being realised with Marmota's maiden programs at Greenwood and Campfire Bore both yielding bonanza gold grades. Uranium prices too increased steadily throughout the quarter.

5. AGM in Perth

The AGM will be held for the first time in Perth,
at 2pm (Perth time) on:

Tuesday 18 November 2025 at:
BDO Level 9, Mia Yellagonga Tower 2
5 Spring St, Perth WA 6000

For full detail, please see the **Notice of Meeting** [ASX:MEU 16 Oct 2025]

Shareholders are very warmly welcomed to attend the AGM which will include a presentation and update from Gawler Gold project manager, Paul Richardson.
