HIGHLIGHTS

Ngalia Regional Project (NT)

- Drilling programs completed at Walbiri South and Penrynth
- Excellent results including:
 - 1m at 3012ppm eU₃O₈ from WS25003
 - 3m at 199ppm eU₃O₈ from PR250006

Bigrlyi Project (NT)

- No significant activities during the quarter
- Minor increase in BJV ownership share due to missed contributions by other parties

FINANCIAL

Energy Metals had approximately \$8.91M in cash and 209.7M shares on issue at 30 September 2025.

Shubiao TAO
Managing Director
30 October 2025

INTRODUCTION

Energy Metals (EME) is a dedicated uranium company with eight exploration projects located in the Northern Territory (NT) and Western Australia covering around 2,440 km² (Figure 1). Most of the projects contain uranium and associated vanadium mineralisation discovered by major companies in the 1970s, including the advanced Bigrlyi Project (NT).

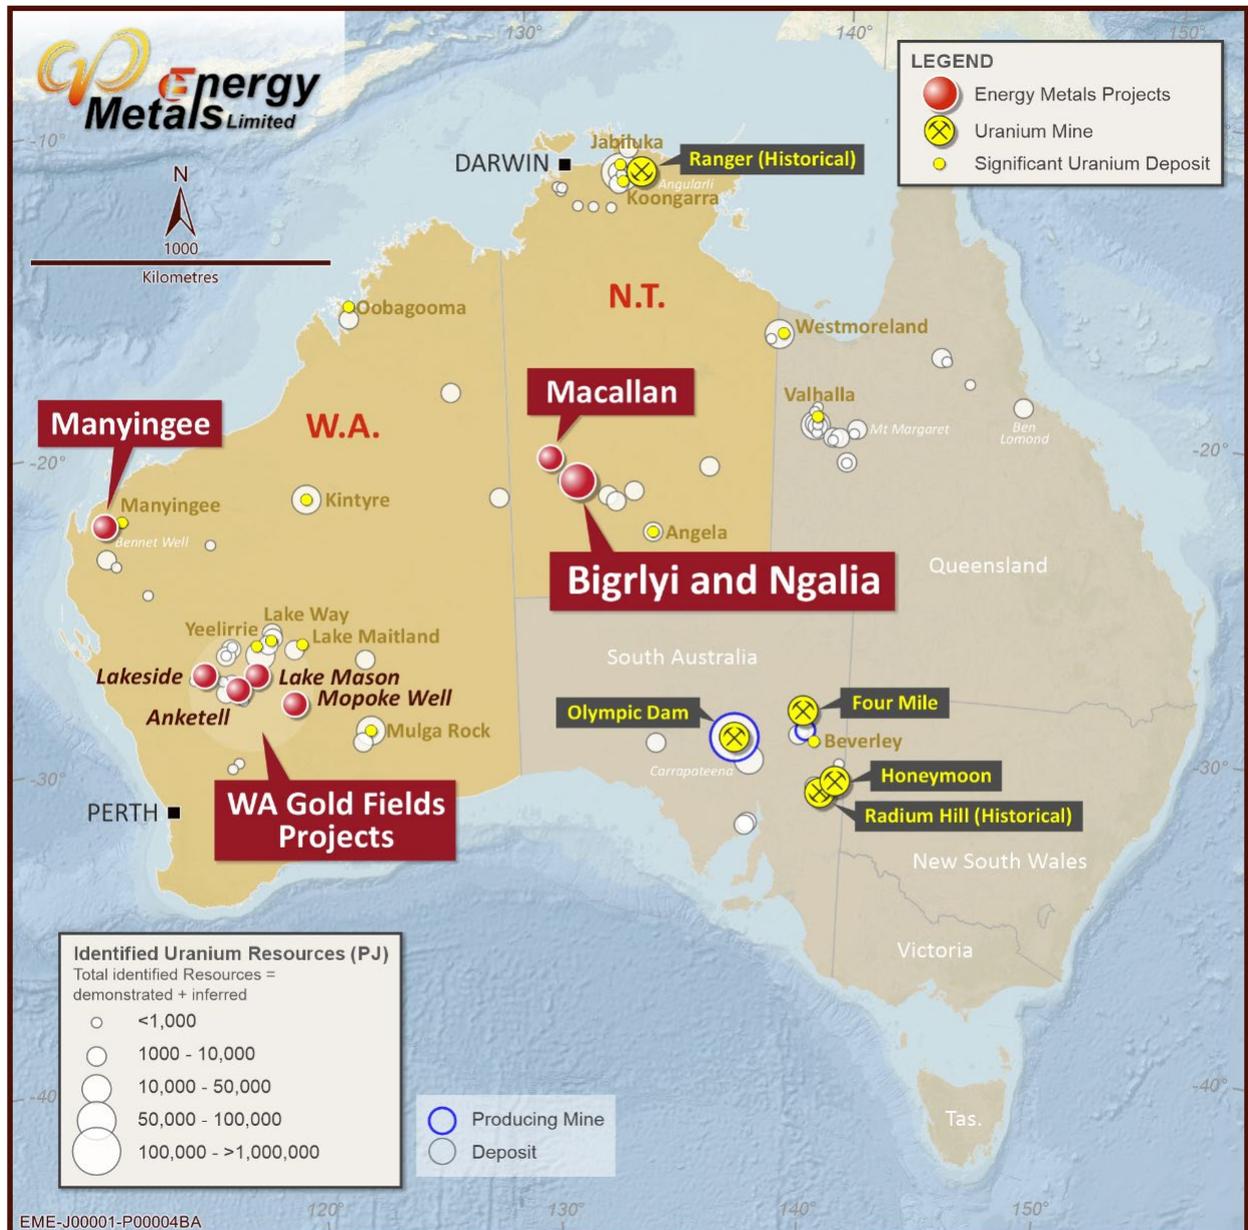

Figure 1 – Location of Energy Metals Projects

Energy Metals is well placed to take advantage of the favourable outlook for uranium as nuclear power continues to play an increasing role in reducing global carbon emissions.

Energy Metals' largest shareholder (with 66.45% of issued capital) is China Uranium Development Company Limited, a wholly owned subsidiary of major Chinese utility China General Nuclear Power Group (CGN). At 31 December 2024, the installed capacity of CGN's operating nuclear generating plants was 31,750MWe from 28 nuclear power units with sixteen other power units of 19,406MWe capacity under construction in various locations across China.

CGN is one of only two companies authorised by the Chinese Government to import and export uranium. This unique relationship with CGN gives Energy Metals direct exposure to the uranium market as well as access to significant capital and places the Company in a very strong position going forward.

Market Update. The uranium spot price began the quarter at US\$ 78.50/lb, dropping to a low of US\$ 71.10/lb in July before rallying to reach a high of US\$ 82.60/lb by the end of the quarter. The long-term price rose from US\$ 80/lb to US\$ 83/lb over the quarter. The rise in price during the quarter is attributed to a confluence of supply-constraints, rising demand for nuclear power, and increased investor interest. Most commentators forecast a rally for uranium prices in 2025 with an expected range of US\$ 90-100 considered likely by the end of the year. More than 20 countries have announced plans to increase their nuclear power capacity in the light of ambitious plans to decarbonise their economies. In the vanadium market prices stabilised during the quarter and the gap between Chinese and European pricing closed, with both currently sitting around US\$ 4.20/lb. Vanadium demand is weak at present due to oversupply in the Chinese market and subdued demand from the steel industry. Projected vanadium pricing through the end of 2025 is for a moderate increase to around US\$ 4.50/lb.

NORTHERN TERRITORY

Bigrlyi Joint Venture (EME 72.57%)

The Bigrlyi Joint Venture comprises two granted exploration licences in retention (ELRs), one granted EL, and several applications within the Ngalia Basin, located approximately 350km northwest of Alice Springs. Energy Metals operates the Joint Venture in partnership with Northern Territory Uranium Pty Ltd (20.87%), and Noble Investments Pty Ltd (6.56%).

The Bigrlyi Joint Venture (BJV) has been the subject of significant exploration activity since 1973, including over 1,040 drill-holes, metallurgical test-work and mining studies focussed on the flagship Bigrlyi deposit, which comprises a number of sub-deposits over a 11km strike length on ELR32552 (Figure 2). The Bigrlyi project is characterised by relatively high uranium grades, vanadium credits and excellent metallurgical recoveries. Further information is available in ASX announcements or from Energy Metals' website: www.energymetals.net.

The historical Karins uranium deposit is part of the Bigrlyi Joint Venture, with a JORC-compliant resource estimate released to the ASX in 2015. The historic Sundberg deposit, which is a satellite of the larger Walbiri deposit (Figure 3) also forms part of the Bigrlyi Joint Venture. A maiden JORC (2012) resource estimate was announced for Sundberg in 2015.

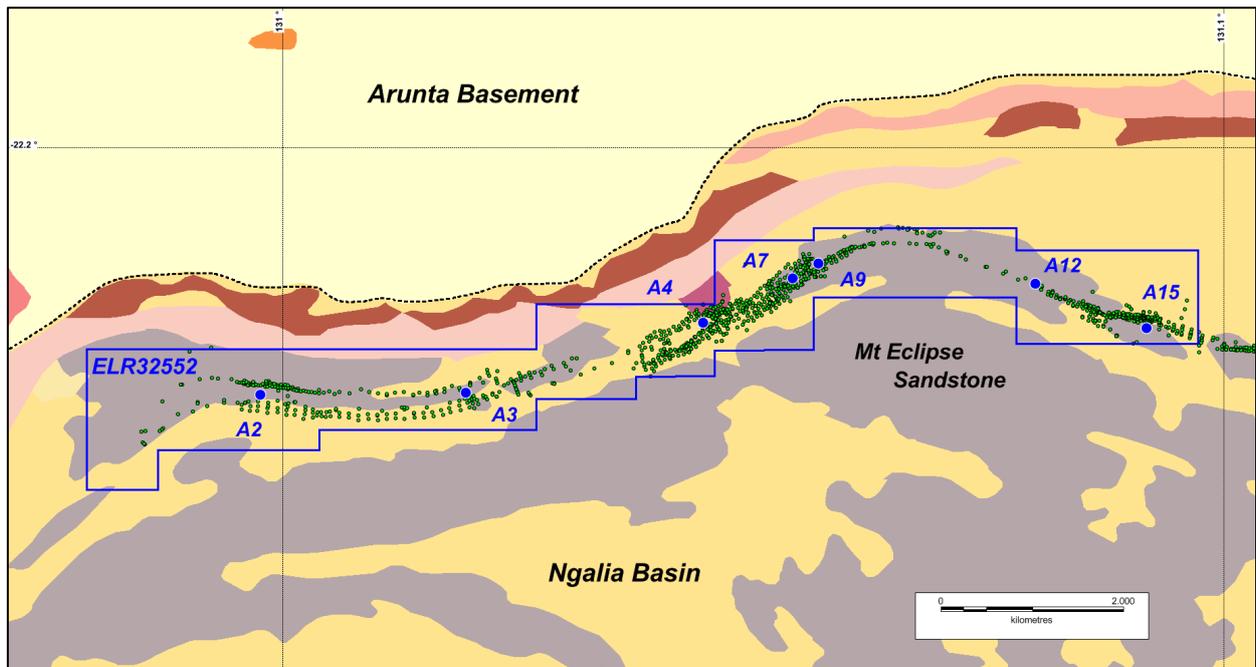

Figure 2 – Bigryli Joint Venture project area showing simplified geology (grey = Mt Eclipse Sandstone) with the outline of amalgamated ELR 32552 shown in blue; Anomaly-2 to Anomaly-15 (A2 to A15) sub-deposit locations (blue dots) and exploration drill-hole collars (green dots) are shown.

Walbiri Joint Venture (EME 77.12%)

ELR45 covers part of the historical Walbiri deposit and part of the Hill One satellite deposit (Figure 3). The project is a joint venture with NTU, with EME as the operator. Energy Metals holds a 77.12% beneficial interest in the JV. A JORC (2012) mineral resource estimate was announced for the Walbiri deposit in 2015 confirming Walbiri as the second largest sandstone-hosted deposit in the Ngalia Basin after Bigryli.

Malawiri Joint Venture (EME 76.03%)

ELR41 covers the historical Malawiri deposit. The project is a joint venture with NTU, with Energy Metals as the operator. Energy Metals holds a 76.03% beneficial interest in the JV and NTU holds a 23.97% interest. The Company advanced the Malawiri project to JORC-compliant resource status with release of a mineral resource estimate on 14 December 2017.

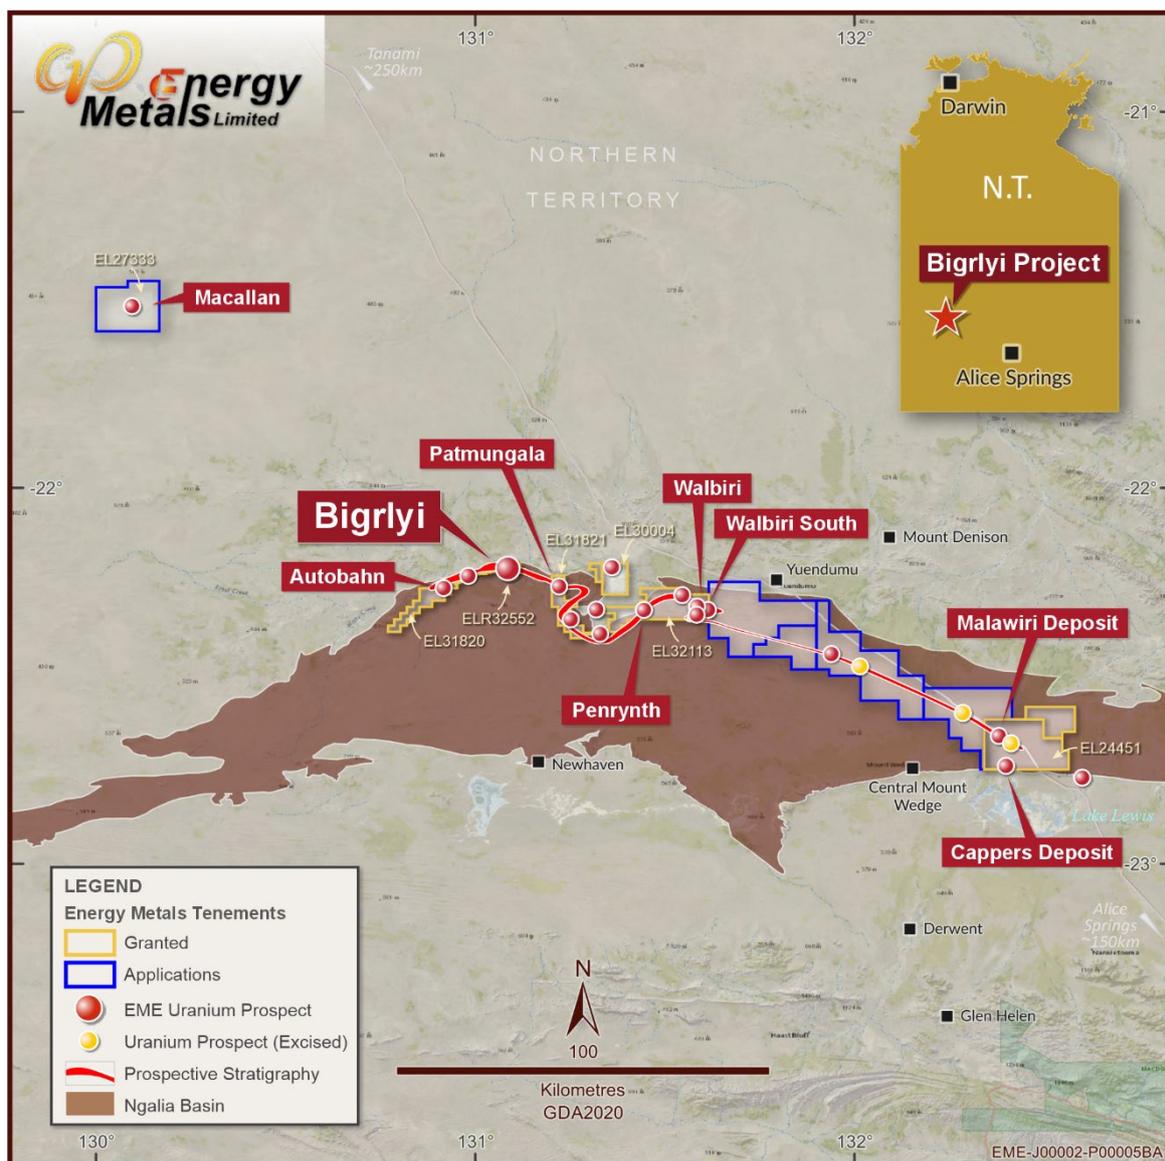

Figure 3 – Uranium deposits, occurrences and exploration target areas in the Ngalia Basin.

Bigrlyi & Related Deposits Activities (September 2025 Quarter)

The Bigrlyi Joint Venture (BJV) consists of three parties who share part ownership of the Bigrlyi deposit and related mining tenements. Each party contributes to project development costs in proportion to their relative ownership amounts. Non-payment of required contributions by one party during 2024 led to minor dilution of their ownership and subsequent increases to the other parties’ proportions. As a result, Energy Metals share of the BJV has increased by 0.18%. These changes are summarised in Table 3 below:

Ownership Party	Opening Share (2024)	Adjusted Share (Current)
Energy Metals Ltd	72.39%	72.57%
Northern Territory Uranium Pty Ltd	20.82%	20.87%
Noble Investments Pty Ltd	6.79%	6.56%

No significant work was carried out by the Bigrlyi JV during the quarter.

No work was carried out on the Walbiri or Malawiri JV tenure during the quarter.

Ngalia Regional Project (EME 100%)

The Ngalia Regional Project comprises thirteen 100% owned exploration licences, applications and exploration licences in retention located in the Ngalia Basin, between 180km and 350km northwest of Alice Springs (Figure 3). The tenements are contiguous and enclose the Bigrlyi project as well as containing a number of uranium occurrences, including part of the historic Walbiri deposit and the Cappers calcrete-hosted deposit. In addition, the rare earth element (REE) potential of the Crystal Creek prospect on EL30004, which comprises clay-rich regolith materials developed on granite, are under investigation.

Ngalia Regional Project Activities (September 2025 Quarter)

During the quarter, the Company carried out Reverse Circulation (RC) drilling programs at two prospects; Walbiri South and Penrynth. An ASX announcement titled “Exploration Update” detailing the work was released to the market on 22/10/2025 and a summary is given herein. All uranium concentrations are in calculated equivalent U_3O_8 (eU_3O_8) derived from calibrated downhole gamma logging. All significant eU_3O_8 intersections are verified by later chemical assays carried out at an accredited laboratory. This process is ongoing and the chemical assay results will be announced in due course.

A total of fourteen RC drillholes were completed during the quarter for 2865m. Of these, eight were at Walbiri South (1401m) and six were at Penrynth (1464m). Promising initial results were received from both programs, including a highlight from Walbiri South of 1m at 3012ppm eU_3O_8 from 153m downhole in WS25003. Drill collar details are given in Table 1 below and significant intersections are summarised in Table 2.

Table 1: Drilling Collar Details from Ngalia Regional Drilling during the quarter

HOLE ID	HOLE TYPE	EASTING	NORTHING	RL	DIP	AZIMUTH	DEPTH (m)
WS25001	RC EXP	764400	7527539	658	-60	180	180
WS25002	RC EXP	764751	7527539	658	-60	180	176

PR25005	RC EXP	743887	7525407	662	-55	159	180
PR25006	RC EXP	743637	7525652	667	-50	165	204

All coordinates in GDA94, MGA Zone 52.

Drilling at Walbiri South followed on from an initial six-hole program in November 2024 which confirmed the presence of prospective rock units. Eight holes were drilled in September 2025 to confirm the strike extent of the target unit which is now known to be at least 4km and open to both east and west. All drillholes intersected elevated uranium, with two holes returning greater than 100ppm eU_3O_8 .

The Company then carried out a maiden drilling program at the Penryn target to test below an outcropping ridge of Mt Eclipse Sandstone associated with a prominent radiometric anomaly. Two drillholes here also exceeded 100ppm eU₃O₈ which is considered an excellent result given the early stage of exploration.

The most significant result from the program is the high-grade intersection from WS25003. The result is very encouraging and confirms our assumption that Walbiri South has potential to host an economic uranium deposit similar to the Walbiri deposit 2.5km to the north. To put the result from WS25003 in context, the grade of 3012ppm eU₃O₈ compares favourably with the average grades of the nearby Walbiri (641ppm) and Bigrlyi (1370ppm) mineral resources.

The mineralised interval has been studied in hand specimen and contains easily identifiable carnotite. Also present is a vibrant green mineral likely but not yet confirmed to be a vanadium-enriched chlorite. This Va-chlorite is found in association with uranium mineralisation at Bigrlyi and is also noted from sandstone-hosted U deposits in Australia, Kazakhstan, and the USA. Detailed petrological work will be carried out on selected samples from WS25003.

Figure 4 – Cross-sectional view of WS25003 showing downhole lithology, redox state, and eU₃O₈ (ppm)

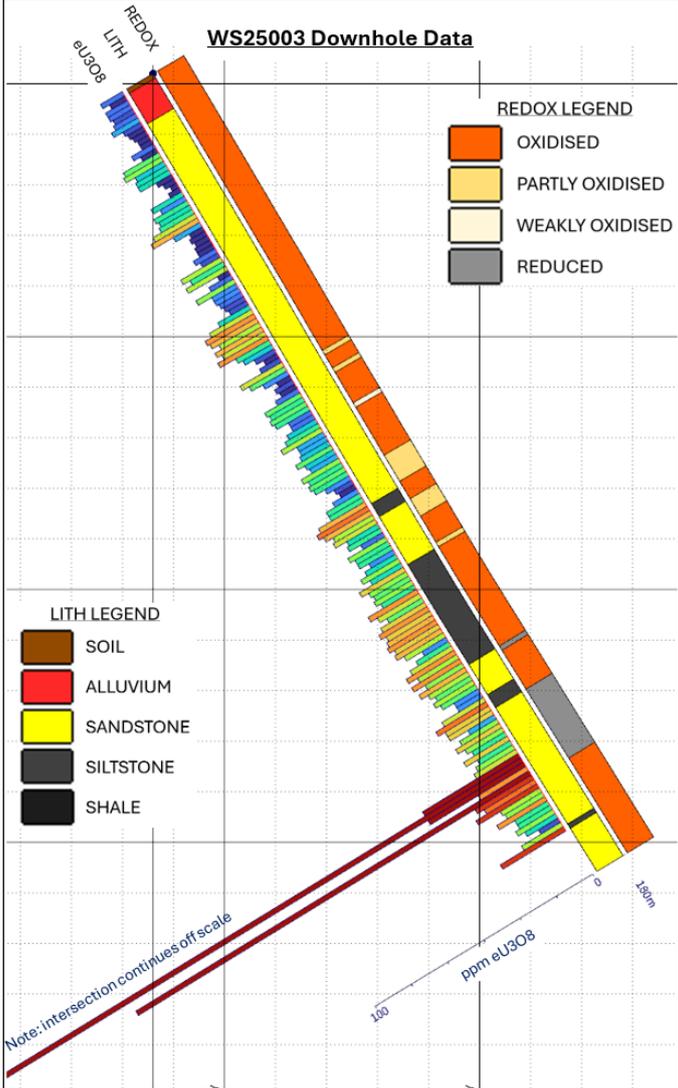

Table 2: Significant Intersections greater than 100ppm eU₃O₈ from Walbiri South and Penrynth Drilling

HOLE ID	PROSPECT	DEPTH (m)	THICKNESS (m)	GRADE (ppm eU ₃ O ₈)
WS25003	Walbiri South	153	1.0	3012
WS25003	Walbiri South	156	1.0	181
WS25007	Walbiri South	168	1.0	167
PR25001	Penrynth	210	1.0	173
PR25006	Penrynth	137	3.0	199
PR25006	Penrynth	149	1.0	105

NOTE: Thickness given is downhole thickness. True width is likely to be 70-100% of downhole thickness however further work is required before this can be calculated accurately.

Chemical assay samples from Walbiri South and Penrynth have been transported to the laboratory for analysis and results are expected in approximately six weeks. These results will be validated against the gamma-derived eU₃O₈ values before the interpretations are finalised. Following this, the Company will begin developing plans for further work at both targets. With the impending onset of the wet season in the NT, on-ground follow up work is likely to take place in Q2 of 2026.

Macallan (EME 100%)

The Macallan project comprises a single exploration licence application (ELA27333), located 460 km NW of Alice Springs and 140 km from Bigirlyi. The tenement covers a strong 3km-wide bullseye radiometric anomaly. The Macallan anomaly lies within the Wildcat Palaeovalley, an ancient valley system that drains into Lake Mackay to the southwest. The Macallan anomaly most likely represents a surficial accumulation of uranium minerals associated with the Wildcat palaeodrainage system, although other explanations are possible.

ELA27333 lies on land under Aboriginal Freehold title and access is subject to negotiation with the Traditional Owners and the CLC. The negotiation period has been extended until October 2026 and the Company is working with the CLC to progress an exploration agreement and eventually proceed to grant of this tenement.

WESTERN AUSTRALIA

Manyingee (EME 100%)

The Manyingee project comprises retention licence application R08/3, underlying tenement E08/1480 and two exploration licence applications, which are located 85 km south of Onslow. The project is located adjacent to mining leases containing Paladin Energy's Manyingee resource, a stacked series of buried, palaeochannel-hosted, roll-front uranium deposits. In November 2016 Energy Metals announced an initial JORC (2012) Mineral Resource Estimate for the Manyingee East uranium deposit, which is located up-channel of Paladin's Manyingee deposit.

Law firm Gilbert+Tobin was appointed in 2019 to assist Energy Metals with landholder objections to grant of the Manyingee title applications. The objections are still progressing through the Wardens Court procedure, with hearings scheduled to take place in December 2025.

Other Deposits - Mopoke Well, Lakeside, Anketell, Lake Mason (all EME 100%)

These four projects are surficial uranium deposits associated with calcrete or calcretised sediments related to ancient drainage and/or lacustrine systems. All projects are located on granted retention licences and mineral resource estimates under the JORC 2004 or 2012 codes have previously been announced for each deposit. All deposits are affected by the WA Government's current ban on uranium mining, and under present uranium market conditions the deposits are not economic. Energy Metals will continue to monitor the market and political situation with a view to re-starting exploration and development activities should positive conditions return.

CORPORATE

Energy Metals remains in a strong financial position with approximately \$8.91 million in cash and bank deposits at the end of the quarter, forming a solid resource for ongoing exploration and project development. In accordance with ASX Listing Rule 5.3.1, expenditure incurred during the Quarter on the above-mentioned exploration activities totalled \$256,000.

As disclosed under item 6.1 in the Appendix 5B, Energy metals paid \$23,000 in total during the quarter to related parties and their associates. The payments represented amounts paid to the directors, including salaries, non-executive directors' fee, and consulting fees.

Competent Persons Statement

The information in this report that relates to Mineral Exploration is based on information compiled by Mr David Nelson, a Competent Person who is a Member of The Australian Institute of Geoscientists (Member #4172). Mr Nelson is a full-time employee of Energy Metals Ltd where he holds the position of Exploration Manager. Mr Nelson has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration, and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves – The JORC Code (2012)'. Mr Nelson consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

The information discussed in this report relating to mineralisation modelling, exploration targets and metallurgical test-work results is based on information compiled by Dr Wayne Taylor. Dr Taylor is a member of the Australian Institute of Geoscientists (MAIG). He has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which they are undertaking to qualify as Competent Persons as defined in the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves – The JORC Code (2012)". Dr Taylor consents to the inclusion of the information in the report in the form and context in which it appears.

This report references mineral resource estimates and/or related information that were prepared and first disclosed under the JORC Code 2004. These have not been updated to JORC Code 2012 standards on the basis that the information has not materially changed since it was last reported.

6.2	Aggregate amount of payments to related parties and their associates included in item 2	-
<i>Note: if any amounts are shown in items 6.1 or 6.2, your quarterly activity report must include a description of, and an explanation for, such payments.</i>		

Mining exploration entity or oil and gas exploration entity quarterly cash flow report

7. Financing facilities	Total facility amount at quarter end \$A'000	Amount drawn at quarter end \$A'000
<i>Note: the term "facility" includes all forms of financing arrangements available to the entity.</i>		
<i>Add notes as necessary for an understanding of the sources of finance available to the entity.</i>		
7.1	Loan facilities	
7.2	Credit standby arrangements	
7.3	Other (please specify)	
7.4	Total financing facilities	
7.5	Unused financing facilities available at quarter end	
7.6	Include in the box below a description of each facility above, including the lender, interest rate, maturity date and whether it is secured or unsecured. If any additional financing facilities have been entered into or are proposed to be entered into after quarter end, include a note providing details of those facilities as well.	

8. Estimated cash available for future operating activities	\$A'000	
8.1	Net cash from / (used in) operating activities (item 1.9) (excluding GST refund)	(91)
8.2	(Payments for exploration & evaluation classified as investing activities) (item 2.1(d))	(196)
8.3	Total relevant outgoings (item 8.1 + item 8.2)	(287)
8.4	Cash and cash equivalents at quarter end (item 4.6)	8,907
8.5	Unused finance facilities available at quarter end (item 7.5)	-
8.6	Total available funding (item 8.4 + item 8.5)	8,907
8.7	Estimated quarters of funding available (item 8.6 divided by item 8.3)	31
<i>Note: if the entity has reported positive relevant outgoings (ie a net cash inflow) in item 8.3, answer item 8.7 as "N/A". Otherwise, a figure for the estimated quarters of funding available must be included in item 8.7.</i>		
8.8	If item 8.7 is less than 2 quarters, please provide answers to the following questions:	
8.8.1	Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?	
Answer: Not applicable.		
8.8.2	Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?	
Answer: Not applicable.		

Mining exploration entity or oil and gas exploration entity quarterly cash flow report

8.8.3 Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?

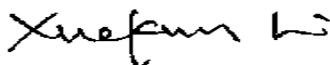

Answer: Not applicable.

Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.

Compliance statement

- 1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.
- 2 This statement gives a true and fair view of the matters disclosed.

Date: 30 October 2025

Xuekun Li, Company Secretary

Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
