The amount included in line 6.1 of appendix 4C is the payment of fees to Directors.

Commentary:

Executive Chairman of Uscom, Professor Rob Phillips said *“Q1 remained difficult in all regions except SE Asia which continues to achieve to forecasts. The shifting US Tariff wars have created global uncertainty in all markets, while Europe continues to re-allocate funding from healthcare to defense as the Russian war directs public spending priorities. China, Uscom’s major market, remains focused on broader long term economic stabilization with the most recent 5-year plenum confirming a focus on health and technology, despite the impact of changing and unpredictable US tariffs. Effective investment and business strategies require consistency and predictability to support rational commercial responses to global geopolitics gyrations to provide a platform from which we can enact next steps to promote Uscom’s long term success. In the mean-time Uscom management continue to comply with changing global regulatory demands and increasingly complex regional administrative compliance. However longer term we have confidence that personal healthcare, a business with a market in the order of 100B USD, will remain a significant and critical social focus. We remain convinced that Uscom’s sector leading innovative cardiovascular and pulmonary technologies which address conditions responsible for more than 75% of all human mortality will have enduring healthcare value by improving quality and duration of life. We look forward to the normalization of global commercial environments and the restoration of Uscom’s long term growth.”*

Uscom manufactures and markets the world leading **USCOM 1A**, the Uscom **BP+**, and the Uscom **SpiroSonic** digital multi-channel ultrasonic spirometry technologies into global markets addressing cardiovascular and pulmonary diseases.

About Uscom

Uscom Limited (UCM): An ASX listed innovative medical technology company specialising in development and marketing of premium non-invasive cardiovascular and pulmonary medical devices. Uscom has a mission to demonstrate leadership in science and create noninvasive devices that assist clinicians improve clinical outcomes. Uscom has three practice leading suites of devices in the field of cardiac, vascular and pulmonary monitoring; the USCOM 1A advanced haemodynamic monitor, Uscom BP+ central blood pressure monitor, and the Uscom SpiroSonic digital ultrasonic spirometers. Uscom devices are premium resolution, noninvasive devices which deploy innovative and practice leading technologies approved or submitted for FDA, CE, CFDA and TGA regulatory approval and marketing into global distribution networks.

The USCOM 1A: A simple to use, cost-effective and non-invasive advanced haemodynamic monitor that measures cardiovascular function, detects irregularities and is used to guide treatment. The USCOM 1A device has major applications in Paediatrics, Emergency, Intensive Care Medicine and Anaesthesia, and is the device of choice for management of adult and paediatric sepsis, hypertension, heart failure and for the guidance of fluid, inotropes and vasoactive cardiovascular therapy.

The Uscom BP+: A supra-systolic oscillometric central blood pressure monitor which measures blood pressure and blood pressure waveforms at the heart, as well as in the arm, information only previously available using invasive cardiac catheterisation. The Uscom BP+ replaces conventional and more widespread sub-systolic blood pressure monitors, and is the emerging standard of care measurement in hypertension, heart failure and vascular health. The Uscom BP+ provides a highly accurate and repeatable measurement of central and brachial blood pressure and pulse pressure waveforms using a familiar upper arm cuff. The BP+ is simple to use and requires no complex training with applications in hypertension and pre-eclampsia, heart failure, intensive care, general practice and home care. The Uscom BP+ is supported by the proprietary **BP+ Reporter**, an innovative stand alone software solution that provides a digital platform to archive patient examinations and images, trend measure progress over time, analyse pulse pressure waves and generate summary reports.

Uscom SpiroSonic digital multi-path ultrasonic spirometers: High fidelity, digital, pulmonary function testing devices based on multi path ultrasound technology. They require no calibration, are simple to disinfect, and are simple and accurate to use providing research quality pulmonary function testing in small hand held devices that can be used in research, clinical and home care environments. The devices can be coupled with mobile phone apps and proprietary SpiroSonic software, **SpiroReporter**, with wireless interfacing to provide remote tele-monitoring of pulmonary disease. The devices are specialised for assessment of COPD, sleep disordered breathing, asthma, occupational lung disease and monitoring of pulmonary therapeutic compliance.
