MALI OVERVIEW

The partial lifting of the suspension of mining permits by the Government of the Republic of Mali occurred in March 2025¹. Processing of renewals is underway and the Government is working through the backlog caused by the suspensions that have been in place since September 2022. Indications suggest Mali is set to secure the position of Africa's second-biggest lithium producer in 2025, with output anticipated to represent 14% of the regional total according to Benchmark's lithium forecast².

The Company engaged CPS Capital Group Pty Ltd (CPS Capital) to act as lead manager to facilitate the Loan. Under CPS Capital's mandate, CPS Capital will receive fees of 6% of funds raised under the Loan. CPS Capital will also receive 1,000,000 unlisted options (exercisable at \$0.30 and expiring 30 June 2028) (Lead Manager Options) and 3,000,000 unlisted Options, subject to conversion of tranche 1 of the Loan amount, (Subscriber Options) at an issue price of \$0.00001 per Option (Broker Options)³.

Any Loan Shares and Loan Options issued on conversion of the Loan will be issued subject to the Company obtaining any required Shareholder approvals under the Corporations Act and ASX Listing Rules (including ASX Listing Rules 7.1 or 10.11, where applicable). The Company will seek Shareholder approval under ASX Listing Rules 7.1 for the issue of the Broker Options.

Cautionary Statement – Visual Estimates

This announcement contains references to visual results and visual estimates of mineralisation. FL1 advises there is uncertainty in reporting visual results. Visual estimates of mineral findings should not be considered a substitute for laboratory analysis where concentrations or grades are provided with scientific accuracy. Visual estimates also potentially provide no information regarding impurities or other factors relevant to mineral result valuations. The presence of pegmatite rock does not necessarily indicate the presence of Lithium mineralisation. Laboratory chemical assays are required to determine the grade of mineralisation.
