The Company's **Laverton Down Project (LDP)** is located 15kms north of Laverton, in Western Australia's Eastern Goldfields, and straddles the highly mineralised Lancefield and Rosemont-Barnicoat trends. The Lancefield structure hosts multiple gold deposits, including Lancefield, Mt Morgan (Genesis Resources), Sunrise Dam (AngloGold Ashanti), Wallaby/Granny Smith (Goldfields), Moolart Well, Rosemount and Garden Well (Regis Resources) and Cork Tree Well (Brightstar Resources). Drilling completed in April 2025 at LDP returned gold mineralisation associated with the sheared mafic basalts and at the sheared ultramafic hanging wall transition zones along the trend, across a strike of approximately 1 kilometre, and remains untested at depth.

The Company's **West Arunta Nexus Project (Nexus)** is located approximately 1,000kms east-southeast of Port Hedland in Western Australia. Comprising of three exploration licences across an area of 636km² Nexus is an early-stage exploration opportunity surrounded by globally significant and emerging rare earth and critical mineral element deposits. The West Arunta is WA's most exciting exploration frontier with strong potential to hold sedimentary, IOCG, SEDEX & carbonatite hosted mineral deposits.
