

Livium Receives A\$663k in R&D Tax Incentive Rebates for VSPC

Livium Ltd (ASX: LIT) ("Livium" or the "Company") advises that it has received A\$663,000 in research and development ("**R&D**") tax incentive rebates from the Australian Tax Office for the 2025 financial year ("**FY25**"), relating to its wholly owned subsidiary VSPC Pty Limited ("**VSPC**"). The rebate was received on 5 December 2025.

This rebate reflects Livium's ongoing investment in advanced cathode powder technologies through VSPC, supporting the Company's strategy to deliver innovative solutions for the battery materials sector.

Livium has now received R&D rebates totalling A\$1.4m from the Australian Tax Office for the 2025 financial year. LieNA Pty Ltd ("**LieNA**"), Livium's 50:50 Joint Venture with Mineral Resources Limited (**ASX: MIN**), is also expected to receive an FY25 R&D rebate, which is expected to result in a shareholder distribution from LieNA.

Livium CEO and Managing Director, Simon Linge commented *"We are pleased to receive the R&D rebate for VSPC, which supports our commitment to advancing next-generation battery materials. This rebate, together with the previously received A\$653k in R&D rebate for Envirostream and our recent A\$4.5 million placement, strengthens Livium's position to accelerate technology development and expand into our current battery recycling activities and near adjacencies, such as solar panel and rare earth element resource recovery markets."*

About Livium

Livium Ltd (ASX: LIT) is Australia's leading battery recycler through its wholly owned subsidiary Envirostream — a profitable business focused on the recovery of valuable materials from end-of-life batteries.

Building on this foundation, Livium is expanding into adjacent opportunities including recycling of rare earth elements and solar panels, and the processing of black mass — strengthening Australia's clean-energy supply chain.

The Company also holds a portfolio of complementary technologies, including LieNA®, a patented lithium extraction process in joint venture with Mineral Resources Ltd (ASX: MIN), and VSPC, a developer of next-generation lithium ferro phosphate (LFP) cathode materials — the leading global battery chemistry.

Forward-looking statements

This announcement contains forward-looking statements. Forward-looking statements are subject to a variety of risks and uncertainties that it is beyond the Company's ability to control or predict and which could cause actual events or results to differ materially from those anticipated in such forward-looking statements. Investors should be aware that past performance should not be relied upon as being indicative of future performance.
