

Secures \$2.1m of project work

DXN Limited ("DXN" or "the Company"), a prefabricated modular data centre specialist, is pleased to announce it has been awarded a \$1.4 million contract by a global communications and IT services provider and has secured \$0.7 million in a variation order on a Structcore project.

Key Highlights

- **\$1.4 million contract signed with a global communications and IT provider for an Edge Data Centre**
- **DXN selected for its expertise in delivering complex prefabricated projects**
- **DXN's solution will support an end customer in the Pacific**
- **Delivery expected by end of June 2026, further supporting DXN's FY26 revenue growth targets**
- **Secured an additional \$0.7 million through expansion and variation orders to an existing Structcore project**

DXN was awarded a \$1.4 million contract by a leading provider of communications and IT services. Under the contract DXN will design, build and install a multi-module to support an end customer with an Edge Data Centre.

The multi-module solution comprises prefabricated modules housing critical equipment, which will be integrated on-site in the Pacific. The scope includes design, build, installation, and commissioning. The project is targeting completion by the end of June 2026, contributing to DXN's FY26 revenue pipeline and underscoring DXN's expertise in delivering complex, prefabricated solutions for global connectivity projects.

The customer connects remote operations for industries globally; this initiative will boost internet connectivity across the Pacific and assist with a global ground network by mid-2026.

Additionally, DXN will receive approximately \$0.7 million via variation and expansion orders for an existing Structcore project.

Shalini Lagrutta, Managing Director of DXN, said: "We are thrilled to be awarded this landmark project, which not only expands our footprint in the Asia-Pacific but also leverages our modular construction capabilities to support cutting-edge infrastructure. This award reinforces DXN's position as a trusted partner of innovative, prefabricated solutions for mission-critical applications. Importantly, both projects further supports our backlog and ability to grow revenue in FY26."

Ends-

This announcement was authorised for release by the Board of Directors.

About DXN Limited

DXN Limited is a vertically integrated manufacturer and operator of modular data centres across Asia Pacific. The Company designs, engineers, manufactures, and operates high-quality, prefabricated facilities for government and blue-chip enterprise customers.

DXN operates through three core divisions:

1. **Modular Division** – Delivers prefabricated, scalable EDGE data centres and critical infrastructure, tailored to diverse industries including telecom, mining, defence, and subsea cable operators.
2. **Data Centre Operations** – Owns and manages data centres in Darwin and Hobart, providing colocation, monitoring, and managed hosting services.
3. **Data Centre as a Service (DCaaS)** – A capital-light “facility as a service” model, offering bespoke data centre and satellite ground station solutions with end-to-end management, maintenance, and 24/7 monitoring.
