Assetora Limited

Correction to Placements Announcements

Assetora Limited (ASX: AOH) advises that the Placement Announcement lodged on 30 October for Cardio Link Pty Ltd for the issue of 14,285,714 shares and the Placement Announcement lodged on 5 December for Creative Capital Management Pty Ltd for the issue of 3,571,429 shares with 2:1 free attaching options should both be correct to reflect that placements are both subject to shareholder approval at an EGM which will likely be held at the end of January 2026. The Cardio Link placement announcement initially stated that shares would be issued in 7 days. It is now expected that shares will be issued in January 2026.

The company will exceed placement capacity if shares are issued under 7.1 and 7.1A capacity for the above placements. Consequently, the company is holding an EGM in late January to obtain shareholder approval to issue the shares under these placements. To ensure this does not occur again the company will implement a new process to closely monitor placement capacity under 7.1 and 7.1A for each placement.
