Titomic Secures Early Manufacturing Development Contract with Leading Defense Prime

HUNTSVILLE, AL – Titomic Limited (ASX: TTT), a global leader in cold spray additive manufacturing utilizing their Titomic Kinetic Fusion™ technology, is pleased to announce it has secured an Early Manufacturing Development (EMD) contract with a leading defense prime contractor to support a new effort for production of next-generation defense articles. The collaboration will establish and validate an innovative manufacturing approach intended to accelerate production, improve supply-chain resilience, and deliver critical components to the warfighter faster. The initial EMD contract is valued at USD 1,700,000 (AUD 2,550,000) and is expected to be fulfilled by mid-2026 with manufacturing to be undertaken in Titomic's Huntsville facility.

Under the EMD contract, Titomic will work closely with the defense partner to develop manufacturing pathways that address long-standing production delays and capacity constraints across the defense industrial base. The effort leverages Titomic's proprietary cold-spray additive manufacturing systems, known for their ability to rapidly build high-strength, near-net-shape metal parts with minimal waste. By compressing development timelines and enabling scalable production, Titomic's technology is positioned to help defense programs transition quickly from concept to readiness then to serial production.

This new engagement reinforces Titomic's growing role as a strategic supplier supporting defense modernization initiatives. Around the world, defense organizations and armed forces are seeking new approaches to overcome slow manufacturing cycles, fragile supply chains, and increasing demand for complex metal components. Titomic's capabilities offer higher throughput, enhanced material performance, and the flexibility to produce parts that are difficult, time-consuming and/or costly to manufacture through traditional methods.

"Securing this Early Manufacturing Development contract marks another important milestone for Titomic as we continue to expand our impact throughout the defense sector," said Dr. Patti Dare, President of Titomic, USA. "Our advanced manufacturing technology is designed to break through production bottlenecks and ensure critical assets and solutions reach the warfighter in a mission-relevant timeframe. We are proud to support this initiative and look forward to strengthening our partnership with this leading defense prime."

This announcement has been authorized for release by Titomic's Board of Directors.

ABOUT TITOMIC LIMITED

Titomic Limited (ASX: TTT) is a leading American manufacturing company specializing in large integrated solutions for industrial- scale metal additive manufacturing, coating, and repairs using its patented kinetic fusion cold spray (Titomic Kinetic Fusion™) technology. Titomic Kinetic Fusion™ cold spray solutions provide OEM production and R&D services to the global Aerospace, Defense, Shipbuilding, Oil & Gas, Mining and Automotive industries. Titomic also offers global sales and support for all its Titomic Kinetic Fusion™ cold spray AM activities from its Huntsville, Alabama Head Office, as well as through local presence in the Australia and Europe. Titomic delivers competitive advantages in metal additive manufacturing at every stage in the product value chain. For more information, please visit www.titomic.com.

FORWARD LOOKING STATEMENTS

Certain statements made in this release are forward-looking statements and are based on Titomic's current expectations, estimates and projections. Words such as "anticipates", "expects", "intends", "plans", "believes", "seeks", "estimates", "guidance" and similar expressions are intended to identify forward-looking statements. Although Titomic believes the forward-looking statements are based on reasonable assumptions, they are subject to certain risks and uncertainties, some of which are beyond Titomic's control, including those risks or uncertainties inherent in the process of both developing and commercializing technology. As a result, actual results could materially differ from those expressed or forecasted in the forward-looking statements. The forward-looking statements made in this release relate only to events as of the date on which the statements are made. Titomic will not undertake any obligation to release publicly any revisions or updates to these forward-looking statements to reflect events, circumstances or unanticipated events occurring after the date of this release except as required by law or by any appropriate regulatory authority.
