15 December 2025

Amendment to prior Appendix 3Bs for option listing

Chariot Resources Ltd (“Chariot” or the “Company”) refers to the lodgement of the Prospectus on 12 December 2025 and advises it would like to apply for listing of the \$0.10 Options included in the Appendix 3Bs lodged on 10 July 2025 (and amended on 27 August 2025), 15 July 2025, 22 August 2025 and 20 October 2025.

This announcement has been authorised for release by the Board of Directors of Chariot Resources Ltd.

Shanthar Pathmanathan
Executive Chairman & Managing Director
Chariot Resources Ltd

About Chariot

Chariot Resources Limited is a mineral exploration company focused on discovering and developing high-grade and near surface lithium opportunities focused principally in the United States and Nigeria. In addition to the recently announced acquisition of a Nigerian lithium portfolio which has yet to close, Chariot has twelve (12) lithium projects, including two core projects in the United States (the “**Core Projects**”) and a number of exploration pipeline projects which Chariot majority owns and operates.

The Core Projects include Chariot’s Black Mountain Project (which is prospective for hard rock lithium) in Wyoming, USA and the Resurgent Project (which is prospective for claystone lithium) in Nevada and Oregon, USA. Initial survey results from the Core Projects indicate high-grade lithium mineralisation at surface.

The Nigerian portfolio of hard-rock lithium assets consists of four project clusters (Fonlo, Gbugbu, Iganna, and Saki) in the Oyo and Kwara states which cover approximately 254 square kilometers and are comprised of 8 exploration licences and 2 small-scale mining leases. These assets represent one of the largest portfolios of lithium assets in the country and have a history of significant artisanal

lithium mining. Chariot anticipates completing the acquisition of the Nigerian portfolio in the first quarter (or early in the second quarter) of the 2026 calendar year.

Chariot also holds an interest in six exploration pipeline projects located in Wyoming, USA, including the Copper Mountain Project, the South Pass Project and four other hard rock lithium projects.

Chariot also holds an interest in applications for seven (7) exploration licences in the highly prospective Southern Cross Greenstone Belt, Western Australia. The Southern Cross Greenstone Belt, one of Western Australia's most significant gold-producing regions with over 150 mines, is now emerging as a key region for LCT pegmatites.

In addition, Chariot holds a portfolio interest in certain properties prospective for claystone hosted lithium located in the State of Nevada in the United States through its interest in Mustang Lithium LLC.
