

## REZ COMPLETES \$2.0M PLACEMENT TO ADVANCE EAST MENZIES GOLD PROJECT

### HIGHLIGHTS

- Firm commitments received to raise \$2.0 million (before costs)
- Shares issued at \$0.014 with 1-for-2 free attaching \$0.04 options, expiring June 2027
- Funding supports drilling, resource expansion and near-term production growth at East Menzies
- Follows major 2025 milestones, including three gold pours<sup>i</sup>, approval for 40,000 tonnes of onsite processing<sup>(iii)</sup> and the Gigante Grande Maiden Mineral Resource<sup>(iv)</sup>
- Drilling rig secured, with drilling planned to commence on site late January 2026

**Resources & Energy Group Limited** (ASX: REZ) (**REZ** or the **Company**) is pleased to advise that it has raised \$2,000,000 (before costs) (**Placement**) through the issue of 142,857,140 fully paid ordinary shares at \$0.014 per share (**Placement Shares**). For every two Placement Shares subscribed, investors will receive 1 option with an expiry date of 25 June 2027 and an exercise price of \$0.04 (**Placement Options**). The issue of the 71,428,570 Placement Options will be subject to shareholder approval to be sought at a general meeting.

The Placement was well supported by both new and existing sophisticated and professional investors. The Placement Shares will be issued under the Company's available placement capacity pursuant to ASX Listing Rules 7.1 and 7.1A. 77,080,592 Placement Shares will be issued under Listing Rule 7.1A, and 65,776,548 Placement Shares will be issued under Listing Rule 7.1. The Placement Shares issue price of \$0.014 is 85% of the 15-day volume weighted average price of \$0.016 per share prior to the trading halt announced on 11 December 2025.

This capital raise strengthens the Company's operational momentum following a pivotal year at the East Menzies Gold Project, where REZ completed three gold doré pours and advanced key approvals and resource growth initiatives. As outlined in the AGM presentation ([28 November 2025<sup>ii</sup>](#)), East Menzies is emerging as a consolidated gold district with multiple near-term production opportunities and large-scale exploration upside.

Whairo Capital Pty Ltd (**Whairo**) acted as the Sole Lead Manager to the Placement. Whairo will be paid a fee of 6% of the amount raised, along with the issuance of 20,000,000 options expiring on 25 June 2027, with an exercise price of \$0.04. The issue of options to Whairo will be subject to shareholder approval to be sought at a general meeting (**Whairo Options**).

Concurrently with the Placement, the Directors of REZ will also be issued 10,714,285 shares in lieu of fees owing on the same terms as the Placement (issue price of \$0.014 per share and attaching 1:2 options, with an expiry date of 25 June 2027 and exercise price of \$0.04). The issue to directors will be subject to shareholder approval to be sought at a general meeting (**Director Issue**).

### **REZ GROUP MANAGING DIRECTOR J. DANIEL MOORE SAID:**

*“We appreciate the strong support for this Placement. The capital allows us to build on a pivotal year in which REZ secured approval for full-scale commercial vat-leach production and established the maiden Mineral Resource at Gigante Grande. We now move into 2026 with strong momentum across multiple production and exploration fronts.”*

## **STRATEGIC CONTEXT AND RECENT PROJECT PROGRESS**

**Transition to a gold-producing business** - The Company's transition from trial operations to gold production was confirmed by three successful gold pours in 2025, which generated early cash flow in a strong Australian gold price environment. These production outcomes provide the platform for the next phase of drilling and development supported by the Placement.

**40,000-tonne processing approval at Maranoa** - A defining milestone was [securing approval](#) <sup>iii</sup>for eight additional 5,000-tonne vats, enabling full-scale commercial vat-leach production and building an independent onsite processing model. This upgrade supports faster recovery cycles and reduced reliance on third-party toll milling.

**Gigante Grande: Resource foundation + upside** - Gigante Grande now hosts a [Maiden Inferred Mineral Resource](#) <sup>iv</sup> of 1.39 Mt @ 0.91 g/t Au for 40,700 oz, with an [Exploration Target](#) <sup>v</sup> of 160–550 koz, defined within a 7 km mineralised corridor and open to the northwest and at depth. Multiple high-grade intercepts (500m × 1,600m footprint) highlight the scale potential. Preparation is underway for a significant drill program in early 2026.

**Mining pipeline spanning three deposits** - The broader East Menzies camp includes:

- Maranoa – mining approval for an additional 8,000 oz
- Goodenough – expansion potential from current 43,000 oz
- Granny Venn (GVAN) – historic 2021/22 campaign delivered 8,700 oz, \$23m revenue, \$7.5m project profit

**Longer-term growth pathway: A Menzies gold mill** - Planning is advancing for a modular CIL/CIP plant (120 ktpa) at GVAN, scalable for future production across the consolidated tenement package.

## USE OF FUNDS

Proceeds will be used to advance key development and exploration programs across the East Menzies Gold Project, including:

- Drilling at Gigante Grande, Goodenough, and Granny Venn (GVAN)
- Expanding the Gigante Grande Mineral Resource and Exploration Target
- Advancing the 40,000-t vat-leach program at Maranoa and associated processing upgrades
- Regional targeting and data review across the 7 km Gigante Grande corridor
- Progression of studies and planning for the Menzies modular gold mill
- General working capital and placement costs
