

Drilling & Exploration Update | EOM December 2025

Altitude Minerals Ltd (ASX: ATT) (ATT, Altitude or the Company) provides a final exploration and drilling update for 2025, following an active and highly productive year across the Company's Heavy Mineral Sands, Copper-Gold, and Silver-Gold portfolios in Australia and the United States.

The Managing Director has just returned from a field trip to Nevada, where the Company completed further **drill-target refinement at the Firenze Silver & Gold Project**, progressed **logistics and contractor discussions**, and reviewed **multiple advanced gold, silver and copper opportunities** with potential to complement the existing project pipeline.

2025 has been a **transformational year** for Altitude Minerals, with a strong pipeline of drill-ready targets established and **three drilling programs completed in the last months of the year**. The Company enters 2026 with **momentum, defined drill programs, and multiple near-term catalysts**, including recent positive HM results, pending assay results and upcoming drilling.

Heavy Minerals Sands Targets | Eromanga Basin, South Australia

December activities

- Positive results reported in ASX Announcement 15/12/2025 "**HMS Intersected in first drilling program Nilpinna Target**"

2026 plans

- Follow up ground magnetic surveys to inform further drill targeting
- Anticipated grant of new tenements currently under application to strengthen the Company's ground position

Copper-Gold Porphyry Targets | Macquarie Arc, NSW

Byrock Project, Northern Macquarie Arc, NSW

November – December activities

- 419m of rotary mud & diamond core drilling completed testing the high-priority T55 Cu-Au Porphyry Target – East Byrock
- Seven priority pipe targets tested with 2,228m of low-cost aircore drilling
- All air-core samples submitted for assay

January – February 2026 plans

- Core cutting and assay preparation
- Assay results expected in two batches
- Follow-up program design and prioritisation subject to results

Theseus Project, Southern Macquarie Arc, NSW

December activities

- Continued with administrative transfer of three key tenements from Rimfire Pacific
- Landowner engagement

2026 plans

- Finalise tenement transfer paperwork
 - Drill target ranking
 - Permitting and planning for drill target testing
-

Silver & Gold Targets | Firenze Project, Nevada, USA

December activities

- Detailed structural mapping and drill-target refinement
- On-ground verification of access and logistics
- Integration of alteration mapping data to refine priority drill positions

2026 plans

- CSAMT geophysical survey confirmed for January 2026
- Completion of soils and rock-chip interpretation
- Finalisation of drill collars and permitting
- **2,500m RC drill program planned for March-April 2026**, subject to permitting and rig availability

Gold | Boulder Creek Gold Project, Alaska, USA

November activities

- Relogging core and digitising of historical data

January – February plans

- Consulting gold expert to report
