Comprehensive Cloud for Your Business

Future-proof your technology and IT infrastructure with a solution that evolves with your business. Atturra Cloud Managed Services help you choose the right platforms to stay ahead of your competitors while reducing risk.

When you partner with Atturra, you get access to our team of specialists with over 40 years of IT experience. They manage 1 million daily cloud users and back up 12 PB+ of Australian-based data 365 days a year.

Atturra's Cloud Managed Services help you reduce costs with pay-as-you-go models, access services built to scale, and bolster your ability to avoid security threats.

Our Cloud Services

Cloud Backup

Be prepared for any situation, knowing critical business data is safe and secure.

Public Cloud

Migrate your business seamlessly to the cloud with a secure and scalable solution.

Private Cloud

Leverage this solution for increased security, control, and flexibility.

Microsoft 365

Build faster, more efficient workflows and optimise your IT ecosystem.

Infrastructure-as-a-Service

Only pay for the storage you use with data storage and network services on demand.

Cloud Platform

Get a managed service that deploys a complete cloud environment for your business.

Data Centres

Secure, sovereign data centres across ANZ. Flexible colocation and private hosting with high-speed connectivity, uptime assurance and robust compliance.

> **"** The greatest security is really having a team of Atturra's Managed Services people available. That has really offloaded pressure to ensure IT services run 24/7.

How can a modern cloud solution benefit you?

Less Hardware

Your IT infrastructure is housed safely in a remote data centre, not a crowded on-site server room.

Reduced Costs

Subscription-based payment plans make it easier to reduce the cost of managing and maintaining your IT systems.

Improved Efficiency

Save time and resources when planning, upgrading, and implementing new IT infrastructure.

Reliable Security

Your data is stored safely and securely in data centres built with enterprise-level encryption protocols.

Reduced Risk

Safe, <u>secure</u>, remote storage ensures that your business' critical data is always backed up and recoverable.

Scalability

Cloud solutions enable your business to scale up—or down—easily without investing in physical infrastructure.

Upgrade Your cloud solution in 3 Easy Steps

1

Book a consultation

Come to us for a consultation. You'll get a feel for who we are, and we'll learn more about your business and identify your cloud requirements.

2

Customised Cloud Strategy

We create a customised solution that delivers all your cloud requirements and sets you up for future growth and agility. We then implement and manage it for you.

3

Modernise your ecosystem

Sleep well at night, knowing that your business's IT infrastructure is ready for what's ahead.
