Chairman Geoff Wilson AO said: “The six month investment portfolio performance is the strongest for WAM Active since inception 18 years ago. This exceptional performance, along with the strong performance of the Company over the last 12-months has enabled the Board of Directors to declare an increased fully franked interim dividend of 3.2 cents per share and a special fully franked dividend of 1.0 cents per share. WAM Active’s proven and flexible investment strategy, coupled with the expertise of the investment team and the dynamic portfolio construction continues to deliver excellent investment portfolio performance for shareholders.”

The dividends declared represent an annualised fully franked interim dividend yield of 6.5%* and a grossed-up dividend yield of 9.3%*, when including the value of franking credits. Since inception, WAM Active has paid 104.7 cents per share in fully franked dividends to shareholders and 149.6 cents per share when including the value of franking credits.

Lead Portfolio Manager Oscar Oberg said: “The WAM Active investment team and I are pleased to deliver continued investment portfolio outperformance for shareholders. Improved capital markets activity has supported a more dynamic approach toward portfolio construction, enabling the WAM Active investment team to capitalise on trading opportunities that fit within our investment process including earnings updates, merger and acquisition activity and other corporate activities.”

*Investment portfolio performance is before expenses, fees and taxes to compare to the relevant indexes which are also before expenses, fees and taxes. The investment portfolio performance and pre-tax net tangible assets (NTA) at 31 December 2025 are estimates only. The December 2025 investment update, including the final pre-tax NTA will be announced to the market on or before 14 January 2026.

*Based on the 5 January 2026 share price of \$0.99 per share and the annualised FY26 fully franked interim dividend of 6.4 cents per share, excluding the special fully franked dividend of 1.0 cents per share. Grossed-up dividend yield includes the value of franking credits and is based on a tax rate of 30.0%.

Deputy Portfolio Manager Shaun Weick said: “Over the past six months, we have materially increased portfolio turnover to take advantage of the opportunities we see in the market, whilst at the same time actively managing the cash position to cushion downside exposure. In recent weeks we have seen a material shift in domestic investor sentiment as the outlook for inflation and interest rates has been reassessed higher. Accepting this adjustment, we expect the upcoming February reporting period should provide compelling trading opportunities.

“WAM Active has progressively rotated positioning towards precious and base metals as we believe these companies are well positioned for near term outperformance as the US continues to reduce interest rates, global growth improves and the USD moves lower. We believe this environment warrants an active approach to portfolio construction which positions the fund well. Whilst capital markets activity has generally improved this year, the performance of recent IPOs suggest caution is warranted in this respect. Overall, we remain optimistic on the outlook for markets into 2026 and are excited by the opportunities that could present over time,” Shaun added.

Fully franked dividends since inception

Interim dividend dates

Ex-dividend date	15 May 2026
Dividend record date (7:00pm Sydney time)	18 May 2026
Last election date for DRP	20 May 2026
Payment date	28 May 2026

Special dividend dates

Ex-dividend date	17 June 2026
Dividend record date (7:00pm Sydney time)	18 June 2026
Last election date for DRP	22 June 2026
Payment date	30 June 2026

The Dividend Reinvestment Plan (DRP) is in operation and the recommended fully franked interim dividend of 3.2 cents per share and the special fully franked dividend of 1.0 cents per share qualify. Participating shareholders will be entitled to be allotted the number of shares (rounded to the nearest whole number) which the cash dividend would purchase at the relevant issue price. The relevant issue price will be calculated as the volume weighted average market price (VWAP) of shares sold on the ASX over the four trading days commencing on the ex-dividend date for the relevant dividend. The DRP will operate without a discount for the fully franked interim and special dividends.
