

ASX Announcement
20 January 2026

DECEMBER 2025 QUARTERLY REPORT

Barlee Project – Gold

- **Numerous large footprint and high amplitude gold anomalies** have been **identified** at the Barlee Project over areas of historic anomalism further reinforcing the prospectivity of the project.
- Six highly rated prospects are:
 - Astro Prospect - **1,800m** (before going undercover) x **800m anomaly** with maximum gold of **204ppb**.
 - Scooby Prospect - **900m x 450m anomaly** with maximum gold of **57ppb**.
 - Tiger Prospect - **1,200m x 700m anomaly** with maximum gold of **230ppb**.
 - Gromit Prospect - **1,000m x 450m anomaly**, with a maximum gold of **235ppb** (highest gold value of the program).
 - Odie Prospect - **350m x 250m anomaly** with a maximum gold of **37ppb**.
 - Lost Bolt Prospect - **1,700m x 1,000m anomaly** with maximum gold of **211ppb**.
- A total of 1,500 samples collected and assayed utilising the Ultrafine (UFF) method.
- Results increase the Company's confidence in the prospectivity of this area.

Boodanoo Project – Gold

- Infill soil sampling has confirmed and further defined the previously identified geochemical anomaly at the Boodanoo Project.
- This additional sampling has resulted in the definition of **two sub parallel, NNE striking anomalies with a peak value of 59.6ppb Au**.
- The +10ppb Au contour of these anomalies are **in excess of 650m** in strike with **widths of up to 190m** and are located to the immediate west and east of a small hill of outcropping gabbro.
- The southern extremity of the soil anomaly is affected by transported cover which can inhibit the effectiveness of the sampling method.

- No previous drilling has occurred in the area of these anomalies.

Killarney Project – Gold

- Assays received from the second RC drill program at Killarney.
- Significant intercepts include:
 - 4m @ 1.63g/t Au including 2m @ 2.99g/t Au, from 55m.
 - 3m @ 1.18g/t Au including 1m @ 3.00g/t Au, from 76m.
 - 2m @ 1.32g/t Au from 72m.
 - 8m @ 0.68g/t Au including 2m @ 2.02g/t Au, from 36m.
 - 8m @ 0.84g/t Au including 1m @ 5.7g/t Au, from 68m.
- Assay results confirm the presence of gold within the targeted structural corridor.
- Mineralisation is associated with zones of heavily weathered ferruginous saprolite and quartz veining, further to the east the mineralised structure was intersected in fresh rock.

Corporate

- **Cash and shareholdings at 31 December 2025 of \$11.3M** comprised of cash of \$9.2M and shareholdings of \$2.1M.

Barlee Project (Gold)

During the quarter **Duketon Mining Limited (Company or DKM)** received assay results from the inaugural soil geochemistry program at the Barlee Project (see ASX announcement 8 October 2025). A 1,500 sample, ultra fine fraction (UFF) soil program over a number of areas of the Barlee Project was completed during the quarter. A number of strong gold anomalies have been identified within these areas (Figures 1 to 5).

The **Astro Prospect** is a 1,800m x 800m anomaly with a maximum gold of 204ppb. This anomaly may continue to the north undercover as evidenced by several anomalous samples (Figure 2 and Figure 3).

The **Scooby Prospect** is 500m to the south-east of Astro and gold anomalism covers an area of 900m x 450m with a maximum gold of 57ppb (Figure 2 and Figure 3). The gap between the Astro and Scooby anomalies has not been sampled and will be infilled in the future.

In the southern area, the **Tiger Prospect** gold anomaly covers an area of 1,200m x 700m, maximum gold is 230ppb (Figure 2 and Figure 4).

Gromit Prospect has the highest gold value of the UFF program of 234ppb. The gold anomaly covers an area of 1,000m x 450m (Figure 2 and Figure 4).

These four anomalies exist over outcropping Diemals Formation sediments, an interpreted late Archean Basin. There has been no drilling over any of these prospects.

The **Odie Prospect** is a 350m x 250m anomaly at the intersection of the eastern edge of the basin and a NNE structure proximal to a Banded Iron Formation with a maximum gold of 37.4ppb. Historic drilling has intersected anomalous gold including 16m @ 0.274g/t Au from surface (LBAC0123), 4m @ 0.187g/t Au from 20m and 4m @ 0.1g/t Au from 28m (LBAC0120) (Figure 2 and Figure 5).

At the **Lost Bolt Prospect**, a large gold anomaly, approximately 1,700m x 1000m, has been identified with a maximum gold of 211ppb Au. These anomalous UFF results lie outside of previously drilled areas. Historic drilling at the prospect has intersected wide zones of mineralisation including 4m @ 1.89g/t Au, 12m @ 0.4g/t Au and 4m @ 0.98g/t Au.

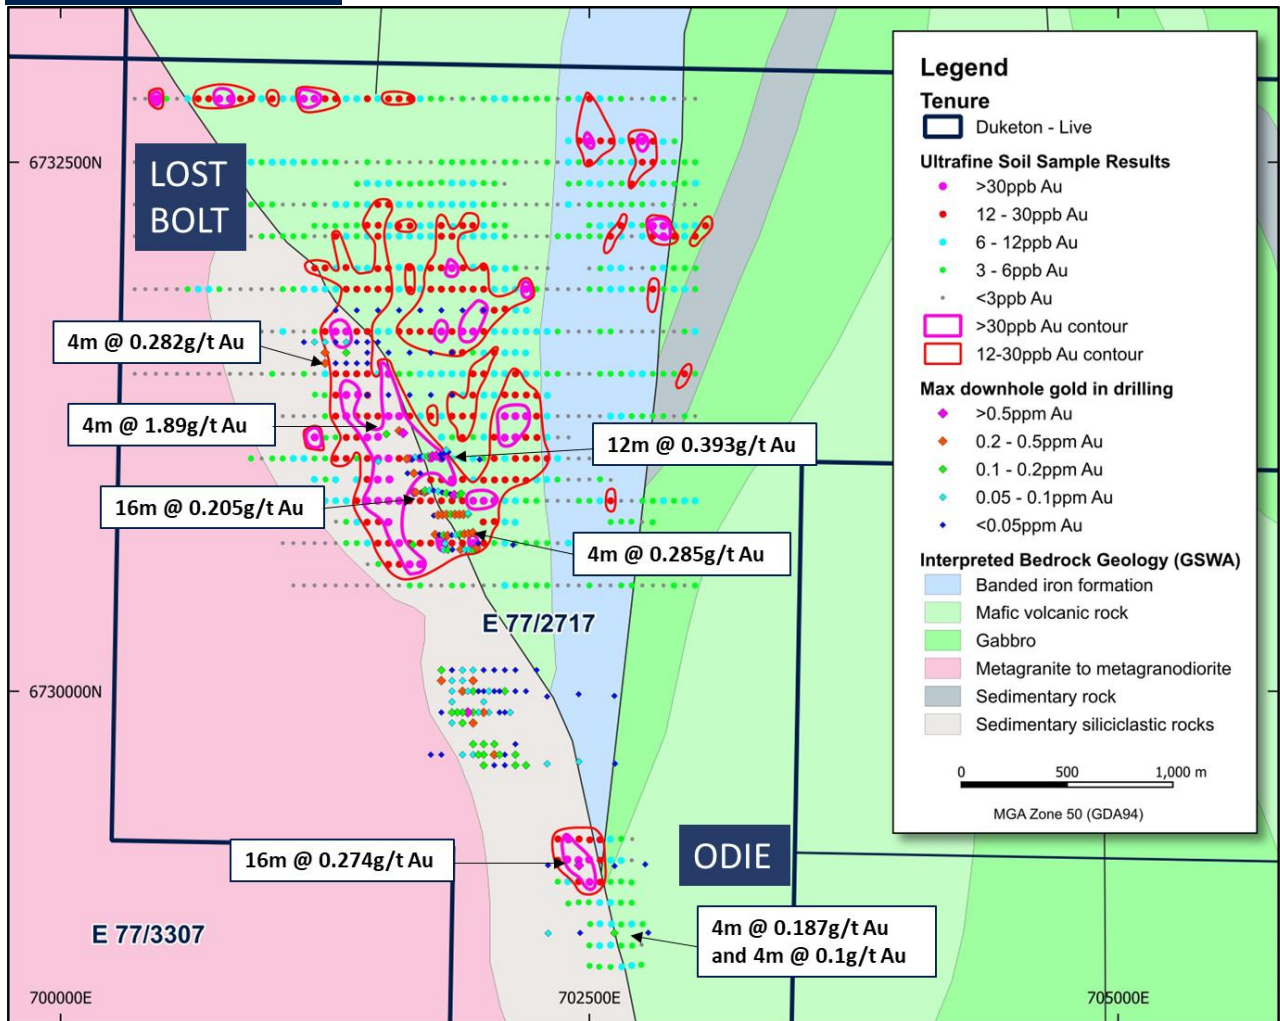

Figure 5: UFF soils, gold contours and historic drilling over GSWA interpreted bedrock geology, Lost Bolt and Odie Prospects, E77/2717

Boodanoo Project (Gold)

During the quarter the Company received results from a 150 sample, soil geochemistry program, infilling the historic regolith gold anomaly (see ASX announcement 26 November 2025). The results have confirmed and further defined two parallel gold anomalies, 650m long, up to 190m wide with a peak value of 59.6ppb Au.

Sampling was completed over the central portion of the tenement, reducing spacing to 100m x 25m. The new results validate the historic dataset and provide improved definition and continuity of the anomalies, enabling a targeted approach to follow-up drilling. The anomalies are located along the western and eastern flank of a small hill comprising gabbro of the Meeline Suite, part of the Windimurra Igneous Complex (Figure 6 and Figure 7).

DKM notes that regolith conditions to the south of the anomalies include a broad alluvial channel, which has reduced the effectiveness of surface geochemical sampling. Sub-surface techniques, such as auger drilling, will be required to adequately test this zone.

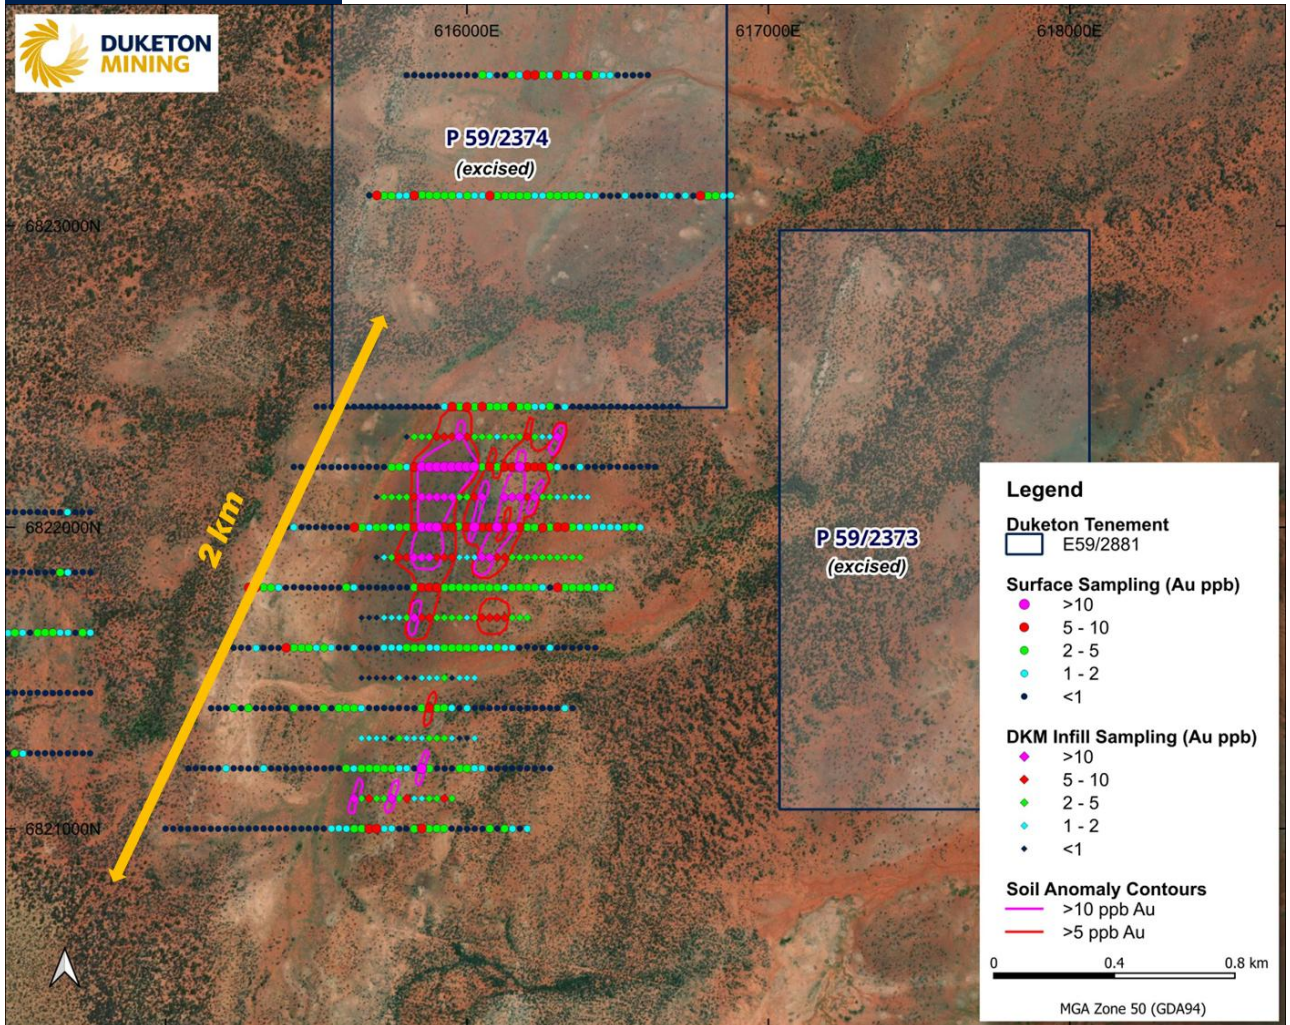

Figure 6: Boodanoo Project soil sample results and interpreted gold anomaly

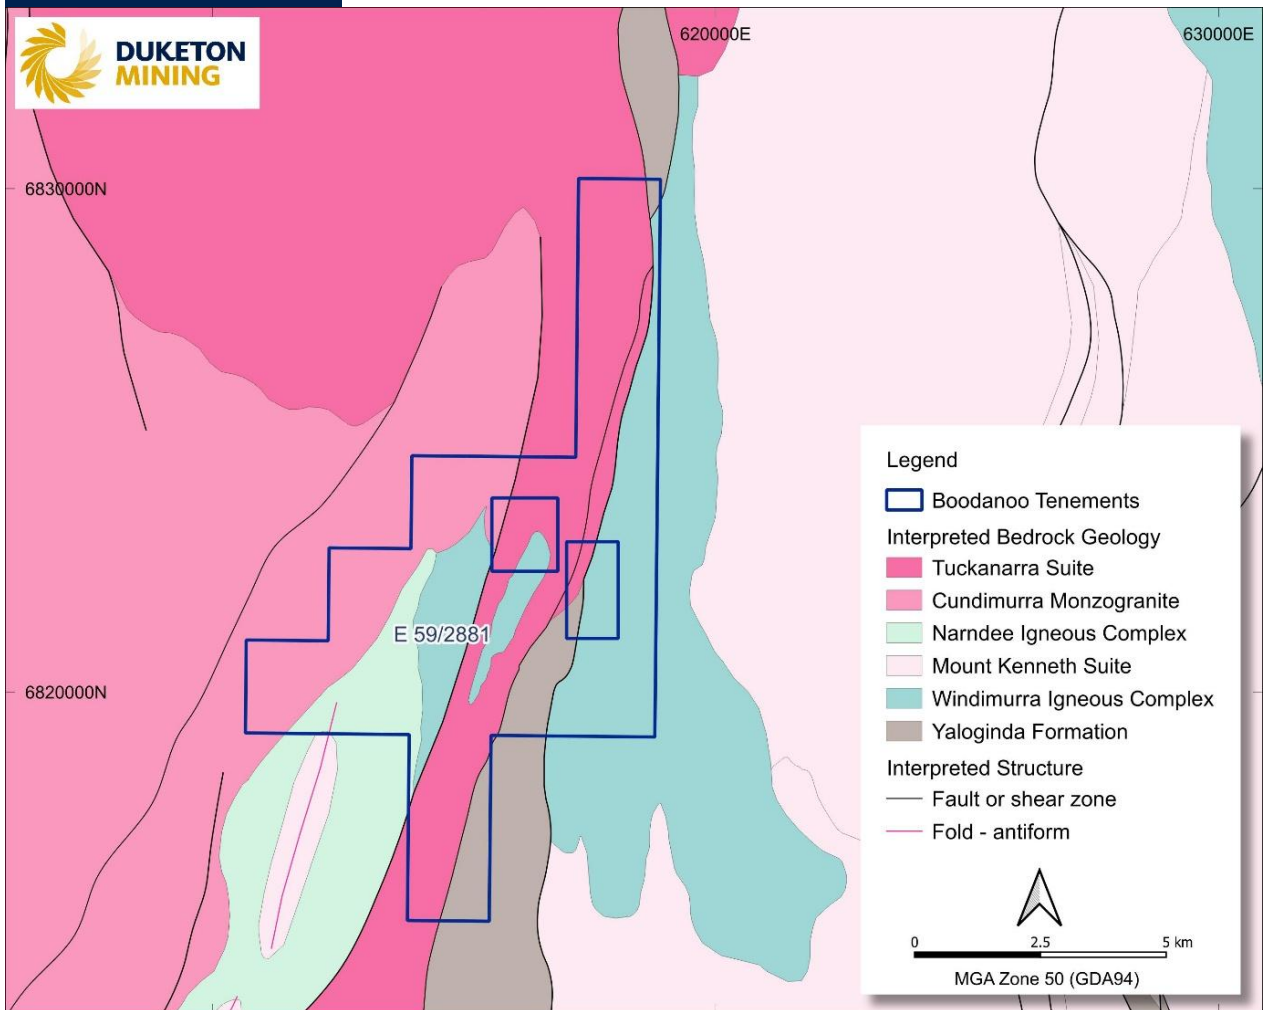

Figure 7: GSWA Regional Interpreted Geology with tenement E 59/2881

Killarney Project (Gold)

During the quarter the Company completed a second reverse circulation drill campaign at the Killarney Project (see ASX announcement 25 November 2025).

Significant intercepts include:

- **4m @ 1.63g/t Au including 2m @ 2.99g/t Au, from 55m in 25KRC020**
- **3m @ 1.18g/t Au including 1m @ 3.00g/t Au, from 76m in 25KRC031**
- **2m @ 1.32g/t Au from 72m in 25KRC024**
- **8m @ 0.68g/t Au including 2m @ 2.02g/t Au, from 36m in 25KRC019**
- **8m @ 0.84g/t Au from 68m including 1m @ 5.7g/t Au, from 68m in 25KRC021**

Eighteen (18) RC drillholes were completed for 1,560 metres. Drilling to the immediate east of the historic shallow Killarney Pit intersected a strongly weathered zone with variable quartz veining. Further to the east, drillholes intersected the mineralised structure in fresh rock.

Recent assay results confirm the presence of gold within the targeted structural corridor. While grades encountered in this program were generally lower than those returned from the previous drill program, the Company has identified grade variability as a characteristic of this mineralised system. Natural variations in gold distribution are common within structurally controlled and/or nuggety gold systems, and continued intersections of gold remain a positive indicator of the robustness of the mineralised system.

The Company is encouraged that all holes targeting the mineralised structure continue to intersect gold, reinforcing the Company's understanding that it remains within a mineralised corridor of potential significance. These results, combined with logged geology and structural observations, provide valuable information that will assist in refining the Company's exploration model.

Duketon Project (Nickel)

Rosie – Mineral Resource Estimate

The Indicated and Inferred Mineral Resource Estimate (**MRE**) for Rosie of **2.77 million tonnes at 3.27% nickel equivalent** is reported in accordance with the 2012 JORC Code (Table 1 and Table 2). The resource estimate is reported at >1% NiEq. Over **72% of the Resource has been classified as Indicated** with the remainder in the Inferred Category (Table 1 and Table 2). Mineralisation remains open in all directions.

The Mineral Resource contained metal stands at **56,300 tonnes of nickel, 11,800 tonnes of copper, 1,610 tonnes of cobalt and over 229,000 oz of total PGEs** (Table 3).

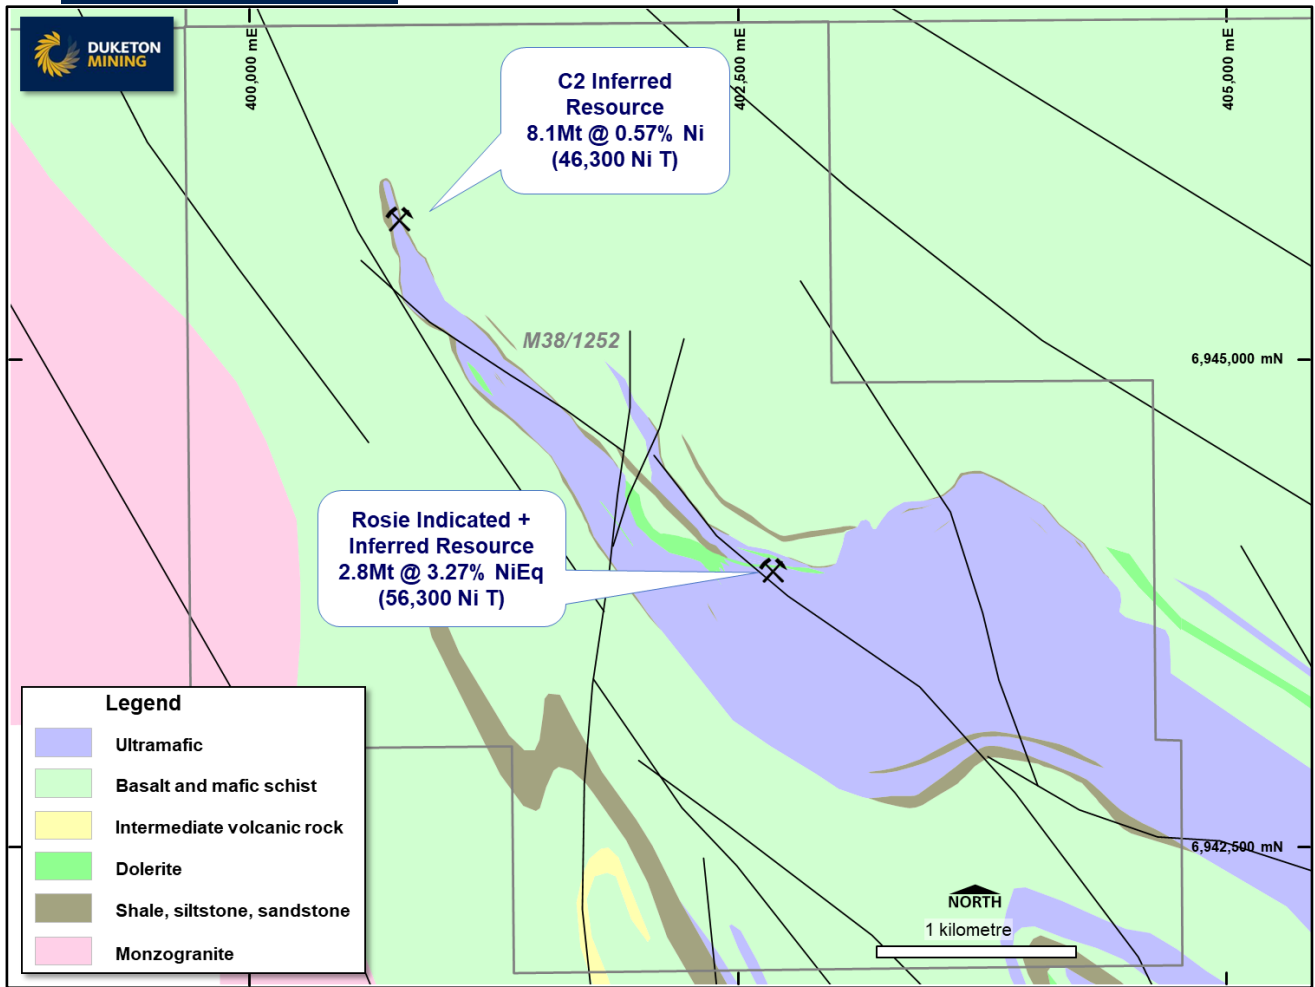

Figure 10: Plan of The Bulge Complex

Resource Category	Tonnes (kt)	Ni%	NiEq_%
Indicated	2,012	2.11	3.35
Inferred	761	1.81	3.06
TOTAL	2,773	2.03	3.27

Table 1: Rosie Mineral Resource Statement (February 2022) >1.0% NiEq

Rosie Nickel Resource >1% NiEq							
Classification	Sulphide	Tonnes	Ni (%)	Cu (%)	Co (ppm)	Total PGEs (g/t)	NiEq) %
Indicated	Pentlandite	1,191,555	2.4	0.42	642	2.7	3.76
	Violarite	820,999	1.7	0.39	504	2.5	2.75
	Sub-Total	2,012,553	2.1	0.41	585	2.6	3.35
Inferred	Pentlandite	694,751	1.8	0.48	580	2.5	3.13
	Violarite	66,179	1.5	0.42	442	1.7	2.36
	Sub-Total	760,930	1.8	0.48	568	2.4	3.06
Total	All	2,773,483	2.0	0.43	580	2.6	3.27

Table 2: Rosie Mineral Resource Grade

Note: For Tables 1 and 2.

- (1) Assumptions for the nickel equivalent are: Prices (in USD) \$8.00/lb Ni, \$3.65/lb Cu, \$15.30/lb Co, \$1,100/oz Pt, \$2,300/oz Pd and \$15,500/oz Rh.
- (2) Recovery assumptions from metallurgical test work are: Pentlandite domain 96.9% Ni, 99.5% Cu, 95.1% Co, 78.2% Pt, 97.6% Pd and 83.4% Rh. Violarite domain 88.7% Ni, 94.5% Cu, 88.5% Co, 57.6% Pt, 87.3% Pd and 64.8% Rh.
- (3) The following equations were used to calculate nickel equivalent – Cu and Co measured in ppm and PGEs measured in ppb – all converted to percentages for NiEq calculation:
- (4) Pentlandite domain: $NiEq = Ni\% + (Cu\% * 0.995 * (3.65/8)) + (Co\% * 0.951 * (15.3/8)) + (Pt\% * 0.782 * (1100 * 14.583/8)) + (Pd\% * 0.976 * (2300 * 14.583/8)) + (Rh\% * 0.834 * (15500 * 14.583/8))$
- (5) Violarite domain: $NiEq = Ni\% + (Cu\% * 0.945 * (3.65/8)) + (Co\% * 0.885 * (15.3/8)) + (Pt\% * 0.576 * (1100 * 14.583/8)) + (Pd\% * 0.873 * (2300 * 14.583/8)) + (Rh\% * 0.648 * (15500 * 14.583/8))$ where 14.583 is the amount of troy ounces per pound.

Classification	Ore Type	Contained Metal			
		Ni (t)	Cu (t)	Co (t)	Total PGEs (oz)
Indicated	Pentlandite	28,524	4,978	764	104,868
	Violarite	13,966	3,230	414	64,869
	Sub-Total	42,490	8,208	1,178	169,737
Inferred	Pentlandite	12,786	3,337	403	55,740
	Violarite	987	279	29	3,551
	Sub-Total	13,774	3,616	432	59,291
	Total	56,264	11,824	1,610	229,028

Table 3: Rosie Mineral Resource Contained Metal

The resource includes a reportable nickel equivalent number based on metallurgical work completed to determine recoveries (see ASX announcements 8 July 2020 and 10 July 2020). It is the opinion of DKM that all the elements included in the metal equivalents calculation have a reasonable potential to be recovered and sold.

C2 – Mineral Resource Estimate

The Indicated and Inferred Mineral Resource Estimate for C2 is **8.06 million tonnes at 0.57% nickel** and is reported in accordance with the 2012 JORC Code. The resource estimate is reported at >0.4% Ni grade. Over **99% of the Resource is classified as Indicated** (Table 4). Mineralisation remains open in all directions (see ASX Announcement 12 December 2022).

The Mineral Resource contained metal stands at **46,263 tonnes of nickel, 2,339 tonnes of copper, 1,505 tonnes of cobalt and 25,684 oz of total PGEs** (Table 5).

C2 Nickel Resource >0.4%Ni						
Classification	Tonnes	Ni (%)	Cu (%)	Pd (ppb)	Pt (ppb)	S (%)
Indicated	7,955,751	0.57	0.03	56.7	42.8	1.7
Inferred	107,790	0.44	0.01	34.7	31.4	0.5
Total	8,063,541	0.57	0.03	56.5	42.7	1.7

Table 4: C2 Nickel Resource > 0.4% Ni with Auxiliary Attributes

Classification	Ni tonnes	Cu tonnes	Co tonnes	PGE oz
Indicated	45,790	2,325	1,490	25,455
Inferred	474	15	14	229
Total	46,263	2,339	1,505	25,684

Table 5: C2 Mineral Resource Contained Metal

Combined Rosie and C2 Resources

The total JORC compliant nickel resource for the Bulge Complex (Rosie and C2) now stands at **102,527 tonnes of nickel, 14,163 tonnes of copper and 254,712 ounces of PGEs** (Table 6).

Combined Metal Inventory, The Bulge Area			
Deposit	Ni tonnes	Cu tonnes	PGE oz
Rosie	56,264	11,824	229,028
C2	46,263	2,339	25,684
TOTAL	102,527	14,163	254,712

Ongoing Strategy

The Company remains well positioned to drive value from three approaches:

1. Exploration opportunities on current tenure - assessing early-stage exploration opportunities across all projects looking at all commodities;
2. Acquiring new tenure – via opportunistic applications or by simple/low-cost commercial means; and
3. Expand/Study Nickel Resources - review mining study and target extensions to Rosie and C2 and the greater area for Ni-Cu-PGE's.

Corporate

At 31 December 2025, the Company had a cash and liquids balance of **A\$11.3M** comprised of cash of **A\$9.2M** and shareholdings of **A\$2.1M**.

ASX Additional Information

Exploration and evaluation expenditure during the quarter was \$536,000 associated with geological consultants, field related activities, and tenement compliance costs. Details of exploration activity during the quarter are set out in this report. There were no substantive mining production and development activities during the quarter. During the quarter, the Company made cash payments of \$108,000 to related parties and their associates. This was the aggregate amount paid to the directors including salary, directors' fees, consulting fees and superannuation.

Authorised for release by:

Stuart Fogarty

The information in the announcement that relates to production targets or financial information derived from a production target is extracted from the ASX announcement 28 April 2021 for the Rosie Scoping Study and is available to view on the Company's website (www.duketonmining.com.au). The company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcement and that all material assumptions underpinning the production target or the financial information derived from the production target in the relevant market announcement continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcement.

The information in the announcement that relates to Mineral Resources for Rosie is extracted from the ASX announcement 10 March 2022 and is available to view on the Company's website (www.duketonmining.com.au). The information in the announcement that relates to Mineral Resources for C2 is extracted from ASX announcement 12 December 2023. The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcements and that all material assumptions and technical parameters underpinning the estimates in the relevant market announcements continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcement.

The information in this report that relates to exploration results is based on information compiled by Ms Kirsty Culver, Member of the Australian Institute of Geoscientists (AIG) and an employee of Duketon Mining Limited. Ms Culver has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity that is being undertaken to qualify as a competent person as defined in the JORC Code 2012. Ms Culver consents to the inclusion in the report of the matters based on the information in the form and context in which it appears.

The information in this report that references previously reported exploration results is extracted from the Company's ASX market announcements released on the date noted in the body of the text where that reference appears. The previous market announcements are available to view on the Company's website or on the ASX website (www.asx.com.au). The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market. The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcements.

Appendix 1: Summary of Mining Tenements

At 31 December 2025 the Company had an interest in the following tenements:

Tenement number	Project	State	Status	Interest at beginning of quarter	Interest at end of quarter	Acquired/Disposed
E28/3553	Eucla	WA	Application	100%	100%	N/A

If any additional financing facilities have been entered into or are proposed to be entered into after quarter end, include a note providing details of those facilities as well.	N/A	

8. Estimated cash available for future operating activities	\$A'000
8.1 Net cash from / (used in) operating activities (item 1.9)	(687)
8.2 (Payments for exploration & evaluation classified as investing activities) (item 2.1(d))	-
8.3 Total relevant outgoings (item 8.1 + item 8.2)	(687)
8.4 Cash and cash equivalents at quarter end (item 4.6)	9,172
8.5 Unused finance facilities available at quarter end (item 7.5)	-
8.6 Total available funding (item 8.4 + item 8.5)	9,172
8.7 Estimated quarters of funding available (item 8.6 divided by item 8.3)	13.4
<i>Note: if the entity has reported positive relevant outgoings (ie a net cash inflow) in item 8.3, answer item 8.7 as "N/A". Otherwise, a figure for the estimated quarters of funding available must be included in item 8.7.</i>	
8.8 If item 8.7 is less than 2 quarters, please provide answers to the following questions:	
8.8.1 Does the entity expect that it will continue to have the current level of net operating cash flows for the time being and, if not, why not?	
Answer: N/A	
8.8.2 Has the entity taken any steps, or does it propose to take any steps, to raise further cash to fund its operations and, if so, what are those steps and how likely does it believe that they will be successful?	
Answer: N/A	
8.8.3 Does the entity expect to be able to continue its operations and to meet its business objectives and, if so, on what basis?	
Answer: N/A	
<i>Note: where item 8.7 is less than 2 quarters, all of questions 8.8.1, 8.8.2 and 8.8.3 above must be answered.</i>	

Compliance statement

- 1 This statement has been prepared in accordance with accounting standards and policies which comply with Listing Rule 19.11A.
- 2 This statement gives a true and fair view of the matters disclosed.

Date: 20 January 2026

(Name of body or officer authorising release – see note 4)

Notes

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg Audit and Risk Committee]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
6. By the Company lodging this Appendix 5B, the Managing Director and CFO declare that the Appendix 5B for the relevant quarter:
 - presents a true and fair view, in all material respects, of the cashflows of the Company for the relevant quarter and is in accordance with relevant accounting standards;
 - the statement given above is founded on a sound system of risk management and internal compliance and control which implements the policies adopted by the Board; and
 - the Company's financial records have been properly maintained and the Company's risk management and internal compliance and control system is operating efficiently and effectively in all material respects.
