

Quarterly Report

For the period ended 31 December 2025

Update on Activities

Highlights for the Quarter

- ◆ Key Petroleum Limited (“**Key**” or “**the Company**”) continues to advance its interests in the Cooper-Eromanga Basin in Queensland. During the fourth quarter of 2025, the Company did not receive any further notifications regarding its eight Potential Commercial Area (**PCA**) applications across ATP 920 and ATP 924. According to the DNRM system, the applications remain under consideration at the decision stage.

The Company is pleased with the current status of the PCA applications and anticipates receiving formal government approval around the end of 2025. Upon approval, the two permits would each have a 15-year term, providing a long-term framework for development planning, partner engagement and funding activities, and the realization of the full value of the PCAs. Following confirmation of PCA approval, the Company intends to commence relevant technical studies to support the next stage of development.

- ◆ The Company successfully held its Annual General Meeting (**AGM**) on 27 November 2025, at which all scheduled resolutions were duly considered and approved. This was followed by a Board meeting to review the Company’s performance in 2025 and to discuss its development strategy for 2026.

Following the successful completion of a share issuance in the third quarter of 2025, the Company raised a certain amount of funds, providing financial support for its day-to-day operations. The Company plans to undertake a further share issuance in early 2026 to raise additional capital and to seek suitable projects during 2026, with the aim of enhancing its asset portfolio and laying a solid foundation for future growth.

- ◆ In December 2025, following the decision of the former Company Secretary to retire, the Company appointed a new Company Secretary. The handover process has been completed, and the new Company Secretary brings relevant legal and financial expertise to support the Company’s ongoing operations and development.

Activities for the Upcoming Quarter

- ◆ Based on the current status of the two PCA applications, the Company will continue to actively pursue all reasonable avenues to facilitate the approval process as efficiently as possible. This may include further engagement with relevant government departments to reinforce the strategic importance of the PCAs and outline the Company’s proposed next steps following approval. The objective is to support timely decision-making and maintain momentum. Upon receiving formal approval, the Company intends to promptly progress the projects by initiating the necessary technical studies, advancing financing preparations, and moving the PCA assets toward the next stage of development.

- ◆ The Company’s current financial position remains limited. Regardless of the timing of PCA approvals, ensuring sufficient financing remains a key priority to support ongoing operations and project development.

- ◆ In the first quarter of 2026, the Company's main focus will be to continue issuing a certain number of new shares to raise additional funds to support the development of its business.
