POTENTIAL RISKS

The Company's risk profile remains substantially unchanged from the previous quarter, with Global Brent Oil prices experienced volatility and softened during the Quarter but have strengthened post Quarter-end. Natural gas prices were highly volatile, strengthening significantly as compared to the previous Quarter, but have softened post Quarter-end. Ongoing international conflicts (including Ukraine and the middle east), coupled with ongoing market volatility from US tariff's continues to create instability in global oil and gas prices and has the potential to impact the Company's future royalty receipts.

In addition, royalty receipts may be impacted by:

- any interruption to or suspension of production from ExxonMobil & Woodside in the Gippsland Basin with an impact to the Weeks Royalty; and
- changes to the value of royalty receipts as a result of US\$ and A\$ FX movements, oil and gas prices and the proportion of commodity sales that are hedged, unhedged and/or contracted, of which Fitzroy has not ability to control.

3.1 Buru Energy Limited (Buru)

Fitzroy did not receive any royalty receipts during the Quarter due to the Ungani Oilfield Assets remaining under a care and maintenance program. The restart of Ungani production requires the renegotiation of certain commercial terms pursuant to the existing Ungani Native Title agreements and requisite field management regulatory approvals.

In its December Quarterly Activities Report (released subsequent to the end of the Quarter on 19 January 2026)⁵, Buru outlined the following:

- Corporate advisor appointed to manage a global process to secure a funding partnership to finance the estimated A\$40 million required for the Rafael Gas Project resource and flowrate validation program and subsequent independent reserves certification.
- Rafael Gas Project Schedule, showing a Final Investment Decision (**FID**), targeted to be early 3Q 2026.
- Buru is currently evaluating the potential to include the testing of the newly identified Flying Fox Prospect within the 2026 Rafael drilling campaign, via a cost-effective deepening of the Rafael 2H Well.

Full details of Buru's activities and announcements during the Quarter can be found at: www.buruenergy.com.

Fitzroy holds a 2% net well head royalty over the tenements in the Canning Basin Royalty Deed, and a 3% net well head royalty over the tenements in the Lennard Shelf Royalty Deed. (See items 9.2 and 9.3 below).

4. Bowden's Silver Project

The Bowdens Silver Project (**Bowdens**) is located in New South Wales, approximately 26kms east of Mudgee. Bowdens is the largest undeveloped silver deposit in Australia, with substantial resources and a considerable body of high-quality technical work already completed. Bowden's Silver is owned and is being developed by Silver Mines Limited (ASX: SVL). Bowdens hosts a JORC 2012 Mineral Reserve of 179Mt at 58.0g/t silver, 0.39% zinc and 0.28% lead for 180 million ounces of silver and 334 million ounces of silver equivalent⁶.

⁵ BRU ASX Announcement 19 January 2026 – Quarterly Activities & Cashflow Report.

⁶ SVL ASX announcement 8 September 2025 – Investor Presentation (refer Appendix 1).

In its Bowdens Silver Project Update released on 23 December 2025¹, the Company advised of the following:

- In keeping with the Company's aim of achieving the most appropriate, lowest risk pathway to a successful, legally robust redetermination of the Development Application (DA), and in consultation with the New South Wales Department of Planning, Housing and Infrastructure (DPCI), the Company has chosen to refresh its ecological surveys and provide an updated biodiversity assessment in accordance with the requirements of the Biodiversity and Conservation Act 2016 (NSW) (BC Act).
- The refreshed surveys are anticipated to be completed in early 2026, with the updated biodiversity assessment submitted to the DPCI by the middle of 2026.
- It is expected that the DPCI will then provide an updated assessment report to the Independent Planning Commission of NSW for consideration and subsequent DA redetermination.
- The Bowdens Project remains a high-quality project of state and regional significance, and development of it remains our top priority. We remain confident in the underlying merits of the Bowdens Project and are fully committed to progressing it through the approvals process in a thorough and transparent manner. We will continue to engage with regulators and stakeholders and keep the market informed as the Bowdens Project advances through the next stages of the planning process.”

Fitzroy has a 2% Net Smelter Return reducing to 1% after the receipt of US\$5m, generated from the sale of any silver or other ores, concentrates or other primary, intermediate product or any other mineral substances (**product**) produced from within EL5920.

5. Snowy River Gold Project - Snowy River Mine

The Snowy River Gold Project (**Project**) is located near Reefton, on the West Coast of the South Island of New Zealand and is being developed by Endura Mining Pty Ltd (**Endura**), who holds 100% of the Project. The Project hosts probable Ore Reserves of 244koz of gold grading 6.03g/t Au and Mineral Resources of 795koz of gold grading 23.1g/t Au⁷.

On 5 November 2025², Endura announced the following:

- A\$150 million of new equity funding secured to finance development of the Snowy River Gold Mine.
- Endura has received a long-form credit approved term sheet from one of Australia's largest commercial banks at competitive rates which the Company is working to finalise by the end of 2025.
- Finalising the debt component ensures the Snowy River Gold Mine will be fully funded to gold production.

In its various other announcements during the Quarter, Endura outlined the significant progress being made on Project construction activities.

Full details of Endura's activities and announcements can be found at www.enduramining.com

Fitzroy holds a variable 1-3% Over Riding Return royalty over the Project. Endura (via its wholly owned subsidiary Tasman Mining Limited (**Tasman**)) holds an option to buy-out the Fitzroy royalty. The option to buy-out the royalty is exercisable at any time until a decision to mine for the sum of A\$11.6 million indexed from 31 March 2024⁸ (**Buyout Price**). The current value of the Buyout Price (based on published CPI data⁹) is approximately A\$12.2 million.

A decision to mine the Snowy River Project is defined as being a date which is 20 business days after the date on which Endura:

1. has access to sufficient funds to complete the development of the Snowy River Project (including construction of the Plant) and to proceed to commercial production; and
2. holds in its bank account sufficient funds to pay the Buyout Price.

If the buy-out option is not exercised and the Snowy River project proceeds to commercial production, the operative provisions of the 1-3% royalty deed apply.
