

## Quarterly Activities Report for December 2025

### Highlights:

- Golden Dragon Mining listed on the ASX on Wednesday 29 October after an oversubscribed Initial Public Offering.
- Cue Project, now recognised as the Company's flagship asset and the cornerstone of its future exploration strategy.
- Golden Dragon has delineated several advanced-stage gold targets within the Cue Project; many coincide with key regional structures, high-grade drill intercepts and are considered "walk up" drill targets.
- Inaugural drill campaign was completed at Coodardy on the 8<sup>th</sup> of December 2025, one of Golden Dragon's advanced gold targets, results expected in early February.
- A slimline RC drilling program planned in February, designed to test priority targets and advance two Prospects Coodardy and Behring Bore toward resource definition.
- With the consent of the Wajarri Yamatji Native Title Holders, Snappy Gum Heritage Services was engaged to conduct a Work Program Clearance archaeological survey and ethnographic consultation from 7 to 13 November 2025.

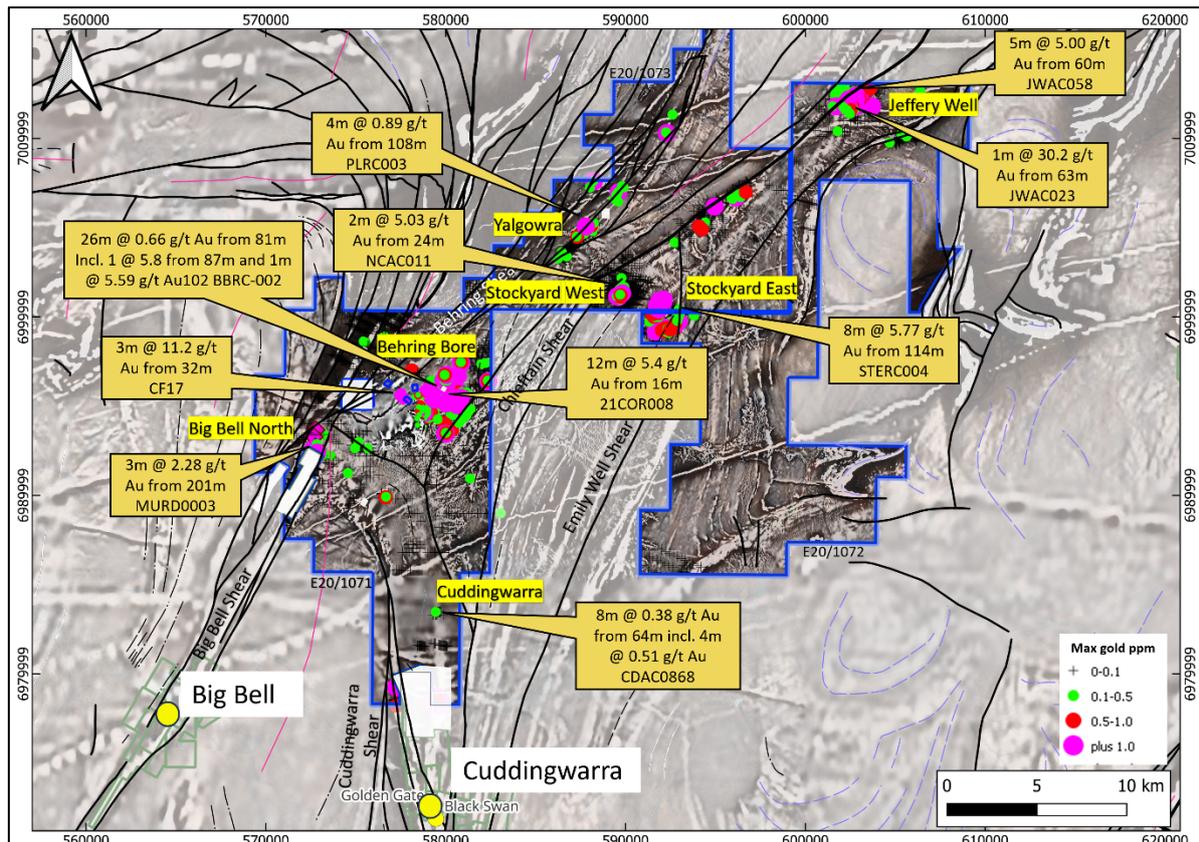

Golden Dragon debuted on the ASX on Wednesday, 29 October after an oversubscribed IPO, reflecting strong investor demand. Following its listing, the Company advanced several strategic acquisitions, equity raisings, and corporate initiatives to accelerate growth.

### Cue Project (GDR 80%)

Exploration completed to date has confirmed a strong correlation between gold mineralisation and key regional structures, including, Big Bell Shear Zone (BBSZ), Cuddingwarra Shear, and several prominent north-south trends on a deposit scale. Importantly, large areas concealed beneath transported cover remain largely untested, presenting meaningful discovery upside.

Golden Dragon has completed a comprehensive review of priority targets across the Cue Project area. Figure.1 illustrates these targets superimposed on a recently acquired (2019) TMI dataset. The review demonstrated that the principal structural corridors are spatially coincident with known mineralised zones, supported by historical drilling that records maximum gold values over sample intervals (1–2 m), referred to as “Max gold”.

## Tenement Acquisition

Two key additional tenements were acquired on 25 July 2025; the company completed the acquisition of tenements M20/455 (Coodardy) and M20/327 (Curtis Find) for consideration comprising \$50,000 in cash and 200,000 fully paid ordinary shares.

The Cue project now comprises two exploration licences under application (E20/1072 and 1073), one granted exploration licence (E20/1071) and two granted mining leases (M20/455 and M20/327) over a contiguous area of 612.8 km<sup>2</sup> (Figure.2).

Golden Dragon holds an 80% interest in the issued share capital of Fastfield Pty Ltd, which is the 100% legal and beneficial owner of E20/1071, E20/1072 and E20/1073. The remaining 20% interest in the issued share capital of Fastfield Pty Ltd is held by Bruce Robert Legendre.

## Advanced Gold Targets

Golden Dragon has delineated several advanced-stage gold targets within the Cue Project, including Behring Bore, Coodardy, Piston, Curtis Find, Stockyard East, Stockyard West, Big Bell North, and Jeffery Well. Many coincide with historical workings, high-grade drill intercepts and are considered “walk up” drill targets significant Intersections from advanced targets include.<sup>1</sup>

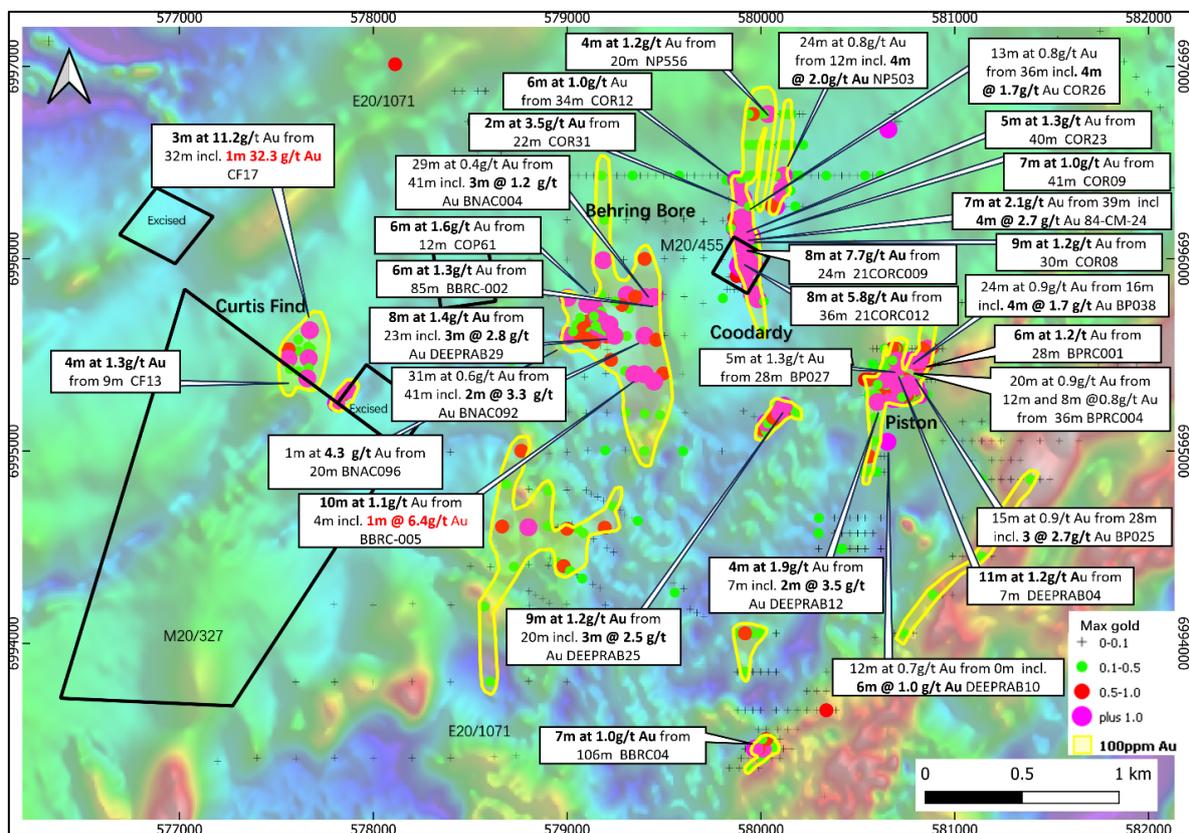

- Coodardy**  
 Mineralisation defined over 400 m strike, with intercepts such as **8 m @ 7.3 g/t Au** and **8 m @ 5.8 g/t Au**, open down-dip and down-plunge.
- Behring Bore**  
 Gold mineralisation extends over ~900 m × 500 m, hosted in altered pyritic dolerite beneath shallow cover, with assays up to **15.0 g/t Au**. Identified as a high-priority camp-scale target by Evolution’s 2021 study.

<sup>1</sup> [Golden Dragon Prospectus](#)

- **Piston:**  
Broad low-grade gold zones up to **15 m @ 0.9 g/t Au**, warranting further testing.
- **Curtis Find:**  
High-grade intersections up to **3 m @ 11.2 g/t Au** (incl. 1 m @ 32.3 g/t Au), scheduled for follow-up drilling.
- **Stockyard East / West:**  
Mineralisation identified over 1.2 km strike with intercepts such as **8 m @ 5.8 g/t Au** and **1 m @ 17.0 g/t Au**, open along strike and at depth.
- **Big Bell North:**  
Along strike from the Big Bell deposit; diamond drilling intersected **3 m @ 2.28 g/t Au**. Represents a key deep exploration target.
- **Jeffery Well:**  
Gold anomalism (>1.0 g/t Au) across 1,000 m × 500 m, with peak intersection **1 m @ 30.2 g/t Au**, remaining open to the north.

## Coodardy

The inaugural drill campaign was completed at Coodardy on the 8<sup>th</sup> of December 2025 ([Drilling Completed at Coodardy](#)), one of Golden Dragon’s advanced gold targets. The 17-hole RC drill program consisted of 1340m targeting shallow high-grade mineralisation.

14 holes were drilled within M20/455 at Coodardy, three extra holes were drilled at Curtis Find within M20/327 (Figure.3). Drilling at Coodardy intersected a 15-30m saprolite zone with 1-3 metre intervals of quartz veining in multiple holes within the program. Correspondence from ALS laboratory indicates results are expected in early February 2026.

The mineralisation identified to date at Coodardy is moderately east-dipping, north-plunging and defined over a north-south strike length of 700 m. The mineralisation is hosted in the uppermost part of a quartz veined, carbonate-pyrite altered dolerite and overlain by sediments and interlayered basalts (Figure.4).

Previous exploration at Coodardy has been highly successful with multiple high-grade intersections including<sup>3</sup>.

- **12 m @ 4.5g/t Au** from 16m 21COR008
- **8 m @ 7.7g/t Au** from 24m 21COR009

## Planned Exploration

The Behring Bore and Coodardy Prospects have emerged as the most advanced and highest-potential targets within the Golden Dragon Project. These Prospects represent the strongest opportunity for progression to a maiden JORC-compliant Mineral Resource, supported by consistent geological and grade continuity.

In 2021, Evolution commissioned Model Earth Global Geological Services to undertake an extensive fact mapping, interpretation and targeting program over the Cue project **The Behring Bore area was identified as the most prospective target area for potential “camp-scale”, “non Big Bell-style” mineralisation.** (Outhwaite, 2021)<sup>4</sup>.

Golden Dragon has since completed an extensive review of all historical exploration datasets and interpretations. Building on these foundations, the Company will commence a slimline RC drilling program in February, designed to test priority targets and advance both Prospects toward resource definition.

## Heritage

With the consent of the Wajarri Yamatji Native Title Holders, Snappy Gum Heritage Services was engaged to conduct a Work Program Clearance (WPC) archaeological survey and ethnographic consultation from 7 to 13 November 2025.

The heritage survey was undertaken using a WPC method, as determined by Ethical Engagement Consultancy and Golden Dragon. The WPC method involves the identification of ‘Clear’ and ‘Not Clear’ areas and is generally undertaken in the early stages of project planning. Where the Wajarri Yamatji participants consider an area to be Clear, the proponent may undertake ground disturbance activities as specified in the work program scope.

The focus of the surveys was on locating cultural heritage of archaeological (tangible) and ethnographic (intangible) significance, to assist in the process of project approvals

### **References to Previous Announcements**

The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcements, and that all material assumptions and technical parameters have not materially changed. The Company also confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcement.

### **Competent Person Statement**

The technical information in this announcement that relates to Exploration Results is based on, and fairly represents, information compiled by Mr Simon Buswell-Smith. Mr Buswell-Smith is a professional geologist with over 17 years' experience in the mineral exploration industry across Australia, specialising in gold, base-metals and critical minerals. He is a Member of the Australian Institute of Geoscientists (Member No. 4802) and has more than five years' relevant experience in mineral exploration. Mr Buswell-Smith is a "Competent Person" as defined in the 2012 Edition of the JORC Code. He has reviewed the technical information in this announcement, consents to being named as Competent Person, and has authorised the inclusion of all Exploration Results in the form and context in which they appear.

**Notes**

1. This quarterly cash flow report and the accompanying activity report provide a basis for informing the market about the entity's activities for the past quarter, how they have been financed and the effect this has had on its cash position. An entity that wishes to disclose additional information over and above the minimum required under the Listing Rules is encouraged to do so.
2. If this quarterly cash flow report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, *AASB 6: Exploration for and Evaluation of Mineral Resources* and *AASB 107: Statement of Cash Flows* apply to this report. If this quarterly cash flow report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.
4. If this report has been authorised for release to the market by your board of directors, you can insert here: "By the board". If it has been authorised for release to the market by a committee of your board of directors, you can insert here: "By the [name of board committee – eg *Audit and Risk Committee*]". If it has been authorised for release to the market by a disclosure committee, you can insert here: "By the Disclosure Committee".
5. If this report has been authorised for release to the market by your board of directors and you wish to hold yourself out as complying with recommendation 4.2 of the ASX Corporate Governance Council's *Corporate Governance Principles and Recommendations*, the board should have received a declaration from its CEO and CFO that, in their opinion, the financial records of the entity have been properly maintained, that this report complies with the appropriate accounting standards and gives a true and fair view of the cash flows of the entity, and that their opinion has been formed on the basis of a sound system of risk management and internal control which is operating effectively.
