ASX RELEASE

Aircore Drilling Set to Commence at Chifley

Bulletin Resources Limited (“Bulletin”, “BNR”) advises that an aircore drilling program has commenced on its Chifley Project at Lake Rebecca South.

The prospect is located approximately 140km ESE of Kalgoorlie at the southern end of Bulletin’s Pinjin Lake Rebecca project. (Figure 1).

Up to 30 sites have been prepared for a total of approximately 1,500m drilling planned based on an average hole depth of 50m.

As noted recently, drilling is testing a gold target made up of a discrete 1km x 1km surface gold geochemical anomaly which is partly coincident with a discrete magnetic target over interpreted mafic and ultramafic greenstones on the Claypan Fault (Figure 2). (Refer BNR ASX Announcement 31 January 2024).

The target is entirely overlain by transported sheetwash cover in an area with no previous drilling. Assay results are expected to be received 4-6 weeks after completion of the drilling program.

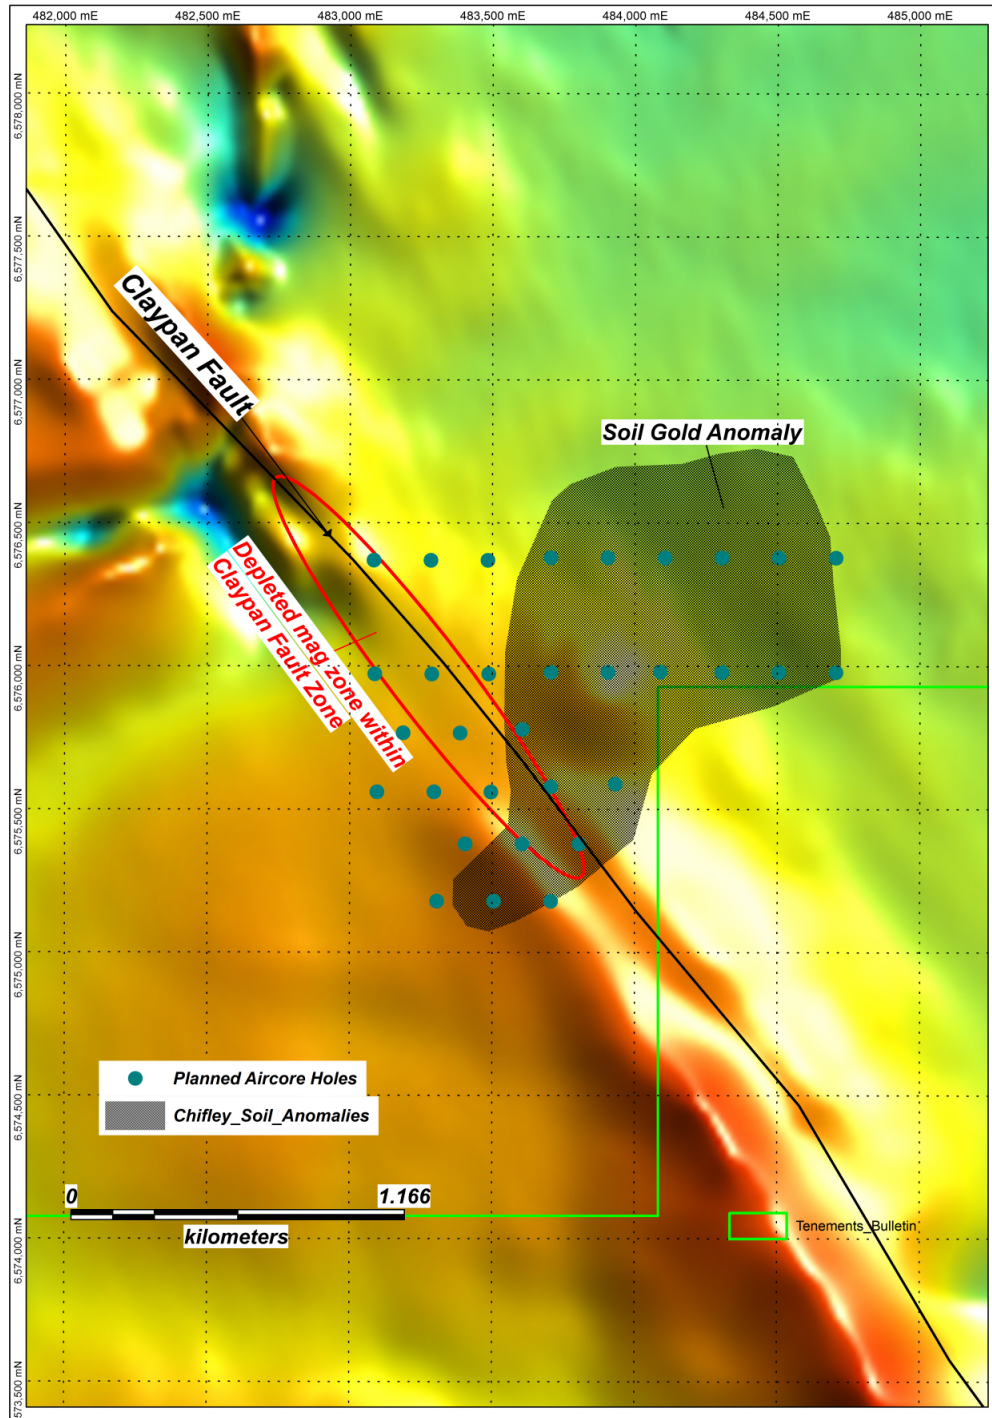

Figure 2: Chifley Aircore drilling located on target summary showing location of gold geochemical anomaly and partly coincident demagnetised zone over interpreted mafic and ultramafic greenstones in the Claypan Fault.
