Yojee December Q2 FY26 Activity Report

HIGHLIGHTS

- **Strong Cash Reserves:** Closing cash position of \$6.18 million as at 31 December 2025 with no debt, following the successful capital raise in the prior quarter.
- **Operating Efficiency:** Achieved a 23% reduction in net operating cash outflows, down to \$607k from \$793k in Q1 FY26. This improvement reflects disciplined administrative rationalisation and the non-recurrence of front-loaded annual costs.
- **MOSAIC Beta Milestone:** Continued live environment testing of the MOSAIC platform with foundational freight forwarding and customs broker partners in Australia, marking a critical step toward full commercial transition.
- **New Customer Acquisitions:** Contracts signed and implementation commenced for two additional Australian TCMS customers, Fracht Australia and Road Feeder Services (RFS), with initial volumes expected in early 2026.
- **Continued Growth:** Signed and extended operational rollout for Röhlig Logistics to Australia, New Zealand, and Southeast Asia.
- **Strengthened leadership team:** Strengthened the executive team and Board with the appointment of veteran logistics leaders from Mainfreight and Agility, including Robert Cotter as Chief Growth Officer (CGO) and Frank Guerra as Non-Executive Director, to help drive the commercialisation of the MOSAIC platform.

OPERATIONAL & COMMERCIAL UPDATE

MOSAIC Platform Development

The MOSAIC customer BETA program continued its trajectory throughout the quarter, moving beyond basic functionality into robust testing of platform capabilities with industry participants across diverse logistics verticals. This deliberate, wide-ranging engagement ensures that MOSAIC is not just a technical solution, but a product designed for the freight forwarding community, by the community.

Key insights from this phase include:

- **Vertical-Specific Testing:** Execution of live-environment testing across multiple operational models to ensure platform flexibility and stability.
- **Invaluable Iteration:** Feedback from foundation partners has been instrumental in refining the User Experience (UX), allowing the engineering team to iterate rapidly on features that simplify complex workflows.
- **User Delight & Frictionless Onboarding:** Development focus has shifted toward ensuring the platform is intuitive and "delights" the end-user, which the Company identifies as a primary driver for rapid commercial uptake.
- **Next Milestone:** The BETA program remains on track to conclude in Q3 FY26.

ASX: YOJ

Simplifying the Complex

- **Accelerated Product Development:** As the global logistics landscape undergoes rapid, daily shifts, Yojee continues to attract top-tier engineering talent to our hubs in Australia and Singapore. This strategic expansion of our technical team is focused on delivering unique, market-differentiating features within the MOSAIC platform.
- **Speed to Market:** Rather than a delay, the comprehensive BETA phase strengthens our path to market by de-risking performance and enabling faster, broader adoption through the remainder of 2026 prior to full commercial transition.

TCMS Platform Growth

Transport Carrier Management System (TCMS) continues to demonstrate strong momentum through a dual-track growth strategy focused on expanding existing enterprise partnerships and securing new market entrants.

- **Existing Customer Expansion:** The Company is actively collaborating with its Tier-1 enterprise customers to replicate established success across new geographic regions and logistics verticals. This "land and expand" approach is expected to drive meaningful transaction volume growth throughout FY26.
- **High-Margin Scalability:** A key focus of the current TCMS rollout is scaling the platform's global reach with minimal incremental investment. By leveraging our established cloud-native architecture, we are engaging with large-scale enterprise organisations in a manner that allows for rapid deployment without adding significant engineering or infrastructure overhead.
- **Diversified Pipeline:** We continue to build a robust sales pipeline, targeting international logistics providers that require multi-region, connected transport execution tools. This includes the recent addition of Fracht Australia and Road Feeder Services (RFS), both of which are currently in the implementation phase with initial volumes anticipated in early 2026.
- **Röhlig Logistics:** Successfully operationalised the contract extension across Australia, New Zealand, and Southeast Asia following the initial Singapore rollout.

LEADERSHIP FOR COMMERCIALISATION

Yojee has significantly strengthened its leadership team to align with the 2026 MOSAIC commercial launch:

- **Chief Growth Officer (CGO):** Mr. Robert Cotter (commencing 2 Feb 2026). A veteran with 35 years of experience at Mainfreight and Agility, he will lead the global MOSAIC expansion.
- **Non-Executive Director:** Mr. Frank Guerra (effective 1 Jan 2026). Formerly the Australasian CEO of Agility Logistics, bringing over 45 years of deep industry expertise.
- **Chief Product Officer (CPO):** Mr. Shane D'Aprile has transitioned from CRO to CPO to lead the integrated strategic roadmap for both TCMS and MOSAIC.

FINANCIAL COMMENTARY

The Company closed the quarter with \$6.18 million in cash and no debt. A disciplined approach to administrative spend and the non-recurrence of front-loaded annual costs resulted in a 23% reduction in net operating cash outflows (down to \$607k from \$793k in the prior quarter).

Cash receipts were \$90k for the quarter. This reflects a return to normalised recurring billing, following the prior quarter's \$231k result, which included the successful collection of significant legacy arrears.

As noted in Section 6 of the Appendix 4C, payments to related parties totalled \$96k, comprising Director fees and salaries.

The Company invested \$568k in the capitalisation of development costs for the MOSAIC platform.

CEO OUTLOOK

Mark Connell, CEO: *"This quarter was about precision. We successfully reduced our operating burn while simultaneously attracting some of the industry's most respected names to our leadership table. These moves, combined with the successful ongoing testing of MOSAIC in a live environment, position us perfectly for our 2026 commercialisation phase. We have the runway, the tech, and now the team to deliver."*
