

# DECEMBER 2025 QUARTERLY REPORT

NGX Limited (ASX: NGX) (“NGX” or “Company”) is pleased to present its Quarterly Report for the period ending 31 December 2025. The Company is developing a portfolio of minerals critical to the clean energy transition.

## HIGHLIGHTS

---

### Natural Graphite – Mine Pre-Development

- The Company commenced and is continuing a sampling and auger drilling program across regional projects, Msinja and Lifidzi to test the extent of known high-grade titanium mineralisation across the prospects.
- NGX continued to assess Malingunde’s development pathway and technical studies, targeting a scalable operation leveraging the project’s significant advantages, being saprolite-hosted graphite. Studies and work programs include upstream optimisation work intended to support precursor Active Anode Material (**AAM**) production.

### Natural Graphite – Product Qualification & Downstream

- Ongoing engagement and market assessment to explore opportunities for strategic partnerships, future sales and offtake agreements.

### Uranium Exploration Projects in Namibia

- In December, the Company received notification that EPL9921 (**Rossingburg**) was approved to ‘Preparedness to Grant’, by Namibia’s Ministry of Industries, Mines and Energy. NGX is now required to complete an environmental clearance to enable the licence to be granted.
- Tubusis’ Environmental Clearance Certificate (**ECC**) was approved by the Ministry of Environment, Forestry and Tourism (**MEFT**), allowing the licence to proceed to official granting.
- Preparations and planning for an initial exploration program for Tubusis have commenced.

### Corporate & Business Development

- NGX is in a strong financial position with cash at bank of approximately \$2.7 million and no debt as at 31 December 2025.
- The Company is actively assessing and developing further opportunities in the clean energy and critical minerals sectors, as well as other high-growth opportunities to expand and complement its current portfolio.

## NATURAL GRAPHITE

During the quarter, NGX commenced an auger drilling exploration program across all three licences in Malawi. The Company is investigating the known high-grade titanium mineralisation across Malingunde and its other regional projects, Msinja and Lifidzi. Initial work was completed by the previous owners, Sovereign Metals Limited, who confirmed the presence of high-grade titanium and its potential to be a by-product in the operation. The initial focus was at Msinja with the completion of the first phase. The raw samples are currently being split and prepared for transport to South Africa for processing and analysis with, despatch scheduled for January.

NGX continued technical studies aimed at defining the most effective development pathway for the Malingunde Project. The revised development pathway is designed to leverage Malingunde's saprolite-advantage, which offers significant benefits such as easier extraction, processing, higher purity, low sulphur content and reduced environmental footprint of the integrated production of AAM. The work includes a revised mining plan, updated processing plan, dry stacked tailings strategy, as well as an updated Environmental & Social Impact Assessment (ESIA) plan. Malingunde is considered one of the best undeveloped sources of natural graphite in south-eastern Africa, a region emerging as an alternative supply source to the China-dominant market.

## URANIUM EXPLORATION PROJECTS IN NAMIBIA

NGX holds two earn-in joint venture agreements to acquire the Tubusis and Rossingburg uranium exploration project applications in Namibia. Both EPLs are located in the Erongo Region of Namibia, one of the world's best-known uranium districts with multiple operating mines in the area.

In December, NGX received positive updates from the respective vendors on the permitting of both projects. For EPL9921 (**Rossingburg**) the EPL application was approved by the Namibia's Ministry of Industries, Mines and Energy and evaluated to 'Intention of Grant'. NGX is now required to complete environmental clearance to enable the licence to be granted. The necessary planning and initial scoping of the environment clearance work has already commenced. For EPL9629 (Tubusis) the Environmental Clearance Certificate (ECC) was approved by the Ministry of Environment, Forestry and Tourism (MEFT). With approval of the ECC, the licence can now proceed to official granting. The Company has commenced preparation and planning for an initial exploration program for Tubusis.

## CORPORATE

---

NGX is in a strong financial position with cash at bank of approximately \$2.7 million and no debt as at 31 December 2025. During the quarter, the Company assessed and is developing further opportunities in the clean energy space, other critical minerals sectors as well as other high-growth opportunities to expand and complement its current portfolio.

### **Competent Person Statement**

*The information in this announcement that relates to Metallurgical Downstream Studies is extracted from announcements dated 24 October 2024, 3 February 2025 and 5 March 2025, which are available to view at [www.ngxlimited.com](http://www.ngxlimited.com). NGX confirms that: a) it is not aware of any new information or data that materially affects the information included in the original announcements; b) all material assumptions included in the original announcements continue to apply and have not materially changed; and c) the form and context in which the relevant Competent Persons' findings are presented in this announcement have not been materially changed from the original announcements.*

### **Forward Looking Statements**

*Statements regarding plans with respect to NGX's project are forward-looking statements. There can be no assurance that the Company's plans for development of the projects will proceed as currently expected. These forward-looking statements are based on the Company's expectations and beliefs concerning future events. Forward-looking statements are necessarily subject to risks, uncertainties and other factors, many of which are outside the control of the Company which could cause actual results to differ materially from such statements. The Company makes no undertaking to subsequently update or revise the forward-looking statements made in this announcement, to reflect the circumstances or events after the date of that announcement.*

### **Disclaimer**

*In relation to the disclosure of visual information and descriptions, the Company cautions that images displayed are for general illustrative purposes only, and that the visuals displayed, visual methods and estimation of mineral abundance should not be a proxy for laboratory analysis, and that laboratory analysis would be required to determine grades. Visual information also potentially provides no information regarding impurities or deleterious physical properties relevant to valuations.*
