

30% Expansion of Portland Creek Footprint Complete

Infini Resources Ltd (ASX: I88, “Infini” or the “Company”) is pleased to announce the completion of the acquisition of Mineral Licences 036831M and 036832M, located immediately south of the Company’s flagship Portland Creek Uranium Project in Newfoundland, Canada, as previously announced on 24 December 2025.

The completion of this transaction increases Infini’s Portland Creek landholding by approximately 7,700 hectares, lifting the Company’s total land position in Newfoundland to over 32,000 hectares and consolidating Infini’s control over what is emerging as a potential district-scale uranium system.

Transaction Completion

The Company confirms that all conditions under the binding purchase agreement have been satisfied and the transaction has now been completed. As a result:

- 100% legal and beneficial ownership of Mineral Licences 036831M and 036832M has transferred to Infini’s wholly owned Canadian subsidiary, Infini Newfoundland and Labrador Ltd.
- Cash consideration of A\$50,000 has been paid to the vendor.
- A total of 1,464,435 fully paid ordinary shares have been issued to the vendor at an issue price of A\$0.239 per share, being the Company’s 5-day VWAP prior to execution, in accordance with the previously disclosed terms.
- A 2.0% Net Smelter Return (NSR) royalty has been granted over the acquired licences under industry-standard conditions.

The abovementioned consideration shares are subject to a 12-month voluntary escrow period and will be issued pursuant to the Company’s placement capacity under ASX Listing Rule 7.1.

About Portland Creek Uranium Project

The Portland Creek Uranium Project spans 328 km² and lies within the Precambrian Long-Range Complex of the Humber Tectonic-Stratigraphic Zone. The geology consists of metaquartzite and a suite of paragneisses, intruded by leucocratic granite, which are believed to have been thrust westward over Paleozoic carbonate-dominant sediments.

The project area covers a large regional uranium anomaly, first identified in the 1970's through a Newfoundland government lake sediment sampling program. Originally, one uranium showing was recorded in the Newfoundland Mineral Deposit Index, reporting 2,180 ppm U₃O₈. A compilation of historic and recent exploration data has since delineated a 6 km zone of anomalous uranium and radon gas in lake sediments, soils and in an airborne radiometric survey. This anomaly closely follows a prominent fault scarp, marking the edge of a granitic plateau interpreted as a deep-seated fault.

Since listing, the Company has verified historical uranium anomalies and completed a soil sampling grid over the Falls Lake Prospect (formerly the Talus Prospect). This work defined a ~800 m x 100 m high-grade uranium anomaly, with a peak result of 74,997 ppm U₃O₈. This anomaly is located down-ice and west of a 1.5 km radiometric anomaly. Additionally, Infini has identified a southern 500 m-wide cluster of high-grade soil samples, which includes a peak of 1,500 ppm U₃O₈ and lies 1.5 km from the recently completed Phase 2 drill program.

Compliance Statement

This announcement contains information on the Portland Creek Project extracted from ASX market announcements dated 10 January 2024, 15 January 2024, 29 January 2024, 19 February 2024, 28 May 2024, 1 July 2024, 10 July 2024, 22 July 2024, 14 October 2024, 23 December 2024, 26 March 2025, 4 July 2025, 14 July 2025, 28 July 2025, 30 July 2025, 3 September 2025, 11 September 2025, 9 October 2025, 13 October 2025, 21 November 2025, 12 December 2025 and 24 December 2025 reported in accordance with the 2012 edition of the "Australian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves" (JORC Code). The original market announcements are available to view on www.infiniresources.com.au and www.asx.com.au. The Company is not aware of any new information or data that materially affects the information included in the original market announcement.

This report contains information regarding the Des Herbiers Mineral Resources Estimate extracted from the Company's Prospectus dated 30 November 2023 and released to the ASX market announcements platform on 10 January 2024, reported in accordance with the 2012 edition of the "Australian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves" (JORC Code). The Company confirms that it is not aware of any new information or data that materially affects the information included in any original announcement and that all material assumptions and technical parameters underpinning the estimates in the original market announcement continue to apply and have not materially changed. The original market announcements are available to view on www.infiniresources.com.au and www.asx.com.au.

Forward Looking Statements

This announcement may contain certain forward-looking statements and projections. Such forward looking statements/projections are estimates for discussion purposes only and should not be relied upon. Forward looking statements/projections are inherently uncertain and may therefore differ materially from results ultimately achieved. Infini Resources Limited does not make any representations and provides no warranties concerning the accuracy of the projections and disclaims any obligation to update or revise any forward-looking statements/projects based on new information, future events or otherwise except to the extent required by applicable laws. While the information contained in this report has been prepared in good faith, neither Infini Resources Limited or any of its directors, officers, agents, employees or advisors give any representation or warranty, express or implied, as to the fairness, accuracy, completeness or correctness of the information, opinions and conclusions contained in this announcement.
