

## Update on Bitcoin Treasury Management

The Board of Directors of 333D Ltd (ASX:T3D or “**Company**”), a company specialising in the creation and management of digital assets, provides an update on its Bitcoin treasury holdings pursuant to its *Bitcoin Treasury Management Policy* (the “**Policy**”).

### ASX Listing Rule 3.1 (continuous disclosure)

The Company’s Policy requires ASX disclosure for any material change in the Bitcoin position (acquisition, disposal or impairment) to be disclosed under *ASX Listing Rule 3.1*. A material change is any movement in the Bitcoin position that changes (+/-) the total assets of the consolidated group greater than 10%.

The market value of the Company’s Bitcoin holdings as at 1 February 2026 (2100 AEST) was \$228,838 which represents an impairment of \$141,661 (equivalent to 13.6% of the total assets of the consolidated group).

The Company holds Bitcoin as part of its treasury management strategy. Bitcoin is subject to market price volatility and is predominantly priced and traded in US dollars (USD). Accordingly, the Australian dollar (AUD) value of the Company’s Bitcoin holdings is affected by both movements in the Bitcoin market price and fluctuations in the AUD/USD exchange rate.

The decrease in the AUD value of the Company’s Bitcoin holdings reflects exchange rate movements, with the Australian dollar strengthening against the US dollar, reducing the AUD equivalent valuation along with volatility in USD cryptocurrency prices more generally as macro sentiment shifted.

The Company continues to monitor digital asset and foreign exchange exposures as part of its treasury risk management framework.

The Company does not currently hedge cryptocurrency or foreign exchange exposures associated with its Bitcoin holdings, and investors should expect reported valuations to vary with market conditions.

- END -

The release of this announcement was **authorised by the Board of Directors** of the Company.

## **About 333D Limited**

333D Limited is a company that seeks to capitalise upon opportunities in the digital line of business as new technologies are developed from both digital capture and digital creation perspectives, that will lend themselves for use in a myriad of interfaces, both physical (3D printed) and/or across other or additional digital platforms. 333D specialises in the digital capture of a subject matter; digital creation of data files incorporating diagnostic or medical imaging in DICOM format, 2D, 3D and animated digital content including still photography, digital design and motion video; and encoding data files using artificial intelligence such that a digitally created file is generated that is viewable in a 3D format and capable of being printed by a 3D printer. 333D Limited also provides bespoke design and management of digital assets (including 3D print files) and bespoke 3D printing bureau services
