

**SECURING DEMAND-DRIVEN METALS IN ANGOLA**

***Appointment of Exploration Manager***

Tyranna Resources Limited (ASX:TYX) ("**Tyranna**" or the "**Company**") is pleased to announce that Mr Paulo Caessa has been appointed Exploration Manager and will head the Company's exploration activities.

Mr Caessa is a Portuguese geologist with over 30 years' relevant experience as a field-orientated geologist having worked on base metal, gold, battery and REE metals projects in Europe, Asia, Central and South America and Africa, including in Angola.

This included an extensive field mapping assignment in Angola for over 4 years under the Angolan National Geology Plan (PLANAGEO) which saw the southern half of the country mapped at scales between 1:50,000 and 1:250,000.

Mr Caessa has previously held executive level positions and a directorship with a Brazilian-focussed, TSX-listed gold explorer. He is a member of Associação Portuguesa de Geólogos, the Society of Economic Geologists and a Professional Geologist (EuroGeol) of the European federation of Geologists.

*Tyranna's Managing Director, David Crook said:*

"Paulo brings a deep knowledge of the geological systems of Angola along with a strong work ethic and demonstrated ability to be able to operate in a multi-cultural environment that will ensure exploration programs advance efficiently.

"Paulo complements this further being a Portuguese speaker, the official language of Angola, which is already proving to greatly simplify technical data exchanges.

"We welcome Paulo to our team."
