RC Drilling, Westminster Project – February 2026

The Directors are pleased to announce that the drill is on site, and we are now positioning over the first drill line.

Truscott Mining Ltd will re-establish drilling activity on the Westminster Project by undertaking 2,500 meters of RC drilling. Weather permitting, the schedule is for the program to take up to three weeks. With the current level of exploration activity in Australia, it may take a further 6 to 8 weeks for final assay results to be available.

Yours sincerely

Michael J Povey
Company Secretary
Truscott Mining Corporation Ltd
