PILLAR 3 REPORT

WESTPAC

DECEMBER 2025

INCORPORATING THE REQUIREMENTS OF APS 330

Acknowledgement of Indigenous Peoples

Westpac acknowledges the First Peoples of Australia. We recognise their ongoing role as Traditional Owners of the land and waters of this country and pay our respects to Elders, past and present. We extend our respect to Westpac's Aboriginal and Torres Strait Islander employees, partners and stakeholders and to the Indigenous Peoples in the other locations where we operate.

In Aotearoa (New Zealand) we also acknowledge tāngata whenua and the unique relationship that Indigenous Peoples share with all New Zealanders under Te Tiriti o Waitangi.

Summary of Credit Risk

CMS1: Comparison of modelled and standardised RWA at risk level

INTRODUCTION

Westpac Banking Corporation is an Authorised Deposit-taking Institution (ADI) subject to regulation by the Australian Prudential Regulation Authority (APRA). Westpac is primarily accredited to use the Advanced Internal Ratings-Based Approach (A-IRB) for credit risk, the Standardised Measurement Approach (SMA) for operational risk and is required to apply the Pillar 1 Basel capital framework in our assessment of traded market risk and interest rate risk in the banking book (IRRBB).

This report has been prepared in accordance with APS 330 Public Disclosure (APS 330) and Westpac's Board approved Prudential Disclosure Policy. This report provides prudential information about our risk management practices and measures. Westpac is required to comply with the disclosure requirements issued by the Basel Committee on Banking Supervision (BCBS), subject to certain amendments by APRA. Disclosures requirements vary, for quarterly, semi-annual and annual Pillar 3 reports.

In addition to this report, the regulatory disclosures section of Westpac's website¹ contains the reporting requirements for capital instruments under paragraph 37 of APS 330 and CCA: Main features of regulatory capital instruments. Capital instruments disclosures are updated when:

- A new capital instrument is issued that will form part of regulatory capital; or
- A capital instrument is redeemed, converted into Common equity tier 1 (CET1) capital, written off, or its terms and conditions are changed.

1. The KM1 key metrics reflects the application of expected credit loss accounting under AASB 9 Financial Instruments.

KEY METRICS

First Quarter 2026 - Fourth Quarter 2025 Level 2 CET1 capital ratio movement

The Level 2 CET1 capital ratio at 31 December 2025 was 12.31%, 22 basis points lower than 30 September 2025. Key movements included:

- First Quarter 2026 net profit: A 42 basis point increase;
- Payment of the 2025 final ordinary dividend: A 59 basis point reduction;
- Risk weighted assets (RWA) movement: A 9 basis point reduction with higher credit RWA partly offset by lower operational RWA; and
- Capital deductions and other items: A 4 basis point increase mainly due to lower deferred tax asset and capitalised software deductions.

The Level 1 CET1 capital ratio was 12.52% at 31 December 2025, 22 basis points lower than 30 September 2025 with movements broadly in line with Level 2.

Tier 2 capital

The Group issued \$1.0 billion of Tier 2 capital instruments over the quarter. The impact of these issuances was an increase in the total capital ratio of approximately 22 basis points. In addition, foreign currency revaluations reduced Tier 2 capital mainly due to the appreciation of the AUD against the USD.

Domestic systemically important banks (D-SIBs), including Westpac, have a minimum total capital requirement of 18.25% from 1 January 2026. Westpac's total capital ratio of 21.57% at 31 December 2025 exceeds this required level. We expect any additional Tier 2 issuance needed due to APRA's removal of AT1 capital instruments to be manageable over the transition period.

Risk Weighted Assets (RWA)

\$m	31 December 2025	30 September 2025	% Mov't
Credit risk ^a	357,736	354,476	1
Market risk	10,728	9,873	9
Interest rate risk in the banking book	38,663	37,290	4
Operational risk	43,726	48,409	(10)
Total risk weighted assets (pre-floor)	450,853	450,048	-
Floor adjustment	1,519	-	-
Total	452,372	450,048	1

a. Includes counterparty credit risk, credit valuation adjustment, securitisation exposures in the banking book and settlement risk.

Total RWA increased by 0.5% to \$452.4 billion over the quarter with higher credit RWA partly offset by lower operational RWA.

Credit RWA increased by \$3.3 billion. Key movements included:

- A \$10.5 billion increase from higher lending primarily in Corporate and Residential Mortgages;
- A \$3.2 billion decrease due to improvements in Residential Mortgages delinquency rates and Corporate credit quality metrics;
- A \$2.3 billion decrease from the removal of a \$1 billion APRA RWA overlay related to the usage of a customer risk grade proxy on a small sub-set of non-retail exposures and data refinements mainly in Corporate;
- A \$1.0 billion decrease from foreign currency translation impacts, predominately the appreciation of the AUD against the NZD and USD; and
- A \$0.7 billion decrease from counterparty credit risk and mark-to-market related credit risk due to decreases in the mark-to-market value of derivatives from changes in underlying foreign currency rates.

Non-credit RWA decreased by \$2.5 billion. Key movements included:

- Operational RWA: \$4.7 billion decrease from:
 - A \$6.25 billion reduction following the removal of the remaining \$500 million operational risk capital overlay; and
 - A \$1.6 billion increase due to the annual SMA operational risk review based on the latest annual audited financial statements.
- IRRBB RWA: A \$1.4 billion increase from the unwind of the embedded gain component due to higher interest rates and additional capital required for increased core deposit hedging partly offset by reductions resulting from the revised APS 117 standard changes; and
- Market RWA: A \$0.9 billion increase mainly from higher market risk exposures.

The capital floor RWA adjustment as at 31 December 2025 was \$1.5 billion driven mainly from higher lending in Corporate and Residential Mortgages.

Leverage ratio

The leverage ratio represents the percentage of Tier 1 capital relative to the Exposure Measure¹. At 31 December 2025, Westpac's leverage ratio was 5.00%, down 7 basis points from 30 September 2025. The ratio remains well above APRA's current regulatory minimum requirement of 3.5%. The decrease in the leverage ratio was mainly due to higher total exposures mostly from higher lending and lower Tier 1 capital following the payment of the 2025 final ordinary dividend, partly offset by lower securities financing transaction (SFT) exposures.

APRA has announced changes to banks' capital requirements with effect from 1 January 2027, as outlined in the Capital Overview section. This includes changes to CET1, Tier 1, total capital and the leverage ratio.

Liquidity Coverage Ratio (LCR)

Westpac's average LCR for the quarter ended 31 December 2025 was 133% (30 September 2025: 137%), well above the regulatory minimum of 100%. The decrease in the ratio was due to lower average liquid assets.

Net Stable Funding Ratio (NSFR)

Westpac had an NSFR of 112% as of 31 December 2025 (30 September 2025: 113%) and continues to be above the regulatory minimum of 100%. The decrease in the ratio is attributable to an increase in required stable funding driven by higher lending, partially offset by an increase in available stable funding driven by growth in customer deposits.

1. As defined under Attachment D of APS 110: Capital Adequacy.

GROUP STRUCTURE

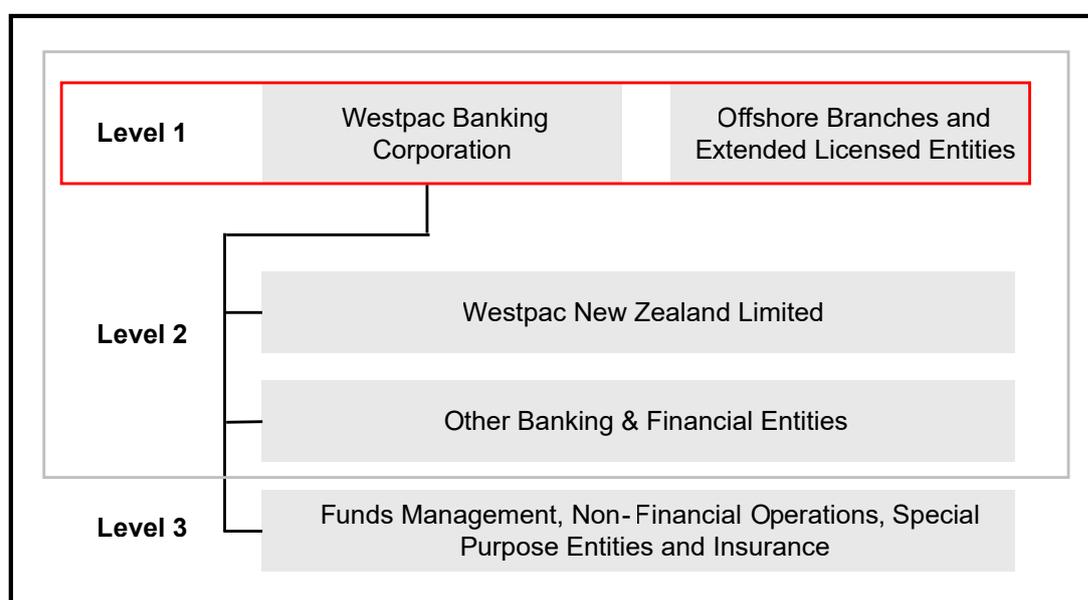

APRA applies a tiered approach to measuring Westpac's capital adequacy¹ by assessing financial strength at three levels:

- Level 1, comprising Westpac Banking Corporation and its subsidiary entities that have been approved by APRA as being part of a single 'Extended Licensed Entity' (ELE) for the purposes of measuring capital adequacy;
- Level 2, the consolidation of Westpac Banking Corporation and all its subsidiary entities except those entities specifically excluded by APRA regulations. The head of the Level 2 group is Westpac Banking Corporation; and
- Level 3, the consolidation of Westpac Banking Corporation and all its subsidiary entities.

Unless otherwise specified, all quantitative disclosures in this report refer to the prudential assessment of Westpac's financial strength on a Level 2 basis².

The Westpac Group

The following diagram shows the Level 3 conglomerate group and illustrates the different tiers of regulatory consolidation.

Accounting consolidation³

The consolidated financial statements incorporate the assets and liabilities of all entities including structured entities controlled by Westpac. Westpac and its subsidiaries are referred to collectively as the 'Group'. The effects of all transactions between entities in the Group are eliminated on consolidation. Control exists when the parent entity is exposed to, or has rights to, variable returns from its involvement with an entity, and has the ability to affect those returns through its power over that entity. Subsidiaries are fully consolidated from the date on which control commences and they are no longer consolidated from the date that control ceases.

Group entities excluded from the regulatory consolidation at Level 2

Regulatory consolidation at Level 2 covers the global operations of Westpac and its subsidiary entities, including other controlled banking, securities and financial entities, except for those entities involved in the following business activities:

- Acting as manager, responsible entity, approved trustee, trustee or similar role in relation to funds management;
- Non-financial (commercial) operations;
- Special purpose entities to which assets have been transferred in accordance with the requirements of *APS 120 Securitisation*; or
- Insurance.

Retained earnings and equity investments in subsidiary entities excluded from the consolidation at Level 2 are deducted from capital, with the exception of securitisation special purpose entities.

1. APS 110 Capital Adequacy outlines the overall framework adopted by APRA for the purpose of assessing the capital adequacy of an ADI.
 2. Impaired assets and provisions held in Level 3 entities are excluded from the tables in this report.
 3. Refer to Note 29 of Westpac's 2025 Annual Report for further details.

Subsidiary banking entities

Westpac New Zealand Limited (WNZL), a wholly owned subsidiary entity, is a registered bank incorporated in New Zealand and regulated by, among others, the Reserve Bank of New Zealand (RBNZ) for prudential purposes. WNZL uses both A-IRB and Standardised methodologies for credit risk and SMA for operational risk. Other subsidiary banking entities in the Group include Westpac Bank PNG Limited and Westpac Europe GMBH. For the purposes of determining Westpac's capital adequacy, subsidiary banking entities are consolidated at Level 2.

Customer operations

Westpac is one of Australia's leading providers of banking and certain financial services, operating under multiple brands in Australia and in New Zealand, with a small presence in Europe, North America, Asia and the Pacific. Westpac provides banking products and services through its digital and online channels, supported by a branch and ATM network, contact centres and relationship and product managers.

Restrictions and major impediments on the transfer of funds or regulatory capital within the Group

Certain subsidiary banking and trustee entities are subject to specific and local prudential regulation in their own right, including capital adequacy requirements and investment or intra-group exposure limits. Westpac seeks to ensure that its subsidiary entities are adequately capitalised and adhere to regulatory requirements at all times. Dividends and capital are repatriated in line with the Group's policy subject to subsidiary Board approval and local regulations.

Intra-group exposure limits

Exposures to related entities are managed within the prudential limits prescribed by APRA in *APS 222 Associations with Related Entities*¹. Westpac has an internal limit structure and approval process governing credit exposures to related entities. This limit structure and approval process, combined with APRA's prudential limits, is designed to reduce the potential for unacceptable contagion risk.

Updates to large and related entity exposure limit calculations resulting from the changes to banks' capital requirements are outlined in the Capital Overview section. These changes are effective from 1 January 2027.

1. For the purposes of APS 222, subsidiaries controlled by Westpac, other than subsidiaries that form part of the ELE, represent 'related entities'. Prudential and internal limits apply to intra-group exposures between the ELE and related entities, both on an individual and aggregate basis.

CAPITAL OVERVIEW

Capital management strategy

Westpac's capital management strategy is reviewed on an ongoing basis, including through an annual Internal Capital Adequacy Assessment Process (ICAAP). Key considerations include:

- Regulatory capital minimums together with the capital conservation buffer and countercyclical capital buffer comprise the Total CET1 Requirement. The total CET1 requirement is currently at least 10.25% and 10.50% effective 1 January 2027¹;
- Strategy, business mix and operations and contingency plans;
- Perspectives of external stakeholders including rating agencies as well as equity and debt investors; and
- A stress testing framework that tests our resilience under a range of adverse economic scenarios.

The Board has determined a target post dividend CET1 capital ratio of above 11.25% in normal operating conditions.

Regulatory developments

Interest Rate Risk in the Banking Book

APRA's revised *APS 117 Capital Adequacy: Interest Rate Risk in the Banking Book* came into effect on 1 October 2025. The revised requirements include implementation of APRA's reaccreditation outcomes for Westpac's IRRBB models which are reflected in the 31 December 2025 amounts of this Pillar 3 report. Comparatives remain unchanged and are based on the prior APS 117.

APRA's phase out of Additional Tier 1 (AT1) capital as eligible bank capital

On 4 December 2025, APRA published the final changes to the relevant prudential and reporting standards resulting from the phase out of AT1 with an effective date of 1 January 2027. Under these revised standards, large internationally active banks such as Westpac will replace 1.5% of AT1 capital with 1.25% of Tier 2 capital and 0.25% of CET1 capital. The total CET1 requirement, including regulatory buffers, will increase from 10.25% to 10.50%. There is no overall increase in total capital requirements for banks.

On implementation of these revised prudential and reporting standards, existing AT1 capital instruments would be included in the calculation of the amount of total capital, until their first scheduled call date. Existing Westpac AT1 capital instruments would reach their first scheduled optional redemption dates by 2031 at the latest.

In addition, effective 1 January 2027 the minimum leverage ratio requirement will be 3.25% based on CET1 capital replacing the current requirement of 3.50% based on Tier 1 capital. *APS 221 Large Exposures* and *APS 222 Associations with Related Entities* exposure limits remain unchanged, however will be based on CET1 capital rather than Tier 1 capital.

RBNZ capital review

On 17 December 2025, the RBNZ published its decisions on the key capital settings for deposit takers. For Group 1 deposit takers², including WNZL, the key proposals include:

- A total CET1 capital ratio requirement of 12%, with a total capital ratio requirement of 15% (including a Prudential Capital Buffer ratio of 6%) and an additional Loss Absorbing Capacity (LAC) requirement of 6%;
- Tier 2 capital and LAC instruments will be required to be issued internally to parents (for example to WBC) and LAC will take a form similar to Tier 2 capital;
- Removal of AT1 instruments from the capital stack;
- More granular standardised risk weights, including lower risk weights in some areas; and
- Setting the long-run level for the counter-cyclical capital buffer component of the Prudential Capital Buffer at 1%.

The RBNZ will consult on the LAC instrument design and implementation timelines for options affecting both future LAC and Tier 2 instruments and the phase-out of existing AT1 and Tier 2 instruments during 2026 and 2027.

1. Noting that APRA may apply higher CET1 requirements for an individual ADI.
2. New Zealand deposit takers with total assets of NZ\$100 billion or more.

OV1: Overview of Risk Weighted Assets (RWA)

This table presents an overview of Westpac's RWA and minimum capital requirements by risk type and approach.

Item	Description	RWA			Minimum capital requirements
		31 December 2025	30 September 2025	30 June 2025	31 December 2025
1	Credit risk (excluding counterparty credit risk)	337,841	334,449	336,419	27,028
2	Of which: standardised approach (SA)	23,398	23,427	24,069	1,872

9 RWA as at end of reporting period	314,443	311,022

LEVERAGE RATIO

LR2: Leverage ratio common disclosure template

The table below provides a detailed breakdown of the components of the leverage ratio denominator, as well as information on the leverage ratio, minimum requirements and buffers.

\$m	31 December 2025	30 September 2025
On-balance sheet exposures		
1 On-balance sheet exposures (excluding derivatives and securities financing transactions (SFTs), but including collateral)	1,125,672	1,104,980
2 Gross-up for derivatives collateral provided where deducted from balance sheet assets pursuant to the operative accounting framework	4,315	3,715
3 (Deductions of receivable assets for cash variation margin provided in derivatives transactions)	(4,798)	(3,776)
4 (Adjustment for securities received under securities financing transactions that are recognised as an asset)	-	-
5 (Specific and general provisions associated with on-balance sheet exposures that are deducted from Tier 1 capital)	-	-
6 (Asset amounts deducted in determining Tier 1 capital and regulatory adjustments)	(15,334)	(15,636)
7 Total on-balance sheet exposures (excluding derivatives and SFTs) (sum of rows 1 to 6)	1,109,855	1,089,283
Derivative exposures		
8 Replacement cost associated with all derivatives transactions (where applicable net of eligible cash variation margin, with bilateral netting and/or the specific treatment for client cleared derivatives)	6,443	7,131
9 Add-on amounts for potential future exposure associated with all derivatives transactions	28,448	27,710
10 (Exempted central counterparty (CCP) leg of client-cleared trade exposures)	-	-
11 Adjusted effective notional amount of written credit derivatives	2,354	5,726
12 (Adjusted effective notional offsets and add-on deductions for written credit derivatives)	(2,354)	(5,726)
13 Total derivative exposures (sum of rows 8 to 12)	34,891	34,841
Securities financing transaction exposures		
14 Gross SFT assets (with no recognition of netting), after adjustment for sale accounting transactions	26,308	42,073
15 (Netted amounts of cash payables and cash receivables of gross SFT assets)	(2,127)	-
16 Counterparty credit risk exposure for SFT assets	2,748	2,994
17 Agent transaction exposures	-	-
18 Total securities financing transaction exposures (sum of rows 14 to 17)	26,929	45,067
Other off-balance sheet exposures		
19 Off-balance sheet exposure at gross notional amount	230,692	227,441
20 (Adjustments for conversion to credit equivalent amounts)	(116,254)	(114,425)
21 (Specific and general provisions associated with off-balance sheet exposures deducted in determining Tier 1 capital)	-	-
22 Off-balance sheet items (sum of rows 19 to 21)	114,438	113,016
Capital and total exposures		
23 Tier 1 capital	64,256	64,978
24 Total exposures (sum of rows 7, 13, 18 and 22)	1,286,113	1,282,207
Leverage ratio		
25 Leverage ratio (including the impact of any applicable temporary exemption of central bank reserves)	5.00%	5.07%
25a Leverage ratio (excluding the impact of any applicable temporary exemption of central bank reserves)	5.00%	5.07%
26 National minimum leverage ratio requirement	3.50%	3.50%
27 Applicable leverage buffers	-	-
Disclosure of mean values		
28 Mean value of gross SFT assets, after adjustment for sale accounting transactions and netted of amounts of associated cash payables and cash receivables	24,181	42,073
29 Quarter-end value of gross SFT assets, after adjustment for sale accounting transactions and netted of amounts of associated cash payables and cash receivables	21,587	47,266
30 Total exposures (including the impact of any applicable temporary exemption of central bank reserves) incorporating mean values from row 28 of gross SFT assets (after adjustment for sale accounting transactions and netted of amounts of associated cash payables and cash receivables)	1,286,113	1,282,207
30a Total exposures (excluding the impact of any applicable temporary exemption of central bank reserves) incorporating mean values from row 28 of gross SFT assets (after adjustment for sale accounting transactions and netted of amounts of associated cash payables and cash receivables)	1,286,113	1,282,207
31 Basel III leverage ratio (including the impact of any applicable temporary exemption of central bank reserves) incorporating mean values from row 28 of gross SFT assets (after adjustment for sale accounting transactions and netted of amounts of associated cash payables and cash receivables)	5.00%	5.07%
31a Basel III leverage ratio (excluding the impact of any applicable temporary exemption of central bank reserves) incorporating mean values from row 28 of gross SFT assets (after adjustment for sale accounting transactions and netted of amounts of associated cash payables and cash receivables)	5.00%	5.07%

FUNDING AND LIQUIDITY RISK MANAGEMENT

LIQ1: Liquidity Coverage Ratio

The Liquidity Coverage Ratio (LCR) measures a bank's ability to meet its liquidity needs under an acute liquidity stress scenario as prescribed by APRA, measured over a 30-day time frame. LCR is calculated as high-quality liquid assets (HQLA) as a percentage of net cash outflows (NCO).

Average LCR is calculated as a simple average of the daily observations over the quarter. The number of data points used is reported in the table.

Westpac's average LCR for the quarter was 133% compared to 137% for the Fourth Quarter 2025 and continues to be above the regulatory minimum of 100% in line with the Group's liquidity risk tolerance.

The decrease in average LCR for the quarter ended 31 December 2025 reflects a decrease in average liquid assets, mainly driven by higher average customer funding gap, the impact of the 2025 final ordinary dividend payment, and lower average RBNZ eligible securities, partially offset by higher average net wholesale funding issuance. Average NCOs were also lower during the quarter, mostly driven by lower wholesale funding maturities and decrease in unsecured wholesale funding, partially offset by increase in Retail & SME deposits.

HQLA averaged \$177.9 billion over the quarter compared to \$182.6 billion for the Fourth Quarter 2025, comprising of cash and balances with central banks, and Australian government and semi-government bonds. Westpac also holds other HQLA, mainly qualifying RBNZ securities.

Funding is sourced from retail, small business, corporate and institutional customer deposits and wholesale funding. Westpac seeks to minimise the outflows associated with this funding by targeting customer deposits with lower LCR outflow rates and actively manages the maturity profile of its wholesale funding portfolio.

\$m	31 December 2025		30 September 2025	
	Total unweighted value (average)	Total weighted value (average)	Total unweighted value (average)	Total weighted value (average)
Liquid assets, of which:				
1	High-quality liquid assets (HQLA)	177,869		182,637
	Alternative Liquid Assets (ALA)	-		-
	Reserve Bank of New Zealand (RBNZ) securities	3,626		6,709
Cash outflows				
2	Retail deposits and deposits from small business customers, of which:	397,245	33,399	388,731
3	Stable deposits	196,284	9,814	192,163
4	Less stable deposits	200,961	23,585	196,568
5	Unsecured wholesale funding, of which:	176,605	76,519	175,580
6	Operational deposits (all counterparties) and deposits in networks of cooperative banks	79,831	19,881	79,473
7	Non-operational deposits (all counterparties)	88,242	48,106	86,421
8	Unsecured debt	8,532	8,532	9,686
9	Secured wholesale funding		229	329
10	Additional requirements, of which:	204,707	34,835	209,083
11	Outflows related to derivative exposures and other collateral requirements	16,369	15,560	15,752
12	Outflows related to loss of funding on debt products	412	412	169
13	Credit and liquidity facilities	187,926	18,863	193,162
14	Other contractual funding obligations	11,924	8,105	10,227

AUD 400 million Westpac Subordinated Notes	400
AUD 1,500 million Westpac Subordinated Notes	1,500
AUD 1,000 million Westpac Subordinated Notes	1,000
Total Tier 2 Capital Instruments	32,782

GLOSSARY

Glossary

Capital Adequacy	Description
Common equity Tier 1 (CET1) capital	Comprises the highest quality components of capital that consists of paid-up share capital, retained profits and certain reserves, less certain intangible assets, capitalised expenses and software, and investments and retained profits in insurance and funds management subsidiaries that are not consolidated for capital adequacy purposes.
Internal Ratings-Based approach (IRB & A-IRB)	These approaches allow banks to use internal estimates of the risks of their loans as inputs into the determination of the amount of credit risk capital needed to support the organisation. In the Advanced IRB (A-IRB) approach, banks must supply their own estimates for all three credit parameters – probability of default, loss given default and exposure at default.
Leverage ratio	The leverage ratio is defined by APRA as Tier 1 capital divided by the “Exposure measure” and is expressed as a percentage. “Exposure measure” includes on-balance sheet exposures, derivatives exposures, securities financing transaction (SFT) exposures, and other off-balance sheet exposures.
Risk weighted assets (RWA)	Assets (both on and off-balance sheet) are risk weighted according to each asset’s inherent potential for default and what the likely losses would be in case of default. In the case of non-asset backed risks (i.e. market, IRRBB and operational risk), RWA is determined by multiplying the capital requirements for those risks by 12.5.
Securities financing transactions (SFT)	APRA defines SFTs as “transactions such as repurchase agreements, reverse repurchase agreements, and security lending and borrowing, and margin lending transactions, where the value of the transactions depends on the market valuation of securities and the transactions are typically subject to margin agreements.”
Tier 1	The sum of CET1 and Additional Tier 1 Capital (AT1). AT1 Capital comprises high quality components of capital that consists of certain securities not included in CET1, but which include loss absorbing characteristics. AT1 instruments convert into equity and absorb losses when certain triggers are met.
Total Capital	The sum of Tier 1 Capital and Tier 2 Capital. Tier 2 Capital includes subordinated instruments and other components of capital that, to varying degrees, do not meet the criteria for Tier 1 Capital, but nonetheless contribute to the overall strength of an ADI and its capacity to absorb losses when certain triggers are met.

Funding and liquidity

Alternative Liquid Assets (ALA)	Assets that qualify for inclusion in the numerator of the LCR in jurisdictions where there is insufficient supply of HQLA.
High-quality liquid assets (HQLA)	Assets which meet APRA’s criteria for inclusion as HQLA in the numerator of the LCR.
Liquidity coverage ratio (LCR)	An APRA requirement to maintain an adequate level of unencumbered high-quality liquid assets, to meet liquidity needs for a 30 calendar day period under an APRA-defined severe stress scenario. Absent a situation of financial stress, the value of the LCR must not be less than 100%. LCR is calculated as the percentage ratio of stock of HQLA, and qualifying RBNZ securities over the total net cash out-flows in a modelled 30 day defined stressed scenario.
Maturity	The maturity date used is drawn from the contractual maturity date of the customer loans.
Net cash outflows (NCO)	Total expected cash outflows minus total expected cash inflows in the specified LCR stress scenario calculated in accordance with APRA’s liquidity standard.
Net Stable Funding Ratio (NSFR)	The NSFR is defined as the ratio of the amount of available stable funding (ASF) to the amount of required stable funding (RSF) defined by APRA. The amount of ASF is the portion of an ADI’s capital and liabilities expected to be a reliable source of funds over a one year time horizon. The amount of RSF is a function of the liquidity characteristics and residual maturities of an ADI’s assets and off-balance sheet activities. ADI’s must maintain an NSFR of at least 100%.

Credit Risk	Description
Credit valuation adjustment (CVA) risk	The risk of mark-to-market losses related to deterioration in the credit quality of a derivative counterparty also referred to as credit valuation adjustment (CVA) risk.
Default	Refer to Non-Performing Exposures definition.
Expected credit loss (ECL)	Expected credit losses are a probability-weighted estimate of the cash shortfalls expected to result from defaults over the relevant time frame. They are determined by evaluating a range of possible outcomes and taking into account the time value of money, past events, current conditions and forecasts of future economic conditions.
Exposure at default (EAD)	EAD is calculated at facility level and includes outstandings as well as the proportion of committed undrawn that is expected to be drawn in the event of a future default.
Non-Performing exposures	Non-performing exposures, are those captured by the regulatory definition of default, contained in <i>APS 220 Credit Risk Management</i> and the RBNZ’s Banking Prudential Requirements for New Zealand regulated exposures. Default occurs when either one, or both, of the following has happened: <ul style="list-style-type: none"> Westpac considers that the borrower is unlikely to pay its credit obligations to Westpac in full, without recourse to actions such as realising available security; The borrower is 90 days or more past-due on a credit obligation to Westpac.

DISCLOSURE REGARDING FORWARD-LOOKING STATEMENTS

Disclosure regarding forward-Looking statements

The information contained in this report contains statements that constitute “forward-looking statements” within the meaning of section 21E of the U.S. Securities Exchange Act of 1934.

Forward-looking statements are statements that are not historical facts. Forward-looking statements appear in a number of places in this report and include statements regarding Westpac’s current intent, belief or expectations with respect to its business and operations, macro and micro economic and market conditions, results of operations and financial condition and performance, capital adequacy and liquidity and risk management, including, without limitation, future loan loss provisions and financial support to certain borrowers, forecasted economic indicators and performance metric outcomes, indicative drivers, climate- and other sustainability-related statements, commitments, targets, projections and metrics, and other estimated and proxy data.

Words such as ‘will’, ‘may’, ‘expect’, ‘intend’, ‘seek’, ‘would’, ‘should’, ‘could’, ‘continue’, ‘plan’, ‘estimate’, ‘anticipate’, ‘believe’, ‘probability’, ‘indicative’, ‘risk’, ‘aim’, ‘outlook’, ‘forecast’, ‘f’cast’, ‘f’, ‘assumption’, ‘projection’, ‘target’, ‘goal’, ‘guidance’, ‘objective’, ‘ambition’ or other similar words, are used to identify forward-looking statements. These statements reflect Westpac’s current views on future events and are subject to change, certain known and unknown risks, uncertainties and assumptions and other factors which are, in many instances, beyond Westpac’s control (and the control of Westpac’s officers, employees, agents, and advisors), and have been made based on management’s and/or the Board’s current expectations or beliefs concerning future developments and their potential effect upon Westpac.

Forward-looking statements may also be made, verbally or in writing, by members of Westpac’s management or Board in connection with this report. Such statements are subject to the same limitations, uncertainties, assumptions and disclaimers set out in this report.

There can be no assurance that future developments or performance will align with Westpac’s expectations or that the effect of future developments on Westpac will be those anticipated. Actual results could differ materially from those Westpac expects or which are expressed or implied in forward-looking statements, depending on various factors including, but not limited to, those described in the risk factors in Westpac’s 2025 Risk Factors. When relying on forward-looking statements to make decisions with respect to Westpac, investors and others relying on information in this report should carefully consider such factors and other uncertainties and events.

Except as required by law, Westpac assumes no obligation to revise or update any forward-looking statements in this report, whether from new information, future events, conditions or otherwise, after the date of this report.
