About PC Gold

PC Gold Limited is a gold exploration and development company focused on unlocking the full potential of its flagship Spring Hill Gold Project in the Northern Territory. With a Mineral Resource Estimate reported in accordance with the JORC Code of 25.6Mt @ 1.0g/t Au, a strong balance sheet, and a highly experienced team, PC Gold is executing a clear strategy to transition Spring Hill toward production.

The Spring Hill Project is a virgin gold system hosting mineralisation within granted mining leases, with environmental approvals already in place to commence open-pit mining. This positions PC Gold to move swiftly through development milestones.

The Company is advancing Spring Hill through a dual-stream strategy:

- Infill drilling to upgrade Resource confidence and support conversion to Reserves.
- Aggressive extensional exploration to grow the global Spring Hill Resource inventory.

All modifying factors required for future development — including mining, metallurgy, infrastructure, and permitting — are being progressed in parallel, to ensure a streamlined path toward feasibility and production.

A breakdown of the Spring Hill Mineral Resource Estimate by category and various Cut Off Grades (COG) is as follows:

COG	Indicated			Inferred			Total

6. The average bulk density is assigned based on average mean values by weathering type: oxide = 2.57 g/cm³; transition = 2.69 g/cm³; Fresh = 2.77 g/cm³.
7. The Mineral Resource was estimated in accordance with the JORC Code.
