CODEIFAI ENTERS AI-BACKED QUANTUM SECURITY MARKET

- **Successful completion of Antenna Transfer acquisition**
- **Platform keys now in the hands of CDE's Technical team with all software successfully transferred and purchase conditions met by Seller**
- **To be re-branded QuantumAI Secure**

Codeifai Limited (ASX:CDE) – (“Codeifai” or the “Company”) is pleased to announce the successful completion of the acquisition of [AntennaTransfer.io](#) (to be re-branded *QuantumAI Secure*) from Credissential Inc. The acquisition received shareholder approval at the Company's General Meeting on December 8, 2025.

Pursuant to the terms of the Transaction, Codeifai pays total consideration of AUD\$1.3 million, comprising AUD\$1.15 million in shares of Codeifai (the “**Shares**”) and AUD\$150,000 in cash. The Shares issued to Credissential are subject to voluntary escrow provisions, with one-third released upon the closing of the Transaction, one-third after three months, and the final one-third after six months from the completion date.

About QuantumAI Secure

The QuantumAI Secure platform utilises quantum key distribution (QKD) and post-quantum cryptographic techniques to ensure high levels of security in financial transactions - an essential capability as the world transitions into a quantum-aware era. By integrating this platform into its existing ecosystem, Codeifai aims to launch a new class of intelligent, quantum-resilient solutions for the fintech, cybersecurity, data-licensing, digital content creation and enterprise software sectors.

- **Quantum-Secure Payments Gateway:** Enables banks, fintechs, and payment processors to adopt a payment infrastructure that resists retroactive decryption even by quantum computer-equipped adversaries.
- **Quantum-Secure File Transfer Gateway:** Ensures highly sensitive documents (financial contracts, IP, health records) can be securely transferred and remain confidential over time.
- **Quantum-Secure Messaging and Communication Protocols:** Provides quantum-hardened alternatives to conventional secure messaging apps and collaboration platforms.
- **Plug-and-Play Compatibility:** Designed to integrate with existing enterprise APIs and financial platforms, including Buy Now Pay Later (BNPL) gateways and cryptocurrency payment portals, enabling smooth migration paths toward quantum readiness

Synergies with Codeifai's existing business

The acquisition of the Quantum AI Secure platform is highly complementary to Codeifai's existing business, as both platforms share a core technological foundation, the use of QR codes, while targeting different but converging domains: AI-driven traceability and compliance (Codeifai's existing business platform) and quantum-secured communications and transactions with QuantumAI

Security. This synergy will allow Codeifai to not only enhance the security layer of its traceability and engagement solutions, but also cross-sell the QuantumAI Secure platform offering as a premium addition to its existing self-service SaaS suite - while expanding into the fast-emerging field of quantum-resilient infrastructure.

Codeifai's existing platform leverages QR codes to provide authentication, supply chain transparency, consumer engagement and data verification across diverse industries. QuantumAI Secure platform also uses QR codes but to encrypt and enable secure payments, file transfers, and communications using Post-Quantum Cryptography (PQC). The integration of both platforms means Codeifai can now offer end-to-end trust, from the physical or digital asset's origin (tracked via Codeifai's system) to its secure transfer or transaction (protected by the QuantumAI Secure platform). Codeifai intends to increase the use of Artificial Intelligence (AI) across its solutions, creating a seamless, quantum-hardened trust layer that is both user-friendly, data rich and future-proof, aligning with the increasing regulatory and security demands across global markets.

Payments and verifications can be done via quantum-encrypted QR codes in any setting, both online and offline.

These synergies unlock a huge opportunity for affiliate marketing, content creators, online shopping portals and all other users of QR Codes, adding significant value to Codeifai's overall ability to collect and analyse data using AI.

Looking forward the Quantum AI Secure acquisition enables Codeifai to greatly expand opportunities to explore a range of new market opportunities such as Security, Defense, Mining, Agriculture to name a few.

About Codeifai

Codeifai Limited is an Australia-based technology company specialising in artificial intelligence ("AI"), quantum security, and secure data solutions. The company develops high-margin, scalable SaaS platforms that leverage AI, post-quantum cryptography, and serialised QR code technology to deliver next-generation digital infrastructure. Codeifai's offerings are designed to meet the growing global demand for secure payments, file transfers, digital identity, engagement and traceability solutions across sectors such as fintech, legal, healthcare, government, and digital content. With a vision to drive the adoption of AI-powered, quantum-resilient technologies, Codeifai aims to be a leader in future-proofing enterprise and government communications and transactions.

This announcement has been authorised by the Board of Codeifai Limited.
