

# Glenburgh Unlocking Australia's next multi-million-ounce gold district.

INVESTOR PRESENTATION - February 2026

TSXV: BZ, ASX: BNZ | [BENZMINING.COM](https://www.benzmining.com)

# Disclaimer

## AND FORWARD-LOOKING STATEMENTS

This presentation contains forward-looking statements and forward-looking information within the meaning of applicable securities laws. The use of any of the words “Expect”, “Anticipate”, “Continue”, “Estimate”, “Objective”, “Ongoing”, “May”, “Will”, “Project”, “Should”, “Believe”, “Plans”, “Intends” and similar expressions are intended to identify forward-looking information or statements. More particularly and without limitation, this presentation contains forward looking statements and information concerning the expected activities of Benz Mining Corp.

The forward-looking statements and information are based on certain key expectations and assumptions made by Benz Mining Corp. Although Benz Mining Corp. believes that the expectations and assumptions on which such forward-looking statements and information are based are reasonable, undue reliance should not be placed on the forward-looking statements and information because Benz Mining Corp. can give no assurance that they will prove to be correct. By its nature, such forward-looking information is subject to various risks and uncertainties, which could cause the actual results and expectations to differ materially from the anticipated results or expectations expressed. Readers are cautioned not to place undue reliance on this forward-looking information, which is given as of the date hereof, and to not use such forward-looking information for anything other than its intended purpose. Benz Mining Corp. undertakes no obligation to update publicly or revise any forward-looking information, whether as a result of new information, future events or otherwise, except as required by law.

The Mineral Resource Estimate for the Eastmain Gold Resource in this announcement was reported by the Company in accordance with ASX Listing Rule 5.8 on 24 May 2023. The information in this announcement that relates to the Mineral Resource Estimates for Glenburgh and Mt Egerton was first reported by the Company in accordance with ASX Listing Rule 5.8 on 6 November 2024. The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcements and confirms, in relation to the Mineral Resource Estimates, that all material assumptions and technical parameters underpinning the estimates continue to apply and have not materially changed. Exploration results have been reported in accordance with ASX Listing Rule 5.7 on 6 November 2024, 3 April 2025, 28 April 2025, 30 June 2025, 31 July 2025, 4 August 2025, 20 August 2025, 11 September 2025, 17 September 2025, 14 October 2025, 8 December 2025 and 28 January 2026. The Company confirms that the form and context in which the Competent Person’s findings are presented have not been materially modified from the original market announcements. Please see Appendix 1 for further information regarding the Mineral Resource Estimates. This presentation has been authorised for release by the Board of Benz Mining Corp. and is current as at February 2026.

# The New Frontier

PALEOPROTEROZOIC (CA. 2000MA) METAMORPHIC BELT AT THE NORTHERN MARGIN OF THE YILGARN CRATON

## District-scale footprint in WA

~2165km<sup>2</sup> land position across underexplored Paleoproterozoic rocks in the Gascoyne.

## Proven discovery record

2025 proved the models. Glenburgh now rapidly growing with every meter drilled.

## Ongoing catalysts

A\$96M in cash, multiple drill rigs turning since start of January 2026.

## "Special Forces" geology team, now a small army

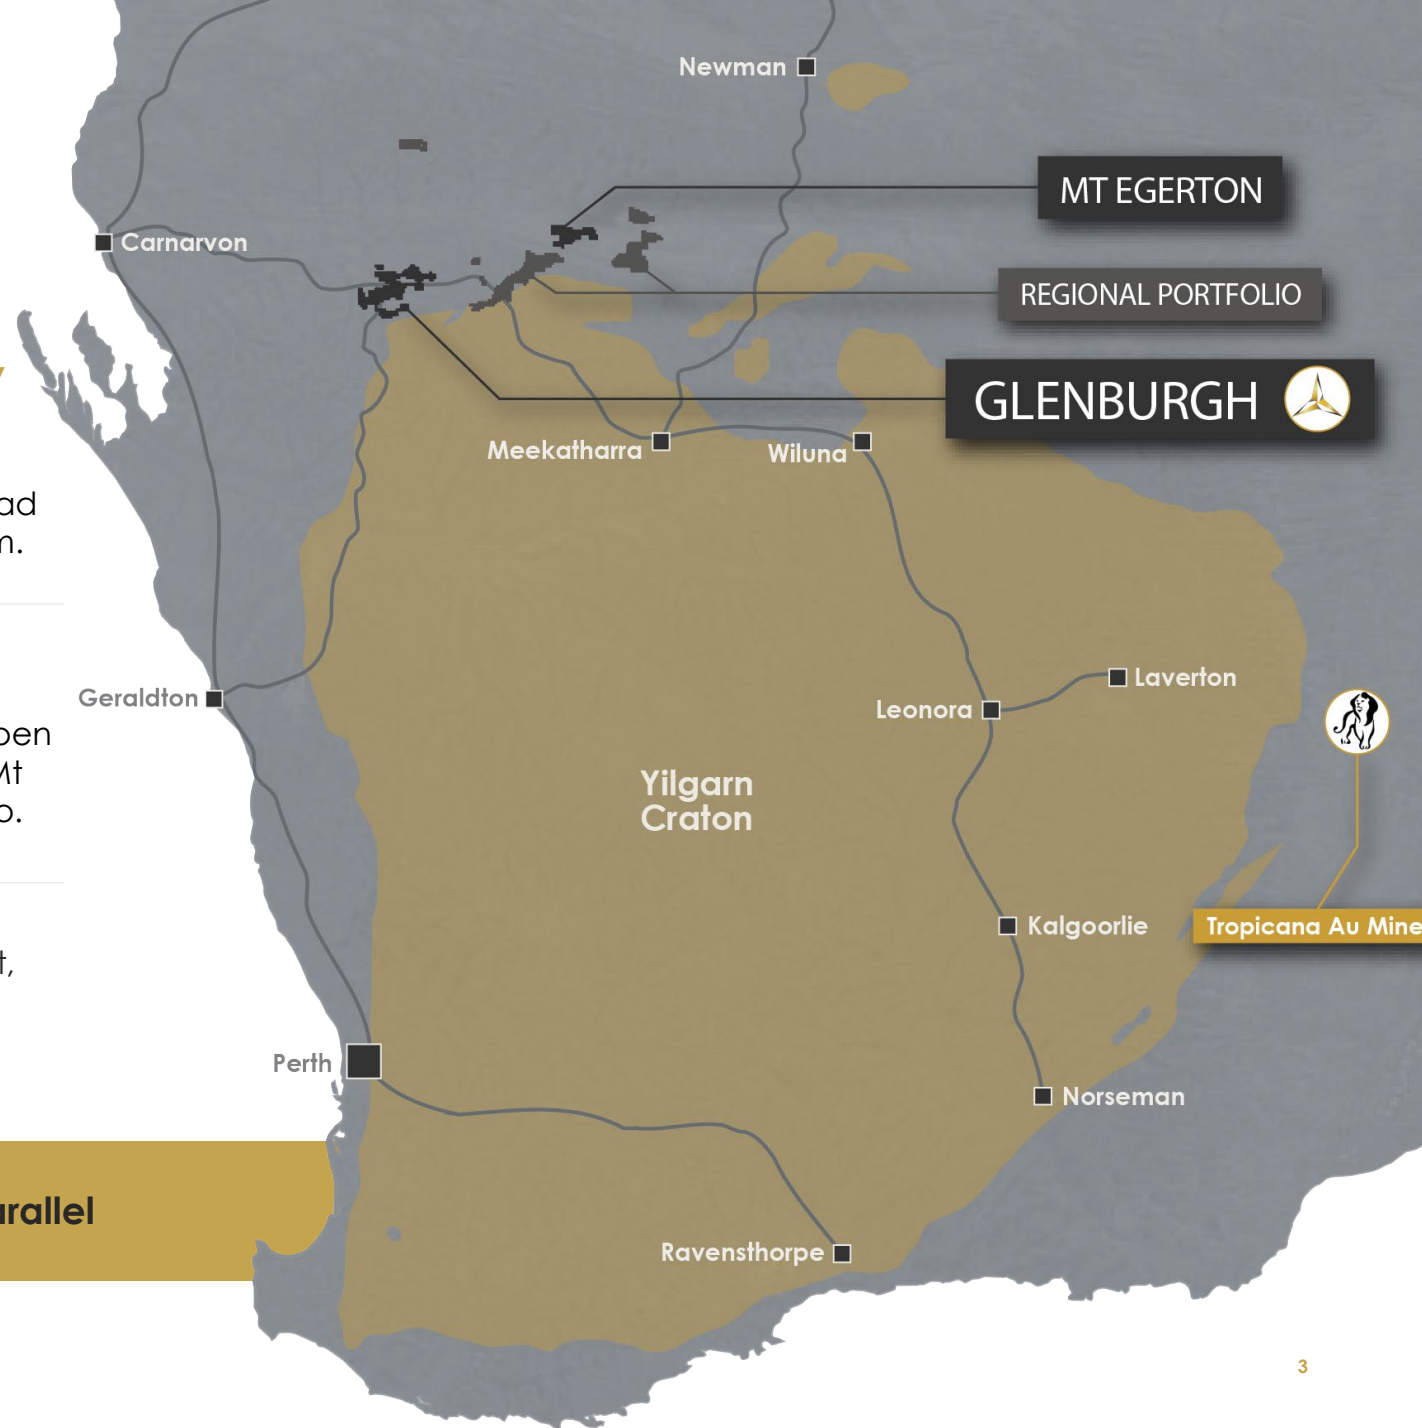

Ex-AngloGold, ex-Barrick, ex-Sandfire, ex-IGO, ex-Gold Road geologists. A formidable team.

## Multi-million-ounce potential

Two deposits suited to bulk open pit + High Grade UG lenses. Mt Egerton and regional portfolio.

## Advanced permitting

Mining Lease, Clearing Permit, access road, borefield and water license. Native title agreements.

Early-stage development assessments progressing in parallel

# Rare, District Scale Opportunity

A NEW 80KM MULTI-MILLION-OUNCE GOLD DISTRICT IN THE MAKING, BENZ HOLDS THE KEYS TO THE ENTIRE BELT

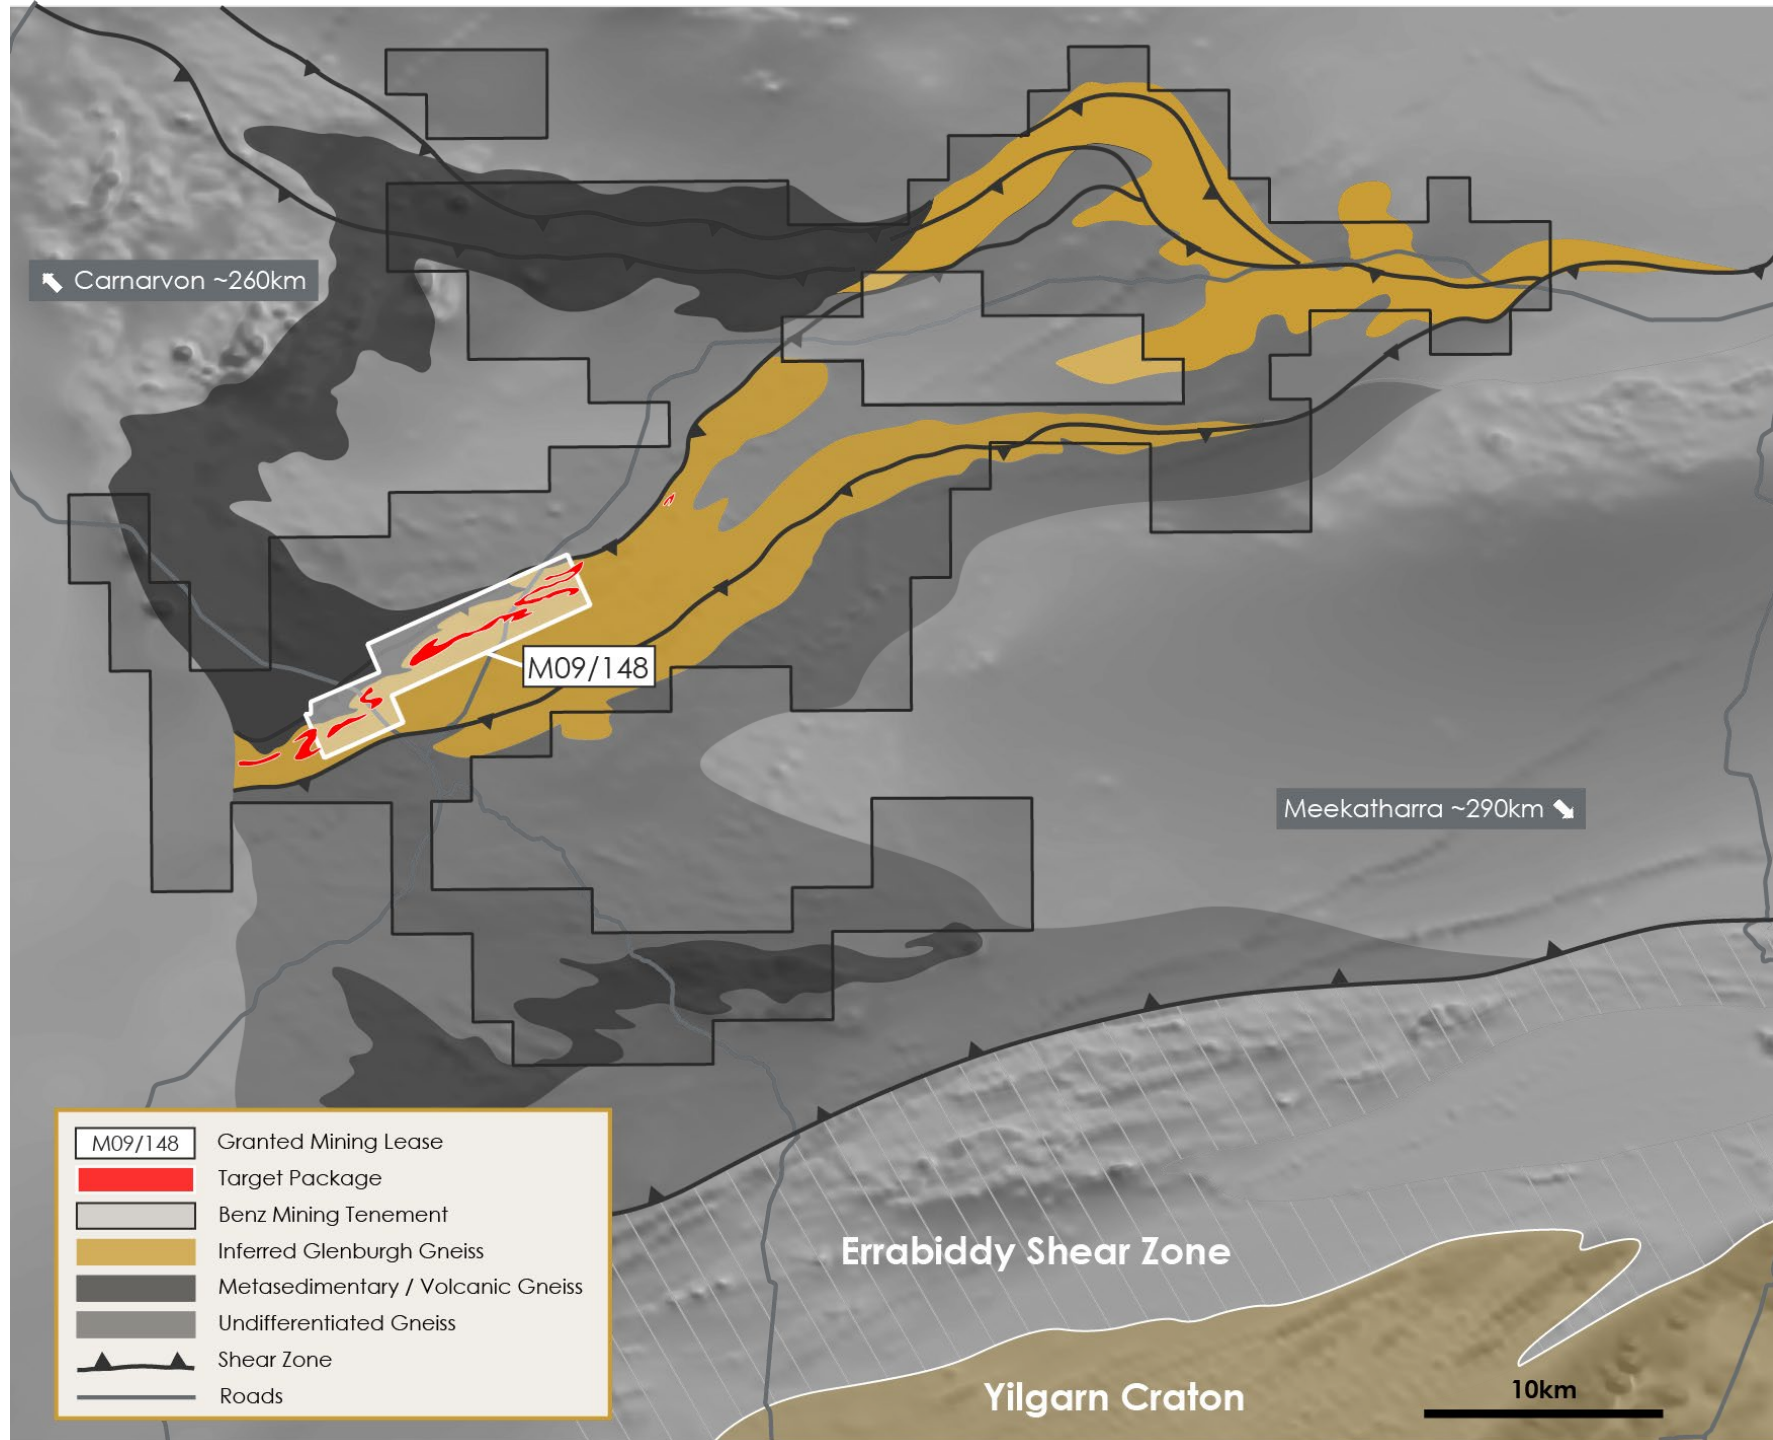

## High Priority Targets

Outcropping targets defined over 18km strike extent.

Focussed exploration and resource expansion drilling within 12km granted Mining Lease.

## District Exploration Upside

Portfolio of underexplored tenure in Paleoproterozoic rocks across the Gascoyne region.

TSXV: BZ, ASX: BNZ

# A Growing Gold District

12KM GRANTED MINING LEASE, THREE 2-3KM CAMPS

## The three Camps

### Hurricane Camp

Hurricane, Zone 102, the high-grade **Zone 126**, NE3, and emerging exploration targets.

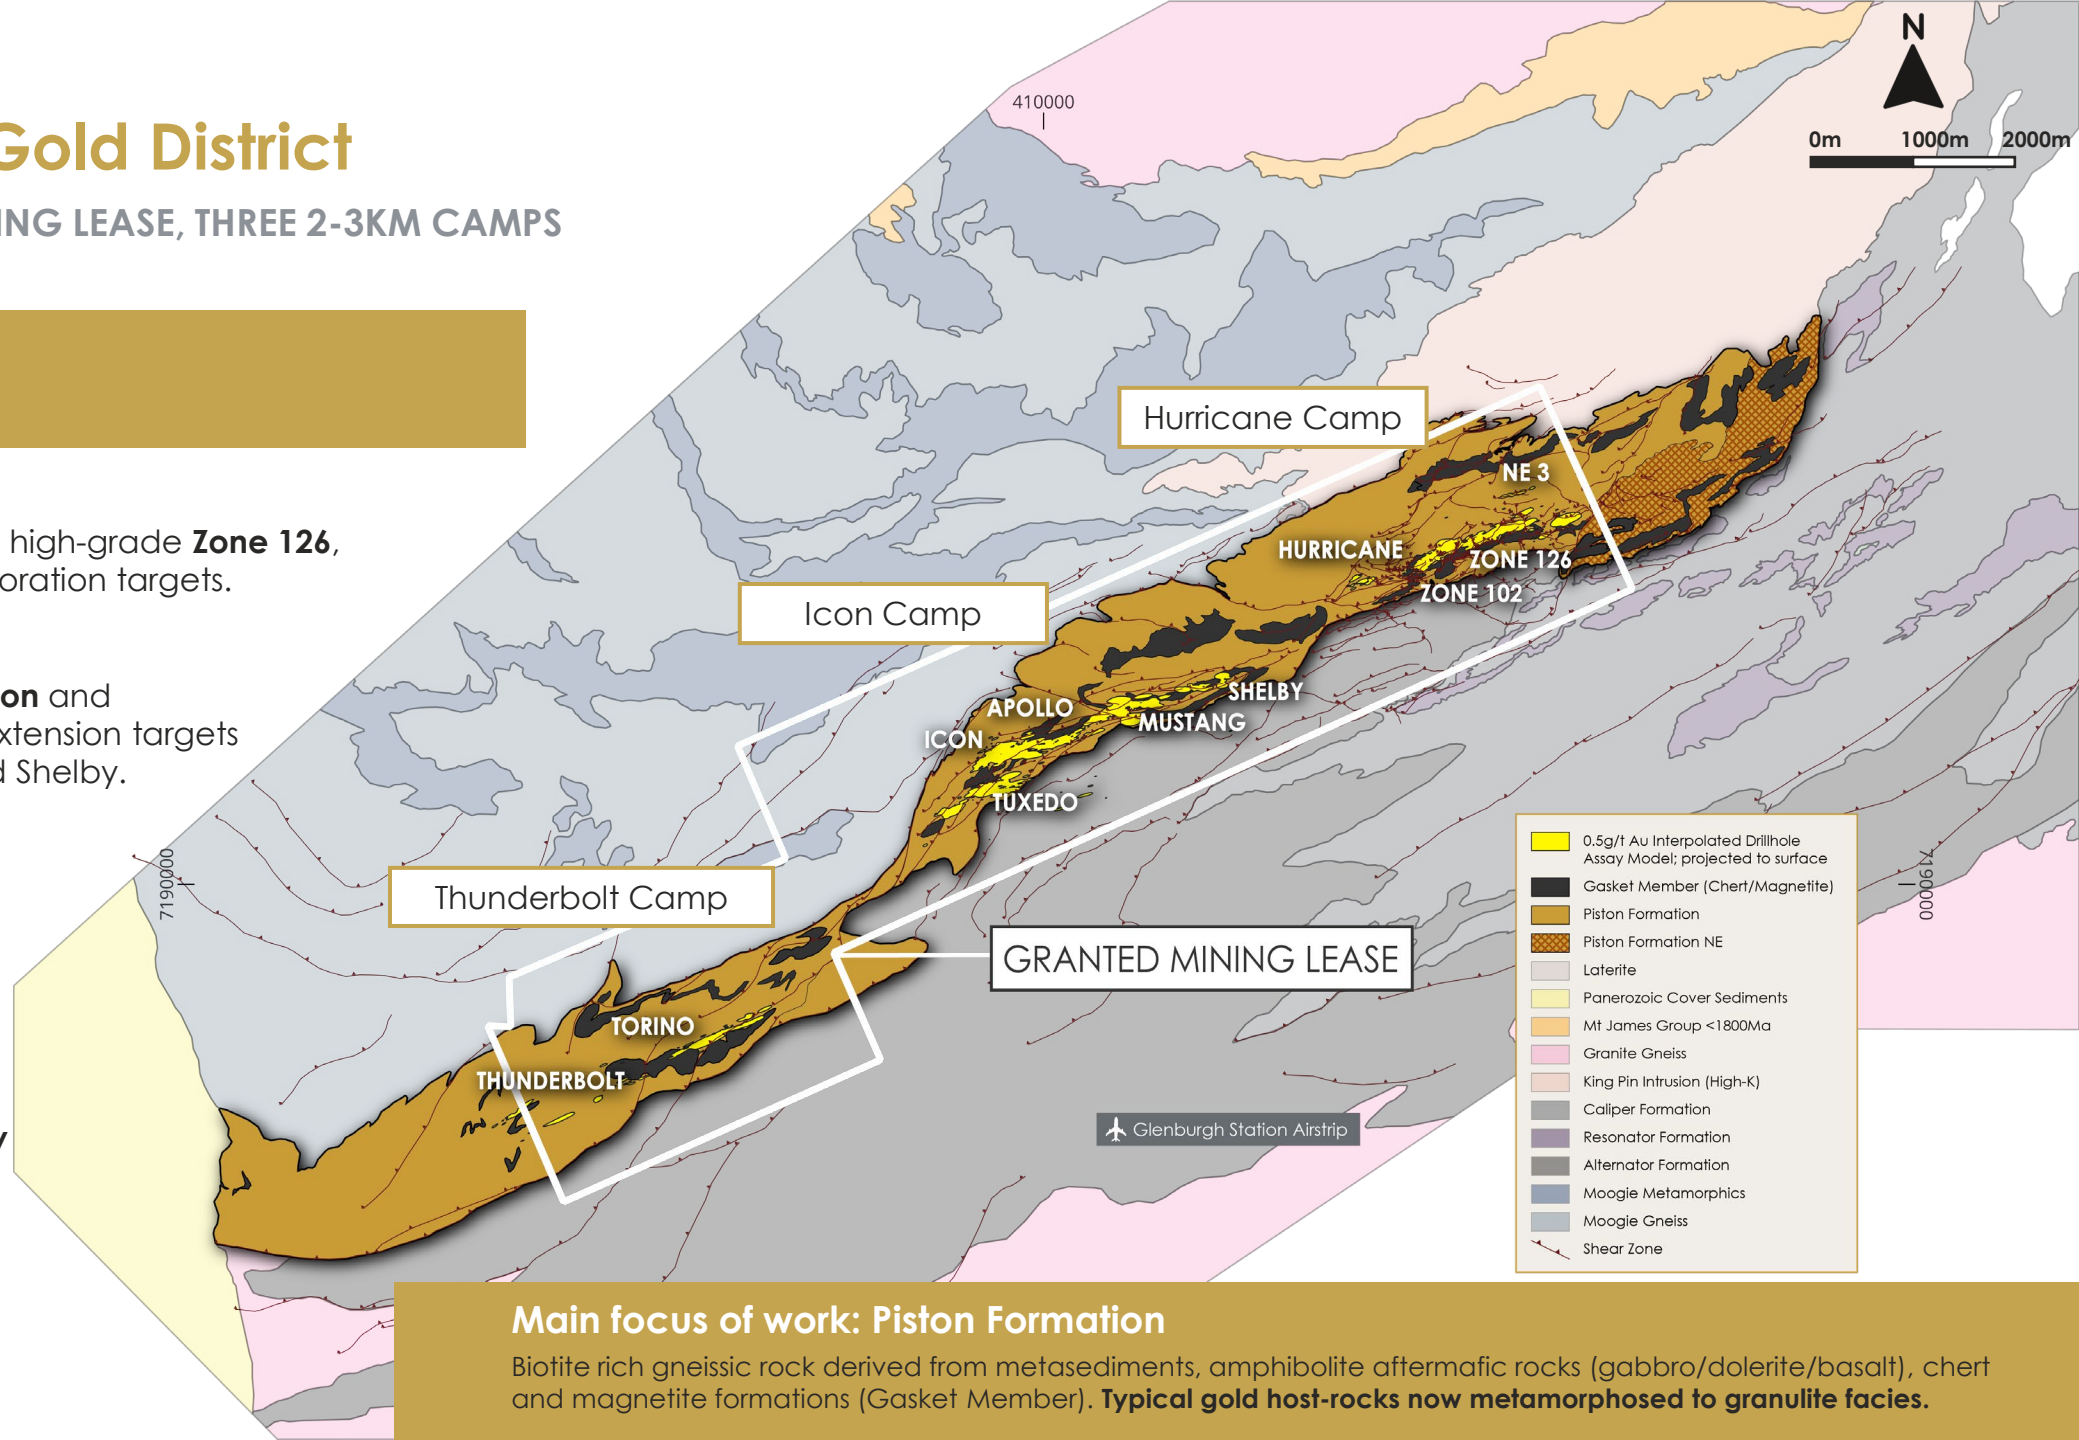

### Icon Camp

Bulk moderate grade **Icon** and **Tuxedo**, and resource extension targets at Apollo, Mustang, and Shelby.

### Thunderbolt Camp

Thunderbolt and Torino prospects.

**Strong geological analogue to Icon and Hurricane Camps with potential to grow to same scale. Untested by Benz Mining Corp drilling.**

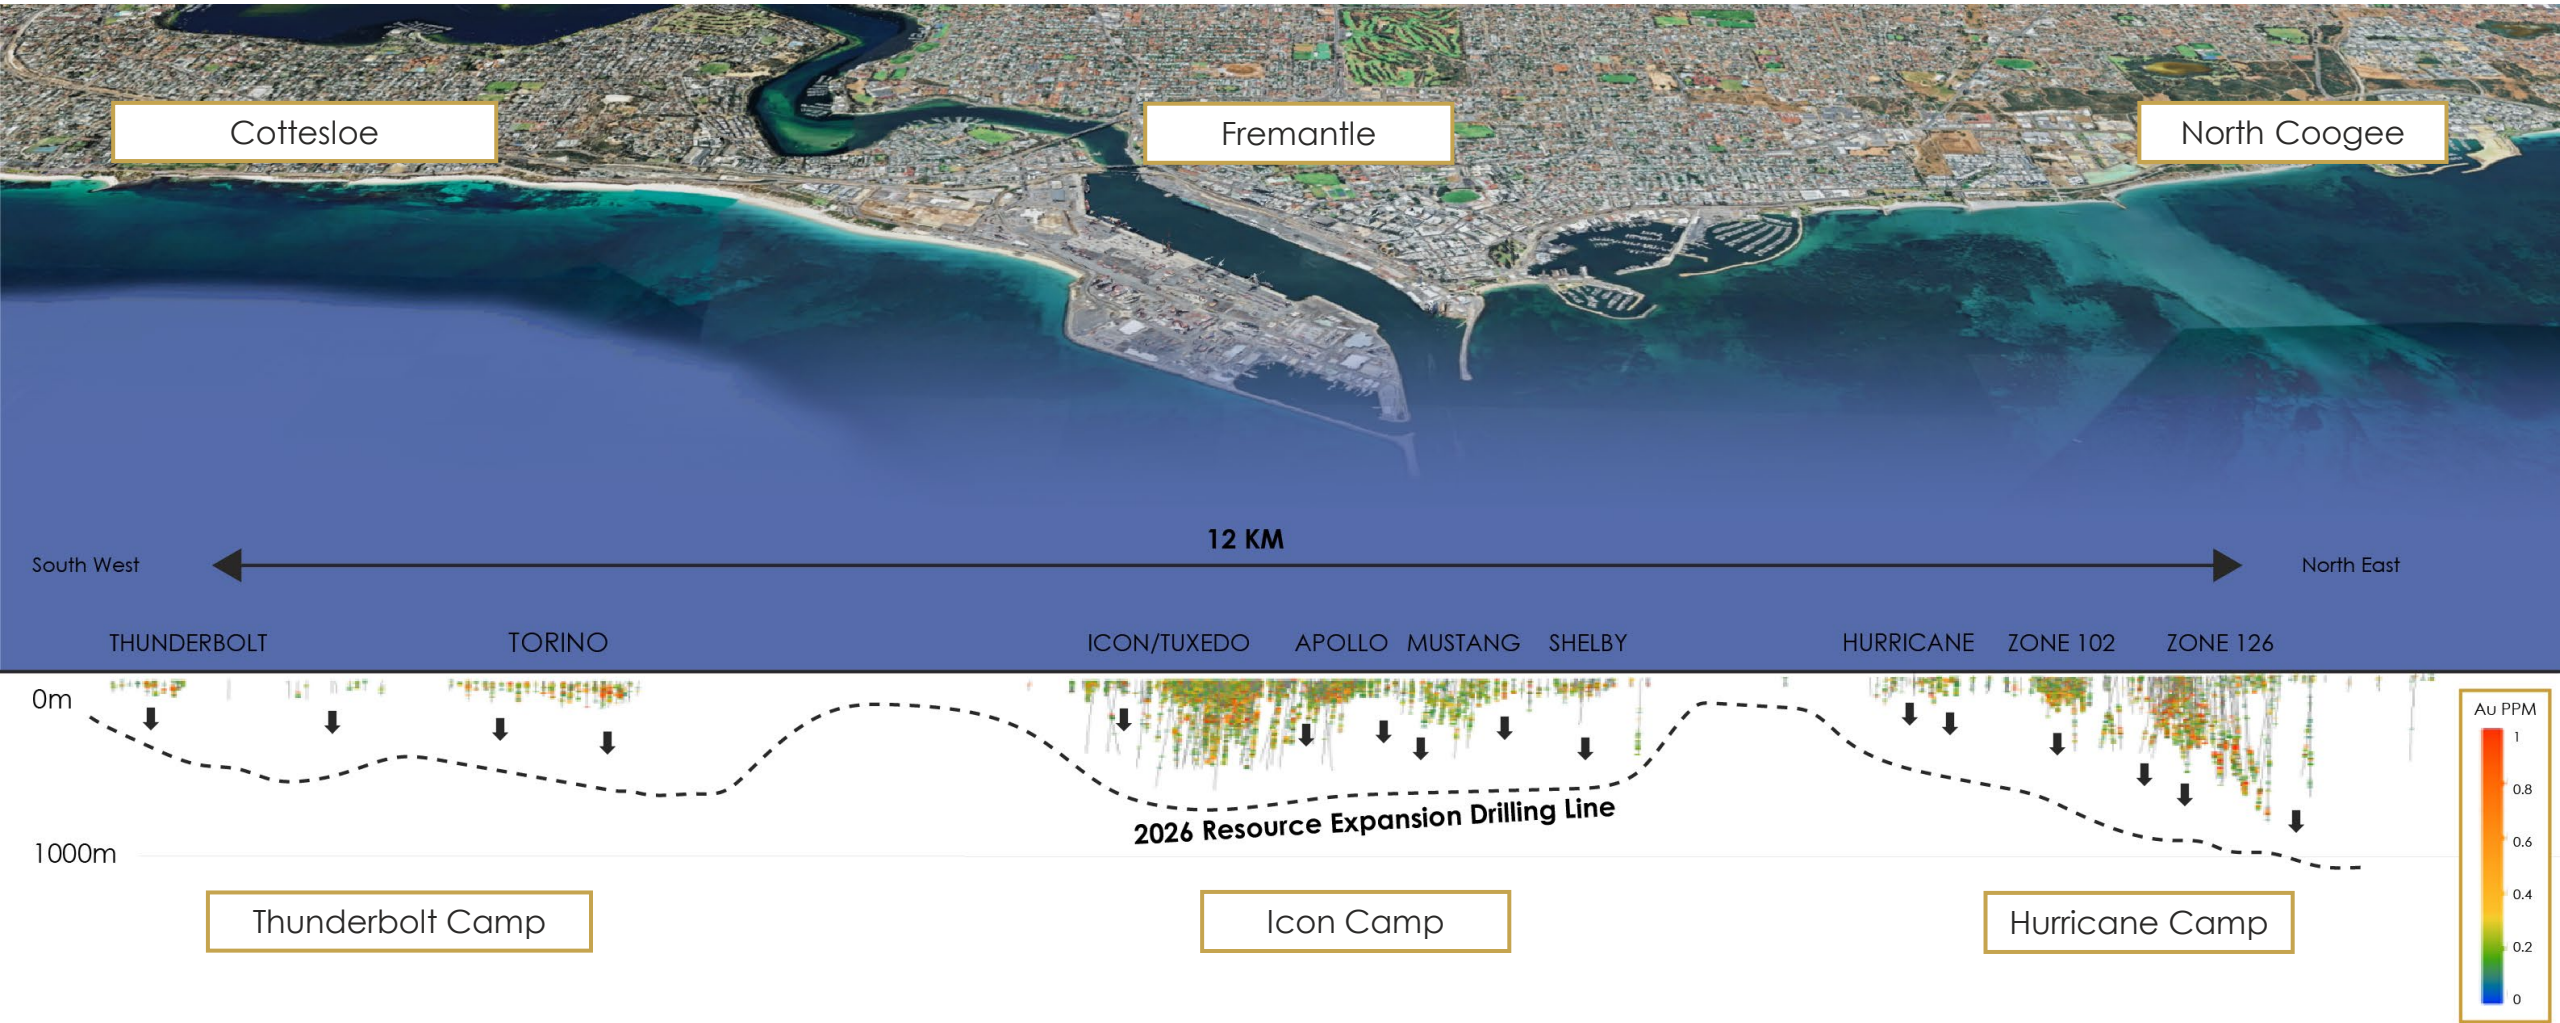

## Main focus of work: Piston Formation

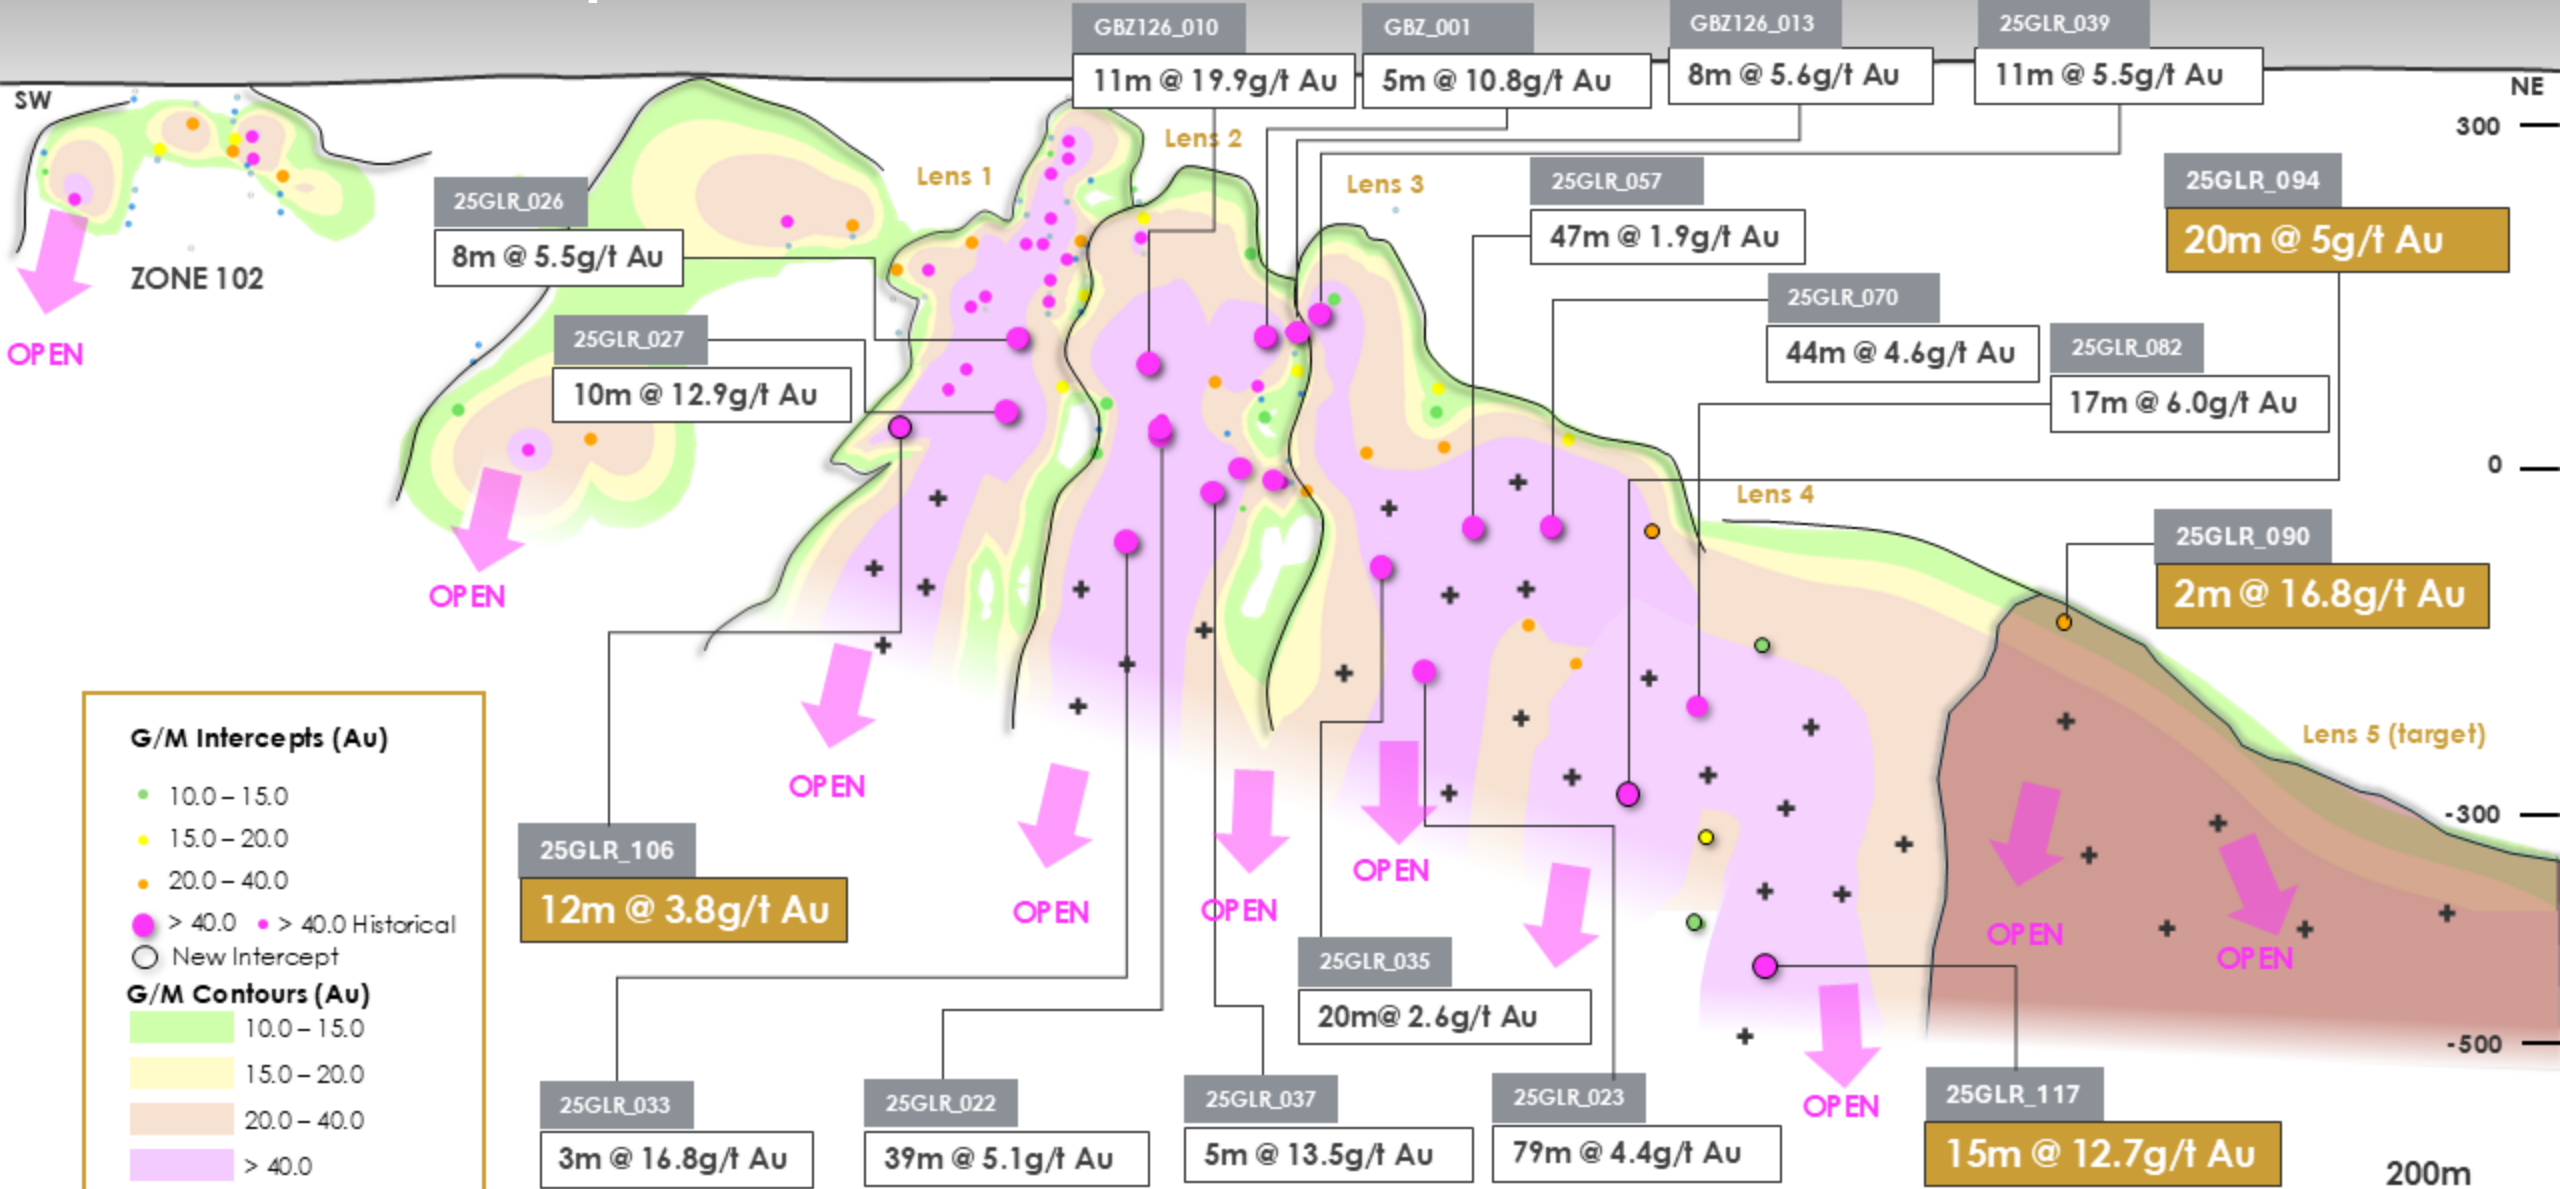

Biotite rich gneissic rock derived from metasediments, amphibolite aftermafic rocks (gabbro/dolerite/basalt), chert and magnetite formations (Gasket Member). **Typical gold host-rocks now metamorphosed to granulite facies.**

# Glenburgh: A Project With Scale

12KM GRANTED MINING LEASE, THREE, 2-3KM CAMPS

# Hurricane Camp: Zone 126

# Icon Camp: Multi-Million Ounce Potential

## BULK TONNAGE OPEN-PIT POTENTIAL

**200m**  
**@1.0 g/t**

Confirms Icon as a large-scale bulk-tonnage gold system.

Close spaced infill drilling is proving to be a powerful discovery tool at Glenburgh, revealing high grade gold missed by the earlier 40-80m drill spacing.

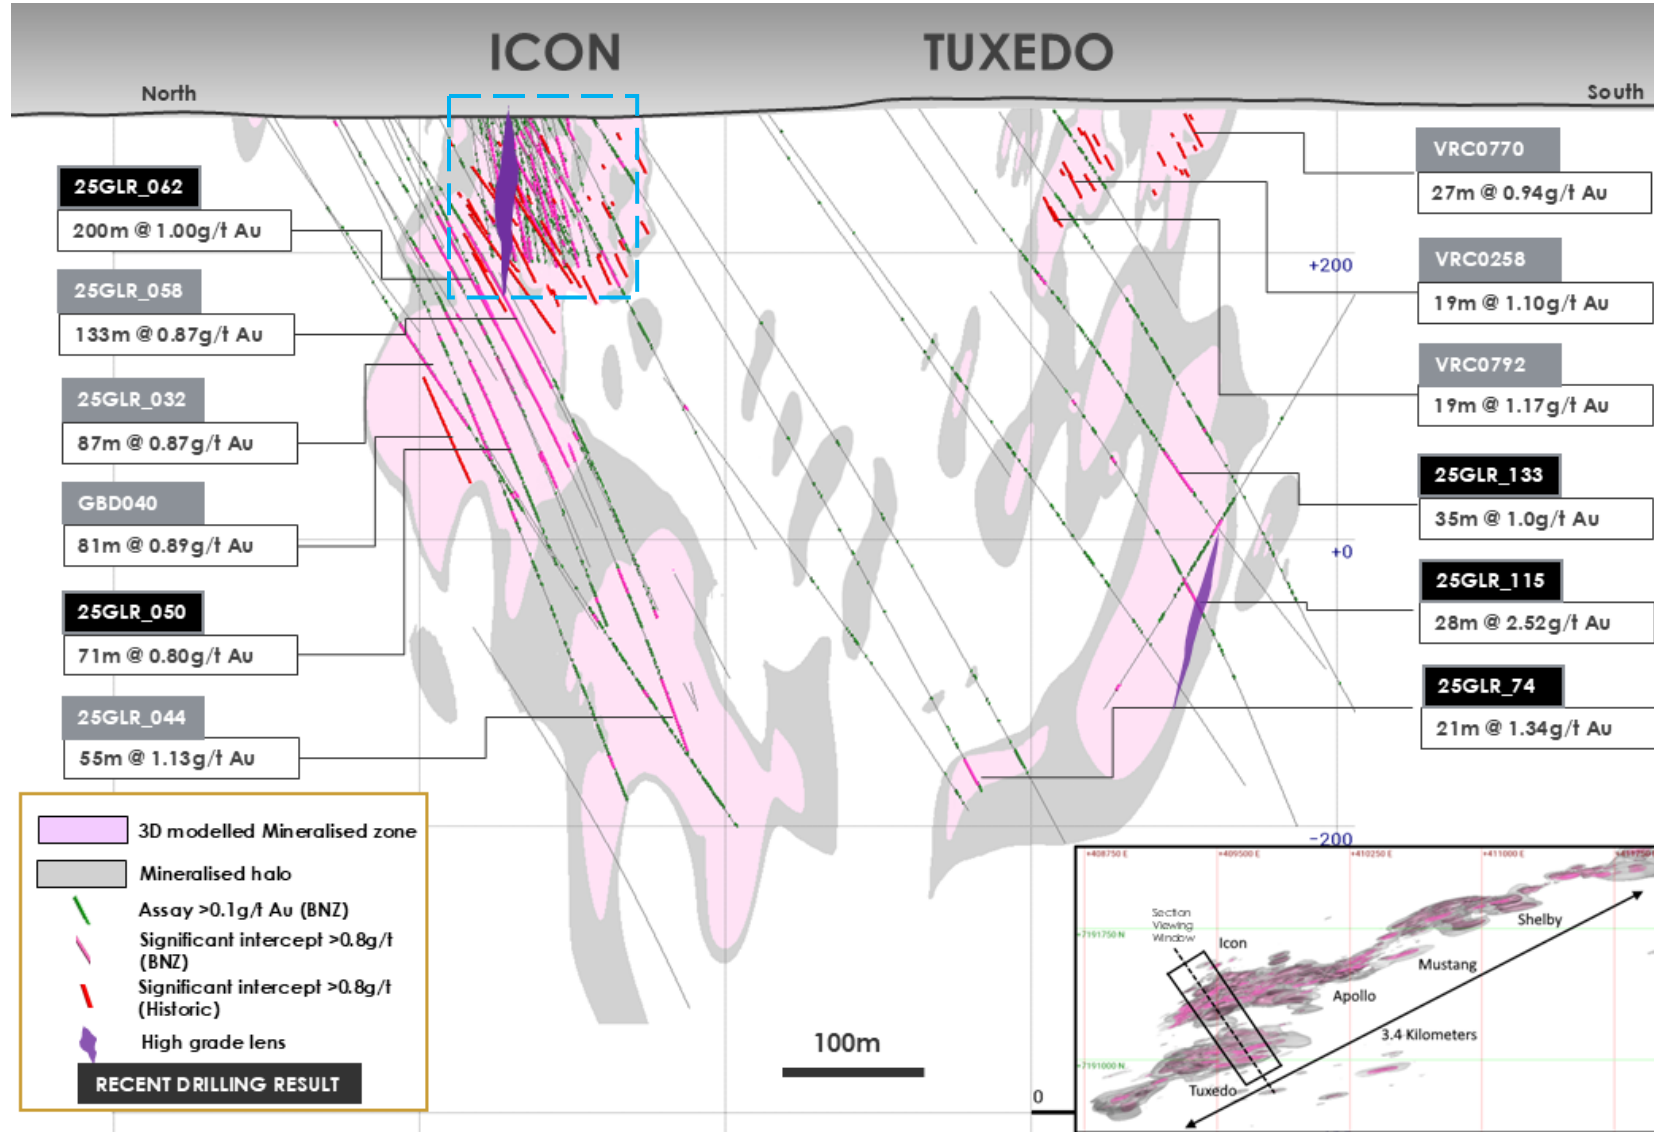

Mineralisation now defined to ~500m depth.

>3km in length, up to 400m wide.

Potential for low-strip open pits.

### High grade lens emerging with infill drilling

- 13m @ 29 g/t Au
- 9m @ 28 g/t Au
- 17m @ 11 g/t Au

# A Geology Driven Company

DOING THINGS DIFFERENTLY WITH TELEVIEWER

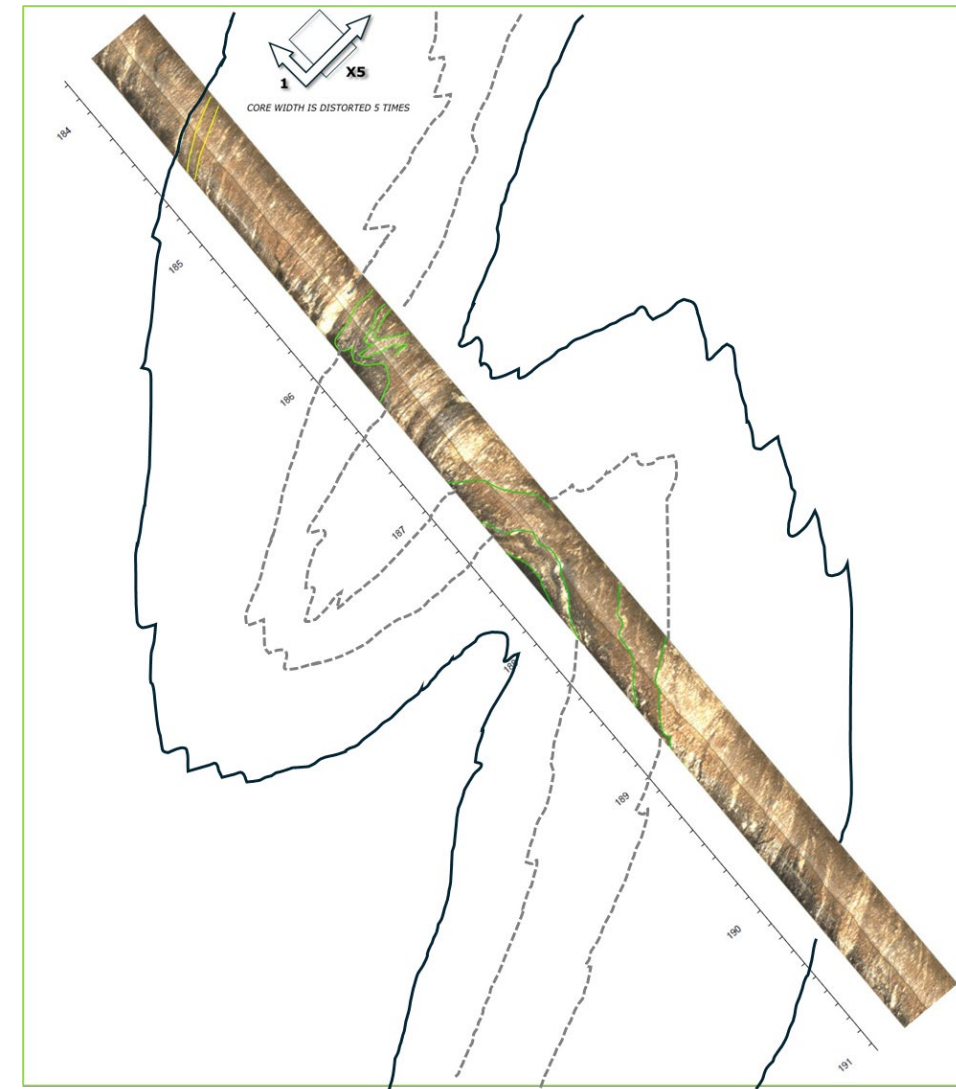

Resource modelling honoring Glenburgh's folded and metamorphosed geometry, for the first time.

Allowing high grade assays to link up, putting ounces into the model that would have otherwise been missed.

Televiewer provides structural insight in RC holes, for a fraction of the cost of diamond drilling. Creating a digital 'core' library.

Tight folding: more complex geometry, but increases the ounces per vertical metre.

Recrystallisation of gold during high-grade metamorphism: improves metallurgical recoveries compared to many non-metamorphosed deposits.

Example of downhole televiewer digital 'core' image (distorted). Structural measurements, texture and geometry information support 3D modelling.

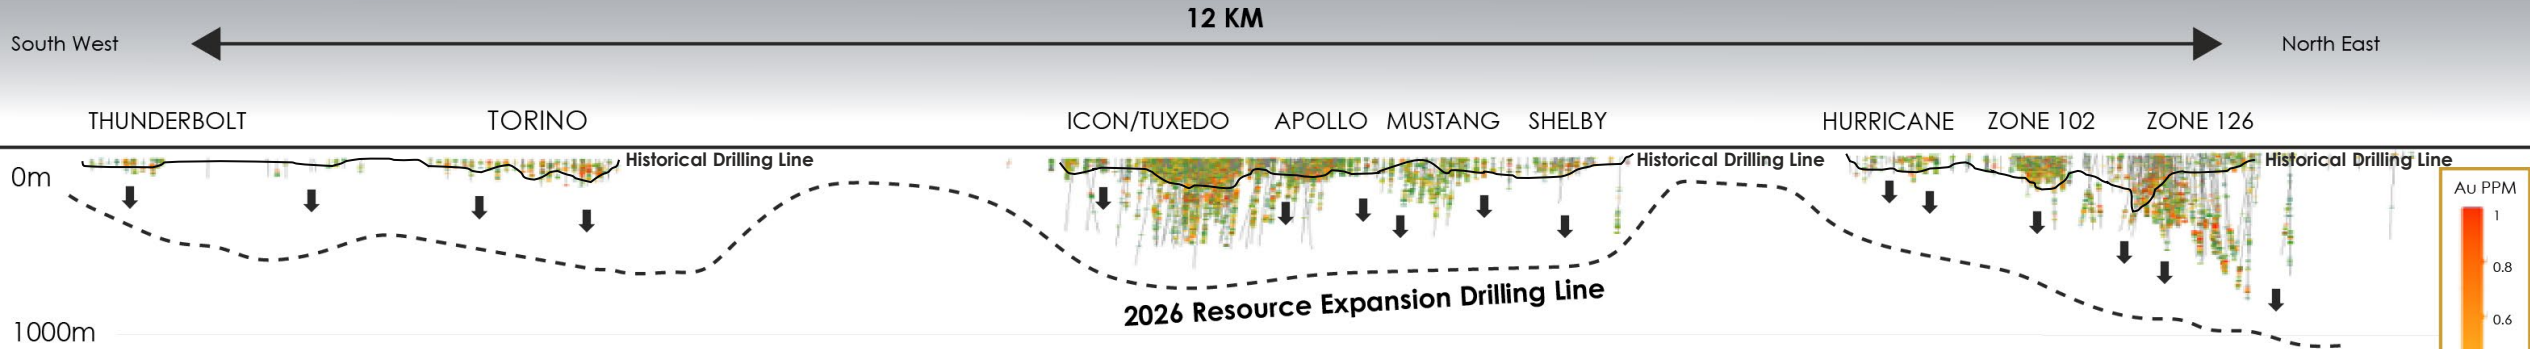

# Televviewer in Action

DIGITAL 'CORE' LIBRARY AND INTERPRETATION TOOL

# Glenburgh 2026 Drill Strategy: +250,000m Planned

## DISCOVERY AND RESOURCE EXPANSION

### Thunderbolt Camp

#### Undrilled by Benz

Historical drilling tested to <100m depth.

Geologically analogous to Icon and Hurricane Camps.

Thin cover has masked additional targets from historical surface sampling.

#### Enormous growth opportunity

Systematic drill testing to ~500m planned in 2026.

### Icon Camp

#### Icon and Tuxedo

Drill tested to ~500m depth and 1km along strike.

#### Bulk open-pit mining potential

Broad 100-300m moderate-grade mineralised intercepts defining a geometry conducive to potential bulk open-pit mining scenarios.

#### 2026 drilling plan

Systematic drill testing of the full~3km Icon Camp to 500m depth.

### Hurricane Camp

#### Zone 126

Defined to ~800m depth and 1km along strike and still open

#### Core of high-grade gold mineralisation

Geometry conducive to potential bulk underground-style mining.

#### Hurricane drill testing underway

Along strike from z126 and represents potential for the next z126 style discovery

#### NE3

Parallel mineralised trend showing potential for another high-grade discovery

# Mt Egerton Optionality

## TRUCKABLE OUNCES AT 100 G/T GOLD

**Two granted mining leases & exploration licenses**  
179.59 km<sup>2</sup> in the Gascoyne province,  
~220km NW of Meekatharra.

**Home to the historical Hibernian Gold Mine**  
Mined in 1912 to 1953.

**Previous drilling: Exceptional high-grade intercepts**  
Only been drilled tested down to ~70m depth:

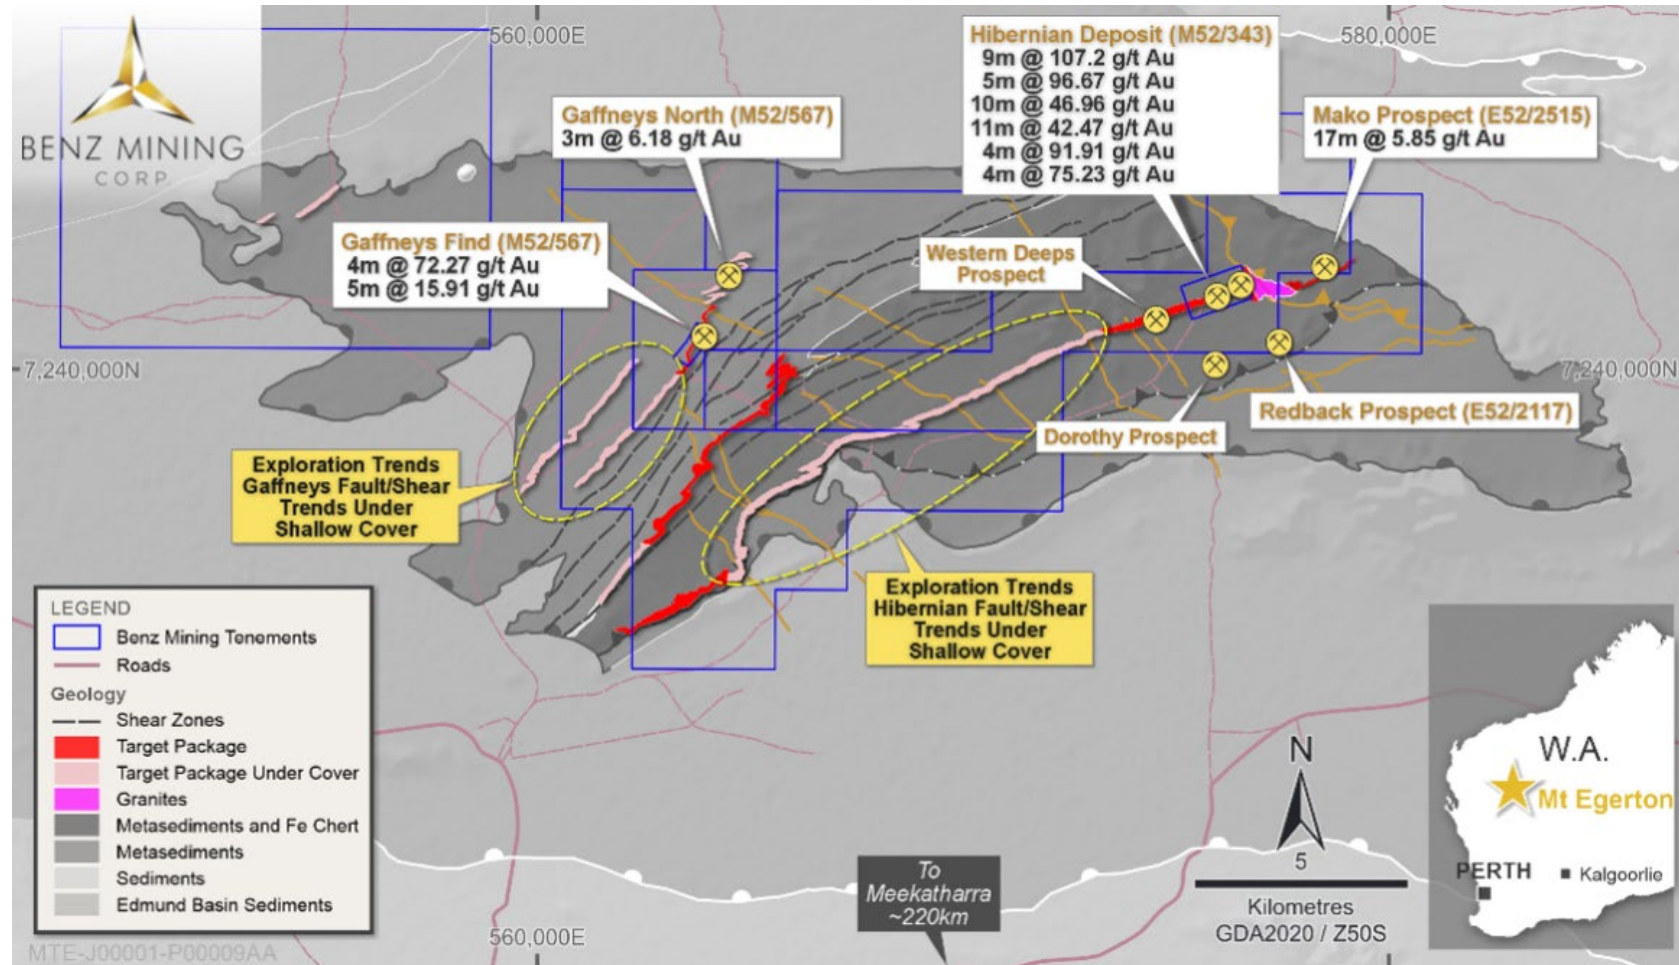

<b>9m @ 107.2g/t Au</b>	<b>4m @ 75.3g/t Au</b>
<b>4m @ 91.9g/t Au</b>	<b>11m @ 42.5g/t Au</b>

**8km underexplored strike extension**  
to the Hibernian trend under shallow cover.

Initial Mineral Resource Estimate.

**0.28Mt @ 3.1g/t Au for 27,000 oz<sup>1</sup> (open pit)**

Mills within trucking distance in Meekatharra.

# Be part of history

## GLENBURGH IS NO ORDINARY DISCOVERY

DISTRICT MAKING SETUP

OWN THE BELT

SPECIAL FORCES  
GEOLOGY TEAM

A new multi-million-ounce gold district in the making

An opportunity to own the entire gold corridor, < 20% explored across 80km

“Seal team 7” of geos assembled, drawn to the project’s quality

Relentless drilling + A\$96M = consistent news-flow.

Step-outs + discovery drilling as new fold & plunge targets are defined and drilled.

Scale growth: bulk, low-strip open-pit potential + high-grade UG upside.

De-risked milestones: mining lease / access & metallurgy (> 94% CIL recoveries).

District narrative crystallises as the belt continues to open up.

**Every metre strengthens our conviction: we’re on to something big at Glenburgh**

TSXV: BZ, ASX: BNZ

# Team

A GEOLOGICALLY DRIVEN COMPANY WITH A TRACK RECORD OF GOLD DISCOVERY AND DEVELOPMENT

## Mark Lynch-Staunton

**Chief Executive Officer**

Formerly with Barrick Gold Corporation before joining Benz in 2023.

Seasoned mine builder responsible for the feasibility & re-commissioning of the multi-million-ounce Bulyanhulu Gold Mine. A proven track record of delivering results combining technical expertise and project management.

## Ben McCormack

**Principal Consulting Geologist**

Expert Consultant to Benz Mining, a specialist in structural geology and exploration in high-grade metamorphic gneiss. Ex-Tropicana Gold Project.

### Geological Team

#### Kyle Prentice

General Manager - Geology

#### Rob Healy

Exploration Manager

#### Joseph Parker

Principal Geologist - Resources

### Board

#### Evan Cranston

Executive Chairman

#### Nick Tintor

Non-Executive Director - Canada

#### Mathew O'Hara

Non-Executive Director

#### Peter Williams

Non-Executive Director

#### Nick Jolly

Non-Executive Director

# Eastmain, Quebec

1MOZ GOLD OPEN IN ALL DIRECTIONS WITH A LOT FURTHER TO GO

## Project overview

### Eastmain has strong potential for growth

With areas that are still underexplored, we will continue to use advanced targeting techniques to identify new high-grade zones.

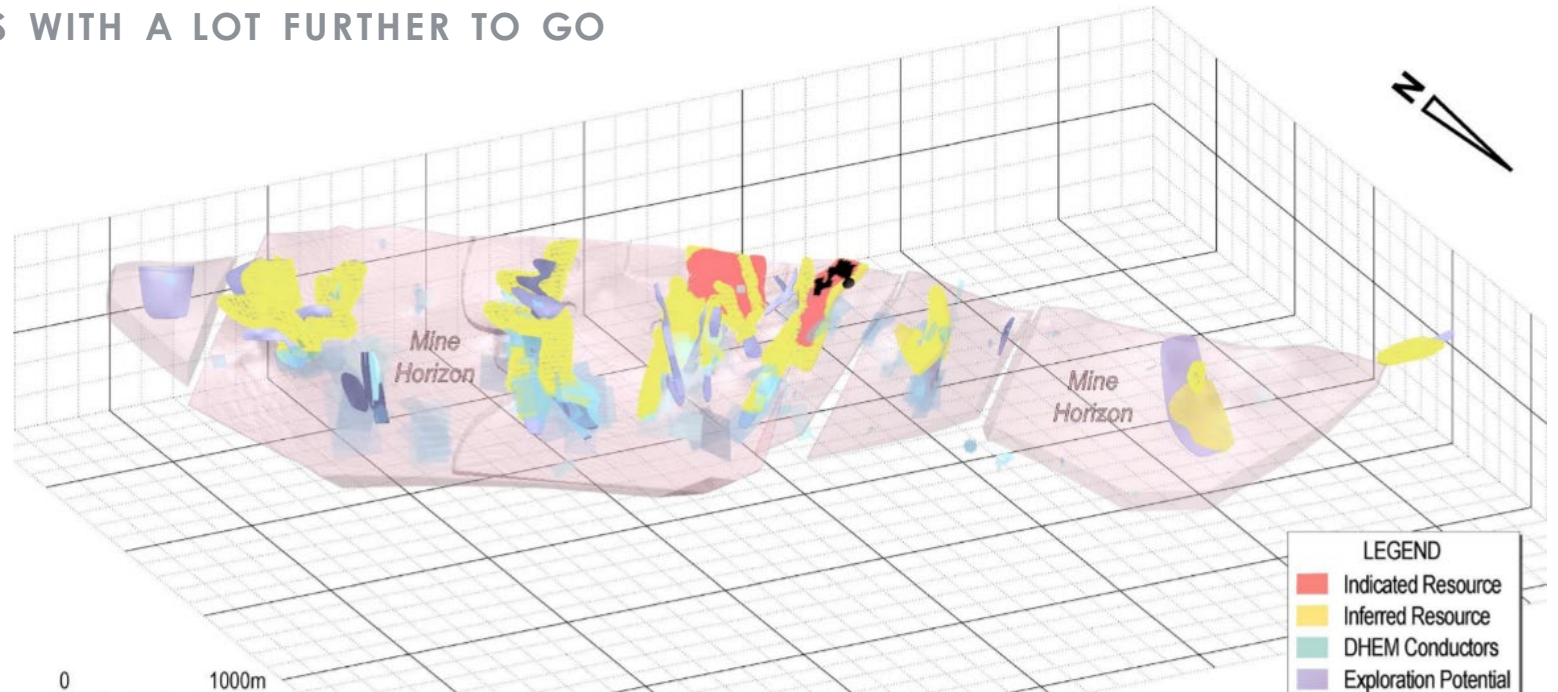

Maiden JORC Resource delivered

**1,005,000 ounces at 6.1g/t Au, including 384,000 ounces of Indicated material at 9.0g/t Au<sup>1</sup>**

### Substantial extensional potential

numerous DHEM and FLEM/VTEM conductors to follow high-grade shoots

**Resource is open in all directions**

## Next steps

**Finalise detailed regional exploration targeting study**

**Initiate Mine scoping studies**
