

# Fully funded for 2026 gold exploration programs

---

Over 20,000m of drilling  
planned across Platina's gold  
portfolio

---

Corey Nolan, Managing Director

RIU Explorers Conference – February 2026

---

---

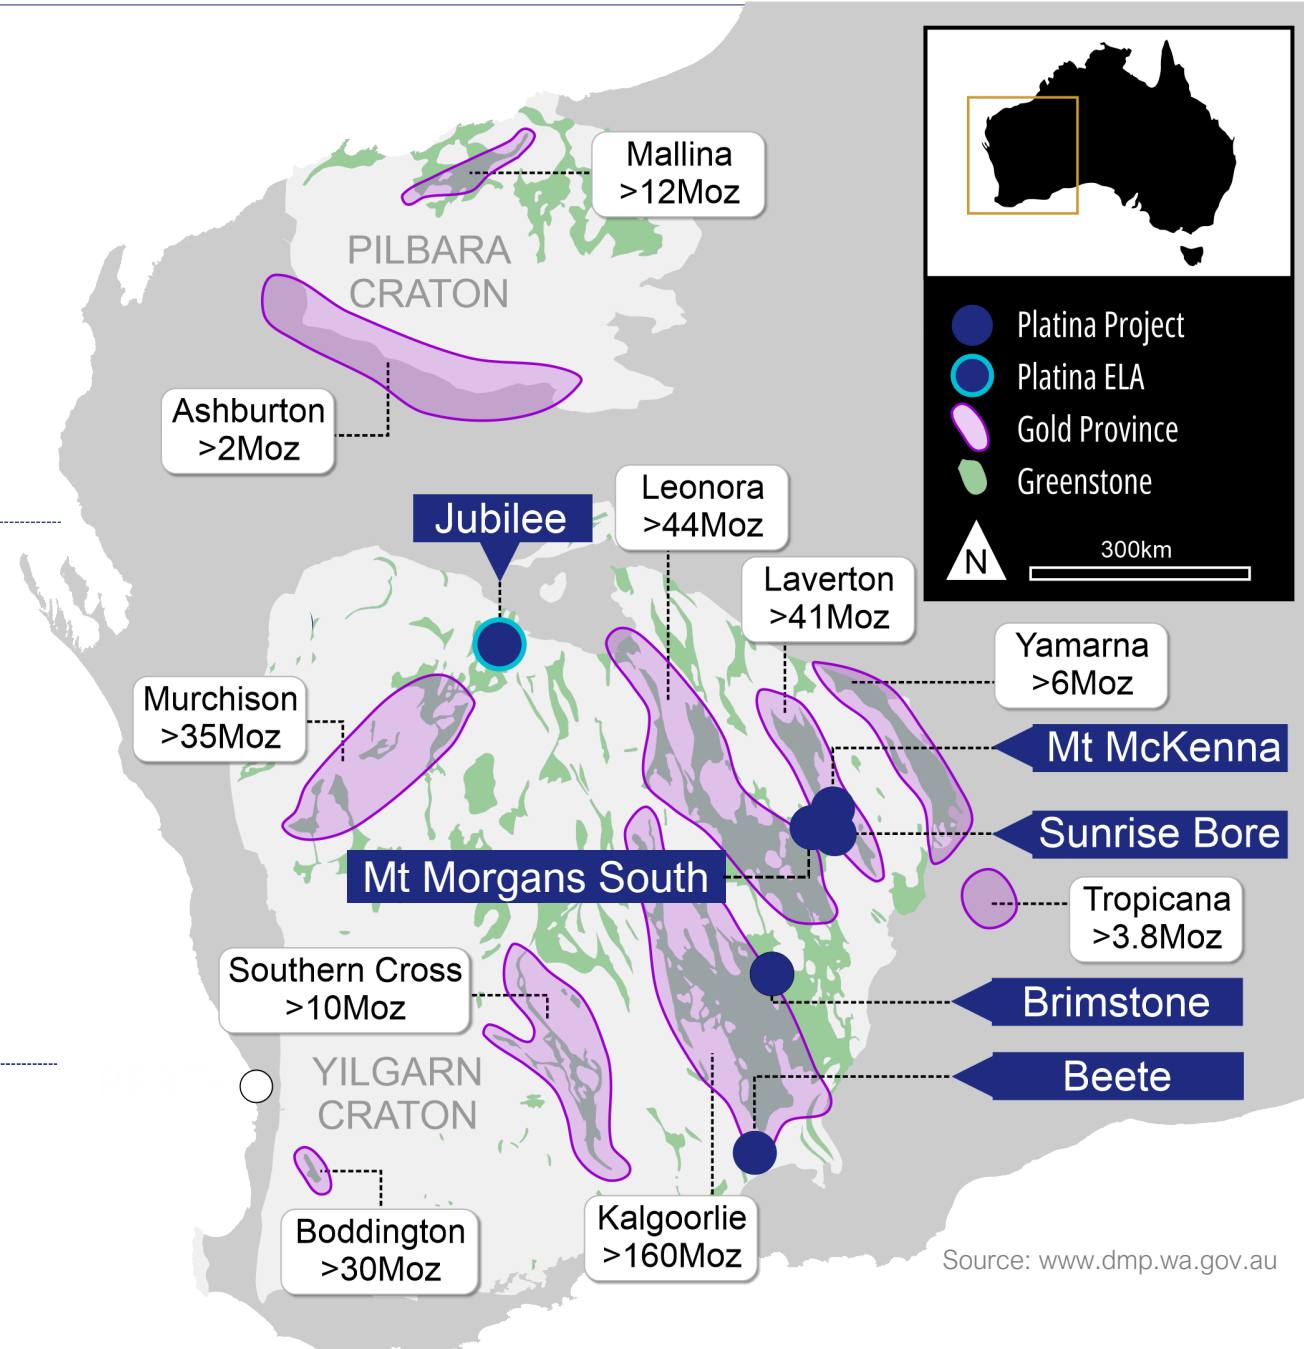

ASX:PGM

# Platina is a Western Australian focused gold explorer

\$11.3 million in cash to advance our projects towards discovery success and share price upside

Over 20,000m of drilling planned across Platina's portfolio in 2026

# Target: projects with +1 Mozs potential

- 01 Projects located within the **Archean Yilgarn Craton**, a globally recognised, highly mineralised province
- 02 Hosted within **greenstone belts** known for major gold discoveries
- 03 **Major structural corridors** with mantle-tapping faults and shear zones — ideal pathways for mineralising fluids
- 04 **Multiple deformation events** and intrusions enhance potential for large-scale mineral system

# Recent WA gold discoveries rewarded

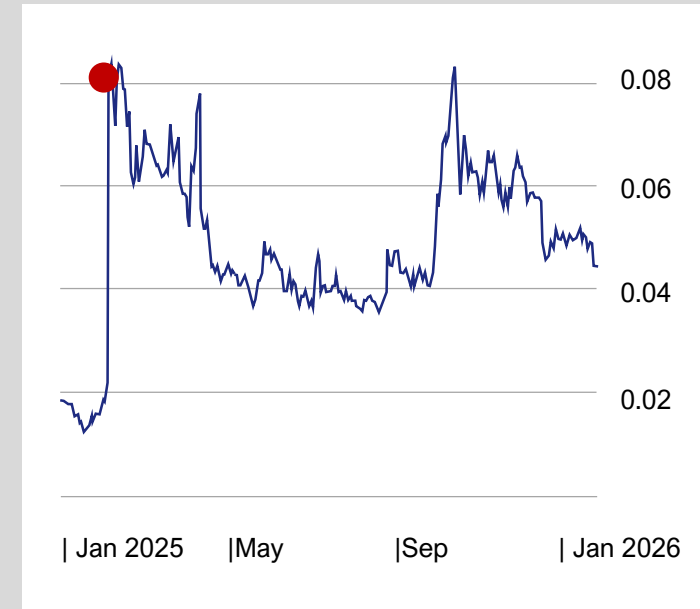

Yandal Resources (ASX:YRL)

● 22 September 2025

Arrakis discovery, Ironstone Well-Barwidgee (Yandal belt)

Kalgoorlie Gold Mining (ASX:KAL)

● 7 February 2025

Lighthorse discovery, Pinjin (Eastern Goldfields). Thick, high-grade intercepts reported

# Prime focus on drilling Laverton targets in 2026

## Mt McKenna

Back-to-back drilling programs planned to commence in early 2026, targeting multiple priority exploration zones across more than 20km of prospective greenstone stratigraphy

## Sunrise Bore

Resource definition RC drilling planned following the grant of the tenement, targeting a highly prospective gold system within a proven mineralised corridor not drilled since 1997

## Mt Morgans South

Pending transaction completion, exploration and drilling activities to be advanced across a suite of shear and intrusion related gold targets

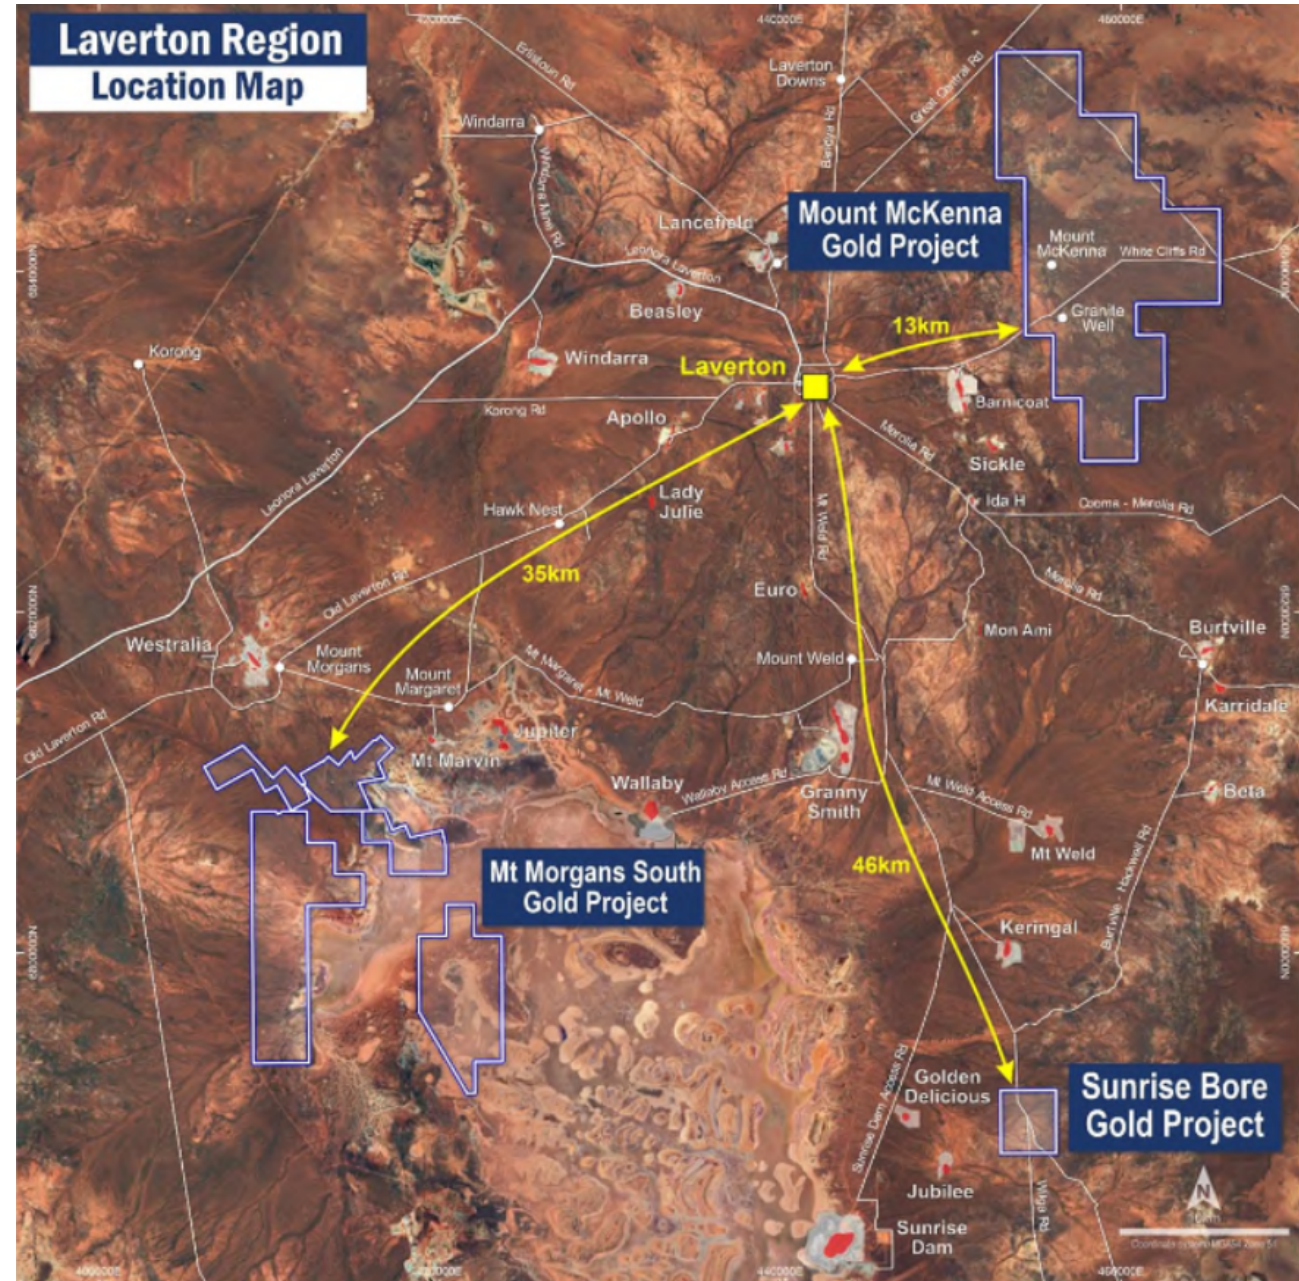

# Laverton

## Excellent infrastructure

- Laverton township – accommodation, airport, hospital, skilled workforce
- Major roads, gas and power available
- Multiple gold processing plants within 50km distance of the tenements
- Simple project access enables rapid and cost-effective exploration and drilling

See ASX release, 3 September 2025, “New gold project acquisition in the world-class Laverton gold district of Western Australia

Source: [www.dmp.wa.gov.au](http://www.dmp.wa.gov.au)

# Mt McKenna Project

## Excellent geological address

- Large fault** Tenement traversed by large mantle tapping regional fault
- Intrusives** Monzogranite and a syenite intrusions enhance prospectivity
- Right rocks** Greenstones covering more than 20km of north-south strike
- Potential for nickel** Large layered mafic-ultramafic intrusive.

See ASX release, 3 September 2025, "New gold project acquisition in the world-class Laverton gold district of Western Australia"

Source: [www.dmp.wa.gov.au](http://www.dmp.wa.gov.au)

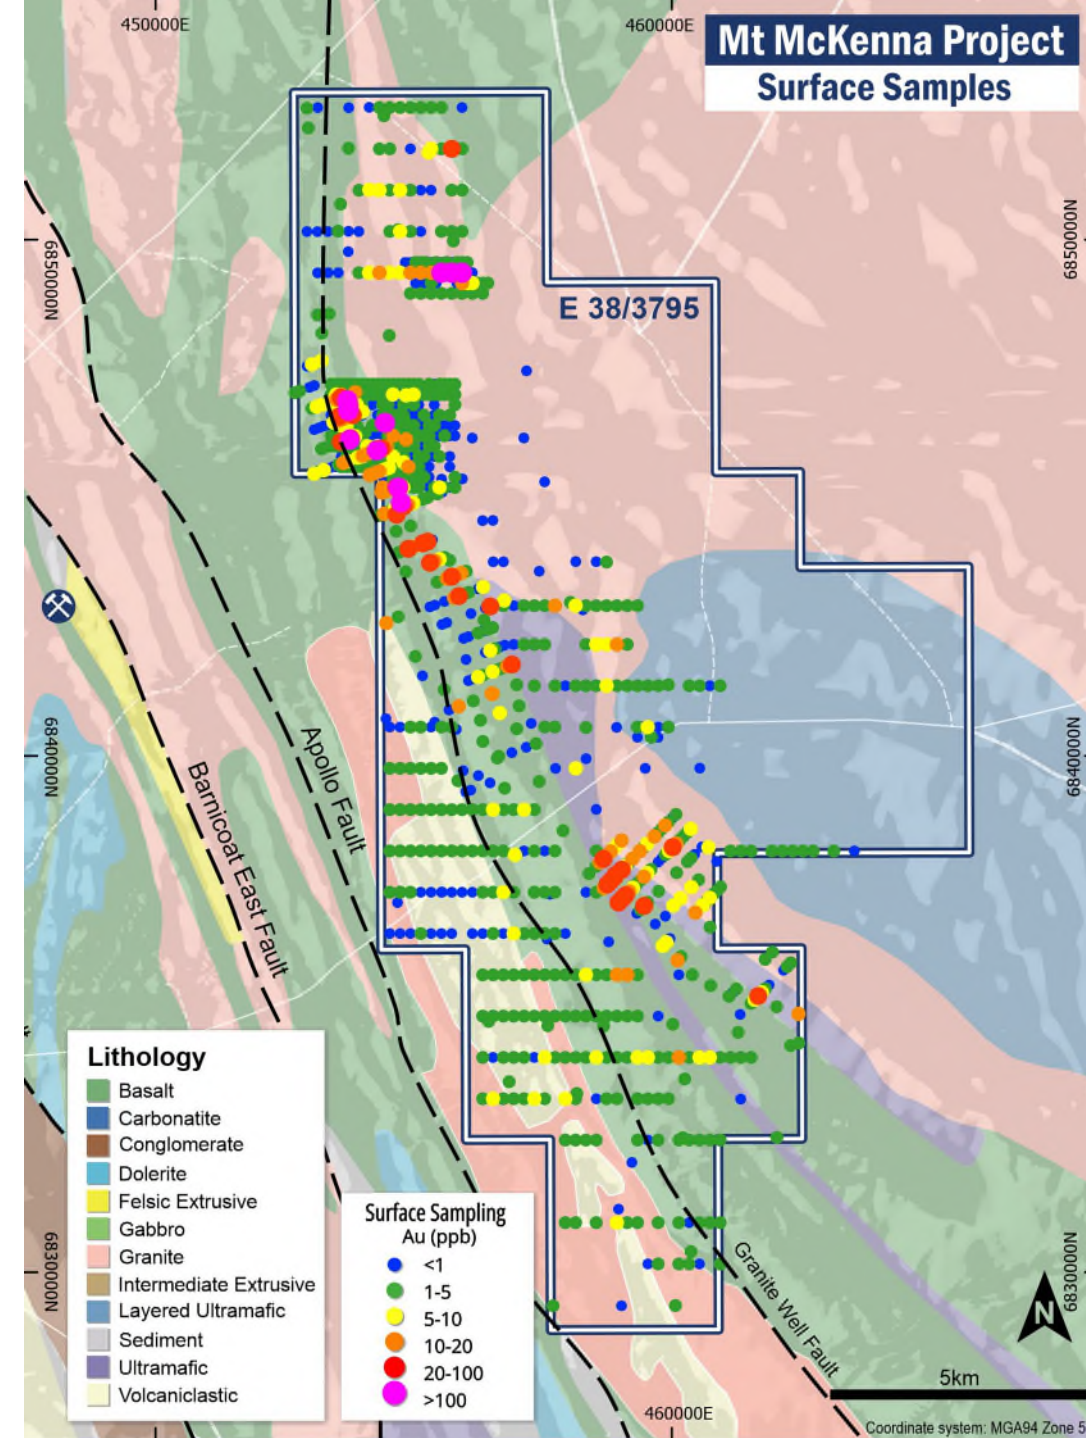

# Mt McKenna Project

## Limited historical exploration

- Soil sampling by Placer in 1999
- 713 drill holes drilled on the tenement:
  - 99% of the holes are less than 95m depth; and
  - 90% of the holes are less than 60m depth.
- Demonstrates significant geological potential:
  - Granite Well fault system has not been tested sufficiently
  - Only 5 kms of the 25km long syenite-mafic contact has been sparsely drill tested

See ASX release, 3 September 2025, "New gold project acquisition in the world-class Laverton gold district of Western Australia"

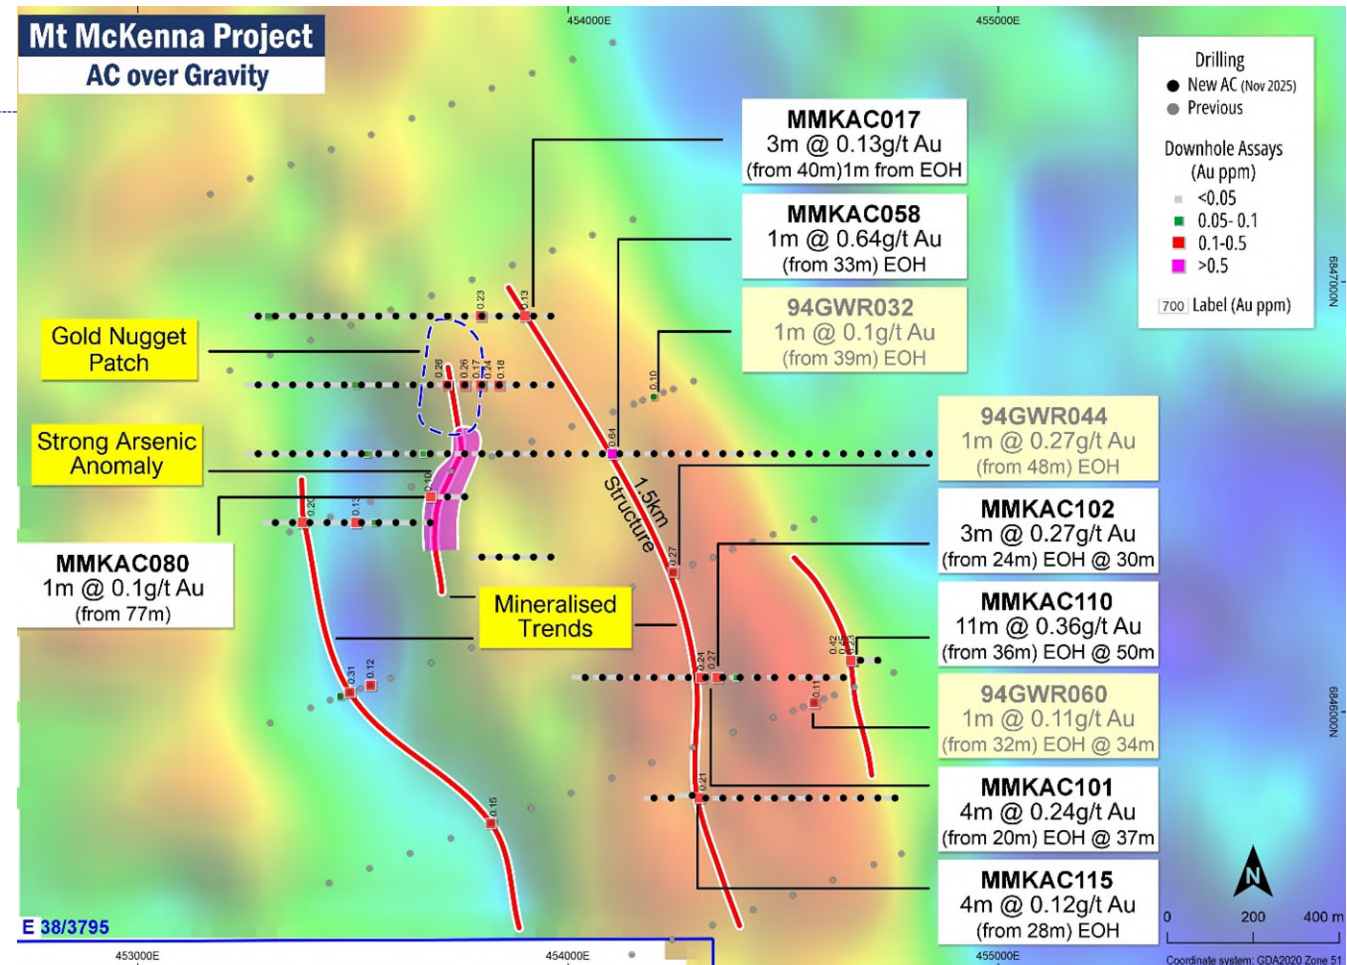

# Mt McKenna Project Phase 1 drilling results

Phase 1 aircore drilling at Target 2 successfully identified a 1.5km mineralised structure defined by the following intersections:

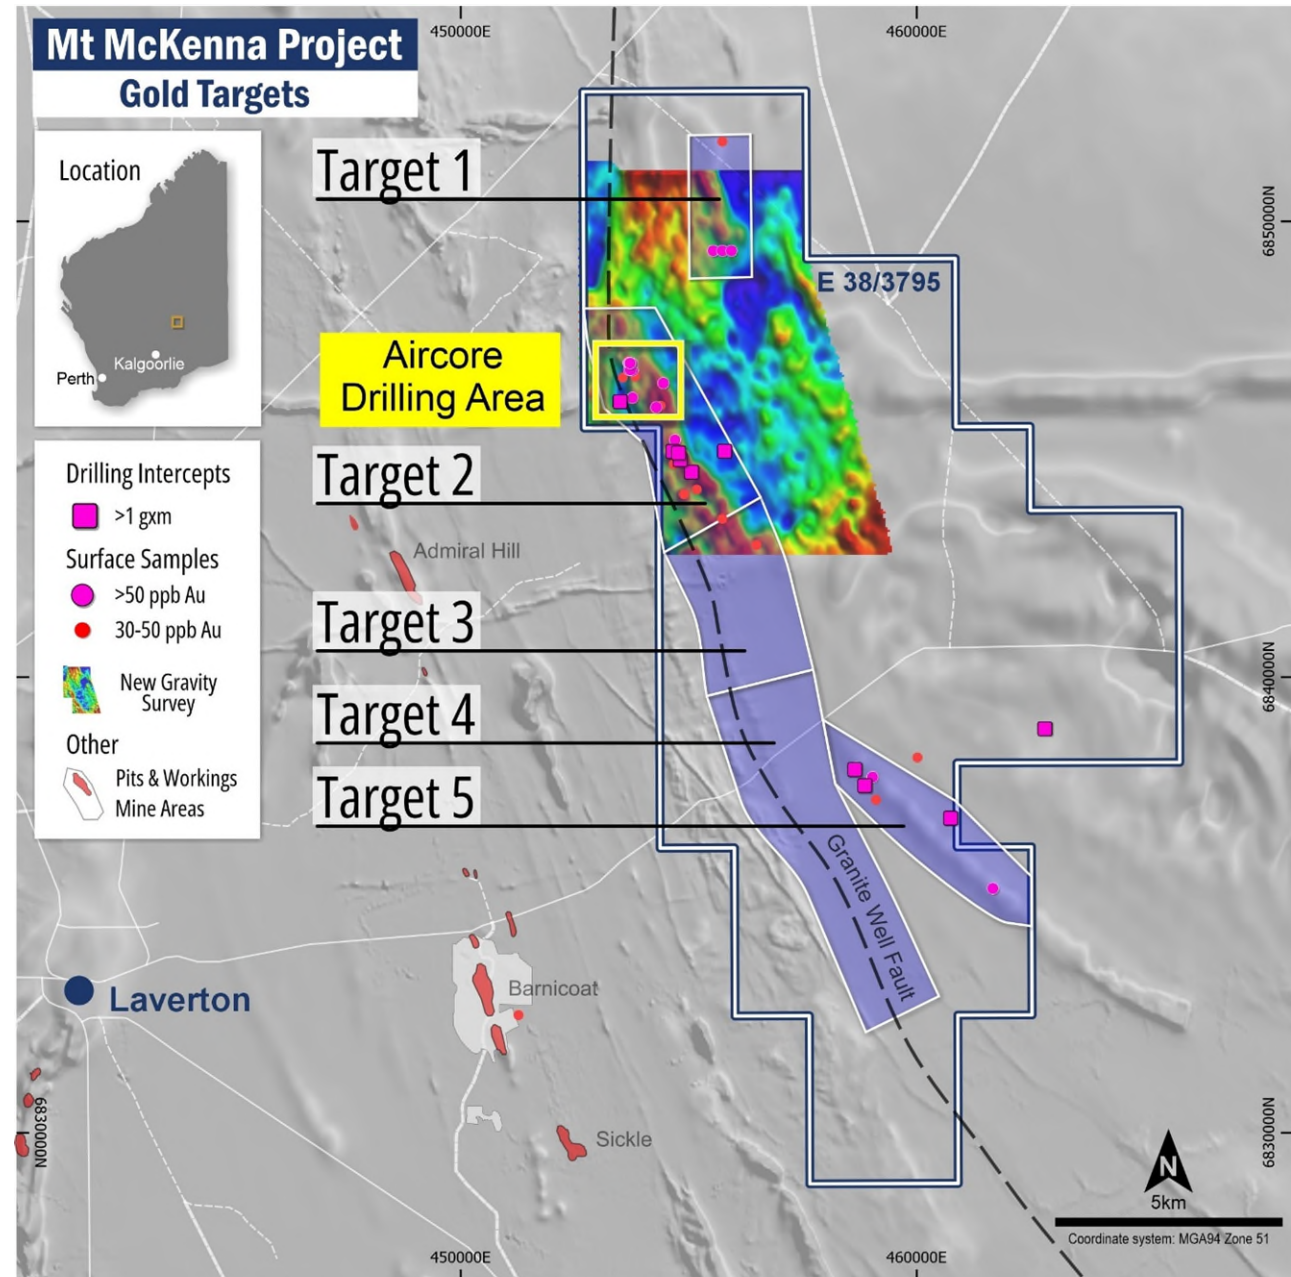

- 11m @ 0.36g/t Au from 36m
- 1m @ 0.64g/t Au from 33m
- 4m @ 0.24g/t Au from 20m
- 3m @ 0.27g/t Au from 24m
- 4m @ 0.12g/t Au from 28m
- 3m @ 0.13g/t Au from 40m

A total of 126 aircore holes for 6,056m were drilled across the northern portion of the Target 2 area.

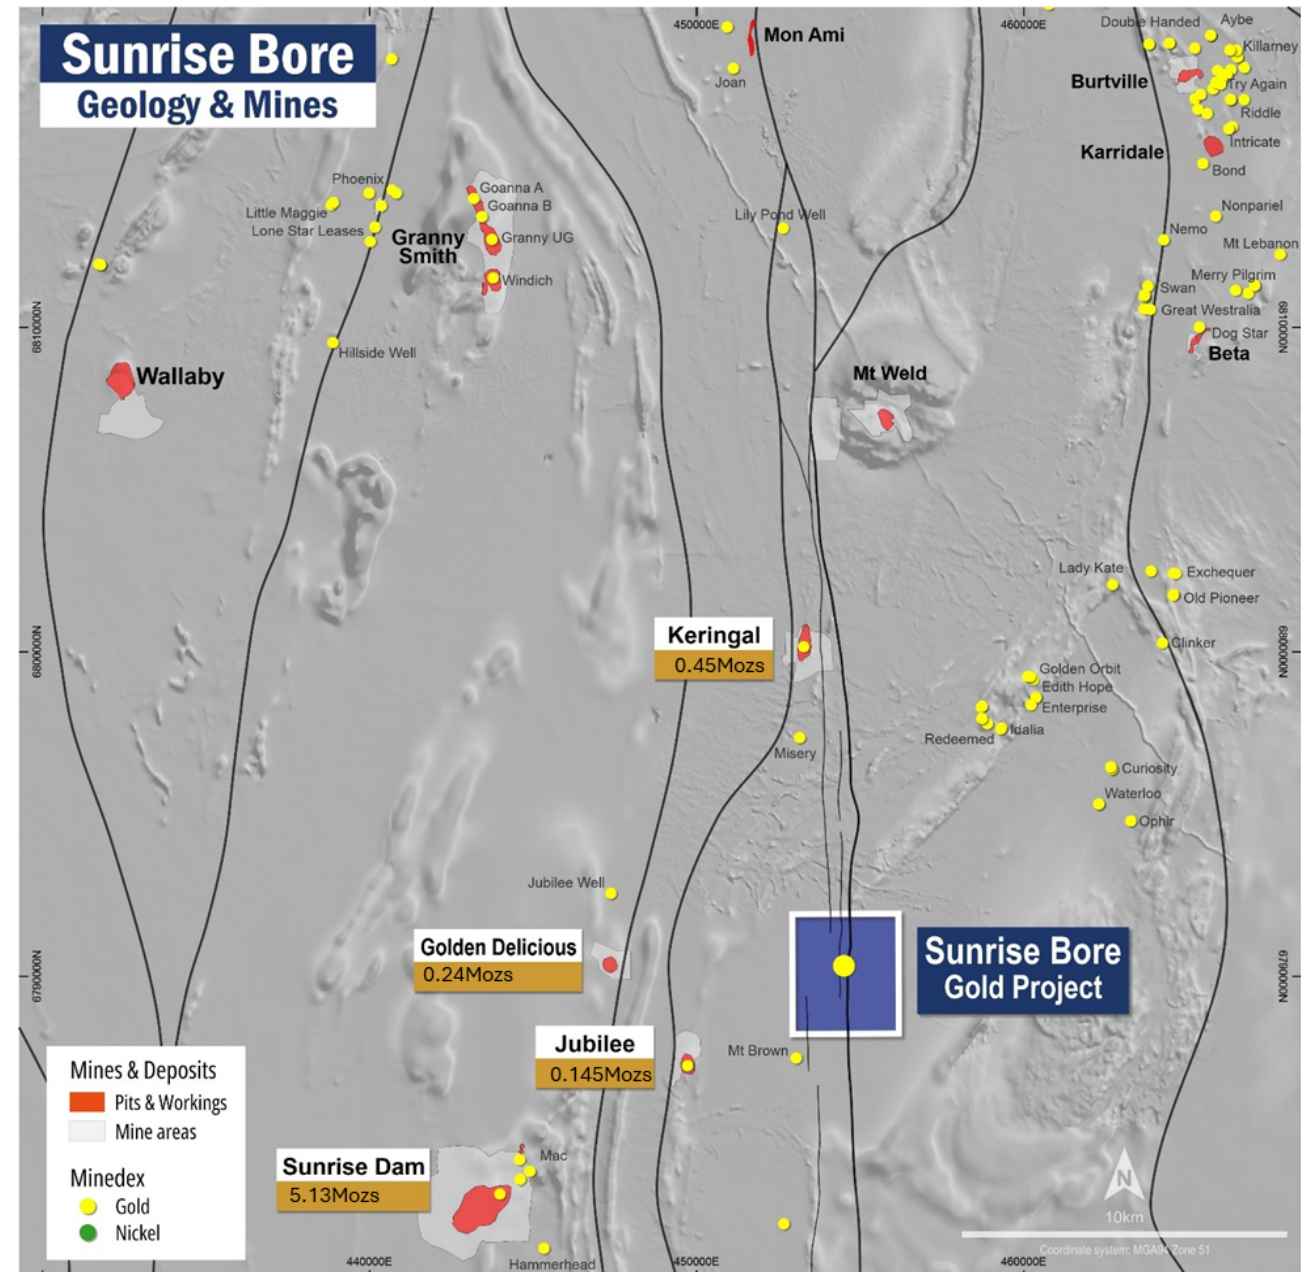

# Mt McKenna Project Planned activities

- Planned 1H2026 exploration activities:
  - Phase 1 results – completed
  - Phase 2 drilling at Target 2 – February
  - Geological mapping and ground gravity surveys – February
  - Cultural heritage clearance Targets 4 and 5 – February
  - Aircore drilling Targets 4 and 5 – April
- Over time, systematically test the broader project area, which covers more than 20km of prospective greenstones, structures and intrusives.

# Sunrise Bore Project

- Conditional Agreement to acquire project on granting of Exploration Licence Application (ELA)
- ELA 12km<sup>2</sup>, 45km south of Laverton
- Located Mineralisation straddles a major north-south fault which hosts the:
  - Keringal Mine (450koz Au) 8km to the north;
  - Adjacent to Golden Delicious Mine (240koz Au);
  - Jubilee Mine (145koz Au).
- Goldfields Sunrise Dam Mine and Plant just 12km to the southeast

# Sunrise Bore Project

- Over 800m of mineralisation in wide-space drill lines and high-grade intersections.
- Not drilled in more than 28 years.

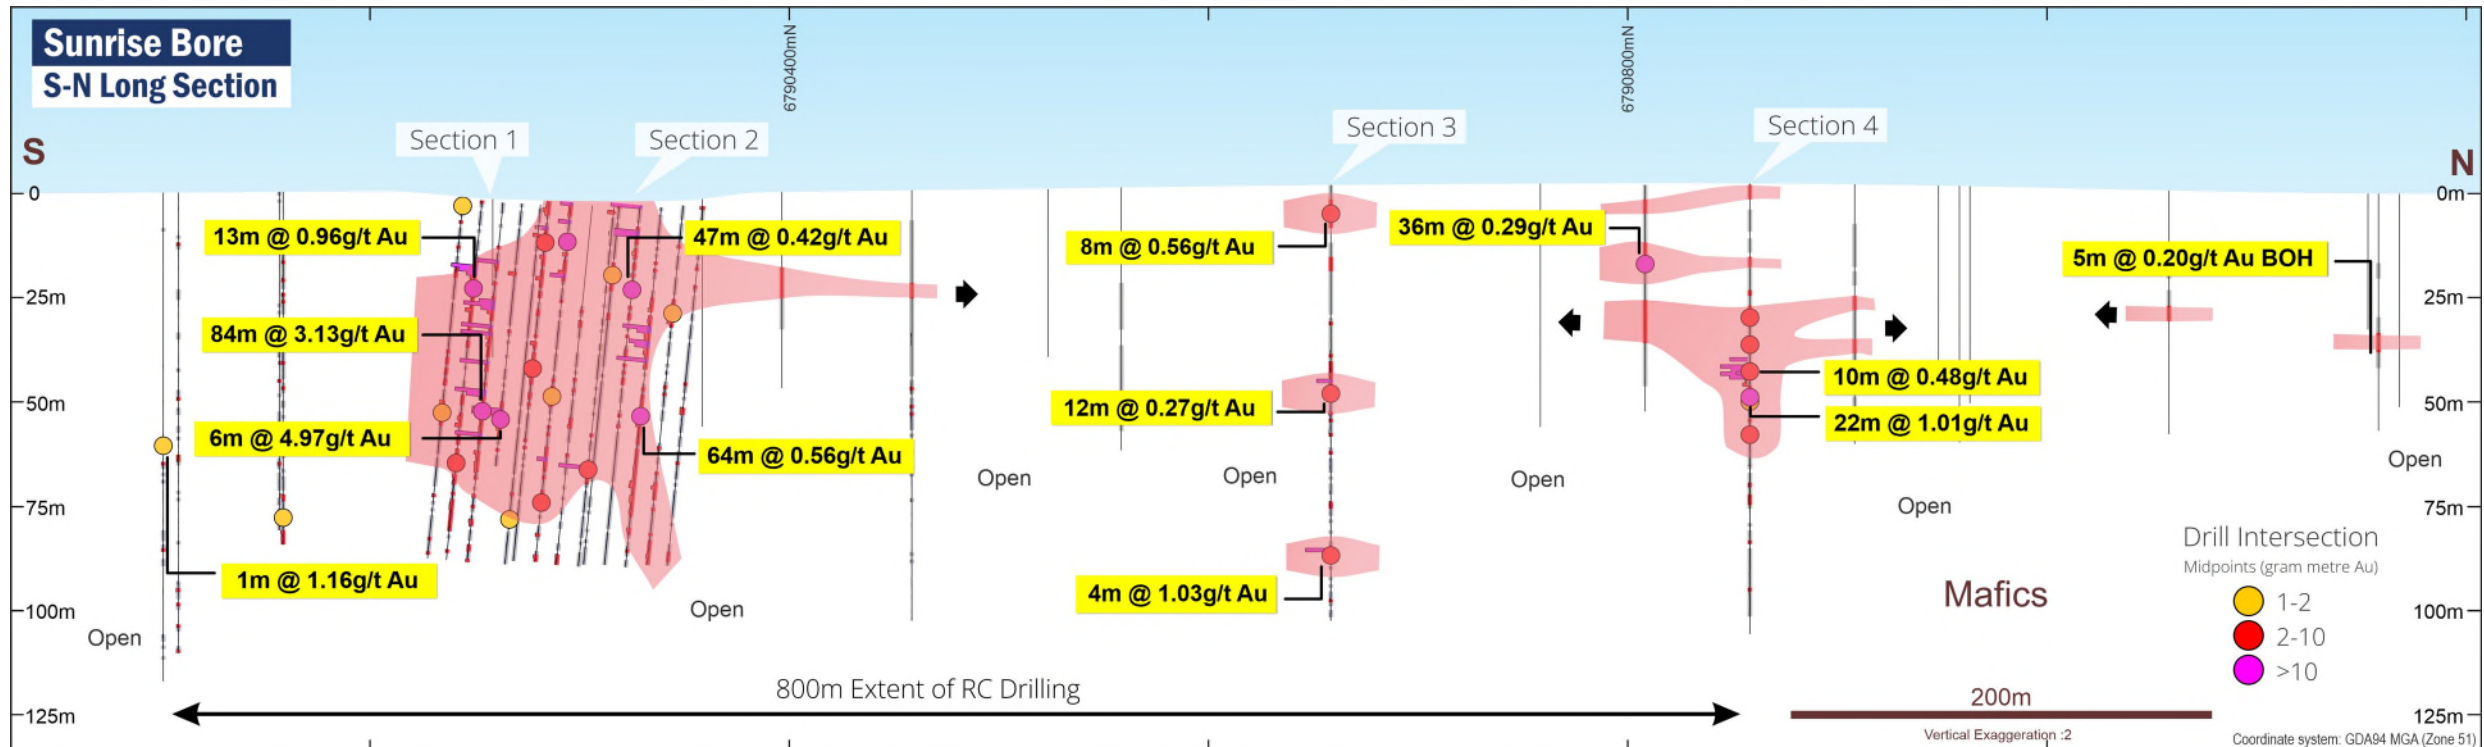

See ASX release, 20 October 2025, "Sunrise Bore acquisition expands Laverton land holding in WA".

# Sunrise Bore Project

## Large scale exploration potential

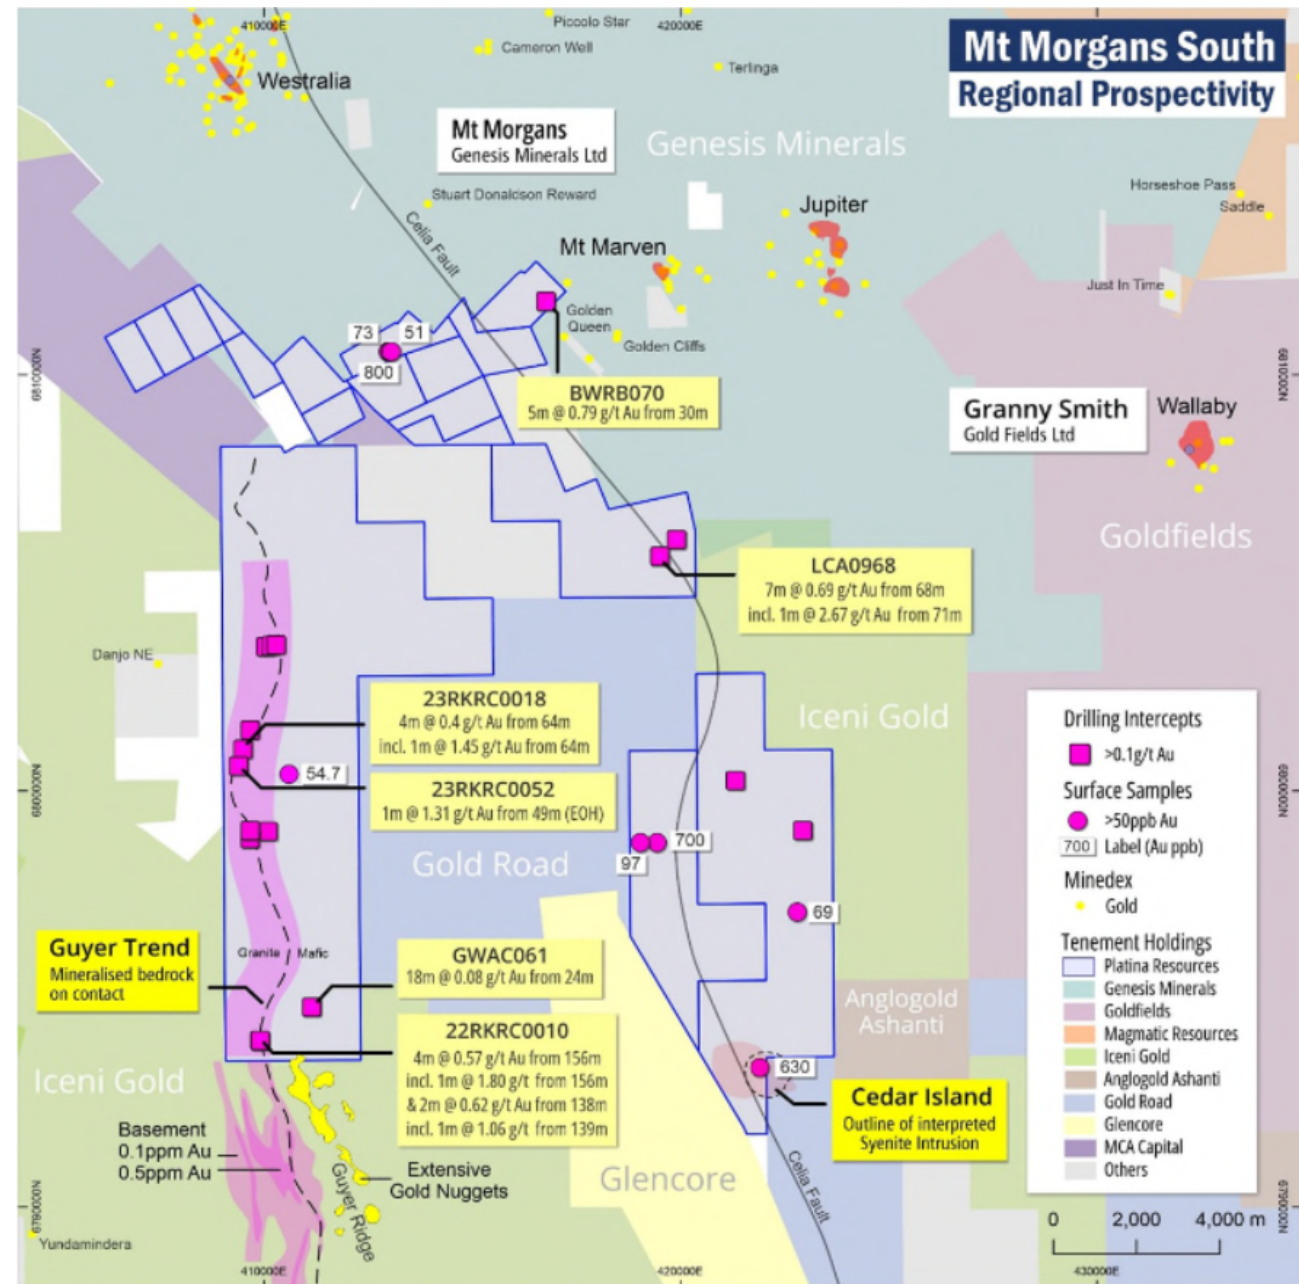

See ASX release, 20 October 2025, "Sunrise Bore acquisition expands Laverton land holding in WA".

- 3.6km of mineralised strike to explore - historical drilling focused on only 800m of this zone.
- Mineralisation is open along strike, down dip and plunge.

# Mt Morgans South Project

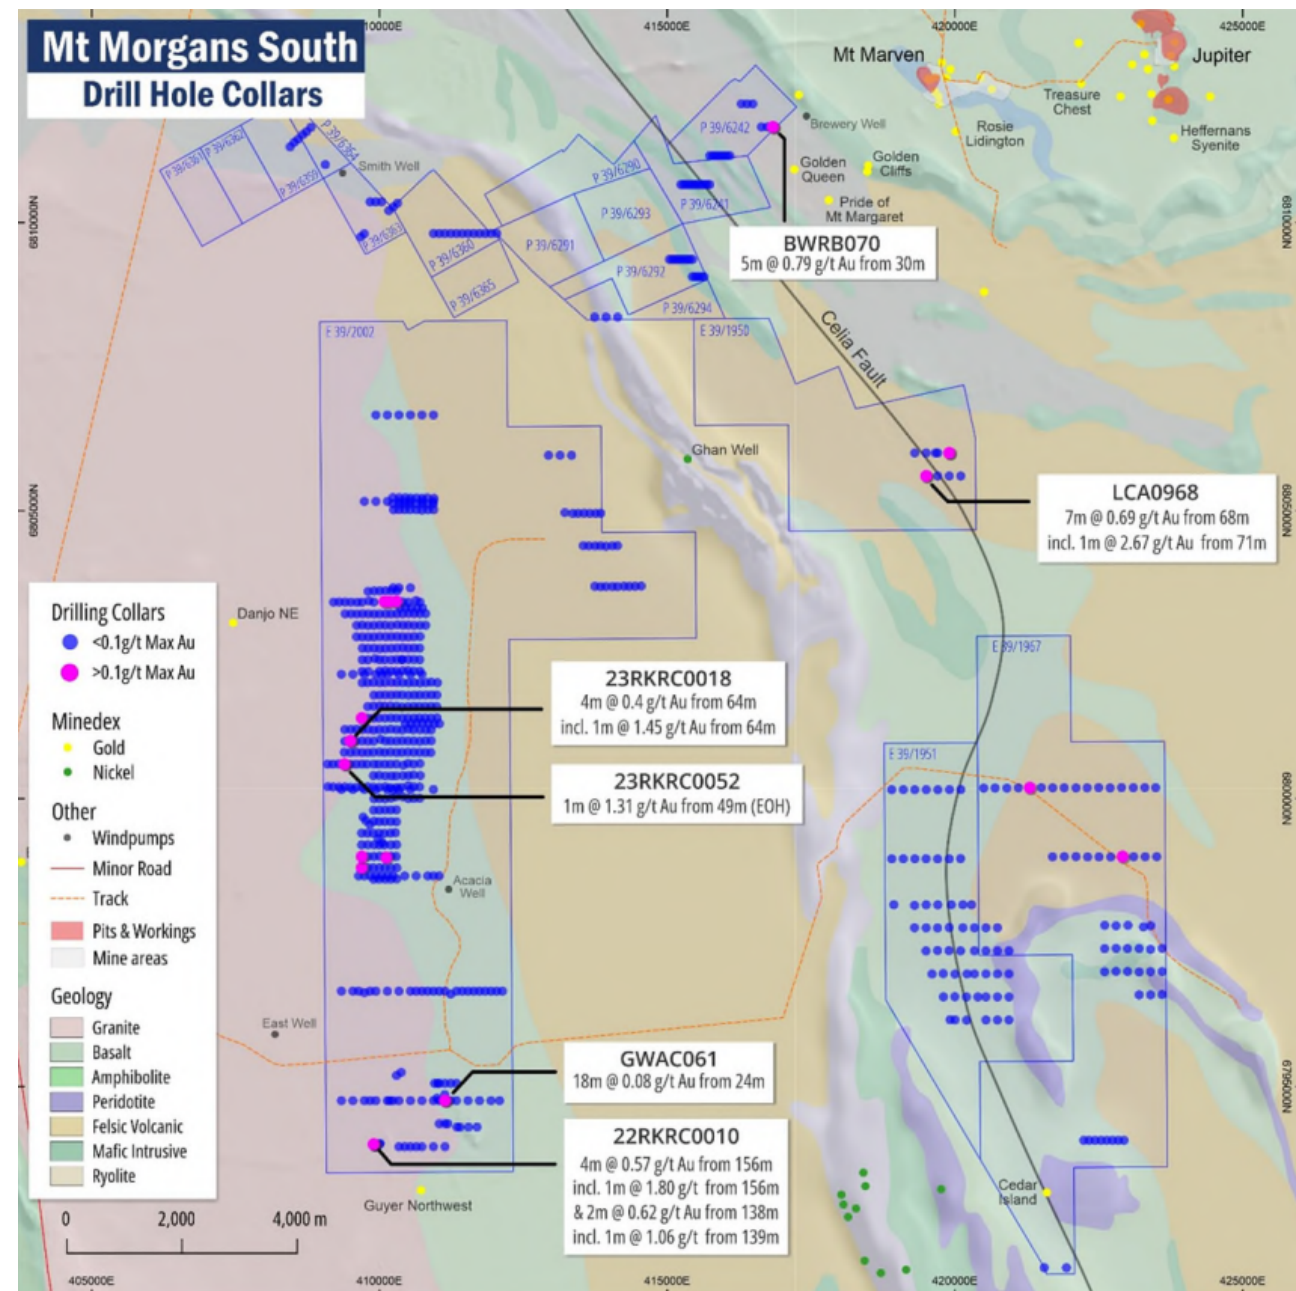

- Four Exploration Licences and 14 Prospecting Licences, covering 126.4km<sup>2</sup> approximately 35km southwest of Laverton.
- Traversed by major regional structures including the Celia Fault, a key control on gold mineralisation.
- Project is proximate to major mines and deposits including:
  - Mt Morgans Gold Operations (3.4Moz Au);
  - Wallaby Gold Mine (3.9Moz Au) 12km to the east;
  - Icen Gold Ltd’s Guyer prospect abuts the project to the south

See ASX release, 10 December 2025. "Expands footprint in the world-class Laverton gold district".

# Mt Morgans South Project

- Historical exploration has defined interpreted mineralised trends across the project area, providing clear target corridors for follow-up.
- Extensive historical surface geochemistry completed across the project area, including multiple soil sampling programs.
- 661 drill holes completed between 1998 and 2023 for 37,244m.
- Three priority target zones have been defined to focus follow-up work across the tenure.

# Executive Management

## Corey Nolan Managing Director

30 years' experience focused on the acquisition, funding, exploration and development of resource projects

Previously CEO at Sayona Mining Ltd where he acquired the Authier lithium project in Canada

Non-Executive Director of Elementos Ltd

## Rohan Deshpande Exploration Manager

Geologist with 18 years' experience primarily focused on the Pilbara and Yilgarn Craton in WA

Previously Exploration Manager Hemi at De Grey Mining and part of the discovery team on the multi-million-ounce Hemi gold deposit

# Why invest?

01

## Tier 1 Project Locations

Strategic assets positioned in world-class mining jurisdictions with established infrastructure and proven mineral potential.

02

## Project Discovery Potential

High-quality exploration targets with outstanding discovery potential.

03

## Management Expertise

Led by an experienced team with a proven record of discovery, development, and value delivery.

04

## Well Capitalised

Strong cash position enabling active exploration programs without reliance on near-term dilutionary funding.

# Share price catalysts

## Mt McKenna

Back-to-back drilling 1H 2026.

## Sunrise Bore

Drilling planned once EL granted.

## Mt Morgans South

Drilling planned once transaction completed.

## Beete

Drilling later in 2026.

## Brimstone

Unlocking project value.

# Record gold prices ahead of extensive 2026 exploration

## Momentum

Recent record gold price highs

## Safe Haven

Hedge against inflation, currency depreciation & economic uncertainty

## Central Bank Buying

Strong price support

## Portfolio Diversification

Risk premium for other assets increased

## Gold price

USD/oz  
as at 4 February 2026

# Disclaimer

## CAUTIONARY AND FORWARD-LOOKING STATEMENTS

This presentation contains “forward-looking information” which may include, but is not limited to, statements with respect to the future financial or operating performance of Platina Resources Limited (“Platina”), its subsidiaries and its projects, the future price of platinum group metals (“PGM’s”), the estimation of mineral resources, operating and exploration expenditures, costs and timing of development of new deposits, costs and timing of future exploration, requirements for additional capital, government regulation, environmental risks, reclamation expenses, title disputes or claims and limitations of insurance coverage. Often, but not always, forward-looking statements can be identified by the use of words such as “plans”, “expects”, “is expected”, “budget”, “scheduled”, “estimates”, “forecasts”, “intends”, “anticipates”, or “believes” or variations (including negative variations) of such words and phrases, or state that certain actions, events or results “may”, “could”, “would”, “might” or “will” be taken, occur or be achieved. Forward-looking statements involve known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of Platina and/or its subsidiaries to be materially different from any future results, performance or achievements expressed or implied by the forward looking statements. Such factors include, among others, general business, economic, competitive, political and social uncertainties; the actual results of current exploration activities; conclusions of economic evaluations; changes in project parameters as plans continue to be refined; future prices of PGM’s; possible variations of ore grade or recovery rates; failure of plant, equipment or processes to operate as anticipated; accident, labour disputes and other risks of the mining industry; and delays in obtaining governmental approvals or financing or in the completion of development or construction activities. Although Platina has attempted to identify important factors that could cause actual actions, events or results to differ materially from those described in forward-looking statements, there may be other factors that could cause actions, events or results to differ from those anticipated, estimated or intended. Forward-looking statements contained herein are made as of the date of this presentation and Platina disclaims any obligation to update any forward-looking statements, whether as a result of new information, future events or results or otherwise. There can be no assurance that forward-looking statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Platina undertakes no obligation to update forward-looking statements if circumstances or management’s estimates or opinions should change. Accordingly, the reader is cautioned not to place undue reliance on forward-looking statements

## REFERENCES TO PREVIOUS ASX RELEASES

The information in this presentation that relates to Exploration Results were last reported by the Company in compliance with the 2012 Edition of the JORC Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves in market releases dated as follows:

- 3 September 2025 - New gold project acquisition in the world-class Laverton gold district of Western Australia.
- 3 November 2025, “Mt McKenna exploration update
- 20 October 2025, “Sunrise Bore acquisition expands Laverton land holding in WA
- 19 January 2026, “Mt McKenna Gold Project: aircore drilling identifies 1.5km mineralised structure”.

The Company confirms that it is not aware of any new information or data that materially affects the information included in the market announcements referred above and further confirms that all material assumptions underpinning the production targets and all material assumptions and technical parameters underpinning the Ore Reserve and Mineral Resource statements contained in those market releases continue to apply and have not materially changed.

## DISCLAIMER

Statements regarding Platina Resources’ plans with respect to its mineral properties are forward-looking statements. There can be no assurance that Platina Resources’ plans for development of its mineral properties will proceed as currently expected. There can also be no assurance that Platina Resources will be able to confirm the presence of additional mineral deposits, that any mineralisation will prove to be economic or that a mine will successfully be developed on any of Platina Resources’ mineral properties or that Platina will achieve any of the valuation increases shown by the peer group companies.

This presentation was authorised by Corey Nolan, Managing Director of Platina Resources Limited.
