# INFRASTRUCTURE MARKET DRIVERS

- The momentum of new energy projects connecting to the National Electricity Market (NEM) continues to build.
- In the Dec 2025 Quarter 18 projects (3.8 GW) received application approval, 10 projects (1.9 GW) were registered, and 9 projects (1.8 GW) reached full output across the NEM.
- The projected 10,000km of transmission projects by 2050 are projected to reduce costs for consumers by delivering benefits that would recoup their \$16 billion investment costs, save consumers a further \$18.5 billion in avoided costs, and deliver emissions reductions valued at \$3.3 billion.

# ENERGY & ENGINEERING

## STRATEGY UPDATE

### Capitalising on Market Growth:

Leveraging the rapid expansion of the energy sector by aligning our capabilities and resources to meet increasing demand. Through targeted investment and strategic workforce expansion, we are strengthening our position as a leading provider of EPC, engineering services, remote monitoring solutions, and operations & maintenance in the Utility and energy market.

### Strong Client Partnerships & Value Creation:

By building strong relationships and consistently delivering value, we are proud to work with a growing number of return clients. Leveraging our capabilities across EPC, engineering services, remote monitoring, and operations & maintenance, we continue to support our clients beyond project delivery.

### Proven Execution & Long-Term Value:

With proven execution and a focus on long-term value, we have built strong relationships with return clients who trust us to deliver. Combining EPC expertise with engineering, remote monitoring, and operations & maintenance, we provide lifecycle support that ensures performance, reliability, and sustainable outcomes, strengthening our position as a trusted partner in the renewable energy market.

# SERVICES

## STRATEGY UPDATE

### Sector Outlook

- **Telecommunications:** Australia's telecom sector is driven by network construction and upgrades, underpinned by NBN upgrades, 5G deployment and demand for resilient digital infrastructure. Genus is well-positioned through its national footprint, strong carrier and utility relationships, and proven delivery capabilities.
- **Utilities:** Addressing rising opex/capex pressures with advanced asset management and inspection trials, including drones, improving data quality and supporting future AI-enabled asset management.
- **Vegetation Management:** Diversifying services for existing customers and other utilities with vegetation management critical to delivering integrated, efficient infrastructure and energy solutions.
