Letter from the Chair

Welcome **Kia ora koutou**

Dame Therese Walsh
Chair

Pierre & Brooke
Customer Service Agents

Lani
Flight Attendant

Air New Zealand is proud to be New Zealand's national airline, and keeping our country and communities connected is a responsibility we take seriously.

The operating environment across the half remained demanding and disruption placed real pressure on teams right across the airline. I know how much has been asked of our people. To Air New Zealanders across the network, thank you for how you've responded – with professionalism, resilience and a strong focus on keeping things moving.

For the first half of the 2026 financial year, Air New Zealand recorded a loss before taxation of \$59 million and a net loss after taxation of \$40 million. This result reflects the combined impact of ongoing fleet

constraints, a slower-than-expected recovery in domestic demand, and rising costs, including persistently high aviation system inflation. Cost pressures have been further exacerbated by a weaker New Zealand dollar. While some of these pressures are cyclical, others are more enduring and they are directly impacting both the cost of flying and affordability for customers.

Late last year, the Board and I asked Nikhil to undertake a company-wide strategy review. The environment we are operating in has changed, and as New Zealand's national airline we play an important role in supporting New

Zealand, particularly as it relates to export and tourism. The strategy reset will allow us to be firmly focused on strengthening and growing our airline to deliver long-term growth and prosperity for New Zealand.

Fleet availability remained one of our most significant headwinds across the first half, both operationally and financially, with up to eight aircraft grounded at times due to global engine maintenance delays. This has been frustrating for customers and our teams alike and has had a material financial impact. The airline received \$55 million of compensation from engine manufacturers

Letter from the Chair (continued)

during the period, however it estimates an additional \$90 million¹ of earnings could have been included within the result had the fleet operated as intended. We continue to work closely with manufacturers to improve certainty around engine return schedules and appropriate compensation.

While there are some early signs of improvement in the outlook for engine returns in the second half, the financial benefit will take longer to flow through. That is because widebody capacity cannot be reintroduced into the schedule and sold at short notice. The primary constraint is uncertainty in the timing of aircraft and engine returns, which limits our ability to plan and sell additional flying with confidence. Disruption-related costs and inefficiencies also take time to unwind.

Financial result

Passenger revenue increased four percent to \$3.0 billion, supported by additional capacity across Tasman and Pacific Islands routes and a higher mix of premium seating on international services. Domestic performance was below expectations reflecting a slower recovery in domestic demand, in particular business purpose travel, alongside continued cost pressures. Passenger revenue also includes \$11 million of unused travel credit breakage, reflecting the conclusion of the Covid-era travel credit programme. This follows a multi-year extended redemption period to support customers to use their credits.

Operating costs including fuel were up eight percent, with the benefits of lower fuel prices offset by higher input costs across the business and a weaker New Zealand dollar.

Fuel costs increased, with the benefit of lower jet fuel prices more than offset by a weaker New Zealand dollar, higher cost of carbon and the operation of less fuel-efficient aircraft due to engine constraints.

Non-fuel operating cost inflation of approximately \$75 million was driven primarily by mandated passenger levies, engineering and maintenance costs, and airport landing charges. As we have noted previously, domestic aviation system charges have risen materially ahead of New Zealand CPI and are expected to continue on this trajectory. That puts sustained upward pressure on the cost of flying, for both Air New Zealand, and ultimately for customers. This reinforces why getting the settings right across the aviation system is so important. The airline's concern is not only about the current level of these costs, but the future trajectory and potential for further increases over time, which would place additional pressure on the business, and the sustainability of regional connectivity.

1. This estimate was calculated based on internal modelling using operational assumptions including capacity, passenger demand, revenue yield, disruption costs and historical performance across affected routes.

Georgia
Flight Attendant

Air New Zealand's new uniform

Against this backdrop, the airline continued to progress its Kia Mau transformation programme and delivered around \$45 million in incremental benefits in the half, with around \$145 million in cumulative benefits since the programme started. These benefits are meaningful and reflect the realisation and ramp up of initiatives outlined at the 2025 annual results, alongside operational improvements. However, the pace and scale of external cost inflation have meant these gains have not been sufficient on their own to offset inflation in the underlying cost base. This will be addressed as part of the ongoing strategic review.

Capital management and dividend

Based on the result announced today the Board has not declared an interim dividend, consistent with the airline's Capital Management Framework. In the current environment, we are taking a prudent approach to distributions, prioritising balance sheet resilience and maintaining financial flexibility while operating conditions remain challenging and uncertainty persists across fleet availability, compensation and key cost inputs.

We remain committed to disciplined capital management and to returning capital when conditions support it.

Letter from the Chair (continued)

Guidance

Based on current trading conditions and assuming an average jet fuel price of US\$85 per barrel for the second half, Air New Zealand expects earnings for the second-half to be broadly in line with, or modestly below, the first half. The outlook remains subject to material uncertainty, including engine return schedules, the timing and quantum of compensation, and continued volatility across key input costs and demand conditions.

Compensation arrangements in respect of certain engines are yet to be agreed for the second half. Air New Zealand is in active negotiations with the relevant manufacturers. While the airline is working hard towards a fair outcome, the timing and quantum of further compensation remains uncertain, and this could materially impact 2026 full year earnings.

Looking ahead

Air New Zealand has strong foundations in our people, our brand, and the capability we are building across the business. The operating environment remains challenging, but our role and our focus is clear: serving New Zealand well, today and for the long term.

To our customers, shareholders, partners, and the wider Air New Zealand whānau, thank you for your support.

Ngā mihi nui,

Dame Therese Walsh
Chair

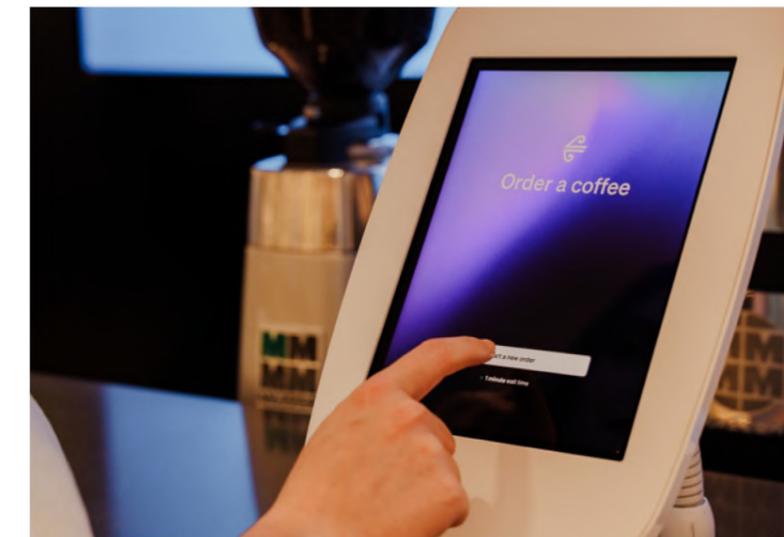

I want to take this opportunity to welcome Nikhil Ravishankar, our new Chief Executive Officer.

Nikhil brings deep knowledge of Air New Zealand and the sector, and a clear focus on what matters most: connecting New Zealanders to each other and the world, delivering value for customers, and running an airline Kiwis can be proud of. His leadership is already sharpening our priorities, including lifting operational performance, improving productivity, and ensuring the airline is positioned to succeed. The Board and I are excited about the next chapter for Air New Zealand under Nikhil's leadership.

Letter from the Chief Executive Officer

Nikhil Ravishankar
Chief Executive Officer

Kia ora.

This is my first set of results as Chief Executive, and I have been reflecting on what it means to lead our national airline.

First of all, I want to say thank you to Air New Zealanders across the airline, for the professionalism and care you show our customers and each other, every day. I see it, I hear it from customers, and I am incredibly grateful for it. I also know that when we don't deliver the experience people expect from us, it can create real stress and disruption and that weighs heavily on all of us.

Air New Zealand has always been more than an airline. We connect families and friends, ideas and opportunities. We carry the trade, talent and ambition that keeps Aotearoa New Zealand moving and growing. For visitors, we are often their first experience of New Zealand. For Kiwis overseas, we are the welcome home. That role is a privilege, and it is also why we have to run a strong, resilient business that can deliver over the long-term.

Eunice, Connor & Don
Aircraft Engineers

Letter from the Chief Executive Officer (continued)

As I have stepped into this role, I have spent a lot of time listening – on the ramp, in cabins, at airports, with engineers and planners, and with former CEOs of the airline. Two things have really stood out for me in those conversations – the strength of the foundations we have, and the standard this airline has set over decades.

We have an incredible legacy to build on. At the same time, we are operating in a challenging environment. Capacity constraints, cost escalation and a slower than expected recovery in domestic demand have created real pressure on financial performance.

Our response cannot be to wait and hope that conditions improve. We have to act, decisively and with discipline, on the things within our control.

My first 100 days were spent focusing on five clear priorities. They span safe, punctual and world-class service for our customers; driving profit improvement while reviewing our cost base and reducing non-essential spend; working with our engine manufacturers to get grounded aircraft back faster; strengthening our advocacy for a fair, affordable aviation system for New Zealand; and finally, undertaking a full review of our strategy and operating model.

And you can already see progress in some of the things that matter most to customers, namely punctuality and reliability, driven by a redesigned schedule and sharper operational execution. We will keep building on that.

At the same time, the cost environment we are operating in is fundamentally different. Continued cost escalation across the aviation system and global supply chain is putting pressure on affordability and the sustainability of regional connectivity. That is why, when I took up the role in October, the Board asked me to undertake a company-wide strategy review to reset the business.

With the Board's direction, we are reviewing all aspects of the airline with a clear objective: returning Air New Zealand to sustained profitability through stronger operational performance, growth and further cost transformation initiatives.

While this work is underway, we are not standing still. Performance and product improvements are already being delivered, including improvements in domestic punctuality and reliability, and a decision to upgrade the interiors of our existing Boeing 777-300ER fleet so our widebody product is consistent, modern and mission-ready.

We are also positioning the airline for growth as fleet constraints ease. Later this financial year we will take delivery of the first two of ten new GE-powered Boeing 787 aircraft. These deliveries support widebody capacity growth of around 20 percent to 25 percent over the next two years.

As the strategy review progresses, we will share more about what it means for our airline. For now, my message is simple: we will focus on what matters most, make smart long-term choices, and keep building a stronger Air New Zealand – because a strong Air New Zealand is good for New Zealand.

We are of New Zealand, for New Zealand – this is our commitment. A commitment to deliver for our people, our customers, our shareholders, and the communities across Aotearoa New Zealand we have the privilege to serve.

Ngā mihi nui,

Nikhil Ravishankar
Chief Executive Officer
Air New Zealand

Changes to our Executive Team

We were pleased to welcome Kate Boyer, Jeremy O'Brien and Scott Wilkinson into the leadership team in recent months.

Kate Boyer has been appointed Chief Operations Officer, Ground and Inflight, and brings deep operational experience and a strong track record of lifting performance across our airport network.

Jeremy O'Brien has stepped into the newly created Chief Customer and Digital Officer role, drawing on extensive experience in commercial strategy, sales and marketing, and Air New Zealand leadership across customer, loyalty, marketing and brand.

Scott Wilkinson commenced as Chief Commercial Officer in October, bringing strong capability across airline commercial strategy, customer experience and digital distribution. As part of his role, Scott also looks after our Loyalty business.

At the same time, we will farewell Alex Marren, who retires from the Chief Operating Officer role at the end of March. Since joining Air New Zealand in 2022, Alex has brought calm, clarity and deep operational expertise helping rebuild performance post-Covid, strengthening frontline tools and processes, and leading through major disruption and ongoing fleet constraints. We thank Alex for the critical role she has played for the airline.

Paul
Deputy Fleet Manager
B777/B787

Financial Commentary

Air New Zealand has reported a loss before taxation of \$59 million for the first six months of the 2026 financial year, compared to earnings before taxation of \$144 million for the equivalent period last year. Net loss after taxation was \$40 million.

This result reflects the combined impact of flat overall capacity due to ongoing fleet constraints associated with the global engine issues affecting the airline's Boeing 787 Dreamliner and Airbus neo fleets, persistently high aviation system inflation, a slower than expected recovery in domestic demand, and a weaker New Zealand dollar.

Revenue

Operating revenue for the period was \$3.4 billion, an increase of \$41 million or 1.2 percent from the comparative period. Excluding the impact of foreign exchange, operating revenue was flat.

Passenger revenue increased 3.6 percent to \$3.0 billion, largely due to increased capacity on the Tasman and Pacific Islands network following the arrival of two new A321neo aircraft. An increased mix of premium cabins on long-haul aircraft also contributed to increased revenue. Excluding the impact of foreign exchange and travel credit breakage, passenger revenue increased 2.5 percent.

However, total capacity (Available Seat Kilometers, ASK) was largely flat, reflecting fleet constraints from the global accelerated engine maintenance requirements, which impacted both the international long-haul and domestic networks. Demand (Revenue Passenger Kilometers, RPK) increased more than capacity, resulting in a load factor of 83.6 percent, an increase of 0.3 percentage points on the prior period.

At a Group level, Revenue per Available Seat Kilometre (RASK) increased 3.3 percent. Excluding foreign exchange and travel credit breakage, RASK increased 2.1 percent.

Capacity across the international long-haul network decreased by 3.6 percent, mainly due to aircraft availability issues, which was only partly offset by the deployment of three leased widebody aircraft and a short-term wet-lease aircraft. Load factors on international long-haul increased by 0.6 percentage points to 82.2 percent and international long-haul RASK increased by 4.4 percent excluding the impact of foreign exchange. International long-haul RASK excluding foreign exchange and travel credit breakage increased 4.3 percent, driven by strong demand for premium products.

International short-haul capacity increased by 8.4 percent relative to the prior period due to two new A321neo aircraft entering the fleet, as well as the deployment of a short-term widebody aircraft on certain routes. Demand was largely in line with capacity growth, resulting in a decrease in load factors of 0.3 percentage points to 86.2 percent. International short-haul RASK increased 1.3 percent or 0.8 percent excluding the impact of foreign exchange. RASK excluding foreign exchange and travel credit breakage increased 0.8 percent.

Domestic capacity was largely flat relative to the prior period, with up to five narrowbody aircraft remaining grounded at times due to engine maintenance requirements. Demand was in line with capacity, resulting in relatively unchanged load factors of 83.4 percent. Domestic RASK was also flat. Domestic RASK excluding foreign exchange and travel credit breakage decreased nominally by 0.3 percent.

Cargo revenue was \$239 million, a decrease of \$18 million or 7.0 percent, including foreign exchange. Excluding foreign exchange the decrease was \$23 million. This was largely driven by a combination of lower load factors on certain routes and reduced flying on the international long-haul network due to aircraft constraints. Yield declines also contributed to the reduction, as increased competition in Asia and a shift towards connecting cargo trans-shipments relative to point-to-point services put pressure on pricing.

Contract services and other revenue and income was \$195 million, a decrease of 19 percent primarily due to a reduction in compensation received from engine manufacturers in the current period.

Expenses

Operating expenditure was \$3.1 billion, an increase of 8.0 percent on the prior period, reflecting ongoing cost inflation and fleet inefficiencies resulting from engine maintenance constraints.

Reported costs per ASK (CASK) deteriorated 7.7 percent, driven by increased inflationary pressure across the cost base, fleet inefficiencies and unfavourable foreign exchange movements. This increase was only partly offset by lower average fuel prices. For the six months to 31 December 2025, inflation led to an increase of approximately \$75 million in non-fuel operating costs compared to the prior period. Underlying CASK, which excludes the impact of fuel price and foreign exchange, deteriorated by 5.7 percent.

Labour costs were \$850 million, an increase of 3.2 percent compared to the same period last year. Full-Time Equivalent labour (FTE) increased 1.1 percent to approximately 11,720.

Pare
Lounge Host

Financial Commentary (continued)

Fuel costs were \$774 million, an increase of 3.8 percent on the prior period. The increase was largely due to a weaker New Zealand dollar, higher flying activity with less efficient widebody aircraft and an increase in the cost of the airline's CORSIA* obligations. This increase was only partially offset by a 4 percent decrease in the underlying jet fuel price from an average of USD 91 per barrel to USD 88 per barrel, as well as favourable hedging movements.

Aircraft operations, passenger services and maintenance costs were \$1.1 billion, an increase of 14 percent on the prior period. This was driven primarily by increased aircraft lifecycle and engine maintenance costs and price inflation, significantly higher mandated passenger levies and increased charges at domestic airports.

Sales, marketing and other expenses were \$399 million, an increase of 7.5 percent, driven largely by higher commissions and sales activity from international markets. It also includes costs of \$15 million associated with our wet-lease arrangement with Wamos Air.

Ownership costs were \$406 million, an increase of \$18 million from the prior period. Average cash holdings declined as the airline transitioned to targeted liquidity levels (in line with the Capital Management Framework), resulting in lower investment income. Net interest costs increased as a result. Depreciation increased due to additional deliveries and investment in engine maintenance.

There was an unfavourable movement in foreign exchange hedging resulting in a net \$19 million negative impact on the Group result for the period.

Share of Earnings of Associates

Share of earnings of associates was \$20 million, an increase of \$5 million on the comparative period due to supply chain improvements at the Christchurch Engine Centre.

Cash and Financial Position

Cash on hand at 31 December 2025 was \$1.1 billion, a decrease of \$342 million compared to 30 June 2025. The movement reflects capital expenditure in the period including pre-delivery payments on the upcoming Boeing 787 aircraft, debt and lease payments, payment of the 2025 final dividend and the share buyback, which was partially offset by operating cash inflows, the issuance of AUD300 million Australian medium-term notes and the return of a restricted cash deposit. Liquidity ended the period within the liquidity target range.

Cashflow and Debt

Operating cash flow was \$213 million, a decrease of \$211 million on the prior period due to lower EBITDA and an unfavourable net movement in working capital, driven by higher receivables partially offset by higher provisions. Net debt to EBITDA increased to 2.6x times, slightly above the airline's target range of 1.5x to 2.5x, reflecting a decrease in EBITDA, increased gross debt, and capital expenditure during the period. Management and the Board continue to closely monitor Net debt to EBITDA but expect it to remain elevated in the short term until earnings increase, and as investment in aircraft, interiors and systems continues.

Share buyback

In the period, the airline completed the share buyback programme previously announced in February 2025. A total of \$43 million worth of shares were repurchased in the period to 31 December 2025, bringing the total number of shares repurchased under the programme to \$81 million.

Change in Earnings

The key changes in earnings, after isolating the impact of foreign exchange movements, are set out in the table below*:

December 2024 earnings before taxation	\$144m	
Passenger capacity	\$14m	<ul style="list-style-type: none"> - Capacity increased by 0.3 percent due to aircraft availability issues affecting the Airbus A321/A320neo and Boeing 787 fleets. - Domestic capacity decreased 0.3 percent due to engine maintenance requirement constraints on the Airbus neo fleet. - International short-haul capacity increased 8 percent due to increased narrowbody flying following delivery of two new leased aircraft and deployment of a wet lease aircraft. - International long-haul capacity decreased 4 percent due to a reduction in aircraft availability as a result of Trent 1000 engine issues.
Passenger RASK	\$58m	<ul style="list-style-type: none"> - Overall Group Revenue per Available Seat Kilometre (RASK) excluding FX and travel credit breakage increased by 2.1 percent. Loads increased by 0.3 percentage points to 83.6 percent. - Domestic RASK excluding FX and travel credit breakage decreased by 0.3 percent with load factor increasing 0.1 percentage points to 83.4 percent. - International short-haul RASK increased by 0.8 percent excluding FX and travel credit breakage with load factor decreasing 0.3 percentage points to 86.2 percent. - International long-haul RASK increased by 4.3 percent excluding FX and travel credit breakage with load factors increasing 0.6 percentage points to 82.2 percent. The current period was impacted by Boeing 787 availability issues with passenger demand reducing at a lesser rate than the reduction in aircraft capacity and strong demand for premium product offerings.
Unused Travel Credits	\$1m	<ul style="list-style-type: none"> - An increase in breakage allowance recognised for passenger unused travel credits for which it was considered the likelihood of those credits being utilised was remote (\$11 million recognised in the current period compared to \$10 million in the comparative period).
Cargo revenue	(\$23m)	<ul style="list-style-type: none"> - Load factor reductions, capacity constraints and lower yields due to an increase in market capacity.
Compensation income	(\$46m)	<ul style="list-style-type: none"> - Lower compensation income received from manufacturers relating to the impact of engine shortages on the business.
Contract services and other revenue	(\$8m)	<ul style="list-style-type: none"> - Lower customer heavy maintenance activity offset by higher ancillary income.
Labour	(\$26m)	<ul style="list-style-type: none"> - Higher labour costs due to wage inflation and operating activity increases partially offset by productivity initiatives and lower incentive payments.
Fuel	(\$4m)	<ul style="list-style-type: none"> - Consumption increased by 1 percent (\$10 million) compared to an increase in capacity of 0.3 percent. The average fuel price, net of hedging and carbon costs, decreased 1 percent compared to the prior period resulting in a decrease in costs of \$6 million. Average jet fuel price decreased by 4 percent.
Aircraft operations, passenger services and maintenance	(\$118m)	<ul style="list-style-type: none"> - Higher costs related to aircraft lifecycle and engine maintenance, mandated passenger levies and domestic landing price increases.
Sales and marketing and other expenses	(\$20m)	<ul style="list-style-type: none"> - Short-term aircraft wet lease costs and higher commissions and sales costs.
Ownership costs	(\$18m)	<ul style="list-style-type: none"> - Lower investment income driven by lower average cash balances (as the airline transitions to targeted liquidity levels under the Capital Management Framework) as well as higher depreciation due to new aircraft deliveries including additional leased aircraft to cover engine availability issues, and capitalised engine maintenance.
Net impact of foreign exchange movements	(\$18m)	<ul style="list-style-type: none"> - Hedging losses due to market movements partially offset by favourable movements on operating revenue and costs.
Share of earnings of associates	\$5m	<ul style="list-style-type: none"> - Increase in share of earnings from the Christchurch Engine Centre due to improvement in supply chain.
December 2025 loss before taxation	(\$59m)	

*The numbers referred to in the Financial Commentary on the previous page have not isolated the impact of foreign exchange.

*CORSIA refers to the Carbon Offsetting and Reduction Scheme for International Aviation.

* Relates to gains/losses on rollover of foreign exchange contracts that hedge exposures in other financial periods.

** December 2024 results have been restated (refer to Note 1 for further details).

The accompanying accounting policies and notes form part of these condensed consolidated interim financial statements.

Notes to the Interim Financial Statements

For the six months ended 31 December 2025

1. Corporate information

Reporting entity

The condensed consolidated interim financial statements ('interim financial statements') presented are for the parent company Air New Zealand Limited ('the Company') and its subsidiaries (together referred to as 'the Group' or 'Air New Zealand'), and the Group's interests in associates.

Air New Zealand is a profit-oriented entity that is domiciled in New Zealand. The Company is registered under the Companies Act 1993 and listed on the New Zealand Stock Exchange (NZX) and Australian Securities Exchange (ASX) and has bonds listed on the NZX debt market. The Company is an FMC Reporting Entity under the Financial Markets Conduct Act 2013.

Air New Zealand's primary business is the transportation of passengers and cargo on scheduled airline services.

Basis of preparation

The interim financial statements have been prepared in accordance with New Zealand Generally Accepted Accounting Practice ('NZ GAAP') as it applies to the interim period. They comply with NZ IAS 34: *Interim Financial Reporting* and IAS 34: *Interim Financial Reporting*, as appropriate for profit-oriented entities. Where necessary, certain comparative information has been updated to conform with the current year's presentation.

The interim financial statements are presented in New Zealand Dollars (\$ or NZD), which is Air New Zealand's functional currency, and rounded to the nearest million, except where otherwise stated.

Interim financial statements do not include all of the information and disclosures required in annual financial statements and should be read in conjunction with the annual financial statements of the Group for the year ended 30 June 2025.

The interim financial statements have not been audited. They have been subject to review by the auditor pursuant to NZ SRE 2410 (Revised) *Review of Financial Statements Performed by the Independent Auditor of the Entity*, issued by the External Reporting Board.

These interim financial statements were approved by the Board of Directors on 26 February 2026.

Restatement of comparative balances

Air New Zealand identified certain accounting adjustments required in the Group's historical consolidated financial statements for the six-month period ended 31 December 2024 and the year ended 30 June 2025. The adjustments originated from an omission in the maintenance provisioning process relating to leased aircraft assets that resulted in the related provisions and corresponding maintenance costs not being reflected in the relevant accounting periods. The adjustments had no cash impact in the respective periods.

The following tables summarise the impacts on the comparative balances in these interim financial statements:

a) Statement of Financial Position

AS AT 30 JUNE 2025	AS REPORTED \$M	ADJUSTMENT \$M	AS RESTATED \$M
Non-current liabilities			
Provisions	218	25	243
Deferred taxation	119	(7)	112
Total non-current liabilities	2,706	18	2,724
Total liabilities	6,785	18	6,803
Total net assets	1,946	(18)	1,928
Reserves	(1,400)	(18)	(1,418)
Total equity	1,946	(18)	1,928

Notes to the Interim Financial Statements (continued)

For the six months ended 31 December 2025

1. Corporate information (continued)

b) Statement of Financial Performance

FOR THE SIX MONTHS ENDED 31 DECEMBER 2024	AS REPORTED \$M	ADJUSTMENT \$M	AS RESTATED \$M
Operating expenditure			
Maintenance	(274)	(11)	(285)
	(2,875)	(11)	(2,886)
Operating earnings (excluding items below)	528	(11)	517
Earnings before finance costs, associates and taxation	164	(11)	153
Earnings before taxation	155	(11)	144
Taxation expense	(49)	3	(46)

c) Statement of Comprehensive Income

FOR THE SIX MONTHS ENDED 31 DECEMBER 2024	AS REPORTED \$M	ADJUSTMENT \$M	AS RESTATED \$M
Net profit for the period	106	(8)	98
Total comprehensive income for the period, attributable to shareholders of the parent company	90	(8)	82

d) Statement of Changes in Equity

FOR THE SIX MONTHS ENDED 31 DECEMBER 2024	AS REPORTED \$M	ADJUSTMENT \$M	AS RESTATED \$M
General reserves:			
Net profit for the period	106	(8)	98
Total comprehensive income for the period	106	(8)	98
Balance as at 31 December 2024	(1,300)	(8)	(1,308)
Balance as at 1 July 2025	(1,323)	(18)	(1,341)
Total Equity:			
Net profit for the period	106	(8)	98
Total comprehensive income for the period	90	(8)	82
Balance as at 31 December 2024	2,050	(8)	2,042
Balance as at 1 July 2025	1,946	(18)	1,928

There was no impact on the consolidated Statement of Cash Flows resulting from the restatement.

Critical accounting judgements and key sources of estimation uncertainty

The estimates and assumptions applied in these interim financial statements are consistent with those applied in the annual financial statements for the year ended 30 June 2025.

Material accounting policy information

The accounting policies and computation methods used in the preparation of the interim financial statements are consistent with those used in the annual financial statements for the year ended 30 June 2025.

New accounting standards, amendments and interpretations adopted during the period

There were no new accounting standards, interpretations or amendments that had a material impact on these interim financial statements.

New and revised NZ IFRSs, narrow scope amendments to NZ IFRSs and IFRS Interpretations not yet effective

Certain pronouncements have been issued by the IASB that are mandatory for accounting periods beginning on or after 1 January 2026. Management is still evaluating and does not expect any such pronouncements to have a significant impact upon adoption, other than on the presentation of the financial statements.

2. General disclosures

2.1. Interest in other entities

The Group has a 49% interest in the Christchurch Engine Centre ('CEC') and a 21% interest in Drylandcarbon One Partnership LLC, which are recognised as investments in associates. The Group's share of equity accounted earnings from the CEC for the six months to 31 December 2025 was \$20 million (six months to 31 December 2024: \$15 million).

2.2. Interest-bearing assets

Interest-bearing assets are measured at amortised cost, using the effective interest method, less any impairment. The fair value of interest-bearing assets as at 31 December 2025 was \$224 million (30 June 2025: \$341 million). Interest-bearing assets are subject to fixed and floating interest rates. Fixed interest rates in the six months to 31 December 2025 ranged from 2.4% per annum to 4.6% per annum (six months to 31 December 2024: 3.1% per annum to 6.5% per annum).

2.3. Interest-bearing liabilities

AS AT	31 DEC 2025 UNAUDITED \$M	30 JUN 2025 AUDITED \$M
Current		
Secured borrowings		
Secured borrowings*	171	189
Medium-term notes		
AUD notes issued 25 May 2022		
Tranche 1: 5.7% 4-year fixed-rate notes due 25 May 2026 (AUD300 million)	344	323
	515	512
Non-current		
Secured borrowings		
Secured borrowings*	316	390
Medium-term notes		
AUD notes issued 25 May 2022		
Tranche 2: 6.5% 7-year fixed-rate notes due 25 May 2029 (AUD250 million)	264	270
AUD notes issued 30 September 2025		
5.179% 7-year fixed-rate notes due 30 September 2032 (AUD300 million)**	344	-
Unsecured bonds		
NZD100 million bonds issued 27 October 2022		
6.61% 5.5-year unsecured, unsubordinated fixed-rate bonds due 27 April 2028	105	105
	1,029	765
At carrying amount	1,544	1,277
At fair value	1,575	1,305

* Secured borrowings relate to specific financing of aircraft and engines and are secured over aircraft assets and subject to both fixed and floating interest rates. Fixed interest rates on secured borrowings were 1.0% per annum in the six months to 31 December 2025 (six months to 31 December 2024: 1.0% per annum).

** On 30 September 2025, Air New Zealand completed an AUD300 million senior unsecured notes issuance.

2.4. Share capital

On 20 February 2025 the Board of Directors approved a 12-month share buyback programme of up to \$100 million, which commenced in March 2025. The buyback programme included both on-market and off-market components. The on-market buyback component was acquired on the New Zealand Stock Exchange (NZX) and Australian Securities Exchange (ASX) and an off-market buyback component was undertaken following any on-market acquisition, whereby Air New Zealand acquired a corresponding number of shares held by the Crown in order to maintain the Crown's shareholding. As at 31 December 2025, 134,902,189 shares (\$81 million) had been acquired under the programme, with 73,431,317 shares (\$43 million) acquired in the six months to 31 December 2025. Upon purchase the shares were cancelled.

During the six months ended 31 December 2025 the Group funded the on-market purchase of 3,571,250 shares for \$2 million (six months ended 31 December 2024: 4,558,097 shares for \$2 million). The shares were used to settle obligations under staff share awards and long-term incentive schemes. The total cost of the purchase including transaction costs has been deducted from 'Share capital'.

2.5. Hedge reserves

As at 31 December 2025, \$29 million of losses (30 June 2025: \$47 million of losses) were held in the cash flow hedge reserve and \$22 million of losses (30 June 2025: \$21 million of losses) in the costs of hedging reserve. These reserves are combined within the Statement of Changes in Equity as 'Hedge reserves'.

Notes to the Interim Financial Statements (continued)

For the six months ended 31 December 2025

2. General disclosures (continued)

2.6. Sale and leaseback transactions

During the six months ended 31 December 2024 four Airbus A320 aircraft were sold and leased back, with a gain on sale of \$3 million being recognised in the Statement of Financial Performance. Lease terms under the arrangement are six years with rights to extend at fair market rentals. Air New Zealand recognised investing cash inflows of \$193 million from the transaction.

2.7. Compensation received from manufacturers

Air New Zealand has entered into confidential agreements with several manufacturers to compensate for the impact of engine shortages on the business. Compensation related to the agreements has been recognised in the Statement of Financial Performance within the below lines:

FOR THE SIX MONTHS ENDED 31 DECEMBER	2025 UNAUDITED \$M	2024 UNAUDITED \$M
Other revenue and income	37	83
Fuel	-	2
Maintenance	1	1
Other expenses	4	-
Depreciation and amortisation	12	8
Finance costs	1	-
Total compensation received from manufacturers	55	94

3. Segmental information

Air New Zealand operates predominantly in one segment, its primary business being the transportation of passengers and cargo on an integrated network of scheduled airline services to, from and within New Zealand. Resource allocation decisions across the network are made to optimise the consolidated Group's financial result.

FOR THE SIX MONTHS ENDED 31 DECEMBER	2025 UNAUDITED \$M	2024 UNAUDITED \$M
Analysis of revenue by geographical region of original sale		
New Zealand	2,123	2,153
Australia and Pacific Islands	446	413
Asia, United Kingdom and Europe	462	449
Americas	413	388
Total operating revenue	3,444	3,403

The principal non-current assets of the Group are the aircraft fleet which is registered in New Zealand and employed across the worldwide network. Accordingly, there is no reasonable basis for allocating the assets to geographical segments.

4. Commitments

Capital commitments

	31 DEC 2025 UNAUDITED \$M	30 JUN 2025 AUDITED \$M
Aircraft and engines	2,884	3,140
Other property, plant and equipment and intangible assets	19	45
	2,903	3,185

Capital commitments include ten Boeing 787 aircraft (contractual delivery from the second half of the 2026 financial year through to the 2029 financial year) and two Airbus A321neo aircraft (delivery in the 2027 financial year).

4. Commitments (continued)

Lease commitments

	31 DEC 2025 UNAUDITED \$M	30 JUN 2025 AUDITED \$M
Aircraft	185	314
	185	314

Lease commitments at 31 December 2025 include two Airbus A321neo aircraft (delivery in the 2028 financial year).

5. Contingent liabilities

All significant legal disputes involving probable loss that can be reliably estimated have been provided for in the interim financial statements.

No other significant contingent liability claims are outstanding at balance sheet date.

Outstanding letters of credit and financial guarantees at 31 December 2025 totalled \$73 million (30 June 2025: \$65 million).

The Group has entered into a partnership agreement with Pratt & Whitney in relation to the Christchurch Engine Centre ('CEC'), in which the Group holds a 49% interest. By the nature of the agreement, joint and several liability exists between the two parties. Total liabilities of the CEC as at 31 December 2025 were \$320 million (30 June 2025: \$212 million).

6. Dividends

No interim dividend was declared in respect of the 2026 financial year.

A final dividend in respect of the 2025 financial year of 1.25 cents per ordinary share was paid on 25 September 2025. No imputation credits were attached and no supplementary dividends paid to non-resident shareholders.

An interim dividend in respect of the 2025 financial year of 1.25 cents per ordinary share was paid on 19 March 2025. No imputation credits were attached and no supplementary dividends were paid to non-resident shareholders.

A final dividend in respect of the 2024 financial year of 1.5 cents per ordinary share was paid on 26 September 2024. No imputation credits were attached and no supplementary dividends paid to non-resident shareholders.

The dividend reinvestment plan is currently suspended.

Independent Auditor's Review Report to the Shareholders of Air New Zealand Limited

For the six months ended 31 December 2025

The Auditor-General is the auditor of Air New Zealand Limited ('the Company') and its subsidiaries ('the Group'). The Auditor-General has appointed me, Jason Stachurski, using the staff and resources of Deloitte Limited, to carry out the review of the condensed consolidated interim financial statements ('interim financial statements') of the Group on his behalf.

CONCLUSION

We have reviewed the interim financial statements of the Group on pages 16 to 25, which comprise the Consolidated Statement of Financial Position as at 31 December 2025, and the Consolidated Statement of Financial Performance, Consolidated Statement of Comprehensive Income, Consolidated Statement of Changes in Equity and Consolidated Statement of Cash Flows for the six months ended on that date, and condensed notes to the interim financial statements, including material accounting policy information.

Based on our review, nothing has come to our attention that causes us to believe that the interim financial statements of the Group do not present fairly, in all material respects, the financial position of the Group as at 31 December 2025, and its financial performance and cash flows for the six months ended on that date, in accordance with NZ IAS 34 *Interim Financial Reporting* and IAS 34 *Interim Financial Reporting*.

BASIS FOR CONCLUSION

We conducted our review in accordance with NZ SRE 2410 (Revised) *Review of Financial Statements Performed by the Independent Auditor of the Entity* ('NZ SRE 2410 (Revised)'). Our responsibilities are further described in the Auditor's Responsibilities for the Review of the Interim Financial Statements section of our report.

We are independent of the Group in accordance with the independence requirements of the Auditor-General's Auditing Standards as applicable to the audits and reviews of public interest entities, which incorporate the independence requirements of Professional and Ethical Standard 1 International Code of Ethics for Assurance Practitioners issued by the New Zealand Auditing and Assurance Standards Board.

In addition to this review and the audit of the Group's annual financial statements, we have carried out assurance services relating to passenger facility charges, and greenhouse gas emissions reported in the greenhouse gas emissions inventory report and in the Climate Statement, and compliance with student fee protection rules. We also provide services to the Corporate Taxpayers Group for which Air New Zealand is a member, along with a number of other organisations. In addition to these engagements, principals and employees of our firm deal with the Group on normal terms within the ordinary course of trading activities of the Group. These engagements and trading activities have not impaired our independence as auditor of the Group.

Other than the audit and these engagements and trading activities, we have no relationship with, or interests in, the Group.

DIRECTORS' RESPONSIBILITIES FOR THE INTERIM FINANCIAL STATEMENTS

The directors are responsible, on behalf of the Group, for the preparation and fair presentation of these interim financial statements in accordance with NZ IAS 34 *Interim Financial Reporting* and IAS 34 *Interim Financial Reporting* and for such internal control as the Board of Directors determine is necessary to enable the preparation and fair presentation of the interim financial statements that are free from material misstatement, whether due to fraud or error.

The directors are also responsible for the publication of the interim financial statements, whether in printed or electronic form.

AUDITOR'S RESPONSIBILITIES FOR THE REVIEW OF THE INTERIM FINANCIAL STATEMENTS

Our responsibility is to express a conclusion on the interim financial statements based on our review. NZ SRE 2410 (Revised) requires us to conclude whether anything has come to our attention that causes us to believe that the interim financial statements, taken as a whole, are not prepared, in all material respects, in accordance with NZ IAS 34 *Interim Financial Reporting* and IAS 34 *Interim Financial Reporting*.

A review of the interim financial statements in accordance with NZ SRE 2410 (Revised) is a limited assurance engagement. We perform procedures, primarily consisting of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. The procedures performed in a review are substantially less than those performed in an audit conducted in accordance with International Standards on Auditing (New Zealand) and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion on these interim financial statements.
