

**MONS PROJECT, WA**

**Release Date February 27, 2026**

BLOCK 3 MONS GALLIUM DEPOSIT, WA

## **Nimy to join WA Government's Critical Minerals and Energy Partnerships Trade Mission**

*Nimy will discuss its Mons Gallium Block 3 resource in WA with critical minerals investors, financiers and customers as part of the delegation being led by WA Mines and Petroleum Minister David Michael*

*Nimy Resources (ASX: NIM) is pleased to advise that it **will hold key discussions with financiers and potential offtake partners in the U.S.** over coming days as part of the Company's strategy to advance its Mons Gallium Block 3 high-grade resource in WA.*

*The discussions will form part of the trade mission delegation being led by WA Mines and Petroleum Minister David Michael. Nimy will be represented by Managing Director Luke Hampson.*

*The purposes of the mission are:*

- *Strengthen critical minerals partnerships.*
- *Build on the already-strong North American investment and trade ties.*
- *Build on the Australia-U.S. critical minerals framework.*
- *The mission includes meetings in New York and Washington DC.*
- *The engagement with the U.S. will build on the bilateral framework on critical minerals and rare earths agreement signed between Australia and the U.S. in October 2025.*

The delegation seeks to **leverage Western Australia's position as a leading mining jurisdiction and emphasise the State's credentials in critical minerals**, further advancing the objectives of the bilateral agreement signed in October 2025.

*During the New York and Washington DC segments of the trip, the Minister and delegates will engage with industry representatives, investors, and stakeholders* to reaffirm Western Australia's reputation as a dependable supplier of critical minerals required by global energy transition initiatives, defense sectors, and advanced technology industries.

*The bilateral agreement executed in October 2025 is intended to expedite priority projects and enhance supply chain diversification. This development presents substantial opportunities for Nimy to engage with North American investment partners and integrate into U.S. supply chains.*

Nimy, as a member of the delegation, ***is strategically positioned to leverage the growing commercial ties with North America and address the imminent gallium shortage caused by increased demand and stringent export controls imposed by China***, which currently accounts for approximately 98% of global production and supply.

***The Mons Gallium Block 3 resource hosts a JORC Inferred Resource of 7.23Mt at 102g/t Ga<sub>2</sub>O<sub>3</sub> (740t contained Gallium Trioxide using a 70g/t Ga<sub>2</sub>O<sub>3</sub> cut-off) and 538ppm Total Rare Earth Oxides (TREOs) (3,890t of contained TREOs) (refer to ASX announcement dated 13 November 2025), positioning the company to leverage opportunities presented by upcoming meetings in New York and Washington DC.***

Perth-based Strategic Metallurgy is undertaking a scoping study on the Mons Gallium Block 3 project (see ASX announcement dated 25 February, 2026). The study is scheduled for completion in the second quarter of 2026.

### **Nimy Managing Director Luke Hampson said:**

*“I look forward to establishing relationships and creating opportunities which will help Nimy unlock the immense value of our Mons Gallium Block 3 project and in the process, help meet the huge demand for critical gallium supplies in North America”*

### **Comments attributed to Mines and Petroleum Minister David Michael:**

*“Western Australia is recognised globally as a reliable and ethical supplier of the critical materials needed to support clean energy, defence capability, and advanced manufacturing.*

*“This visit will strengthen our long-standing relationships with allied partners Canada and the United States and support Western Australian companies seeking investment and offtake partners for major critical minerals projects.*

*“With both Canada and the U.S. working to diversify supply chains, Western Australia is exceptionally well placed to help meet their needs and to deepen collaboration across our shared economic and strategic priorities.”*

## About Nimy Resources and the Mons Project

Nimy Resources is a Western Australian exploration company that has prioritised the development of its recently discovered Mons Belt, situated 370km northeast of Perth and 140km north-northwest of Southern Cross, a Tier 1 jurisdiction in Western Australia.

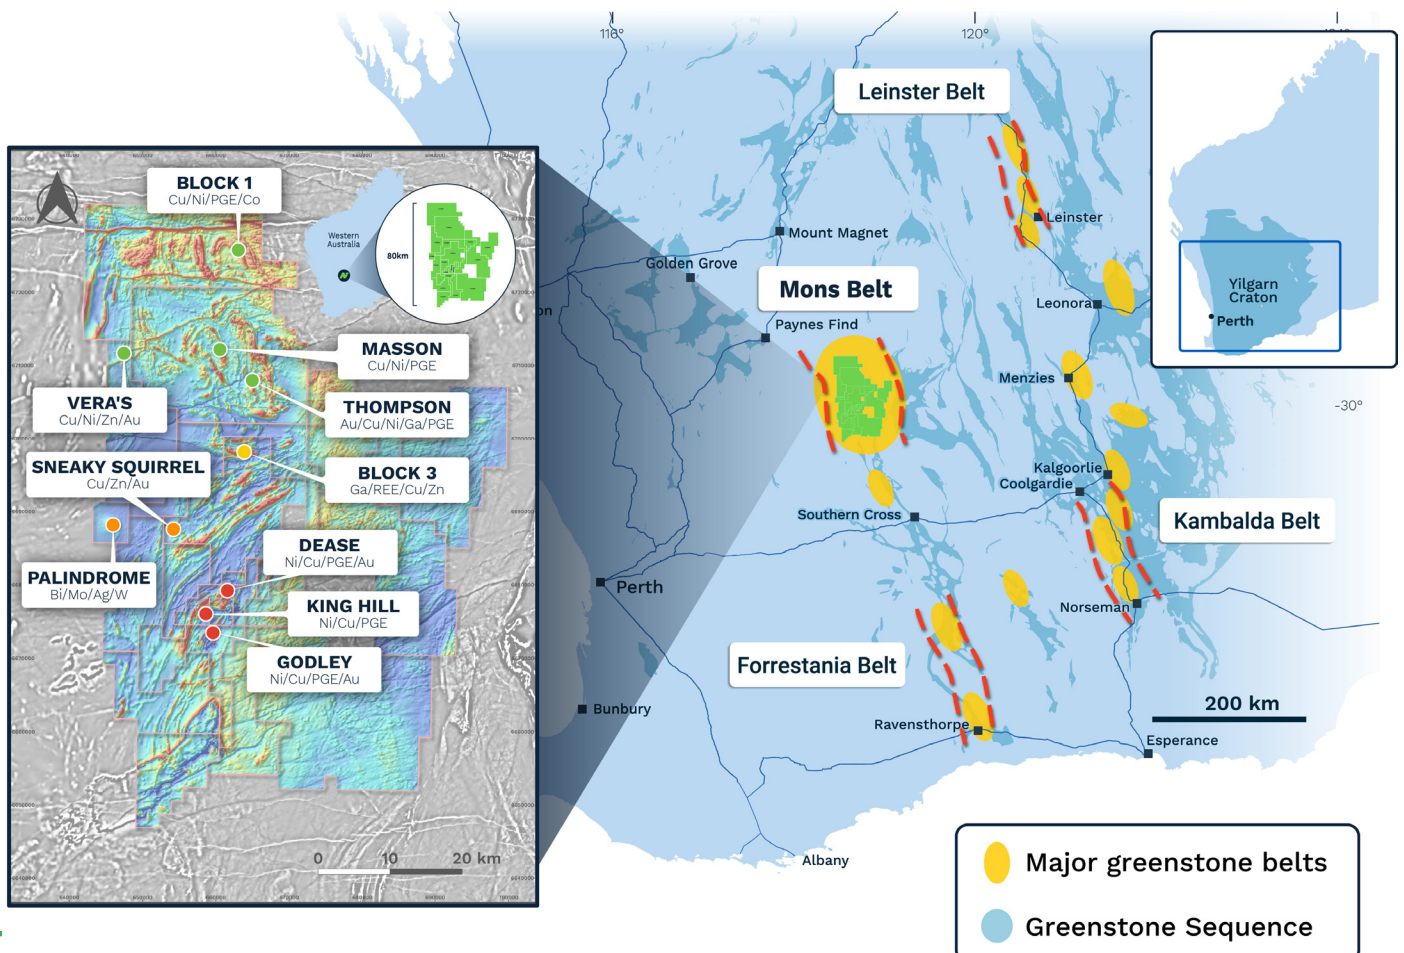

The Mons Belt represents a district scale discovery, spanning ~80km x 30km over 17 tenements with a north/south strike of some 80km of mafic and ultramafic sequences covering ~3004km<sup>2</sup> north of the Forresteria greenstone belt.

The Mons Belt provides a new and exciting frontier in critical metal and gold exploration in Western Australia, the company is currently working with the CSIRO to advance the lithology and mineralisation types within one of Australia’s newest greenstone belt discoveries in the Yilgarn Craton, a region with significant untapped potential.

Nimy Resources believes the Mons Belt offers multi commodity potential with the initial discovery of Masson (Cu, Ni, Co, Au & PGE’s) in addition to Block 3 East Prospect with high-grade gallium (Ga) discovered in the northern tenements.

In addition to these discoveries, the southern tenements have significant fertile komatiite sequences like those found in the Kambalda region of WA.

Nimy Resources is always mindful of its shareholders and the need to continue efforts in creating shareholder value through a methodical and science-based approach.

## Competent Person's Statement

The information contained in this report that pertain to the exploration results and Block 3 Exploration Targets, is based upon information compiled by Mr. Fergus Jockel, a full-time employee of Fergus Jockel Geological Services Pty Ltd. Mr. Jockel is a Member of the Australasian Institute of Mining and Metallurgy (1987) and has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the December 2012 edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves" (the JORC Code). Mr Jockel consents to the inclusion in the report of the matters based upon his information in the form and context in which it appears.

## Forward Looking Statement

This report contains forward looking statements concerning the projects owned by Nimy Resources Limited. Statements concerning mining reserves and resources may also be deemed to be forward looking statements in that they involve estimates based on specific assumptions. Forward-looking statements are not statements of historical fact and actual events, and results may differ materially from those described in the forward-looking statements as a result of a variety of risks, uncertainties and other factors. Forward looking statements are based on management's beliefs, opinions and estimates as of the dates the forward-looking statements are made and no obligation is assumed to update forward looking statements if these beliefs, opinions and estimates should change or to reflect other future developments.

## No New Information

To the extent that this announcement contains references to prior exploration results which have been cross referenced to previous market announcements made by the Company, unless explicitly stated, no new information is contained. The Company confirms that it is not aware of any new information or data that materially affects the information included in the relevant market announcements and, in the case of estimates of Mineral Resources, that all material assumptions and technical parameters underpinning the estimates in the relevant market announcements continue to apply and have not materially changed.
