

A Brownfields gold exploration opportunity with ready-made scale and abundant upside

PDAC 2026

1-4 March 2026

Disclaimer

This presentation has been prepared by Alicanto Minerals Limited ("Alicanto" or the "Company") and is authorised by the Board of Directors of Alicanto.

General Information & Disclaimer

This presentation is for information purposes only and does not constitute a prospectus, offering memorandum or disclosure document under Australian, U.S., Canadian or any other law. It does not, and does not purport to, contain all the information that the recipient may require to evaluate the Company. It should be read in conjunction with Alicanto's other periodic and continuous disclosure announcements, which are available at www.asx.com.au.

No representation or warranty is given as to, and the recipient must not rely on, any information, statement or opinion contained in this presentation, or its accuracy, reasonableness or completeness. Except for statutory liability which cannot be excluded, each of Alicanto, its affiliates, directors, employees, advisers and agents expressly disclaims any responsibility for the accuracy or completeness of the material contained in this presentation and excludes all liability whatsoever for any loss or damage of any kind arising as a result of the use of, or reliance on, the information in this presentation. This presentation does not take into account the investment objectives, financial situation or particular needs of any investor, potential investor or any other person. No investment decision should be made in reliance on this presentation. Independent financial and taxation advice should be sought before making any investment decision. Unless otherwise stated, all dollar amounts in this presentation are expressed in Australian dollars (A\$).

Forward Looking Statements

This presentation may contain certain forward-looking statements and projections regarding: estimated resources and reserves; planned production and operating costs profiles; planned capital requirements; and planned strategies and corporate objectives. Figures, amounts, percentages, estimates, calculations of value and other factors used in this Presentation are subject to the effect of rounding.

Forward-looking statements are subject to a variety of known unknown risks, uncertainties and other factors that could cause actual events or results to materially differ from those reflected in the forward-looking statements, including, without limitation: inherent uncertainties and risks associated with mineral exploration; uncertainties related to the availability of future financing necessary to undertake activities on Alicanto's properties; uncertainties related to the possible recalculation of, or reduction in Alicanto's mineral resources; uncertainties related to the outcome of studies; uncertainties relating to fluctuations in metal prices; the risk that Alicanto's title to its properties could be challenged; risks related to Alicanto's ability to attract and retain qualified personnel; uncertainties related to general economic and global financial conditions; uncertainties related to the competitiveness of the industry; risk associated with Alicanto being subject to government regulation, including changes in regulation; risks associated with Alicanto being subject to environmental laws and regulations, including a change in regulation; risks associated with Alicanto's need for governmental licenses, permits and approvals; uninsured risks and hazards; risk related to the integration of businesses and assets acquired by Alicanto; risk associated with Alicanto having no history of earnings or production revenue; risks associated with fluctuation in foreign exchange rates; risks related to default by joint venture parties (if any), contractors and agents, inherent risks associated with litigation; risk associated with potential conflicts of interest; risks related to Alicanto's lack of a dividend history; risks relating to short term investments; and uncertainties related to fluctuations in Alicanto's share price.

Alicanto's forward-looking statements are based on the assumptions, beliefs, expectations and opinions of management as of the date hereof and which Alicanto believes are reasonable in the circumstances, but no assurance can be given that these expectations will prove to be correct. These assumptions include, but are not limited to, that Alicanto's exploration of its properties and other activities will be in accordance with Alicanto's public statements and stated goals; that there will be no material adverse change affecting Alicanto or its properties; anticipated costs and timing for Alicanto's activities and such other assumptions as set out herein.

Such forward looking statements/projections are estimates for discussion purposes only and should not be relied upon. They are not guarantees of future performance and involve known and unknown risks, uncertainties and other factors many of which are beyond the control of the Company. The forward-looking statements/projections are inherently uncertain and may therefore differ materially from results ultimately achieved. The Company does not make any representations and provides no warranties concerning the accuracy of the forward-looking statements, and disclaims any obligation to update or revise any forward-looking statements based on new information, future events or otherwise except to the extent required by applicable laws.

Compliance Statements

The information in this presentation that relates to the Exploration Results and Mineral Resource Estimate for the Mount Henry Gold Project is extracted from the Company's announcement titled "Transformational acquisition of substantial WA gold project" which was released to the ASX on 17 and 19 December 2025. The Company confirms that it is not aware of any new information or data that materially effects the information in the original market announcements and, in the case of the Mineral Resource Estimate, that all material assumptions and technical parameters underpinning the estimates in the relevant market announcement continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcement.

Not an Offer in the United States or Canada

This presentation does not constitute an offer to sell, or the solicitation of an offer to buy, securities in the United States, Canada or in any other jurisdiction in which such an offer would be unlawful. The securities referred to in this presentation have not been, and will not be, registered under the U.S. Securities Act of 1933, as amended (U.S. Securities Act), or under the securities laws of any state of the United States, and may not be offered or sold in the United States absent registration or an applicable exemption from registration requirements. This presentation is not for distribution to U.S. wire services or for dissemination in the United States or Canada except in compliance with applicable securities laws.

Mineral Resource Disclosure

It is a requirement of the ASX Listing Rules that the reporting of ore reserves and mineral resources in Australia comply with the Joint Ore Reserves Committee's Australasian Code for Reporting of Mineral Resources and Ore Reserves (**JORC Code**). Investors outside Australia should note that while ore reserve and mineral resource estimates of the Company in this document comply with the JORC Code (such JORC Code-compliant ore reserves and mineral resources being "Ore Reserves" and "Mineral Resources" respectively), they may not comply with the relevant guidelines in other countries and, in particular, may not comply with (i) National Instrument 43-101 (Standards of Disclosure for Mineral Projects) of the Canadian Securities Administrators (the "Canadian NI 43-101 Standards"); or (ii) Item 1300 of Regulation S-K, which governs disclosures of mineral reserves in registration statements filed with the SEC. Information contained in this presentation describing mineral deposits may not be comparable to similar information made public by companies subject to the reporting and disclosure requirements of Canadian or US securities laws.

Alicanto: Investment Highlights

- **Proven Team Focused on Value Creation**
 - Alicanto is part of the “Richardson Street stable” with a strong track record of identifying, drilling and re-rating under-explored, brownfields assets.
- **Acquired an Asset in a Tier-I Location**
 - ~200km from Kalgoorlie within one of Australia’s most prolific greenstone belts. This is an established mining region with infrastructure and regulatory certainty.
- **Immediate Scale**
 - 915,000oz JORC Mineral Resource across three deposits. Multiple deposits defined and open along strike and at depth.
- **Under-Explored System**
 - ~150,000m drilled over ~30 years and deposit focused. Mineralisation is shallow, primarily between surface and 100m depth.
- **Clear Growth Program**
 - ~50,000m multi-rig campaign commencing, focused on resource growth and system testing.
- **Strong Shareholder Alignment**
 - Board, Management and advisers hold ~21%, Westgold (ASX:WGX) hold 19.9%. Institutional holding of ~24%.

Mt Henry: A Large, Underexplored Western Australian Gold Project

Mt Henry is a large, shallow Western Australian gold project with clear pathways to resource growth and standalone development

Scale and Quality

- Large, shallow gold system in a world-class WA gold district
- ~0.9Moz Mineral Resource across three deposits
- Resource constrained within an \$2,160/oz pit shell, with upside beyond the current footprint
- 16km mineralised trend with continuity and expansion potential

Pathway to Standalone Development

- Brownfields site with granted tenure and existing infrastructure
- Shallow mineralisation supporting efficient growth
- Regular drilling results and staged resource updates to support value creation

Underexplored Growth Opportunity

- ~150,000m drilled over ~30 years, shallow and deposit-focused
- Extensive untested strike and depth outside current Resources
- Clear, low-risk walk-up targets along the 16km mineralised trend

Fully Funded, Low-Risk Growth

- Drilling contractor secured
- Commencing a comprehensive ~50,000m multi-rig drill program
- Step-out and depth drilling from known mineralisation

Proven team with a history of creating significant value

Ray Shorrocks
Non-Executive
Chair

Duncan Grieve
Non-Executive
Director

Didier Murcia AM
Non-Executive
Director

Russell Curtin
Non-Executive
Director

Steve Parsons
Major Shareholder
and Consultant

Michael Naylor
Major Shareholder
and Consultant

Mining and corporate finance executive with over 30 years' experience advising resource companies on capital markets and M&A globally.

Jeff Sansom
CEO

Seasoned geologist, with a strong discovery track record and extensive project generation experience across gold, lithium and base metals

Susan Field
CFO

Highly experienced legal and corporate advisor with over 35 years' experience in the resources sector, Founder and Chair of MPH Lawyers, with deep expertise in corporate governance and transactions.

Ben Palich
EGM Growth

Former Ernst & Young Partner with over 30 years' experience in energy and resources with strong credentials in financial leadership, risk and governance.

Tim Sloan
Geology Manager

Highly experienced geologist with a global reputation for mineral discovery and a strong track record in building and growing resource companies and creating shareholder value.

Highly experienced finance executive with a global reputation for capital markets execution, financial discipline and shareholder value creation across the resources sector.

Maddison Cramer
Company Secretary

Mining executive with over 15 years' experience across ASX and TSX listed companies, with deep experience in strategy, market engagement and value creation.

Chartered Accountant with over 27 years' experience across corporate and public practice, with strong credentials in financial management, governance and operational leadership.

Experienced geologist with over 30 years' experience across the global resources sector, combining deep technical and commercial expertise with senior mining finance leadership.

Senior Geology Manager with deep experience across ASX-listed gold and lithium operations, with strong statutory and operational leadership credentials.

A highly experienced corporate lawyer and company secretary providing corporate governance, risk management, and legal support to ASX-listed mining and resources companies.

* Westgold has the right to appoint a representative to the board while its shareholding is above 10%.

An Expandable 0.9Moz Resource in a Tier-I Gold District

ALICANTO
MINERALS LIMITED

The Norseman Greenstone Belt is a highly endowed gold belt host to multiple long-life, multi-million-ounce operations

- Mt Henry sits within a proven gold corridor hosting multiple multi-million-ounce operations, including KCGM (**ASX: NST**), Norseman (**ASX: PNR**), St Ives (**JSE: GFI**), Beta Hunt (**ASX: WGX**) and Mungari (**ASX: EVN**)
- The Project is situated in the same regional structural trend that controls gold mineralisation across the Norseman–Kalgoorlie belt
- Numerous large gold systems occur within 150 km of Mt Henry, providing regional context of the scale potential
- Alicanto controls an underexplored area of this corridor, sharing the same geological setting as neighbouring multi-million-ounce deposits.
- Project provides clear pathways to grow the current 0.9Moz resource

Source: ASX releases and Company Reports, see appendix for further detail.

Alicanto Corporate Summary

CAPITAL STRUCTURE

Shares on issue	~161.9M
Share price ¹	A\$2.29
Market Capitalisation	~A\$371M
Performance Rights	22.1M
Options	1.25M

SHAREHOLDER SUMMARY

Institutional ownership (Global)	~24%
Westgold (ASX/TSX:WGX)	19.9%
Board, Management and Advisers (fully diluted)	~21%
Steve Parsons and Mike Naylor	~11%

Global Institutional Investor Base

- **High-quality and expanding institutional investor base:** Globally recognised resources investors, senior mining executives and alternative asset managers hold meaningful positions.
- **Continued momentum in the register:** The register continues to broaden as the Company executes and delivers.
- **Supportive register and reset capital structure:** Provides a strong foundation to advance Mt Henry and execute the next phase of growth.

1. Share price at market close 26 February 2026.

Project Overview

Outstanding Infrastructure, in a Proven Mining District

ALICANTO
MINERALS LIMITED

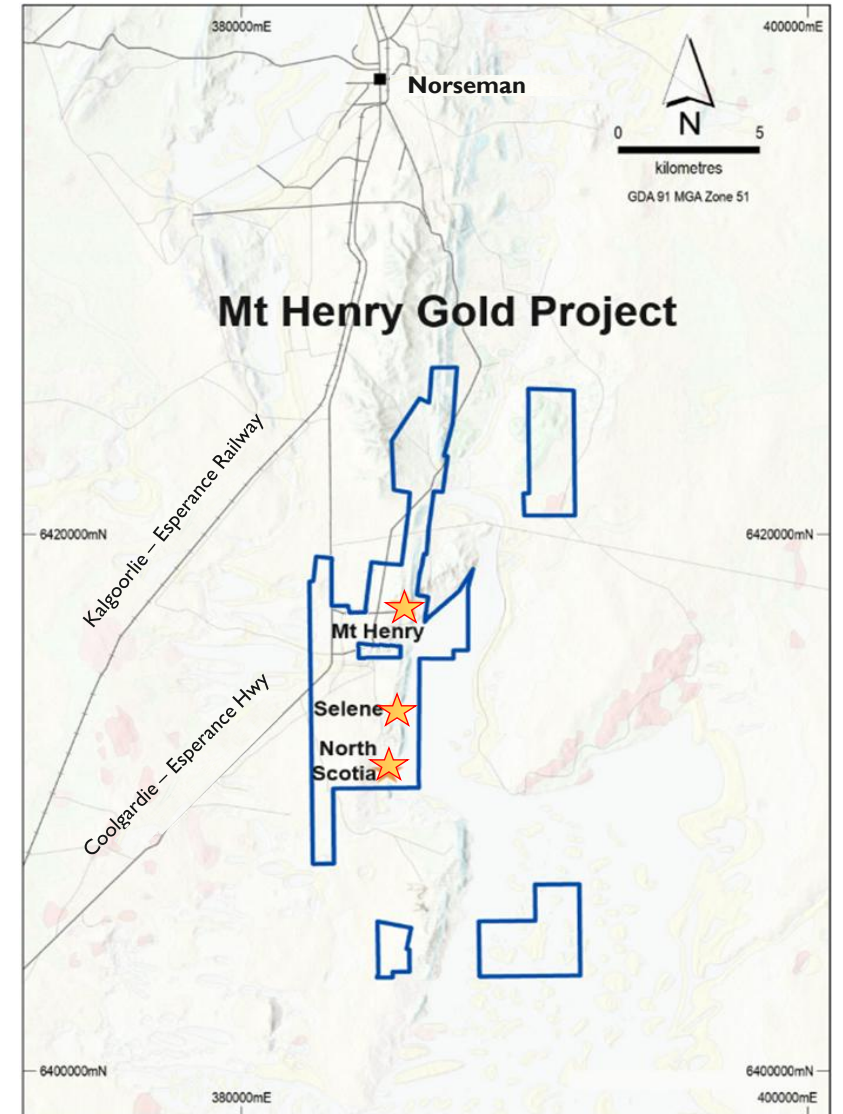

- Located in a well-established WA gold district
- 210km from Kalgoorlie with access to airport, services and workforce
- Direct access via sealed Esperance-Kalgoorlie Highway
- Grid power available and licensed borefield water supply in place
- Sealed all weather Norseman airstrip ~22km from the Project
- 67km² of granted mining and prospecting tenure
- Brownfields site with existing disturbance from historical mining, providing established platforms for infrastructure and operations
- Surrounded by past and current producing gold mines

Coolgardie-Esperance Hwy

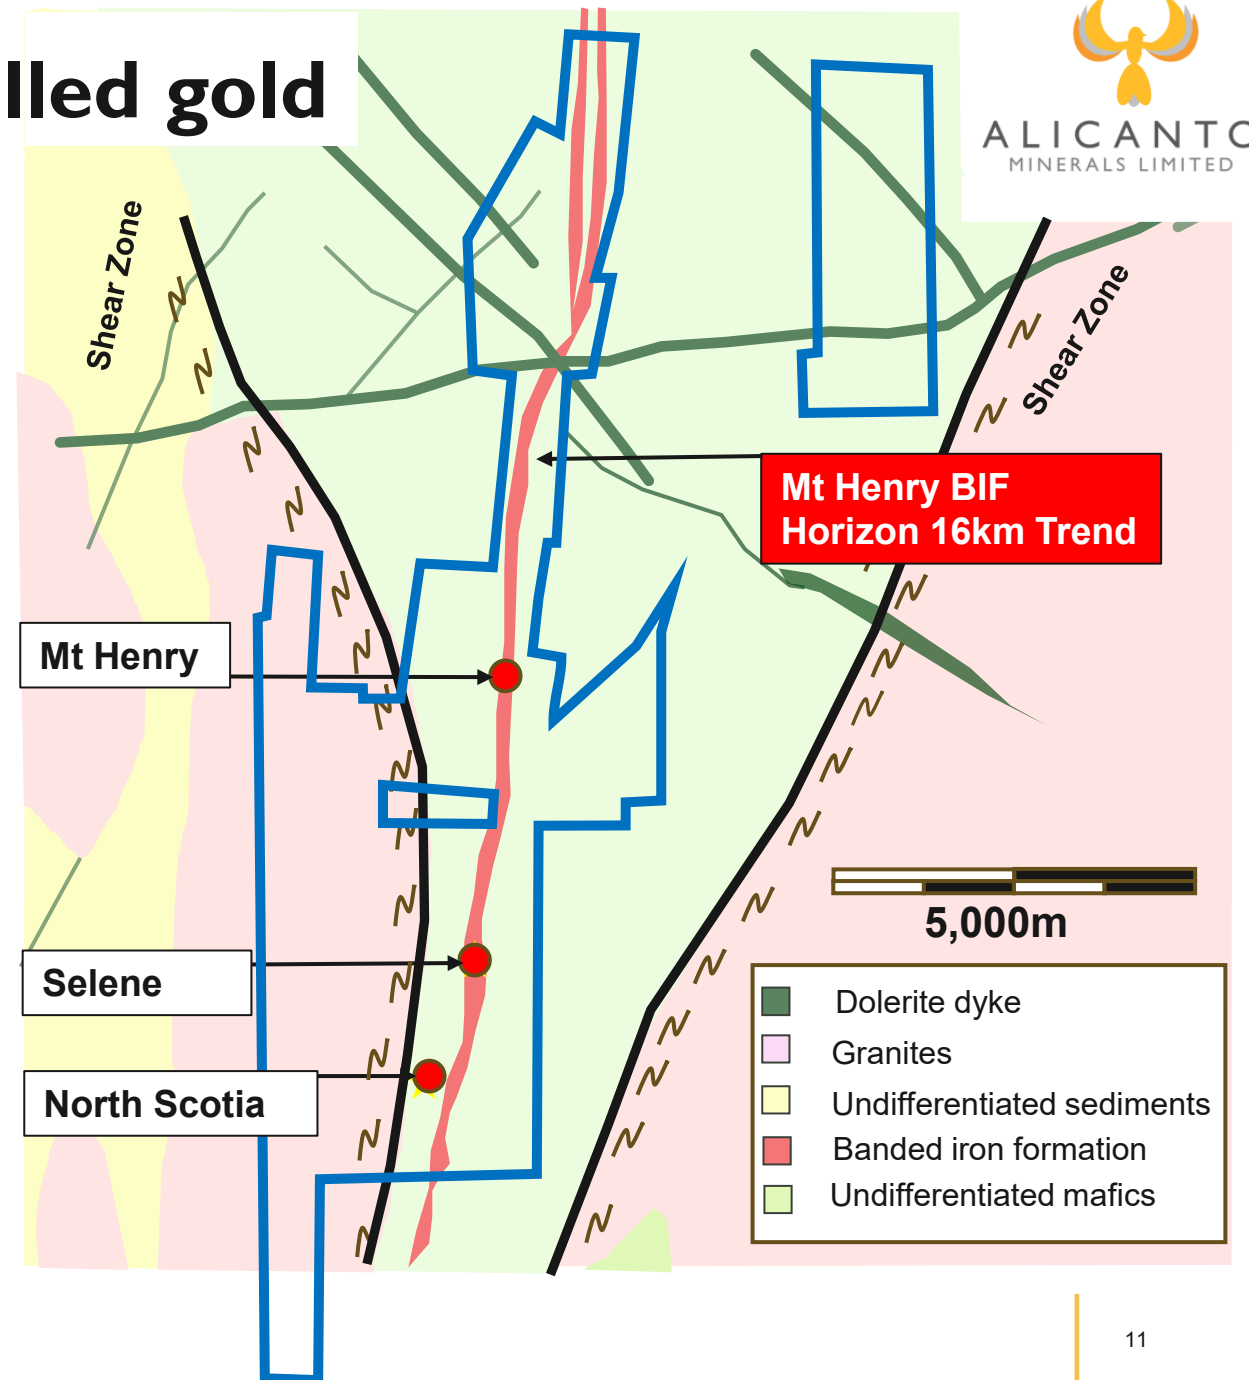

Norseman airstrip

BIF-hosted, structurally controlled gold

- A large-scale Archean BIF-hosted gold system, a deposit style known for scale, continuity and long mine life
- 915koz gold Resources across Mt Henry (232koz), Selene (651koz) and North Scotia (12koz), along a 16km BIF strike.
- Resources defined from shallow drilling and constrained within a A\$2,160 pit shell, open in all directions
- Historical gap in exploration expenditure with most exploration conducted over 25 years ago
- Shallow, open mineralisation highlights the significant upside beyond the current resource footprint
- Outside main deposit areas only limited SHALLOW and WIDE SPACED drilling with numerous significant intersections

Scratching the Surface on a Major Gold Trend

- 16km continuous gold mineralization along BIF trend with significant drill hits along the entire strike
- Historic drilling largely limited to ~150m depth with shallow pits to ~50–90m (Mt Henry only)
- Multiple deposits already defined: Mt Henry, Selene and North Scotia. Also holds 0.9Mt of stockpiles at 0.7g/t
- Large untested gaps along strike and at depth outside existing Resource areas with drilling to <50m outside the three deposit areas
- Broad, simple mineralisation supports rapid, scalable growth
- Clear, low-risk pathway to Resource expansion through step-out and depth drilling

Regional target area ~6km

Limited drill testing
Ave. drill depth: ~60m

**Mt Henry
4.8Mt @ 1.5g/t Au
(232koz Au)**

Pit depth: 50m
Ave. drill depth: ~35m

Regional target area ~4km

Limited drill testing
Ave. drill depth: ~60m

**Selene
18.7Mt @ 1.1g/t Au
(651koz Au)**

Ave. drill depth: ~90m

**North Scotia
0.1Mt @ 2.6g/t Au
(12koz Au)**

Ave. drill depth: ~65m

Selene Gold Deposit - Immediate Resource Growth

← North

Not historically mined, average drill depth of 90m

- SIMPLE geometry with consistent mineralisation and very broad widths from surface
- Consistent over ~1,000m of strike with
- Shallow drilling depth (max depth 130m) OPEN down dip
- Significant historic drill intercepts point to immediate GROWTH

Mt Henry Gold Deposit - Immediate Resource Growth

ALICANTO
MINERALS LIMITED

Limited shallow mining ONLY 90m, ave. drill depth 35m

- SIMPLE geometry with consistent mineralisation and broad widths
- Strong Mineralisation over ~2km of strike
- SHALLOW drilling depth (max depth 150m)
- Completely OPEN below the shallow historic open pit
- Unmined historic drill intercepts point to immediate GROWTH

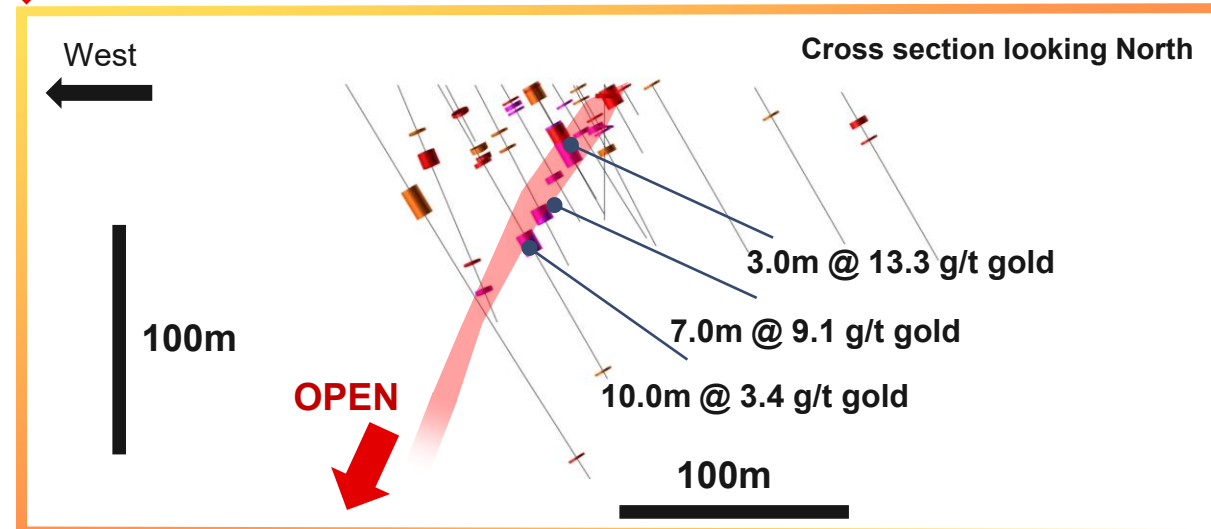

North Scotia - Immediate Resource Growth

Not historically mined, average drill depth of ~65m

- High-Grade gold target - ready for future resource growth
- Different deposit style Vein hosted in basalt
- Shallow drilling depth OPEN down dip
- Significant historic drill intercepts point to immediate GROWTH

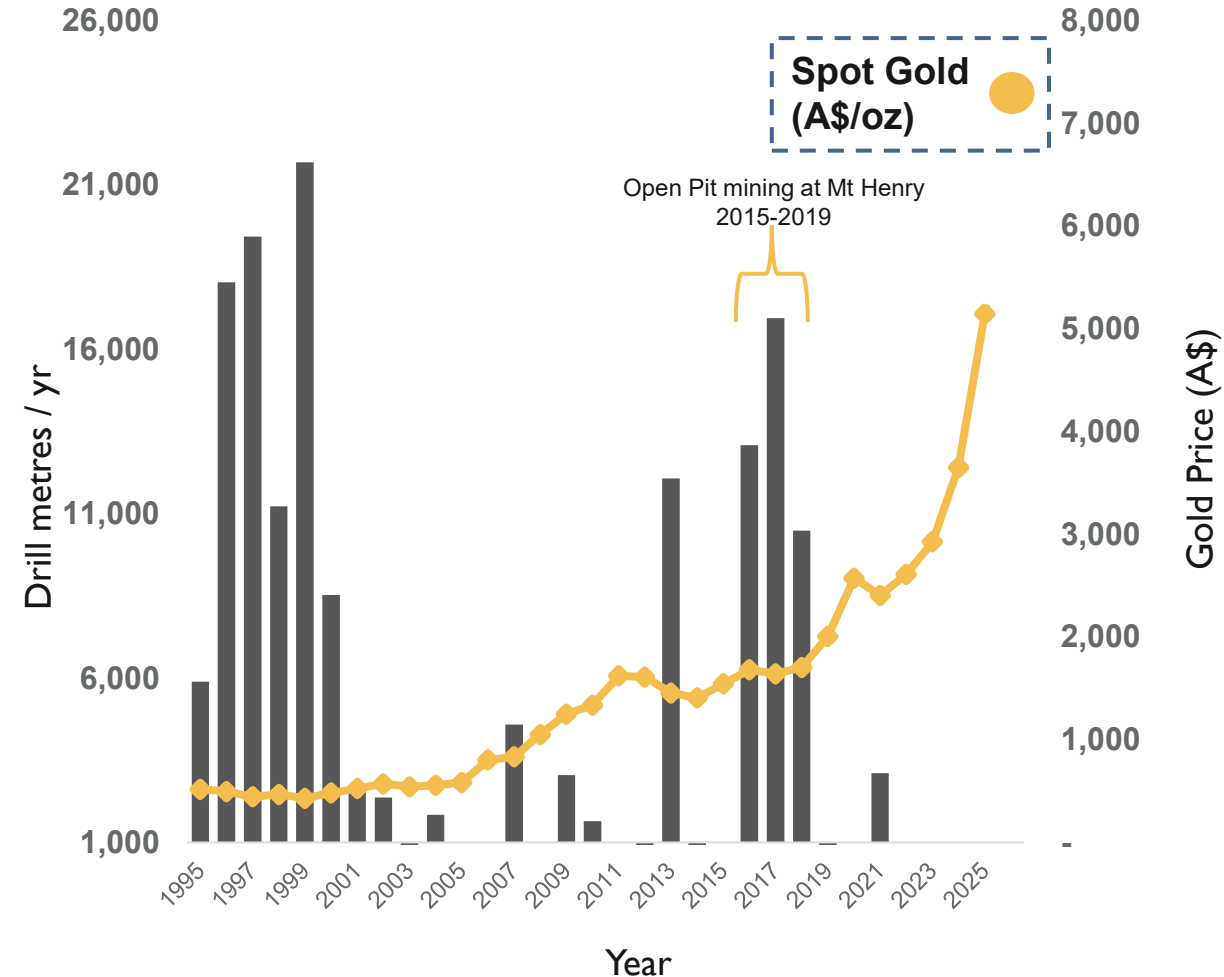

Limited Historical Investment, Strong Gold Price Leverage

Under-drilled through multiple cycles

- Only ~150,000m drilled in the past ~30 years. On average, ~5,000m drilled each year across the 16km gold trend
- Drilling has been shallow (to max of ~150m) and has been deposit focused, with almost no drilling outside main resource areas
- Between 2015 and 2019, selective open pit mining commenced and was completed, with no modern systematic exploration programs
- Historic work was completed at A\$2,160/oz gold
- Today's spot price of ~\$7,300/oz gold fundamentally changes the value of the project
- The underexplored nature of the project, combined with today's gold price and a modern, systematic drilling program, creates a materially different opportunity

Drill metres completed* vs gold price

* Drilling metres completed excludes grade control drilling. Spot gold price is based on 9 February 2026

First Multi-Rig Program In 25 Years

Program status

- First comprehensive multi-rig campaign in 25 years commencing
- Alicanto is transitioning from acquisition into execution

Stage I Rig Fleet

- DDHI diamond rig mobilising to site
- Second diamond rig and an RC rig to follow
- Three rigs to be operating by Q4 FY26

Drill Program Preliminary Focus and Objectives

- Infill drilling to increase resource confidence
- Step-out drilling targeting strike and depth extensions
- Systematic testing of the 16km BIF corridor
- Expand and upgrade the existing 915koz resource base
- Apply modern targeting to a lightly drilled system

Case Studies: Resource Growth via Modern Drilling

Modern drilling has consistently unlocked significant resource growth and market re-ratings in underexplored assets.

Database review	←————→			

Drilling to commence in Q1 2026, the first large-scale exploration campaign at Mt Henry in over 25 years, focused on sustained results and resource growth.

A Large Gold System Poised for Substantial Growth

A brownfields gold system in WA, poised for growth at a time when ounces really matter.

- **Large, proven gold system**
 - 915Koz already defined across multiple deposits within a 16km mineralised trend
- **Scale is yet to be tested**
 - Decades of shallow, fragmented drilling with limited depth or regional testing
- **First modern, systematic drill program underway**
 - ~50,000m multi-rig program designed to test continuity, depth extensions and broader system potential
- **Exploration results to drive value**
 - Ongoing drill results expected to demonstrate scale, expand the resource base and underpin value growth
- **Leverage to current gold price**
 - Incremental ounces added through drilling carry meaningful valuation impact in today's gold environment.
- **Execution team with a track record of re-rating brownfields gold assets**
 - Board, management and advisers have repeatedly delivered growth and value in similar systems
