ASX Announcement

RLF AgTech Announces Investor Webinar to Present Operational Growth Strategy

RLF AgTech Ltd (RLF or the **Company**) (ASX: RLF) is pleased to announce an upcoming investor webinar to provide shareholders with a comprehensive operational update and outline the Company's execution and growth strategy for the next phase of development.

RLF has transitioned from its restructuring phase into a focused execution and growth phase, with increased emphasis on operational discipline, commercial delivery and scalable revenue generation. The Company is strengthening internal systems, refining commercial processes and aligning its manufacturing and technical assets to improve earnings predictability and drive consistent performance across its core markets.

Investor Webinar Overview and Strategic Priorities

The investor webinar will provide shareholders and stakeholders with the opportunity to hear directly from CEO Stuart Upton and Chairman Ben Barlow. The session will include:

- An update on current business operations and performance
- An outline of the Company's execution-focused growth strategy
- Key priorities for the 2026 financial year and beyond
- An opportunity for investors to submit questions

The presentation will be structured around the following core strategic pillars:

1. Operational Maturity and Execution Discipline
2. Australian Market Activation
3. Precision Agriculture and LiquaForce Expansion
4. International Growth and Market Expansion
5. Data-Driven Commercialisation

Webinar Details

- **Date:** Thursday, 12 March 2026
- **Time:** 11:00 AM AEDT
- **Registration:** <https://events.teams.microsoft.com/event/e30b718f-f4e6-4e31-a08e-bb07f55bae72@c869be9a-3c16-4573-a0e9-c587d357c1f3>

The webinar will be hosted by Chairman Ben Barlow, who will provide Board context and strategic oversight. CEO Stuart Upton will present the operational growth strategy and execution roadmap for the period ahead. Participants will have the opportunity to submit questions during the session.

Management Commentary

Stuart Upton, Chief Executive Officer of RLF AgTech, said:

“RLF has established a strong foundation of proven products, comprehensive technical data and validated on-farm performance. Our focus is now disciplined execution and commercial delivery.

“Our strategy is centred on operational accountability, scalable revenue growth and translating technical capability into consistent economic outcomes for growers and sustainable returns for shareholders. The upcoming webinar provides an opportunity to outline this strategy in detail and engage directly with our investors.”

About RLF AgTech Ltd (ASX: RLF)

RLF AgTech Ltd (ASX: RLF) is an Australian-based plant nutrition company that formulates and manufactures advanced crop nutrition products designed to improve agricultural productivity, crop quality, and soil health.

With more than 30 years of technical and agronomic expertise, RLF delivers high-performance liquid fertilisers and seed treatments that support more efficient nutrient uptake, stronger early plant development, and improved yield outcomes. The Company's science-led formulations are backed by extensive field research and are suited to a wide range of broadacre and horticultural crops.

RLF has a growing footprint across Australia, where it now supplies products through a national network of over 1220 retail and wholesale distribution locations, providing broad coverage of key agricultural regions. The inclusion of the LiquaForce business in Queensland forms a significant part of RLF's domestic operations, enhancing its manufacturing and on-farm service capabilities.

Internationally, RLF has long-standing operations in China, including wholly owned manufacturing and distribution facilities, and continues to expand its presence across other parts of Asia, where demand for advanced crop nutrition solutions is increasing.

RLF's crop nutrition technologies are aligned with the future of sustainable agriculture, supporting improved fertiliser efficiency and regenerative farming practices. Through its Accumulating Carbon in Soil System (ACSS), RLF aims to help farmers reduce reliance on traditional fertilisers while increasing organic matter in the soil — contributing to better outcomes for carbon sequestration, improved soil health, and more resilient farming systems.
