## PDAC Presentation

---

Godolphin Resources Limited (ASX: GRL) (“Godolphin” or the “Company”) provides the attached replacement investor presentation, which replaces the presentation previously released to the ASX on 3 March 2026.

The updated presentation represents the actual presentation delivered at the PDAC Conference in Toronto, with the prior version having been provided in error.

<ENDS>

**This market announcement has been authorised for release to the market by the Company Secretary of Godolphin Resources Limited.**

## About Godolphin Resources

Godolphin Resources (ASX: GRL) is an ASX listed resources company, with 100% controlled Australian-based Projects primarily located within the Lachlan Fold Belt (“LFB”) NSW, a world-class gold-copper and rare earth element province of Australia. Godolphin have strategic focus on exploring for and development of critical minerals and metals, we remain committed to sustainability across the community in which we operate, the environment we undertake exploration and development on and to deliver projects which will assist Australia and the world in the clean energy transition. Currently the Company’s tenements cover 3,300km<sup>2</sup> of ground highly prospective for gold, silver, base metals and rare earths and is host to the Company’s advanced Lewis Ponds Gold and Silver Project, the Narraburra REE Project and the Yeoval Cu-Au and Mt Aubrey Au Projects. At Godolphin we aim to operate ethically and responsibly and remain outcome focused to deliver on what we say to add value for all stakeholders.

# DISCLAIMER AND COMPETENT PERSONS STATEMENT

## COMPETENT PERSONS STATEMENT

### COMPLIANCE STATEMENT

The information in this report that relates to Exploration Results is based on, and fairly represents, information and supporting documentation prepared by Jeneta Owens, Managing Director for Godolphin Resources Ltd. Ms Owens is the Managing Director, full-time employee, Shareholder and Option holder of Godolphin Resources Limited. Ms Owens is a Member of the Australasian Institute of Mining and Metallurgy (MAusIMM) and the Australian Institute of Geoscientists (AIG) she has sufficient experience which is relevant to the style of mineralisation and type of deposits under consideration and to the activity which has been undertaken to qualify as a Competent Person as defined in the 2012 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves". Ms Owens consents to the inclusion in this release of the matters based on the information in the form and context in which they appear. The information in this report that relates to Mineral Resources is based on information evaluated by Mr Jeremy Clark who is a Member of The Australasian Institute of Mining and Metallurgy (MAusIMM) and who has sufficient experience relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves". Mr Clark is an associate of RPM and he consents to the inclusion of the estimates in the report of the Mineral Resource in the form and context in which they appear. The data in this report that relates to an Exploration Target for the Lewis Ponds deposit is based on information evaluated by Mr Simon Tear who is a Member of The Australasian Institute of Mining and Metallurgy (MAusIMM) and who has sufficient experience relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (the "JORC Code"). Mr Tear is a Director of H&S Consultants Pty Ltd and he consents to the inclusion in the report of the Exploration Target in the form and context in which it appears. The information in this report that relates to the Production Target, assumptions on Modifying Factors and evaluation of other relevant factors are based on and fairly represents information and supporting documentation that has been compiled for this announcement and have been compiled under the supervision of Mr Tony O'Connell B.E. (Mining) of Optimal Mining Solutions. Mr O'Connell is a Member AusIMM and the Principal Consultant and Director of Optimal Mining Solutions. Mr O'Connell has reviewed and approved the technical content of this announcement. Mr O'Connell is a Competent Person as defined in the 2012 Edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves (JORC Code 2012). Mr O'Connell consents to the inclusion in this announcement of the matters based on his information in the form and context in which it appears. Other information in this announcement is extracted from reports lodged as market announcements referred to above and available on the Company's website [www.godolphinresources.com.au](http://www.godolphinresources.com.au). The Company confirms that it is not aware of any new information that materially affects the information included in the original market announcements and that all material assumptions and technical parameters underpinning the estimates in the relevant market announcements continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Persons' findings are presented have not been materially modified from the original market announcements.

## DISCLAIMER

### EXPLORATION TARGET CAUTIONARY NOTE:

The potential quantity and grade of the Exploration Targets are conceptual in nature and there has been insufficient exploration to estimate a Mineral Resource. It is uncertain if further exploration will result in the estimation of a Mineral Resource. The Exploration Targets have been prepared in accordance with the JORC Code (2012).

### CAUTIONARY NOTE REGARDING FORWARD LOOKING INFORMATION

This Australian Securities Exchange (ASX) release contains forward-looking statements and forward-looking information within the meaning of applicable Australian securities laws, which are based on expectations, estimates and projections as of the date of this release.

This forward-looking information includes, or may be based upon, without limitation, estimates, forecasts and statements as to management's expectations with respect to, among other things, the timing and amount of funding required to execute the Company's exploration, development and business plans, capital and exploration expenditures, the effect on the Company of any changes to existing legislation or policy, government regulation of mining operations, the length of time required to obtain permits, certifications and approvals, the success of exploration, development and mining activities, the geology of the Company's properties, environmental risks, the availability of labour, the focus of the Company in the future, demand and market outlook for precious metals and the prices thereof, progress in development of mineral properties, the Company's ability to raise funding privately or on a public market in the future, the Company's future growth, results of operations, performance, and business prospects and opportunities. Wherever possible, words such as "anticipate", "believe", "expect", "intend", "may" and similar expressions have been used to identify such forward-looking information.

Forward-looking information is based on the opinions and estimates of management at the date the information is given, and on information available to management at such time. Forward-looking information involves significant risks, uncertainties, assumptions and other factors that could cause actual results, performance or achievements to differ materially from the results discussed or implied in the forward-looking information. These factors including, but not limited to, fluctuations in currency markets, fluctuations in commodity prices, the ability of the Company to access sufficient capital on favourable terms or at all, changes in national and local government legislation, taxation, controls, regulations, political or economic developments in Australia or other countries in which the Company does business or may carry on business in the future, operational or technical difficulties in connection with exploration or development activities, employee relations, the speculative nature of mineral exploration and development, obtaining necessary licenses and permits, diminishing quantities and grades of mineral reserves, contests over title to properties, especially title to undeveloped properties, the inherent risks involved in the exploration and development of mineral properties, the uncertainties involved in interpreting drill results and other geological data, environmental hazards, industrial accidents, unusual or unexpected formations, pressures, cave-ins and flooding, limitations of insurance coverage and the possibility of project cost overruns or unanticipated costs and expenses, and should be considered carefully. Many of these uncertainties and contingencies can affect the Company's actual results and could cause actual results to differ materially from those expressed or implied in any forward-looking statements made by, or on behalf of, the Company. Prospective investors should not place undue reliance on any forward-looking information.

Although the forward-looking information contained in this news release is based upon what management believes, or believed at the time, to be reasonable assumptions, the Company cannot assure prospective purchasers that actual results will be consistent with such forward-looking information, as there may be other factors that cause results not to be as anticipated, estimated or intended, and neither the Company nor any other person assumes responsibility for the accuracy and completeness of any such forward-looking information. The Company does not undertake, and assumes no obligation, to update or revise any such forward-looking statements or forward-looking information contained herein to reflect new events or circumstances, except as may be required by law.

No securities exchange, regulation services provider, securities commission or other regulatory authority has approved or disapproved the information contained in this release.

Information in this presentation is extracted from reports lodged as market announcements referred to and available on the Company's website [www.godolphinresources.com.au](http://www.godolphinresources.com.au). The Company confirms that it is not aware of any new information that materially affects the information included in the original market announcements and that all material assumptions and technical parameters underpinning the estimates in the relevant market announcements continue to apply and have not materially changed. The Company confirms that the form and context in which the Competent Persons' findings are presented have not been materially modified from the original market announcements.

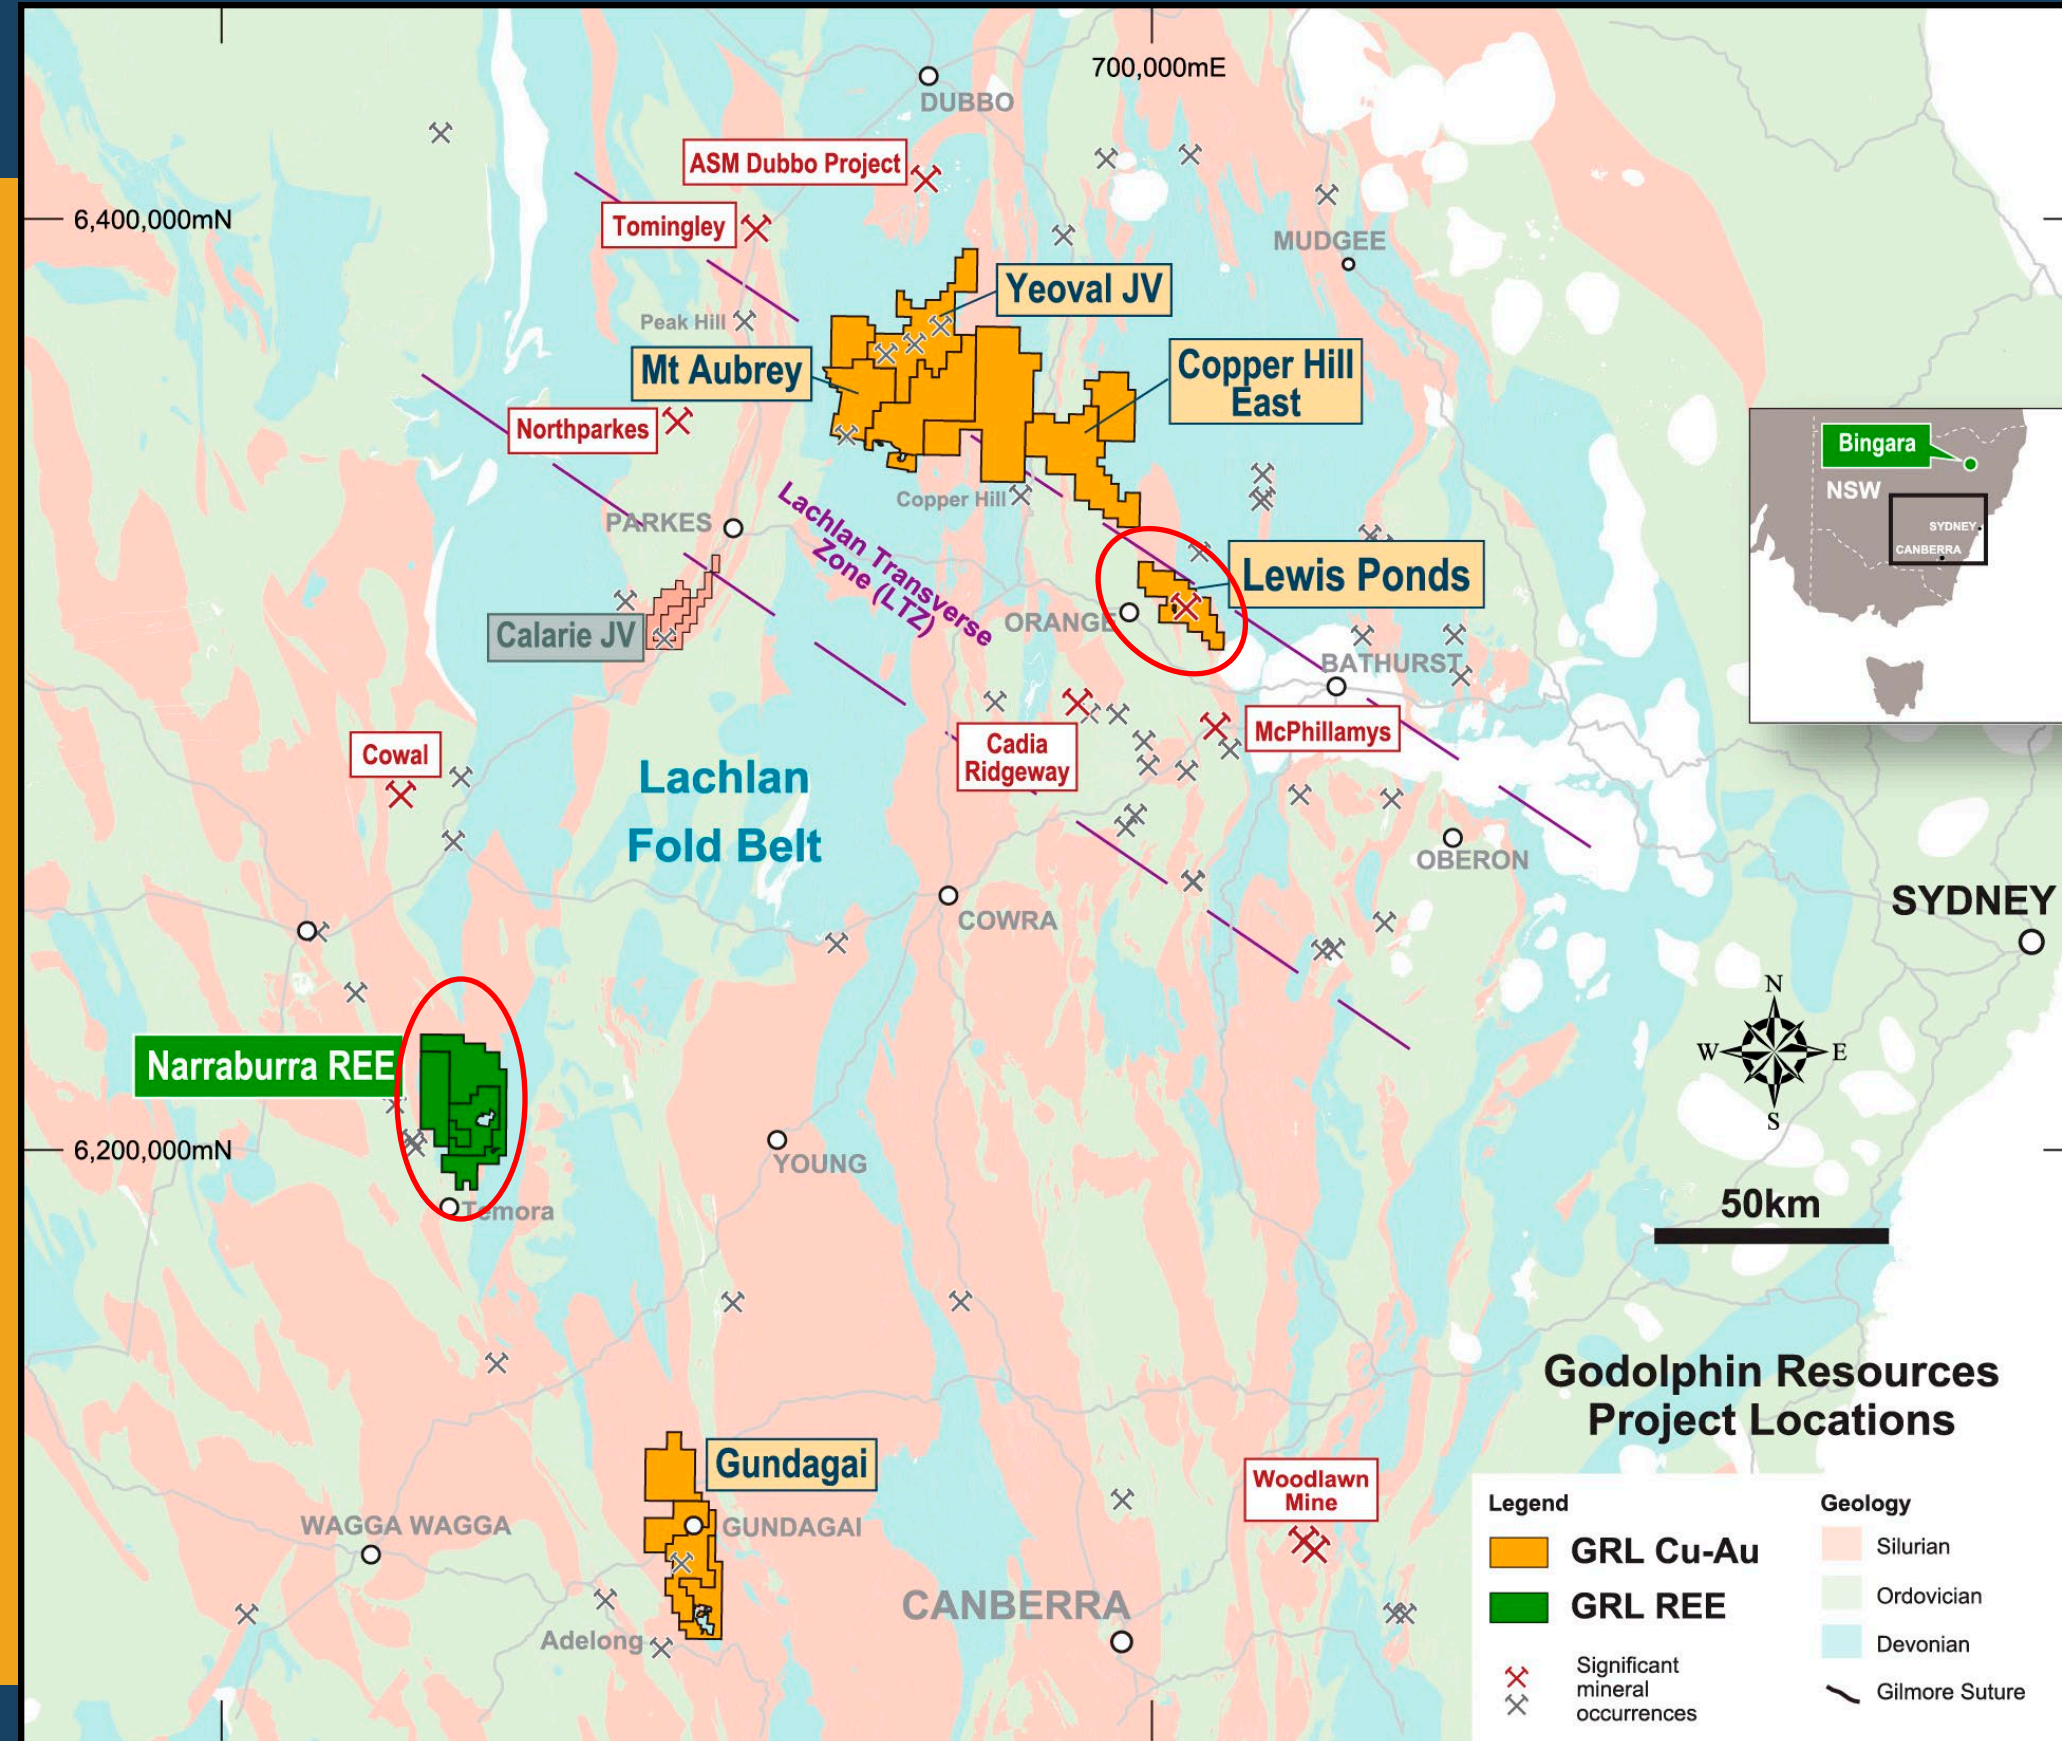

# SIGNIFICANT FOOTHOLD IN NSW

## A STABLE JURISDICTION

### Project suite:

- Lewis Ponds (100%) – Gold, copper and base metals
- Narraburra (100%) – Rare earth elements (REE)
- Cambrai (100%) – REE, tin and copper
- Trungley (100%) – REE
- Yeoval (100%) – Copper and gold
- Copper Hill East (100%) – Copper and gold
- Gundagai North & South (100%) – Gold

GRL HAS ONE OF THE LARGEST EXPLORATION LANDHOLDINGS IN THE LACHLAN FOLD BELT AND WITH OVER 3,200KM<sup>2</sup> OF HIGHLY PROSPECTIVE TENURE ACROSS NSW

# LEWIS PONDS GOLD, SILVER & BASE METALS PROJECT

Project covers ~148km<sup>2</sup> and is located 15km east of Orange, NSW

Project has a JORC 2012 MRE of:

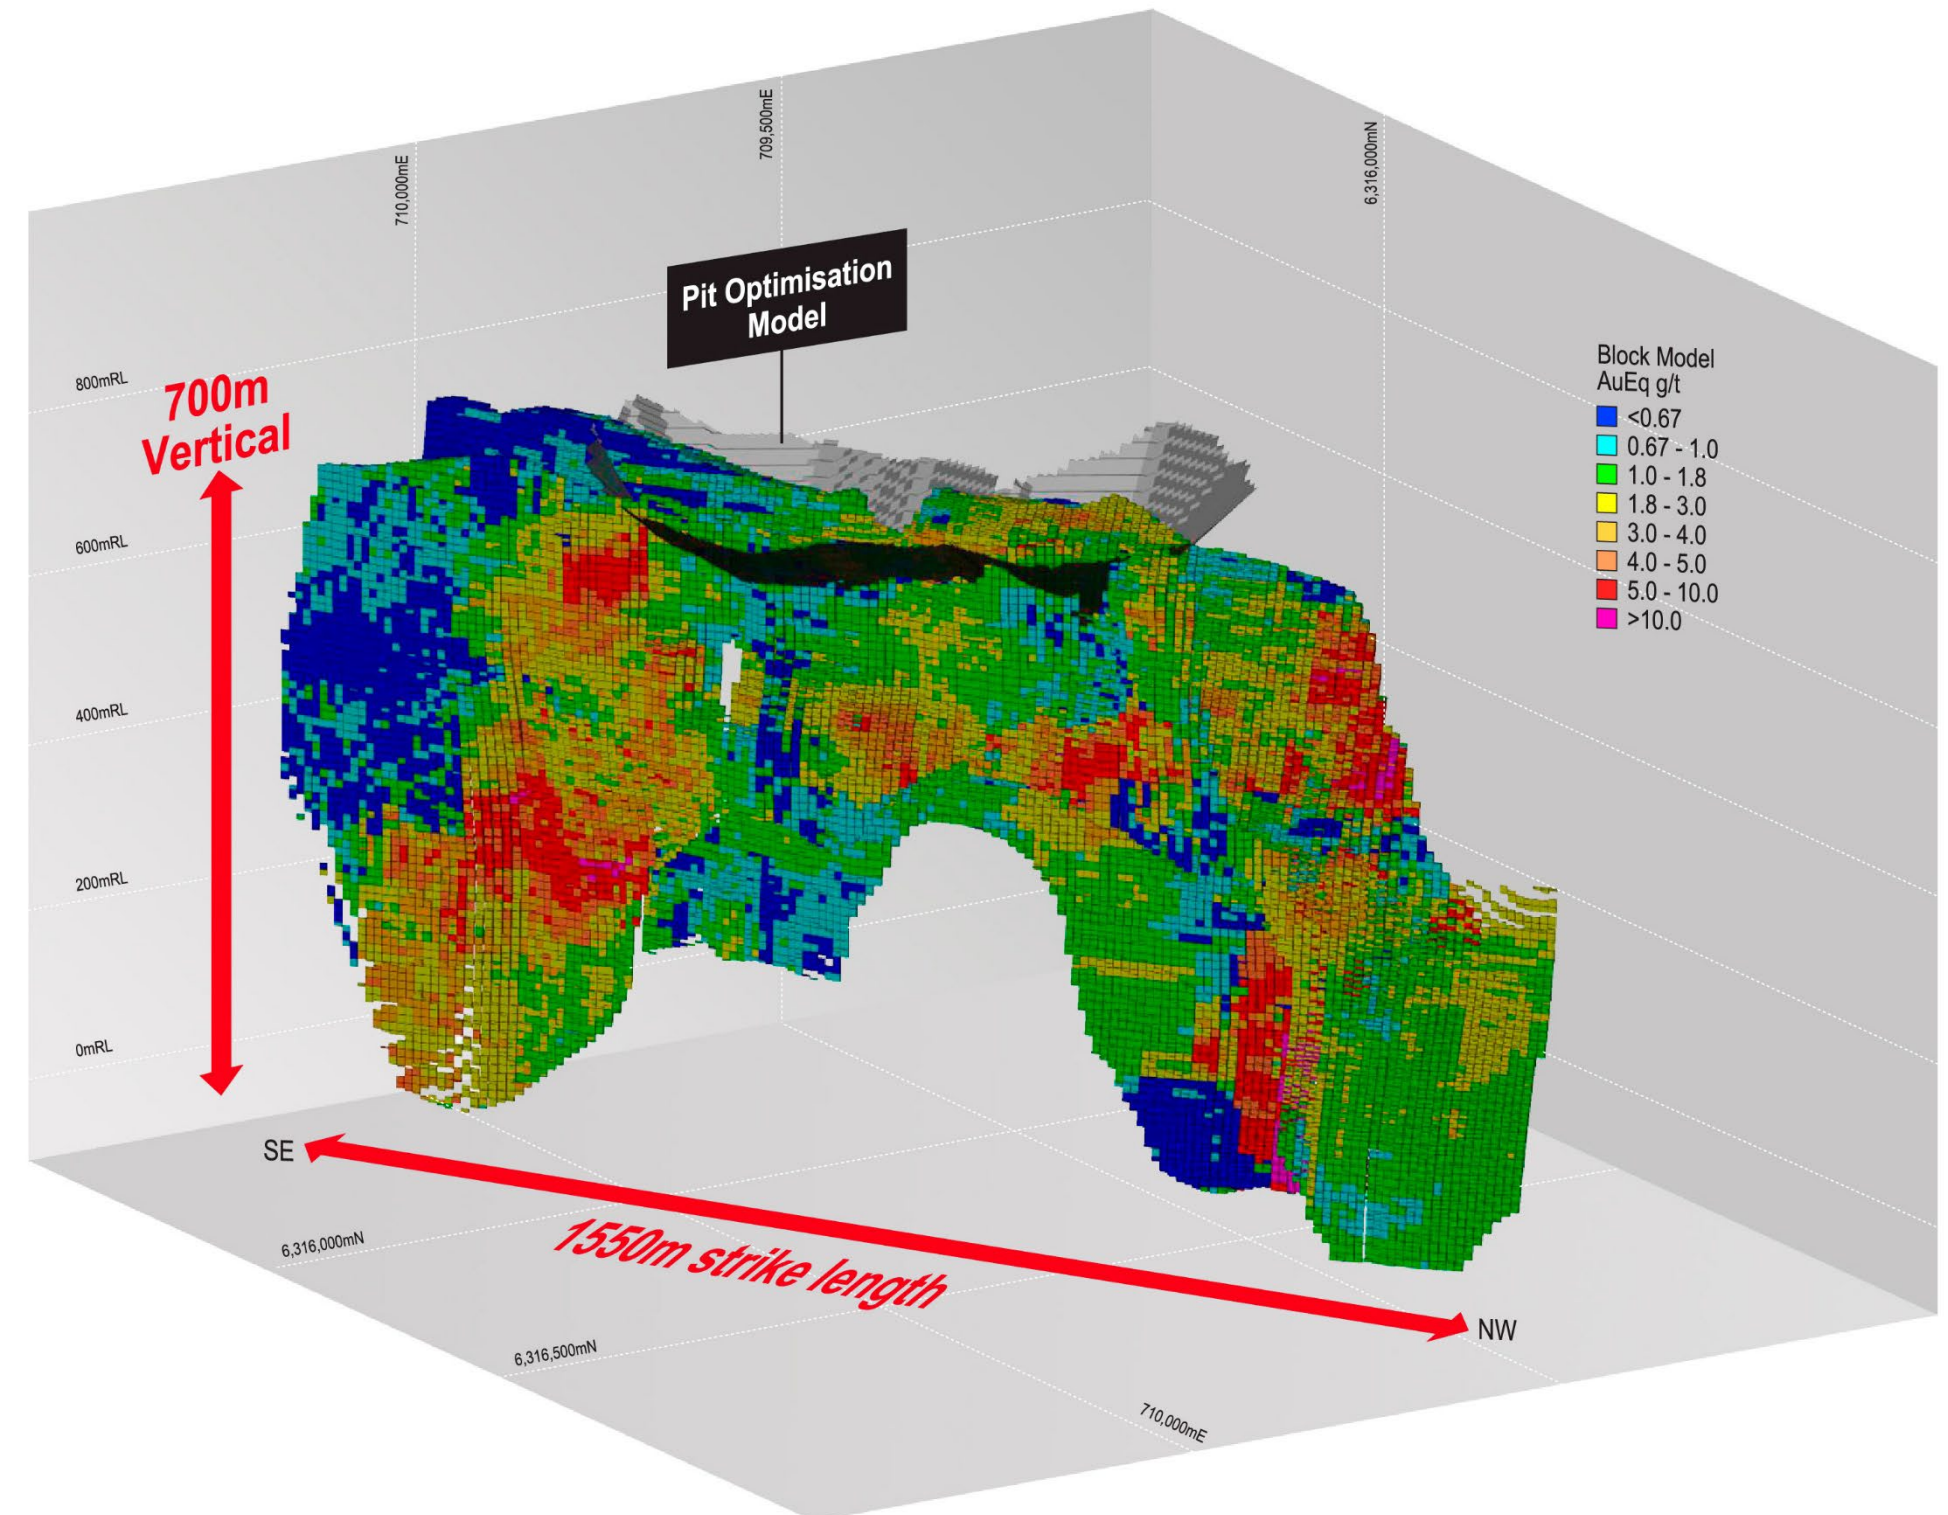

**17.52Mt** (9.09Mt indicated & 8.43Mt inferred) @  
**1.12g/t Au, 53.34g/t Ag, 2.06% Zn, 1.10% Pb, 0.14% Cu**

• Contained metal of:

- 630,000 oz gold
- 30.1 Moz silver
- 362Kt of zinc
- 194Kt of lead & 24Kt of copper

- 78% increase in tonnes
- 34% increase in gold
- 44% increase in silver

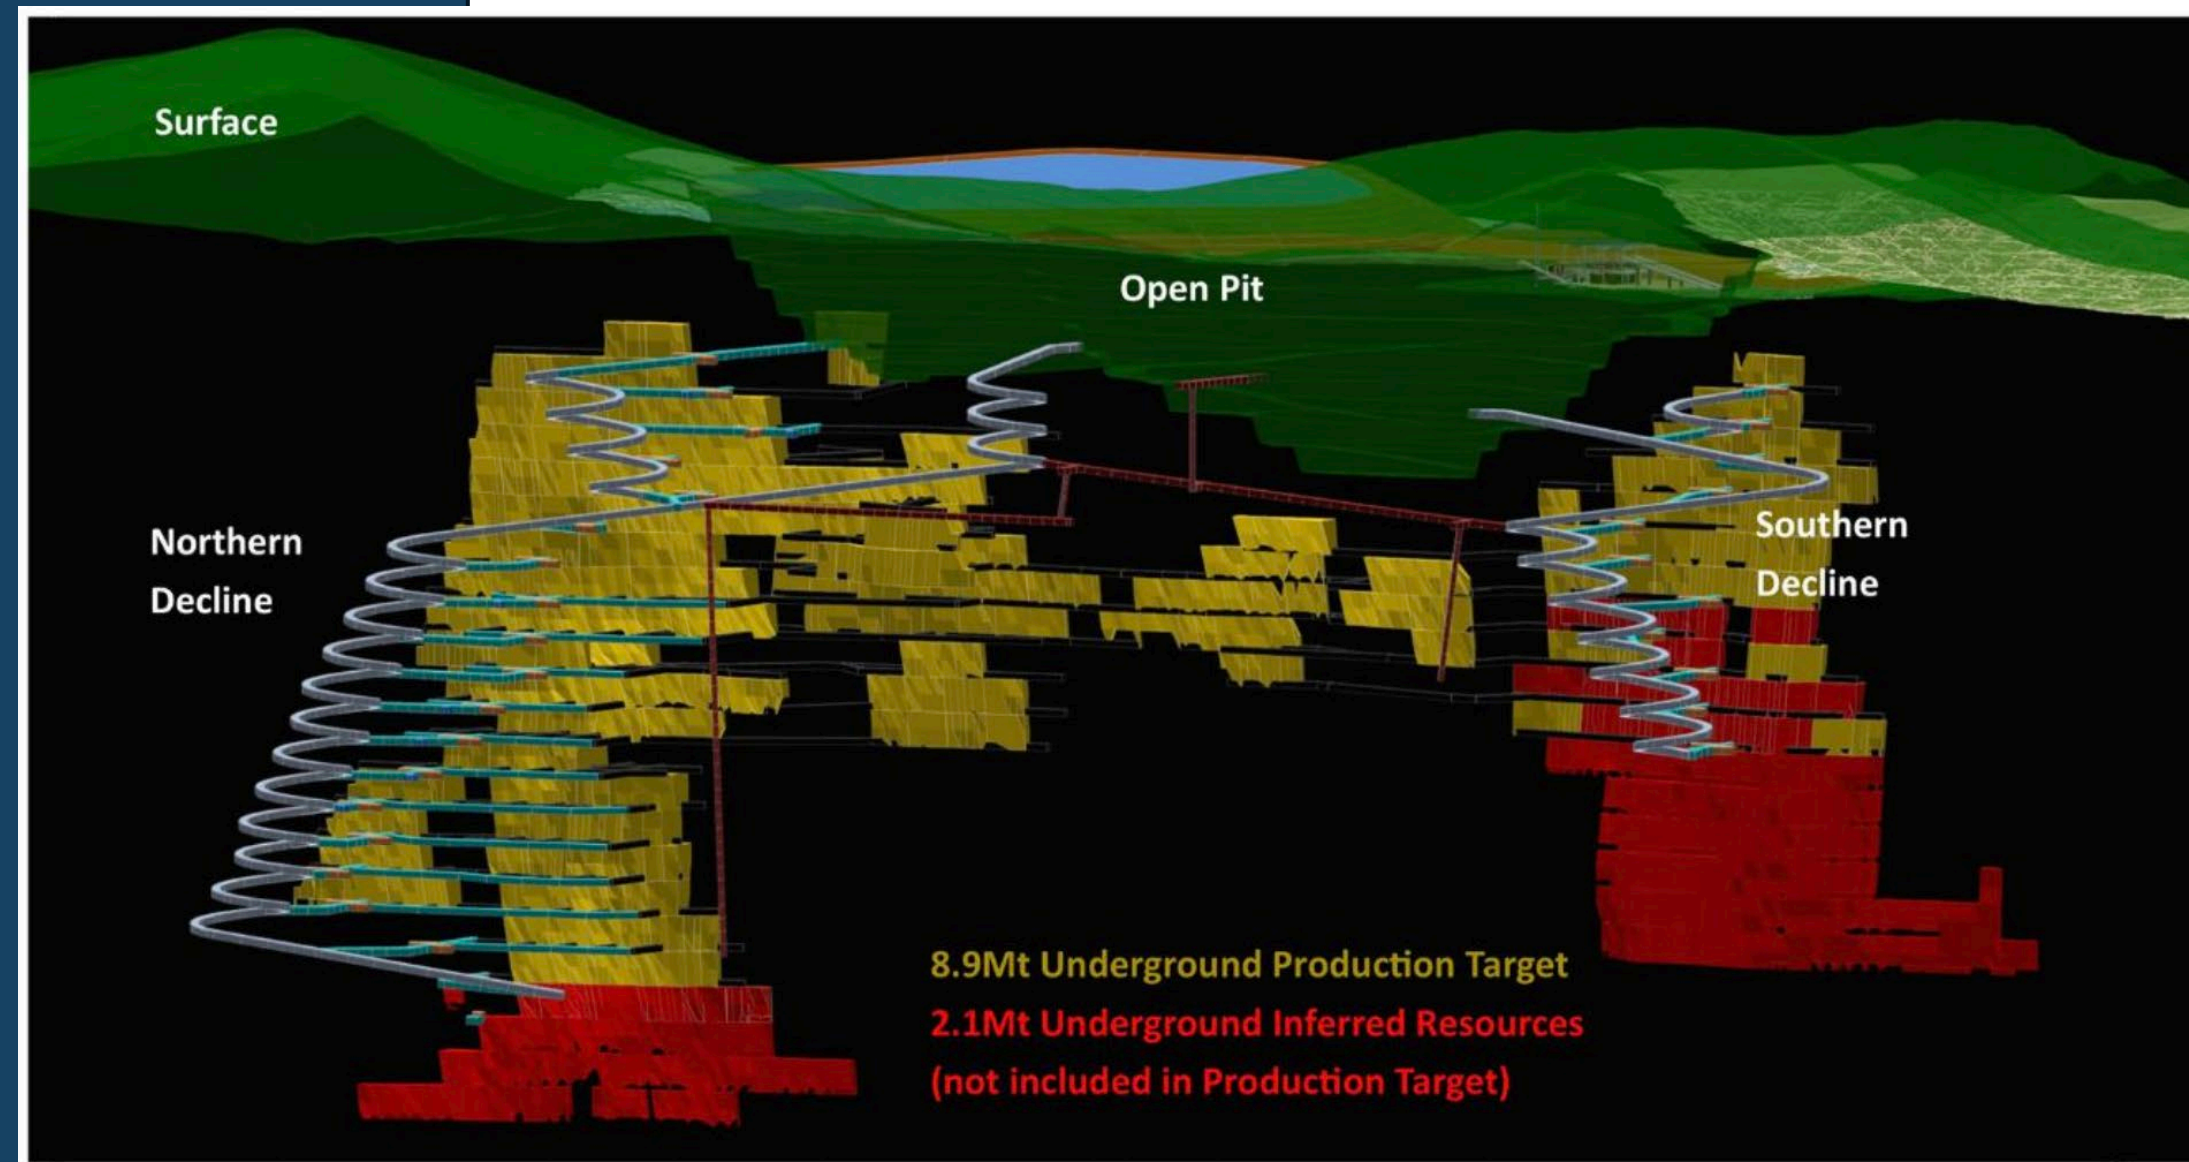

- Pit Optimisation Study also undertaken to facilitate new Open Pit and Underground Resources

# Strong economics from scoping study

Scoping Study highlights favourable project economics and development pathway for Lewis Ponds\*

- **12-year mine life at 1.25Mtpa throughput**
  - Open pit: 1-4 years
  - Underground: 5-12 years
- **Base case (US\$3,700 Au / US\$55 Ag):**
  - Pre-tax NPV<sub>7.5%</sub>: A\$481m with IRR of 24%
  - Free cashflow: A\$1.1Bn (pre-tax)
- **Upside case (US\$5,055 Au / US\$82 Ag):**
  - Pre-tax NPV<sub>7.5%</sub>: A\$1,088m with IRR of 40%
  - Free cashflow: A\$2.2Bn (pre-tax)
- **Payback profile:** 74% Indicated resource in first 6 years
- **Low pre-production capex** of ~A\$268m
- **Average AISC:** A\$3,254/AuEq oz
- **Preferred pathway:** Standalone processing plant

## METALLURGY HIGHLIGHTS

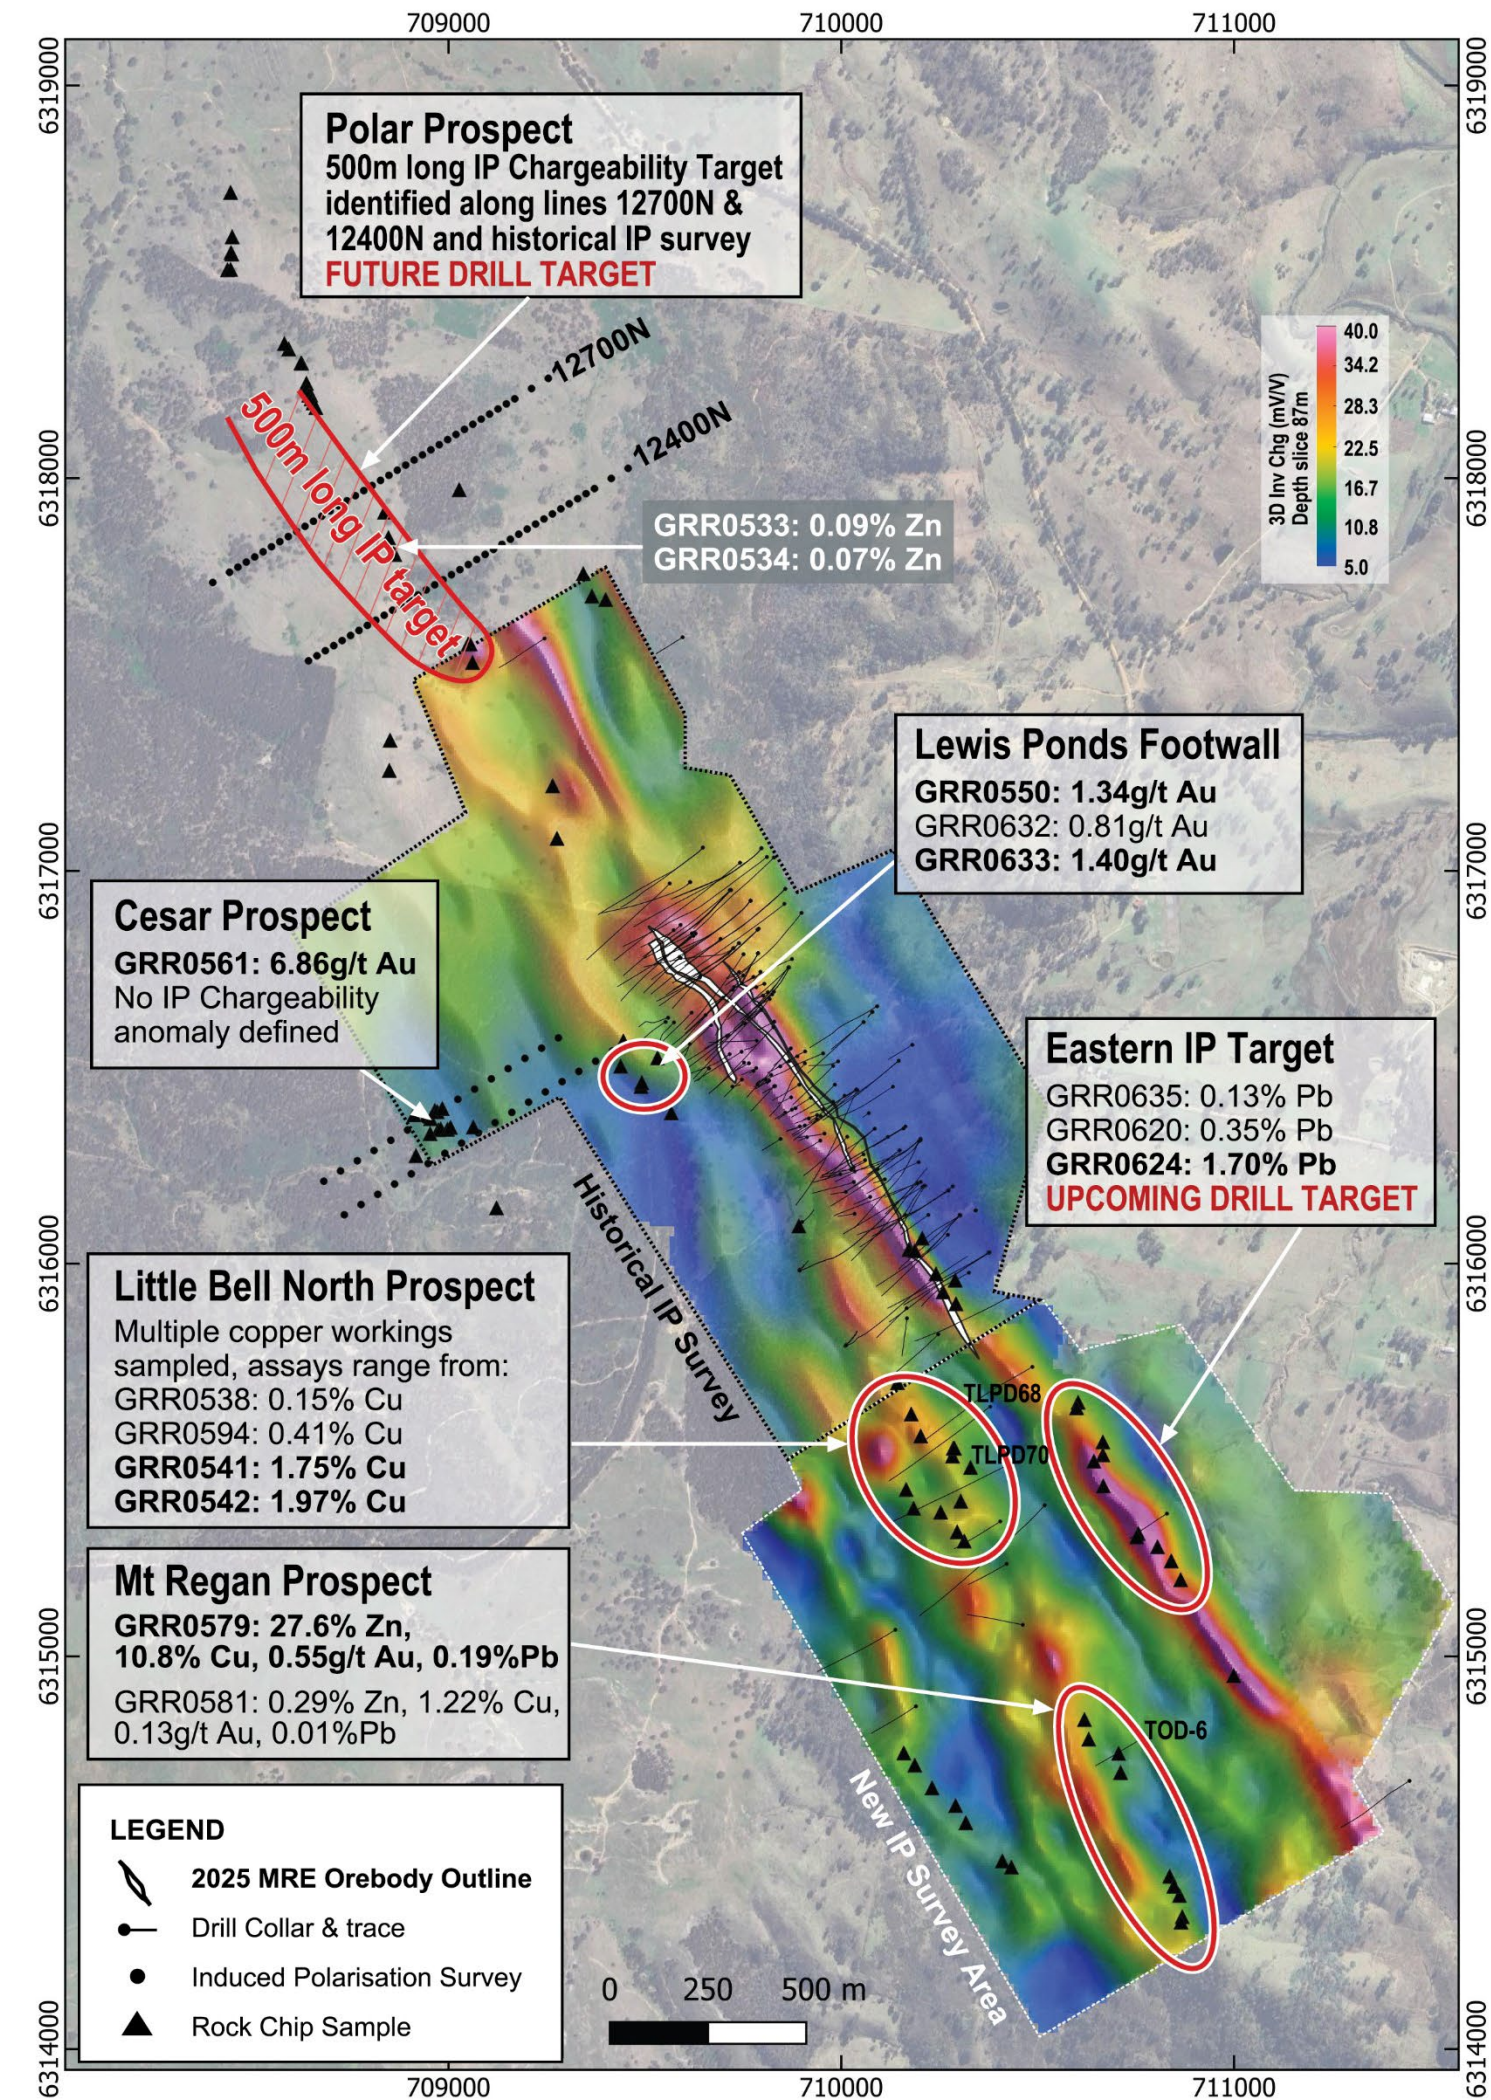

- Two high-quality concentrates produced from test work:
  - **Clean zinc** concentrate grade of >64%
  - **Low impurity high grade lead-gold-silver** concentrate (>31% Pb, >16.7 g/t Au, >1580 g/t Ag)
- Comminution testing - Soft ore – reduced CAPEX and OPEX

\* Lewis Ponds Scoping Study results, reported by Godolphin Resources Limited in GRL: ASX announcement 16 February 2026

# LEWIS PONDS EXPLORATION POTENTIAL

- The Stage 1 Exploration Target(s) (reported in accordance with the 2012 JORC Code & Guidelines) consist of two different sectors - A copper dominant sector referred to as the “Copper Lodes”, and a polymetallic sector “Zinc Lodes” which contains Gold and Silver and consisting of approximately\*:
  - 3Mt – 5Mt at a grade of 1.0% to 1.5% Cu, for contained copper metal between 30,000T – 75,000T.
  - 3Mt – 5Mt at a grade of 1.42g/t to 2.46g/t AuEq (Au-Ag-Zn- Pb-Cu), for contained gold equivalent metal between 137,000 oz – 421,000 oz
- Spicer’s & Tom’s Lodes open to the north, south and at depth – no drilling - Large gaps within the resource – infill drilling can provide upside
- Expansion potential with identified **Torphy’s lode and Quarry lode**
- Multiple **IP anomalies** to the north and south of the MRE– not drill tested
- Multiple off hole EM Conductors in the footwall and along strike – not drill tested
- FLEM & Negative VTEM & Gold in soil anomalies** identified north of the MRE – not drill tested
- Drilling to test exploration targets expected to commence this month**

\* Lewis Ponds, reported by Godolphin Resources Ltd in ASX announcement 23 July 2025  
 $((\text{Au grade g/t} * \text{Au price US\$/oz} * \text{Au recov} / 31.1035) + (\text{Ag grade g/t} * \text{Ag price US\$/oz} * \text{Ag recov} / 31.1035) + (\text{Cu grade \%} * \text{Cu price US\$/t} * \text{Cu recov} / 100) + (\text{Zn grade \%} * \text{Zn price US\$/t} * \text{Zn recov} / 100) + (\text{Pb grade \%} * \text{Pb price US\$/t} * \text{Pb recov} / 100)) / (\text{Au price g/t} * \text{Au recov} / 31.1035)$ . Prices are in US\$ of Au= \$3200/oz, Ag = \$40/oz, Cu= \$9,900/t, Zn = \$2,700/t, Pb = 2,015/t. These prices are long-term prices and have been sourced from a range of metals analysts who provide monthly commodity price forecasts. The long-term pricing for each commodity is based on the average real consensus price from up to 19 metals analysts surveyed. The date of the survey was November 17th, 2025..

## NARRABURRA RARE EARTH PROJECT

### CLOSE TO CRITICAL INFRASTRUCTURE

Well located near an old mining town with excellent access to critical infrastructure

- 350km west of Sydney – 10km north of Temora Township
- **Operating rail line within 5km** of the project site
- **High voltage power lines** within **4km** of the project site – suitable for mining and processing requirements
- Network of **sealed roads** to the project site
- **Nearby water** options from bores on the the Murrumbidgee or Lachlan Rivers
- **Supportive local council** for large developments to support local employment and small business
- **Maiden JORC 2012 Resource<sup>1</sup> delivered in 2023:**
- 94.9Mt @ 739ppm TREO, of which 47.6Mt @ 780ppm is indicated and 47.4Mt @ 698ppm is inferred, including a high grade core of 20Mt @ 1,079ppm TREO using a 600ppm cutoff within the Indicated Resource

## METALLURGY & MREC

**Phase 1:** <sup>1</sup>2023 diagnostic leach tests delivered 92% recovery of key magnet REEs (Pr, Nd, Tb, Dy) with best results of Nd 94%, Pr 90%, Tb 83% & Dy 88%

**Phase 2:** 2024 of comprehensive leach testing program has also delivered exceptional REE recoveries:

- 80% - 95% extraction of key magnet REEs (Nd, Pr, Tb, Dy) with best results of Nd 96%, Pr 92%, Tb 91% and Dy 93%

**MREC composition**<sup>2</sup> indicate a high value product due to **high concentrations of Tb and Dy** and low impurities

Slurry leach results indicate MREO extraction rates up to 90% with limited deleterious element (impurity) extraction and low (1.2kg/t) acid consumption

**Phase 3:** Metallurgical Test Work Program highlights:

- Excellent Magnet Rare Earth Oxide (MREO) leach extraction rates (90%)
- Excellent MREO over recovery from clay through to MREC (>77%)
- 57.8% of MREC product is comprised of TREO
- High Value, Critical Heavy Rare Earth Oxides (HREO) make up 26.9% of the value of TREO in the MREC product
- Terbium and Dysprosium make up **5.9% of the TREO in the MREC**

**MREC product made at ANSTO Minerals Leach Laboratory,  
Sydney, NSW**

<sup>1</sup>refer market announcements (ASX: GRL) 5 & 19 & 21 April 2023, 19 February 2024

<sup>2</sup>refer market announcement (ASX: GRL) 10 December 2024

**Discussions to commence with potential off take partners**

## GEOPHYSICS INDICATES LARGE CLAY BASIN HOSTING THE NARRABURRA DEPOSIT INDICATING SIGNIFICANT RESOURCE EXPANSION POTENTIAL

Image: Cross Section of AEM flight line L31020 displayed as a Conductivity Depth Slice Image (CDI).

- Exploration targets with potential to expand the existing JORC 2012 Mineral Resource Estimate
- Resource is **OPEN** in several direction
- Airborne electromagnetic (AEM) survey undertaken by the NSW Government's Resources and Geosciences department, under the Critical Minerals and High-Tech Metals Strategy, directly maps conductive clays hosting the Narraburra Rare Earth Elements ('REE') mineralisation :
  - Conductive clay basin hosting the Narraburra REE mineralisation extends north and south of the Narraburra Mineral Resource, over a **25km x 4km wide prospective zone which overlaps mapped A-Type Granites** interpreted to be the source of the Narraburra REE mineralisation – **area yet to be drill tested**
  - Two highly prospective drill targets have been delineated from the AEM
  - Future mineral resource extension and exploration activities will be concentrated within this highly prospective zone

Image: showing the 25km long, north-south trending Narraburra Conductivity Basin on Background Magnetic Image: RTP HP5000 – See ASX:GRL 23 July 2024.

## INVESTMENT SUMMARY

- Extensive foothold in the Lachlan Fold Belt, NSW's premier mining and exploration jurisdiction
- **Four JORC 2012 MREs** across project suite with two flagship projects containing **Gold, Silver and Rare Earths**
- JORC 2012 Inferred MRE at Lewis Ponds of **17.52Mt (9.09Mt indicated & 8.43Mt inferred) @ 1.12g/t Au, 53.34g/t Ag, 2.06% Zn, 1.10% Pb, 0.14% Cu**
- - with near term exploration to increase potential upside
  - Multiple expansion targets identified
  - **630,000 oz gold & 30.1 Moz silver contained metal**
- **94.9Mt @ 739ppm TREO (47.6Mt @ 780ppm is indicated and 47.4Mt @ 698ppm is inferred) 20Mt @ 1,079ppm TREO using a 600ppm cutoff**
- **High Tb/Dy levels in MREC** from Narraburra REE project
- **Favourable scoping study economics** highlight development pathway for Lewis Ponds with manageable capex requirements
- Additional exploration drilling to commence shortly to unlock additional resource growth across Lewis Ponds project
