Disclaimers & Important Information

DISCLAIMER

This presentation has been prepared by Cazaly Resources (Company) to provide general information about the Company and its project portfolio. The information in this document is in summary form and should not be relied upon as a complete and accurate representation of any matters that a reader should consider in evaluating the Company. This presentation does not purport to contain all the information that a prospective investor may require for any potential investment in the Company. The reader is referred to the Companies website www.cazalyresources.com.au and public reports for detailed information about the Company and its projects.

COMPETENT PERSONS STATEMENT ASX: CAZ

The information in this presentation reliably represents the available data as referenced in this document, and has been reviewed by Ms Tara French and Mr Don Horn, who are employees of the Company. Ms Tara French and Mr Horn are both Members of the Australasian Institute of Geoscientists and have sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which they are undertaking to qualify as a Competent Persons as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. The company confirms that it is aware the historical information may not have been reported in accordance with JORC 2012, and the more recent information was reported in accordance with JORC 2012, it is also not aware of any new information or data that materially affects the information included in the original reports. Ms Tara French and Mr Horn both consent to the inclusion of the matters based on the information in the form and context in which it appears.

The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcements and in the case of estimates of Mineral Resources or Ore Reserves, that all material assumptions and technical parameters underpinning the estimates in the relevant market announcement continue to apply and have not materially changed. The company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcement.

The information in this presentation that relates to the Bommie porphyry copper mineral resource estimation is based on work completed by Mr. Stephen Hyland, a Competent Person and Fellow of the AusIMM. Mr. Hyland is Principal Consultant Geologist with Hyland Geological and Mining Consultants (HGMC), who is a Fellow of the Australian Institute of Mining and Metallurgy and holds relevant qualifications and experience as a qualified person for public reporting according to the JORC Code in Australia. Mr Hyland is also a Qualified Person under the rules and requirements of the Canadian Reporting Instrument NI43-101. Mr Hyland consents to the inclusion in this report of the information in the form and context in which it appears.

The information in this presentation that relates to the Mount Angelo North Mineral Resource is based on information compiled by Ms Vanessa O'Toole Principle Consultant of Honey Mining and Resources Pty Ltd, a Competent Person, who is a Member of The Australasian Institute of Mining and Metallurgy and has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Ms Vanessa O'Toole consents to the inclusion in the report of the matters based on her information in the form and context in which it appears.

COMPLIANCE STATEMENT (HISTORICAL DATA)

The Company's Competent Persons believe the historical information is a reliable representation of the available project data that has been sourced to date. The Company confirms it is not aware of any new information or data that is relevant to the understanding of the exploration results, or that materially affects the information included in the original market announcement(s). The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original announcements. The historical exploration results have not been independently validated by Cazaly and the Company is not adopting or endorsing the former owners exploration results.

FORWARD LOOKING STATEMENT

This ASX presentation may include forward-looking statements. Forward-looking statements include, but are not limited to, statements concerning Cazaly's planned exploration program(s) and other statements that are not historical facts. When used in this document, words such as "could," "plan," "estimate," "expect," "intend," "may", "potential," "should," and similar expressions are forward looking statements. Although the Company believes that its expectations reflected in these forward-looking statements are reasonable, such statements involve risks and uncertainties and no assurance can be given that actual results will be consistent with these forward-looking statements. The forward-looking statements in this presentation reflect views held only as at the date of this presentation.

incl. 2m @ 23.8g/t from 34m
- GGRC015** – 3m @ 3.8g/t from 169m

Duchess - New gold target identified

- GGRC018** – 19m @ 1.5g/t from 104m
incl. 4m @ 4.7g/t from 119m

Anomalous RC Drill Results

PHASE 1 RC DRILLING - CONCLUSIONS

Duke of York:

- Shallow high grade mineralisation at Duke of York is open to the south and at depth
- Potential for gold mineralisation further west within the untested ultramafic unit

Duchess:

- Gold grades increase with depth
- Open in all directions
- Highlights prospectivity of untested western ultramafic at Goongarrie

WALK UP DRILL TARGET

CARB Project, Ontario, Canada – Nb, REE

REGIONAL SCALE TARGETS (100% CAZ , 2% vendor royalty)

Large Scale Carbonatite
~3km in diameter

Located in the Red Lake district, a well-known mining province in Ontario

Largely unexplored
Just 4 holes drilled in 1960's
No exploration drilling in over 50 years

Anomalous REEs in limited sampling, plus Nb up to **7.1%**

Cazaly Fieldwork

Cazaly re-assayed historic core with pXRF

Best results include **Pr 0.42%**, **Nd 1.49%**, **La 3.36%**, **Ce 4.34%**, and **Nb 0.6%**

TREO up to 2482ppm; **NdPr up to 25% of TREO**;
Niobium up to 917ppm

1960s drill core stored at the Geological Survey, Ontario

Cautionary Statement (pXRF)
The pXRF exploration results reported herein have been collected on historical core samples and are not equivalent to analytical laboratory results. The use of spot pXRF readings only provides an indication of the potential order of magnitude of analytical laboratory assay results. The downhole location of pXRF results collected cannot be relied upon for actual location due to the incomplete nature of the remaining historical drill core.

SIZE COMPARISON

Mineralised Carbonatites

Carbonatite Complex	Company	Location	Diameter (km)	Stage
Araxa	CBMM	Brazil	5	Producing
Carb Nb-REE	Cazaly Resources	Canada	>3	Exploration
Mount Weld	Lynas Rare Earths	Australia	3	Producing
Luni	WA1	Australia	Ellipse 3 x 1	Exploration
Nechalacho	Vital Metals	Canada	2	Producing
Kangankunde	Lindian Resources	Malawi	0.8	Development

Cautionary Statement
The table above is presented to illustrate only the size of carbonatite complexes around the world. It should not be considered a comparison of company or project, a number of the projects in the table above are in development or production. The Carb Carbonatite is in the early exploration stage and there is no certainty that further exploration work will result in determination of an economic mineral resource.
