

ÜNITH Launches New Investor Centre

Unith Ltd (ASX: UNT | FWB: CM3) (“ÜNITH” or the “Company”) is pleased to announce the launch of its new online Investor Centre, providing a centralised destination for current and prospective investors to access Company information and engage directly with management.

ÜNITH’s new Investor Centre consolidates key investor information into a single environment, powered by the Relait investor relations platform. At the centre of the experience is the Streaming Avatar ‘[Digital Scott](#)’, a multi-lingual Digital Human based on ÜNITH’s Executive Director, Scott Mison.

Investors can engage with [Digital Scott](#) at any time to:

- Ask questions about Company announcements and disclosures
- Access information through natural conversation rather than static documents
- Receive consistent responses aligned with public communications

The [Investor Centre](#) is accessible via the Investor Centre tab on the Company’s website and is designed as a one-stop location for ASX announcements, financial and corporate reports, links to the Company’s social media channels, videos, presentations and other multimedia content.

In addition, followers of ÜNITH are encouraged to ‘[Join](#)’ the [Investor Centre](#), enabling them to:

- Submit questions to management on specific announcements and articles
- Receive updates and notifications as new content is published
- If they are a registered shareholder, securely view details of their shareholdings via the integrated shareholder access functionality

Expanding Digital Humans across the Relait platform

The partnership with Relait, announced 30 January 2026 in the Quarterly Activities Report, will see ÜNITH’s Digital Human technology made available to Relait’s growing customer base. This will enable other ASX-listed companies using Relait, to offer shareholders a new, interactive way to engage with company information.

Relait provides the underlying investor relations infrastructure, consolidating registry data, market announcements, and engagement insights into a single intelligent system. The addition of Digital Humans gives companies a new interface for delivering that information in a way that feels more natural and accessible to investors.

**Relait's Chief Executive Officer, Martin McGinty, commented:**

"Relait is committed to a culture of innovation, pushing boundaries and testing new ideas that have the potential to give our customers an edge. Our partnership with UNITH demonstrates how AI can be applied responsibly to improve accessibility and engagement, without compromising accuracy or governance."

"There is often a question about whether Digital Humans de-personalise investor engagement. We believe the opposite is true. By enabling governed, disclosure-aligned avatars to handle common shareholder questions, investors receive faster access to information, while management teams regain valuable time that can be reinvested in deeper, more meaningful human-to-human shareholder relationships."

The Company encourages current and prospective investors to visit the [Investor Centre](#) via Unith's website and to register as followers to stay up to date with news and developments.

This announcement has been authorised for release by the Board of Directors.

About UNITH

Unith Ltd (ASX:UNT) is a technology company that specialises in AI-driven digital human and conversation design solutions. Its focus is the design, development, and deployment of interactive, artificial intelligence (AI)-powered, conversational agents that are realistic, multilingual and scalable. This technology, which can take the form of AI avatars, interacts in a lifelike manner and enhances business clients' customer engagement, education, and entertainment metrics. UNITH is now successfully implementing a strategy to monetise its proprietary AI and digital human capabilities.

UNITH also operates a growing business-to-consumer (B2C) subscription division, which leverages the value-add created by the company's digital human and conversation design solutions technology. This division, which utilises literally thousands of UNITH -created digital humans, generates recurring revenue from clients through subscription models for their services or platforms. Driven by individual business client's requirements, Unith's subscriptions arm can offer a range of services, including access to specific functionalities, tools, or content related to digital humans and AI technology. These subscription services help UNITH clients generate a steady income stream and develop long-lasting relationships with their customers.
