MC MINING LIMITED

DIRECTORS' REPORT FOR THE HALF-YEAR ENDED 31 DECEMBER 2025

The Directors of MC Mining Limited ("MC Mining" or "the Company") submit herewith the financial report of MC Mining and its subsidiaries (the Group) for the half-year ended 31 December 2025. All amounts are expressed in United States dollars ("USD") unless stated otherwise.

1. Directors

Non-Executive Directors

- Muhui (Chris) Huang
- Lanlan (Lily) Wang
- Dr. Huoxin (Hevin) Wang
- Dr. Steele West
- Mathews Senosi
- Bill Pavlovski
- Jianheng (Albert) Deng (Appointed 15 October 2025)
- Zhen (Brian) He (Resigned 15 October 2025)

Executive Director

- Yi (Christine) He – Managing Director & Chief Executive Officer (Appointed 1 October 2025)

2. Principal Activities

The Group is engaged in the mining, exploration, development, and future production of steelmaking coking coal and thermal coal in South Africa. Its key assets include:

- Uitkomst Colliery – operating metallurgical and thermal coal mine (84% owned)
- Makhado Project – hard coking and thermal coal project in development (67.3% owned)
- Vele Aluwani Colliery – semi-soft coking and thermal coal colliery with suspended operations pending the finalisation of the re-engineering business plan (100% owned)
- Greater Soutpansberg Projects (GSP) – exploration-stage coking and thermal coal projects comprising of the following three projects, Chapudi, Generaal, Mopane (74% owned)

3. Review of Operations

3.1 Uitkomst Colliery (Utrecht, KwaZulu-Natal)

Uitkomst recorded no fatalities during the half year (H1 FY2025: one fatality) and one LTI (H1 FY2025: two). Geological challenges, ageing equipment and distance to the coal face resulted in the 24% reduction in ROM production to 140,121 tonnes (H1 FY2025: 185,558 tonnes). Sales volumes declined by 28% to 87,447 tonnes (H1 FY2025: 121,793 tonnes).

Lower sales volumes, reduced thermal coal prices and the stronger Rand resulted in lower revenue of \$6.6 million (H1 FY2025: \$8.4 million), resulting in a gross loss of \$3.9 million and operating cash outflow of \$3.8 million (H1 FY2025: \$4.7 million) with a negative net working capital of \$0.4 million (FY2025: \$2.8 million) at the end of December 2025. Continued losses led to the Board's decision to suspend operations (hibernation) effective 1 March 2026.

During hibernation, the focus is on asset protection, regulatory compliance and maintaining future restart optionality.

3.2 Makhado Project (Soutpansberg, Limpopo)

The Project achieved 1,005 LTI-free days and zero environmental incidents.

Major achievements included:

- Advancing construction of the CHPP with hot commissioning targeted for April 2026.
- Over 1.3 million BCM of overburden removed.
- Continued progress on the 22kV, 14 km power line including transformer delivery.
- Completion of the Mutamba River access bridge.
-

Makhado is designed to produce ~800,000 tonnes of steelmaking HCC per annum over a 28 year LOM.

3.3 Vele Aluwani Colliery

The Vele operation recorded no lost time injuries (LTIs) during the period (H1 FY2025: nil).

Operations remained suspended while a re-engineered business plan and logistics solution are evaluated. The remaining finished goods stockpiles on site following the suspension of operations were successfully disposed of at a nominal value.

MC MINING LIMITED

DIRECTORS' REPORT FOR THE HALF-YEAR ENDED 31 DECEMBER 2025

3. Review of Operations (continued)

3.4 Greater Soutpansberg Projects (GSP)

The GSP recorded zero LTIs (H1 FY2025). Activities included prioritising tenements for future development and preparing for environmental and water licence applications expected to progress during H1 CY2026.

4. Corporate Developments

4.1 IDC Loan Settlement

The IDC (6.7% shareholder in Baobab) continued supporting Makhado. ZAR20 million (\$1.06 million) was repaid during the period, reducing borrowings.

4.2 Kinetic Development Group Subscription

A further \$22 million was received under the Share Subscription Agreement.

5. Financial Review

The Group recorded a loss after tax attributable to owners of \$8.137 million (H1 FY2025: \$8.317 million).

Key financial metrics:

- Revenue: \$6.581 million (FY2025 H1: \$8.384 million)
- Cost of sales: \$11.051 million (FY2025 H1: \$12.543 million)
- Gross loss: \$4.470 million (FY2025 H1: gross loss of \$4.159 million)
- Other administrative expenses: \$4.536 million (FY2025 H1: \$4.392 million)
- Net FX gain: \$232,000 (FY2025 H1: loss of \$744,751)
- Cash and cash equivalents: \$2.920 million (30 June 2025: \$7.388 million)

Cash declines reflect Makhado capital investment and Uitkomst operating losses.

6. Market Outlook

6.1 Hard Coking Coal Market

HCC markets remain supported by strong Asian steel demand, climate driven supply disruptions in Queensland, and limited new global supply. Makhado's HCC product aligns well with potential domestic steel requirements and export channels.

6.2 Thermal Coal Market

API4 prices softened by 11.34% due to increased supply, seasonal demand reductions, and renewable penetration.

6.3 Market Implications for MC Mining

Makhado's commissioning is expected to reposition the Group as a primary South African producer of premium HCC.

7. Key Risks and Mitigation Measures

7.1 Funding and Liquidity Risk

The Group remains dependent on the equity tranches, debt and BOOT funding. Mitigation includes ongoing KDG engagement, IDC alignment, tight cost control, and evaluation of alternative funding structures.

7.2 Operational and Project Execution Risk

Construction and commissioning delays are mitigated through enhanced project oversight, strong contractor presence and logistics optimisation via reviewing alternatives available when Makhado successfully commissions.

7.3 Commodity Price Risk

Sensitivity to coal price volatility is mitigated through increased focus on premium HCC and active monitoring of sales alternatives/options.

7.4 Regulatory and Permitting Risk

Mitigation includes proactive regulatory engagement, strong compliance performance and specialist advisory support. The Department of Mineral and Petroleum Resources conducted a comprehensive, multi-disciplinary onsite audit at Makhado during the reporting period covering health and safety, environmental, social and labour planning, and regulatory compliance.

7.5 Logistics and Infrastructure Risk

Mitigation includes flexible transport planning and continued engagement with logistics partners.

8. Authorised and issued share capital

691,571,278 issued shares at 31 December 2025. Share application money of \$7 million received pending allotment. The holders of ordinary shares are entitled to one vote per share and to receive dividends when declared.

No dividends were declared.

9. Going Concern

Attention is drawn to the disclosure in the interim financial statements on the going concern assumption (refer note 2), noting that there is a material uncertainty that may cast significant doubt on the Group's ability to continue as a going concern and, therefore, that the entity may be unable to realise its assets and discharge its liabilities in the normal course of business.

The directors are satisfied however, at the date of signing the interim financial report, that there are reasonable to strong grounds to believe that the Group will be able to continue to meet its debts as and when they fall due and that it is appropriate for the financial statements to be prepared on a going concern basis. The directors have based this on a number of assumptions which are set out in detail in note 2 to the interim financial report. In order to meet its working capital requirements, the Group has made significant progress in the first half of FY2026 to remove this material uncertainty through the following initiatives:

- Completed the new equity raise for cash via the Kinetic Development Group Limited subscription;
- Successively extended the loan repayments due to the Industrial Development Corporation of South Africa Limited; and
- Progressed the build, own, operate, transfer (BOOT) funding arrangement.

MC MINING LIMITED
DIRECTORS' REPORT FOR THE HALF-YEAR ENDED 31 DECEMBER 2025

10. Events After Reporting Date

Subsequent to the reporting date, on 2 February 2026, the board of directors approved the temporary suspension of mining and processing operations at Uitkomst Colliery, with an initial intended effective date of 1 March 2026, subject to completion of the required statutory, labour and regulatory processes. These processes are ongoing at the date of this report.

The decision follows continued operational underperformance and cash losses experienced at the operation. The suspension is intended to be a care and maintenance measure and does not represent a permanent closure of the mine, a relinquishment of the mining right, nor a decision to place the operation into liquidation or business rescue.

During the hibernation period, activities will be undertaken to secure and preserve assets, maintain environmental and social compliance and protect the value of the operation.

Subsequent to the reporting date, the Company received \$13 million in respect of share subscriptions for shares that had not yet been formally issued as at the date of approval of these financial statements. The amount will be presented within equity as share application money pending allotment until the shares are formally issued.

Kinetic Development Group Limited (Kinetic) made a payment of \$3 million on the 5th January 2026 for the purchase of MC Mining shares, as part of the Share Subscription Agreement. The \$3 million payment relates to the sixth Second Closing as per the Share Subscription Agreement. The \$3 million payment in January 2026 together with the payment totalling \$7 million that were made by Kinetic between 1 October 2025 and 31 December 2025, recognised as share application money as at 31 December 2025, completes the sixth Second Closing instalment. MC Mining issued 47,879,095 shares to Kinetic on 9 January 2026. The issue of shares to Kinetic on the 9th of January 2026 increased Kinetic's shareholding in MC Mining to 44.01%.

Kinetic made payments totalling \$10 million between the 6th of January 2026 and the 27th of February 2026 for the purchase of MC Mining shares, as part of the Share Subscription Agreement. The \$10 million payments relates to the seventh Second Closing as per the Share Subscription Agreement. MC Mining issued 47,879,095 shares to Kinetic on 12 March 2026. The issue of shares to Kinetic on the 12th of March 2026 increased Kinetic's shareholding in MC Mining to 47.42%.

Other than the above, no matters or circumstances have arisen since the end of the financial year which significantly affected or could significantly affect the operations of the Group, the results of those operations or the state of affairs of the Group in future financial years.

11. Rounding

All amounts rounded off under ASIC Instrument 2016/191 to the nearest thousand dollars, unless otherwise indicated.

12. Auditor's Independence Declaration

The auditor's independence declaration is included on page 24 of the half-year report.

NOTES TO THE CONDENSED CONSOLIDATED HALF-YEAR REPORT FOR THE HALF-YEAR ENDED 31 DECEMBER 2025

1. Significant Accounting Policies

Statement of compliance

The half-year financial report is a general purpose financial report prepared in accordance with the *Corporations Act 2001* and AASB 134 *Interim Financial Reporting*. Compliance with AASB 134 ensures compliance with International Financial Reporting Standard IAS 34 '*Interim Financial Reporting*'. The half-year report does not include notes of the type normally included in an annual financial report and should be read in conjunction with the most recent annual financial report.

Basis of preparation

The condensed consolidated financial statements have been prepared on the basis of historical cost, except for the revaluation of financial instruments and assets held for sale. Cost is based on the fair values of the consideration given in exchange for assets.

All amounts are presented in United States dollars, unless otherwise noted.

The Company is of a kind referred to in ASIC Legislative Instrument 2016/191, relating to the 'rounding off' of amounts in the financial statement. Amounts in the directors' report and the half-year financial report have been rounded off in accordance with the instrument to the nearest thousand dollars, or in certain cases, to the nearest dollar.

The accounting policies and methods of computation adopted in the preparation of the half-year financial report are consistent with those adopted and disclosed in the Company's 2025 annual financial report for the financial year ended 30 June 2025, except for the impact of the Standards and Interpretations described below. These accounting policies are consistent with the Australian Accounting Standards and with IFRS® Accounting Standards.

Where applicable, certain comparatives have been adjusted to conform with current year presentation.

The Company has adopted all of the new and revised Standards and Interpretations issued by the Australian Accounting Standards Board (the **AASB**) that are relevant to their operations and effective for the current reporting period.

2. Going Concern

The Group incurred a net loss after tax of \$8.4 million for the half year ended 31 December 2025 (31 December 2024: loss \$8.4 million). Net cash used in operating activities was \$6.5 million (31 December 2024: \$7.7 million). At 31 December 2025, the Group had current assets of \$5.6 million and current liabilities of \$22.9 million (net current liabilities \$17.3 million). Cash and cash equivalents were \$2.9 million, with a bank overdraft of \$1.3 million recognised within current liabilities.

Subsequent to period end, on 2 February 2026, the Board approved the temporary suspension (hibernation) of mining and processing operations at Uitkomst Colliery with an initial intended effective date of 1 March 2026, subject to completion of statutory, labour and regulatory processes. The suspension is intended to stem ongoing operational cash losses and does not represent a permanent closure or a decision to place the operation into liquidation or business rescue. These processes are ongoing at the date of this report.

During the half year, the Group continued to progress its funding plan, including receipts under the Kinetic Development Group Limited share subscription (cash received \$22.0 million in the period, with \$7.0 million recorded as share application money pending allotment). The Group also continued to implement the IDC Settlement Agreement (March 2025) in relation to the Makhado Project funding, under which no further interest accrues and repayments of the capital balance (outstanding \$10.9 million at 31 December 2025) occur under a programme extending to March 2026, subject to the fulfilment of conditions precedent.

The Directors have prepared cash flow forecasts for the 12-month period from the date of this report to March 2027 which incorporate the expected timing of equity subscriptions, IDC settlement, the planned commissioning and ramp up of Makhado, and the effect of Uitkomst hibernation, other cost measures and other debt and equity raising. These forecasts indicate that, assuming the timely completion of the funding initiatives and commissioning milestones described above, the Group will have sufficient liquidity to meet its obligations as they fall due for a period of at least twelve months from the date of this report.

MC MINING LIMITED
NOTES TO THE CONDENSED CONSOLIDATED HALF-YEAR REPORT
FOR THE HALF-YEAR ENDED 31 DECEMBER 2025

2. Going Concern (continued)

Material uncertainty related to going concern

The successful outcome and timing of the funding initiatives and project milestones described above are not wholly within the Group's control. As such, material uncertainty exists that may cast significant doubt on the Group's ability to continue as a going concern, and therefore, the Group may be unable to realise its assets and discharge its liabilities in the ordinary course of business. Notwithstanding this material uncertainty, the Directors believe that the use of the going concern basis of accounting remains appropriate. These financial statements do not include any adjustments that would be necessary should the Group be unable to continue as a going concern.

3. Segment Information

AASB 8 requires operating segments to be identified on the basis of internal reports about components of the Group that are regularly reviewed by the chief operating decision maker in order to allocate resources to the segment and to assess its performance.

Information reported to the Group's Managing Director and CEO for the purposes of resource allocation and assessment of performance is more specifically focused on the stage within the mining pipeline that the operation finds itself in.

The Group's reportable segments under AASB 8 are therefore as follows:

- Exploration
- Development
- Mining

The Exploration segment is involved in the search for resources suitable for commercial exploitation, and the determination of the technical feasibility and commercial viability of resources. As of 31 December 2025, projects within this reportable segment include three exploration stage coking and thermal coal complexes, namely the Chapudi Complex (which comprises the Chapudi project, the Chapudi West project and the Wildebeesthoek project), Generaal (which comprises the Generaal Project and the Mount Stuart Project) and Mopane (which comprises the Voorburg Project and the Jutland Project).

The Makhado Project was classified as in the Development segment. This segment is engaged in establishing access to and commissioning facilities to extract, treat and transport production from the mineral reserve, and other preparations for commercial production.

The Mining segment is involved in day to day activities of obtaining a saleable product from the mineral reserve on a commercial scale and consists of Uitkomst Colliery and the Vele Aluwani Colliery.

The Group evaluates performance on the basis of segment profitability, which represents net operating (loss)/profit earned by each reportable segment.

NOTES TO THE CONDENSED CONSOLIDATED HALF-YEAR REPORT
FOR THE HALF-YEAR ENDED 31 DECEMBER 2025

3. Segment Information (continued)

Each reportable segment is managed separately because, amongst other things, each reportable segment has substantially different risks.

The Group accounts for intersegment sales and transfers as if the sales or transfers were to third parties, i.e. at current market prices.

The Group's reportable segments focus on the stage of project development and the product offerings of coal mines in production.

The following is an analysis of the Group's results by reportable operating segment for the period under review:

For the six months ended 31 December 2025

	\$'000	\$'000	\$'000	\$'000

12.2 Diluted loss per share

Diluted loss per share is calculated by dividing the loss attributable to owners of the Company by the weighted average number of ordinary shares outstanding during the year plus the weighted average number of dilutive ordinary share that would be issued on conversion of all the dilutive potential ordinary shares into ordinary shares.

As the Company is in a loss position, the diluted potential ordinary shares impact is anti-dilutive.

12.3 Headline loss per share (in line with JSE listing requirements)

The calculation of headline loss per share at 31 December 2025 was based on the headline loss attributable to ordinary equity holders of the Company of \$8,137,000 (FY 2025 H1: \$8,317,000) and a weighted average number of ordinary shares outstanding during the period ended 31 December 2025 of 667,111,303 (FY 2025 H1: 454,396,618).

The adjustments made to arrive at the headline loss are as follows:

	31 Dec 2025	31 Dec 2024
	\$'000	\$'000
Loss after tax for the period attributable to ordinary shareholders	(8,137)	(8,317)

Industrial Development Corporation of South Africa Limited

The original loan facilities granted to Baobab under agreements concluded with the IDC in or around May 2017 and August 2020 were subsequently superseded by a Settlement Agreement entered into in March 2025. In terms of the Settlement Agreement, no further interest will accrue on the IDC loans. Baobab is currently repaying the capital portion of these loans in accordance with a repayment programme that extends to March 2026, pending the fulfilment of the conditions precedent set out in the Settlement Agreement. The remaining balance at the end of March 2026 will be converted into equity as stipulated in the Settlement Agreement. As at 31 December 2025, the outstanding capital and interest totalled \$10.8 million (ZAR 180 million).

Fully paid ordinary shares carry one vote per share and carry the right to dividends.

Options

No options were issued during the period.

Performance Rights

No performance rights were issued during the period.

Share application money received

Share application money pending allotment represents an amount of US\$7,000,000 received for 33,515,366 shares that had not yet been formally issued as at the reporting date. This amount is presented within equity, as the company has no obligation to refund it.

22. Contingencies and Commitments

Contingent liabilities

The Group has no significant contingent liabilities at reporting date.

Commitments

As at 31 December 2025, the Group had a \$1.2 million commitment which relate to its social and labour plan at Uitkomst Colliery. In addition to the amount provided in the consolidated statement of financial position.

In addition to the commitments of the parent entity, subsidiary companies have typical financial commitments associated with their mining rights granted by the South African DMRE.

23. Events subsequent to reporting

Subsequent to the reporting date, on 2 February 2026, the board of directors approved the temporary suspension of mining and processing operations at Uitkomst Colliery, with an initial intended effective date of 1 March 2026, subject to completion of the required statutory, labour and regulatory processes. These processes are ongoing at the date of this report.

The decision follows continued operational underperformance and cash losses experienced at the operation. The suspension is intended to be a care and maintenance measure and does not represent a permanent closure of the mine, a relinquishment of the mining right, nor a decision to place the operation into liquidation or business rescue.

During the hibernation period, activities will be undertaken to secure and preserve assets, maintain environmental and social compliance and protect the value of the operation.

MC MINING LIMITED
NOTES TO THE CONDENSED CONSOLIDATED HALF-YEAR REPORT
FOR THE HALF-YEAR ENDED 31 DECEMBER 2025

23. Events subsequent to reporting (continued)

Subsequent to the reporting date, the Company received \$13 million in respect of share subscriptions for shares that had not yet been formally issued as at the date of approval of these financial statements. The amount will be presented within equity as share application money pending allotment until the shares are formally issued.

Kinetic Development Group Limited (Kinetic) made a payment of \$3 million on the 5th January 2026 for the purchase of MC Mining shares, as part of the Share Subscription Agreement. The \$3 million payment relates to the sixth Second Closing as per the Share Subscription Agreement. The \$3 million payment in January 2026 together with the payment totalling \$7 million that were made by Kinetic between 1 October 2025 and 31 December 2025, recognised as share application money as at 31 December 2025, completes the sixth Second Closing instalment. MC Mining issued 47,879,095 shares to Kinetic on 9 January 2026. The issue of shares to Kinetic on the 9th of January 2026 increased Kinetic's shareholding in MC Mining to 44.01%.

Kinetic made payments totalling \$10 million between the 6th of January 2026 and the 27th of February 2026 for the purchase of MC Mining shares, as part of the Share Subscription Agreement. The \$10 million payments relates to the seventh Second Closing as per the Share Subscription Agreement. MC Mining issued 47,879,095 shares to Kinetic on 12 March 2026. The issue of shares to Kinetic on the 12th of March 2026 increased Kinetic's shareholding in MC Mining to 47.42%.

Other than the above, no matters or circumstances have arisen since the end of the financial year which significantly affected or could significantly affect the operations of the Group, the results of those operations or the state of affairs of the Group in future financial years.

24. Key management personnel

Remuneration arrangements of key management personnel are disclosed in the annual financial report.

25. Financial Instruments

Fair value of financial assets and liabilities

The fair value of a financial asset or a financial liability is the amount at which the asset could be exchanged or liability settled in a current transaction between willing parties in an arm's length transaction. The fair values of the Group's financial assets and liabilities approximate their carrying values, as a result of their short maturity or because they carry floating rates of interest.

All financial assets and liabilities recorded in the consolidated financial statements approximate their respective fair values.

The following table provides an analysis of financial instruments that are measured subsequent to initial recognition at fair value, grouped into Level 1 to 3, based on the degree to which the fair value is observable.

Level 1 fair value measurements are those derived from quoted prices in active markets for identical assets or liabilities. The balances classed here are financial assets comprising deposits and listed securities.

Level 2 fair value measurements are those derived from inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. The financial assets classed as Level 2 comprise of investments with investment firms. These investments serve as collateral for rehabilitation guarantees. The third party utilised a market approach with level 2 inputs in determining the value. The inputs used to determine fair values of listed or quoted investments are based on the quoted market price at reporting period date.

Level 3 fair value measurements are those derived from valuation techniques that include inputs for the asset or liability that are not based on observable market data.

There were no assets reclassified into/out of fair value through profit and loss (FVTPL) during the period nor were any assets transferred between levels.

Auditor's Independence Declaration to the Directors of MC Mining Limited

As lead auditor for the review of the half-year financial report of MC Mining Limited for the half-year ended 31 December 2025, I declare to the best of my knowledge and belief, there have been:

- a. No contraventions of the auditor independence requirements of the *Corporations Act 2001* in relation to the review;
- b. No contraventions of any applicable code of professional conduct in relation to the review; and
- c. No non-audit services provided that contravene any applicable code of professional conduct in relation to the review.

This declaration is in respect of MC Mining Limited and the entities it controlled during the half-year ended 31 December 2025.

Independent Auditor's Review Report to the Members of MC Mining Limited

Conclusion

We have reviewed the accompanying half-year financial report of MC Mining Limited (the "Company") and its controlled entities (collectively the "Group"), which comprises the consolidated statement of financial position as at 31 December 2025, the consolidated statement of profit or loss and other comprehensive income, consolidated statement of changes in equity and consolidated statement of cash flows for the half-year ended on that date, explanatory notes and the directors' declaration.

Based on our review, which is not an audit, we have not become aware of any matter that makes us believe that the half-year financial report of the Group does not comply with the *Corporations Act 2001*, including:

- (i) Giving a true and fair view of the consolidated financial position of the Group as at 31 December 2025 and of its consolidated financial performance for the half-year ended on that date; and
- (ii) Complying with Accounting Standard AASB 134 *Interim Financial Reporting* and the *Corporations Regulations 2001*.

Basis for conclusion

We conducted our review in accordance with *ASRE 2410 Review of a Financial Report Performed by the Independent Auditor of the Entity (ASRE 2410)*. Our responsibilities are further described in the Auditor's responsibilities for the review of the half-year financial report section of our report.

We are independent of the Group in accordance with the auditor independence requirements of the *Corporations Act 2001* and the ethical requirements of the Accounting Professional & Ethical Standards Board's *APES 110 Code of Ethics for Professional Accountants* (including Independence Standards) (the Code) that are relevant to our audit of the annual financial report in Australia. We have also fulfilled our other ethical responsibilities in accordance with the Code.

Material uncertainty related to going concern

We draw attention to note 2 in the half-year financial report, which describes recent operating losses and the financial position of the Group. As stated in note 2, these events or conditions, along with other matters as set out in note 2, indicate that a material uncertainty exists that may cast significant doubt on the Group's ability to continue as a going concern. Our review conclusion is not modified in respect of this matter.

Directors' responsibility for the half-year financial report

The directors of the Company are responsible for the preparation of the half-year financial report that gives a true and fair view in accordance with Australian Accounting Standards and the *Corporations Act 2001* and for such internal control as the directors' determine is necessary to enable the presentation of the half-year financial report that gives a true and fair view and is free from material misstatement, whether due to fraud or error.

Auditor's responsibilities for the review of the half-year financial report

Our responsibility is to express a conclusion on the half-year financial report based on our review. *ASRE 2410* requires us to conclude whether we have become aware of any matter that makes us believe that the half-year financial report is not in accordance with the *Corporations Act 2001* including giving a true and fair view of the Group's financial position as at 31 December 2025 and of its performance for the half-year ended on that date, and complying with Accounting Standard *AASB 134 Interim Financial Reporting and the Corporations Regulations 2001*.

A review of a half-year financial report consists of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Australian Auditing Standards and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.
