## About Chariot

Chariot Resources Limited is a mineral exploration company focused on discovering and developing high-grade and near surface lithium opportunities focused principally in the United States and Nigeria. In addition to the recently announced acquisition of a Nigerian lithium portfolio which has yet to close, Chariot has twelve (12) lithium projects, including two core projects in the United States (the “**Core Projects**”) and a number of exploration pipeline projects which Chariot majority owns and operates.

The Core Projects include Chariot’s Black Mountain Project (which is prospective for hard rock lithium) in Wyoming, USA and the Resurgent Project (which is prospective for claystone lithium) in Nevada and Oregon, USA. Initial survey results from the Core Projects indicate high-grade lithium mineralisation at surface.

The Nigerian portfolio of hard-rock lithium assets consists of four project clusters (Fonlo, Gbugbu, Iganna, and Saki) in the Oyo and Kwara states which cover approximately 254 square kilometers and are comprised of 8 exploration licences and 2 small-scale mining leases. These assets represent one of the largest portfolios of lithium assets in the country and have a history of significant artisanal lithium mining. Chariot anticipates completing the acquisition of the Nigerian portfolio in the first quarter of this calendar year.

Chariot also holds an interest in two hard rock lithium exploration pipeline projects located in Wyoming, USA, the Copper Mountain Project and the Tin Cup Project.

Chariot holds an interest in a hard rock lithium project in Zimbabwe. The Zimbabwe project licences are in the process of being relinquished.

In addition, Chariot holds a portfolio interest in certain properties prospective for claystone hosted lithium located in the State of Nevada in the United States through its interest in Mustang Lithium LLC.
