# DRILL RIG MOBILISING FOR MAIDEN PROGRAM AT BARLEE

---

## HIGHLIGHTS

### Barlee Gold Project (100% DKM)

- Maiden aircore and RC drill program to commence at the Barlee Project
- Drilling to test six highly rated gold in soil targets identified in 2025\*
- Program to consist of approximately 4,000m of aircore and 1,500m of RC drilling
- Camp setup, track and drill site clearance underway
- Drill rig mobilising to site.
- Drill targets confirmed by external consultant with additional conceptual targets generated.

---

**Duketon Mining Limited (Company or DKM)** is pleased to provide an update on the Company's gold exploration activities at the Barlee Project (**Project**), 200km north of Southern Cross, Western Australia.

**Managing Director Stuart Fogarty** said *"This is an exciting exploration opportunity for the Company. We have undertaken considerable work in consolidating the Barlee package and generating foundational geological datasets to identify multiple high quality targets which have never been drilled previously. These targets are of significant scale and amplitude, which makes this drill program even more compelling."*

Work has been progressing towards drilling over the previous five month period with a number of key milestones being achieved that include;

- a heritage clearance survey with the Marlinyu Ghoorlie Native Title Group;
- a detailed aeromagnetic survey flown over a key area of the Project;
- project review including structural interpretation and targeting; and

**ASX Announcement  
26<sup>th</sup> March 2026**

- camp setup, track and drill site clearance have commenced in preparation for drilling (Figure 1 and 2). Drilling will commence in the next week with approximately 4,000m of aircore and 1,500m of RC planned.

Drilling is planned at six highly rated prospects identified in geochemical sampling program in 2025 (Figure 3 and Figure 4, ASX Announcement 8 October 2025); including:

- **Astro Prospect** - 1,800m (before going undercover) x 800m anomaly with maximum gold of 204ppb
- **Scooby Prospect** - 900m x 450m anomaly with maximum gold of 57ppb
- **Tiger Prospect** - 1,200m x 700m anomaly with maximum gold of 230ppb
- **Gromit Prospect** - 1,000m x 450m anomaly, with a maximum gold of 235ppb (highest gold value of the program)
- **Odie Prospect** - 350m x 250m anomaly with a maximum gold of 37ppb
- **Lost Bolt Prospect** - 1,700m x 1,000m anomaly with maximum gold of 211ppb

The Company will update the market when drilling commences.

**Competent Person Statement:**

The information in this release that relates to exploration results is based on historical and current information compiled by Ms Kirsty Culver, Member of the Australian Institute of Geoscientists (AIG) and an employee of Duketon Mining Limited. Ms Culver has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity that is being undertaken to qualify as a competent person as defined in the JORC Code 2012. Ms Culver consents to the inclusion in the report of the matters based on the information in the form and context in which it appears.

**Validity of Referenced Results:**

The information in this report that references previously reported exploration results have been extracted from the Company's ASX market announcements released on the date noted in the body of the text where that reference appears. The previous market announcements are available to view on the Company's website or on the ASX website ([www.asx.com.au](http://www.asx.com.au)). The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market. The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcements.
