## Titomic Receives \$1.7 Million Purchase Order from Royal NLR for Cold Spray Systems

Order supports low, medium and high-pressure cold spray capability for aerospace and defense research, repair, coating and additive manufacturing application development in the Netherlands

**Heerenveen, the Netherlands – Titomic Limited (ASX: TTT)**, a global advanced manufacturing company serving the U.S. and allied defense industrial base, is pleased to announce it has received a purchase order valued at EUR 1.02 million (AUD 1.71 million) from Royal NLR (Koninklijk Nederlands Lucht- en Ruimtevaartcentrum), the Netherlands' national aerospace research centre, for Titomic cold spray equipment, including low, medium and high-pressure capability, to support aerospace and defense research, sustainment, repair, coating and additive manufacturing application development in the Netherlands.

Royal NLR is a leading independent aerospace research organisation in the Netherlands, working at the intersection of science, industry and government. Founded in 1919, NLR supports both civil and military aerospace through applied research, technology development and testing aimed at making aviation and space operations safer, more sustainable and more effective.

Bert Thuis, Vice-President Aerospace Vehicles of NLR stated "NLR sees strong potential for Titomic Kinetic Fusion™ technology in aerospace and defense applications, particularly in repair, coating and additive manufacturing. The addition of this capability will broaden our cold spray research and application development activities, and we look forward to working with Titomic in Heerenveen to advance these efforts in the Netherlands."

"We are proud to support NLR, one of the Netherlands' premier aerospace research organisations, with Titomic cold spray capability. This order is an important validation of our technology for aerospace and defense applications, including repair, sustainment, anti-corrosion and additive manufacturing, and further strengthens Titomic's strategic position in the Netherlands and broader European market." said Jim Simpson, CEO and Managing Director of Titomic.

The order underscores Titomic's commitment to supporting leading research organisations and industrial partners as they develop and deploy advanced cold spray applications for aerospace and defense. Titomic looks forward to working with NLR to expand the use of cold spray for high-value repair, coating, sustainment and additive manufacturing applications.

This announcement has been authorized for release by Titomic's Board of Directors.

## **ABOUT TITOMIC LIMITED**

Titomic Limited (ASX: TTT) is a leading Advanced manufacturing company with global operations specializing in large integrated solutions for industrial- scale metal additive manufacturing, coating, and repairs using its patented kinetic fusion cold spray (Titomic Kinetic Fusion™) technology. Titomic Kinetic Fusion™ cold spray solutions provide OEM production and R&D services to the global Aerospace, Defense, Shipbuilding, Oil & Gas, Mining and Automotive industries. Titomic also offers global sales and support for all its Titomic Kinetic Fusion™ cold spray AM activities from its Huntsville, Alabama Global Headquarters, as well as through local presence in the Australia and Europe. Titomic delivers competitive advantages in metal additive manufacturing at every stage in the product value chain. For more information, please visit [www.titomic.com](http://www.titomic.com).

## **FORWARD LOOKING STATEMENTS**

Certain statements made in this release are forward-looking statements and are based on Titomic's current expectations, estimates and projections. Words such as "anticipates", "expects", "intends", "plans", "believes", "seeks", "estimates", "guidance" and similar expressions are intended to identify forward-looking statements. Although Titomic believes the forward-looking statements are based on reasonable assumptions, they are subject to certain risks and uncertainties, some of which are beyond Titomic's control, including those risks or uncertainties inherent in the process of both developing and commercializing technology. As a result, actual results could materially differ from those expressed or forecasted in the forward-looking statements. The forward-looking statements made in this release relate only to events as of the date on which the statements are made. Titomic will not undertake any obligation to release publicly any revisions or updates to these forward-looking statements to reflect events, circumstances or unanticipated events occurring after the date of this release except as required by law or by any appropriate regulatory authority.
