Chairman's Letter

Dear Shareholders,

On behalf of the Board, I am pleased to present the Annual Report for Minbos Resources Limited (ASX:MMB) for the financial year.

This past year has been one of transition for Minbos. The Company has continued its evolution from a developer of mineral assets into a fully integrated nutrient supply business, focused on delivering fertiliser for both export markets and to support agricultural productivity and food security in Angola and the broader Congo Basin.

At the centre of this transformation remains the Cabinda Phosphate Project, which has advanced significantly during the year. Construction activities have continued at the Subantando fertiliser plant site, alongside ongoing development of supporting logistics and export infrastructure. These efforts position the Company to move toward initial production and revenue generation, with the strategic option to commence early sales of phosphate rock ahead of full plant commissioning.

A key focus during the year has been securing and optimising project funding. Importantly, the Board and management have taken proactive steps to optimise capital efficiency and accelerate time to market. During the year, the Company refined its development plan to reduce upfront capital requirements and enable earlier cash flow generation, demonstrating a disciplined and pragmatic approach to project delivery.

The year has also involved important corporate developments, including capital raisings, shareholder engagement initiatives and changes within the leadership team. These steps, while sometimes challenging, are part of ensuring that the Company is appropriately structured and resourced to deliver on its next phase of growth.

From a broader perspective, the strategic rationale underpinning Minbos has never been clearer. Global demand for fertilisers remains strong, while Africa continues to face a structural undersupply of locally produced nutrients. Minbos is uniquely positioned to address this gap—supporting domestic agriculture, reducing import dependence and contributing to long-term food security outcomes.

Looking ahead, the Company's priorities are clear:

- Finalising funding and progressing toward first production at Cabinda;
- Continuing construction and operational readiness of the fertiliser plant;
- Advancing commercial partnerships and offtake opportunities;
- Delivering on its vision of becoming a leading nutrient supplier in Sub-Saharan Africa.

On behalf of the Board, I would like to thank our shareholders for their continued support, as well as our management team, employees, partners and stakeholders in Angola for their commitment and resilience during a pivotal period for the Company.

We believe Minbos is now positioned at an inflection point, with the potential to transition from development into production and cash flow, and we look forward to delivering on this opportunity in the year ahead.

Yours Faithfully,

Mr Paul McKenzie
Non-Executive Chairman

REVIEW OF OPERATIONS (1st Jan 2025 – 31st December 2025)

Cabinda Phosphate Project

US\$2.43M Tranche 2 Funds Received from FSDEA and 2025 Field Trials

In early March, Minbos announced receipt of US\$2.43 million (Tranche 2) from the Angolan Sovereign Wealth Fund (FSDEA) to support continued construction of the Cabinda Phosphate Project, with a final tranche of US\$1.17 million pending completion of standard conditions. The Company also reported strong agronomic results from 2025 field trials, with its PRIMEIRO phosphate fertiliser delivering yield increases of up to 80% in phosphorus-deficient soils. These results reinforced the product's strong market fit and its role as a foundational nutrient input in Angola's agricultural system.

Cabinda Phosphate Finance and Sales Update

During May, The Company provided a comprehensive update on financing and commercial strategy, highlighting growing sales interest across both domestic and export markets, with indicative demand covering a three-year period. The Company progressed a US\$12M Banco BAI loan facility (subject to restructuring its Angolan subsidiary into a public company), alongside continued advancement of a US\$14M IDC facility and confirmation that the FSDEA equity funding had been fully received. The Company also outlined a shift toward a diversified customer base rather than a single offtake partner, strengthening both financing discussions and long-term market positioning.

Field Trial Progress & Fertilizer Strategy

In June, the Company updated shareholders on the commercialisation and product strategy for Minbos' fertiliser portfolio. Extensive field trials confirmed strong yield responses from PRIMEIRO, while new PRIMEIRO PLUS+ blended products (NPKS) demonstrated promising results across multiple application methods. The Company outlined a broader strategy to develop a tailored fertiliser suite for Angolan soils, supported by ongoing agronomy trials and partnerships with farmers and distributors, positioning Minbos as a long-term participant in the domestic agricultural value chain.

Concrete Slab Poured at Subantando Fertilizer Plant

In early August, Minbos reported a key construction milestone with the successful pouring of the main structural concrete slab for the Subantando plant. Civil works is phase 1 of the construction and phase 2, the structural, mechanical, electrical and instrumentation, shall commence once the Company has secured debt financing.

Minbos and Fertiafrica Partnership for Granulation in Benguela

Also in August, the Company entered into a Heads of Agreement with Fertiafrica for exclusive fertiliser granulation services in Benguela, establishing Angola's first integrated granulation hub. The partnership enables conversion of Minbos' phosphate rock into granulated NPK fertilisers, enhancing local value addition and market accessibility. The agreement also includes collaboration on product development, logistics and branding ("Primeiro Inside"), and represents a key step toward building a domestic fertiliser supply chain.

Directors' Report

Capanda Green Ammonia Project

Binding Agreement with TalusAg for Green Ammonia Project

In August, Minbos signed a binding agreement with Talus Renewables to jointly develop the Capanda Green Ammonia Project. The project leverages Angola's low-cost hydropower to produce export-grade green ammonia, targeting European and regional markets. Structured as a potential JV (subject to successful bid outcomes), the project integrates with Minbos' phosphate operations to support future NPK fertiliser production, while also opening exposure to the global energy transition and low-carbon commodities markets. First production is contemplated for Q1 2028.

The Company confirms that it is not aware of any new information or data that materially affects the Cacata Mineral Resources and Cacata Ore Reserves included in this annual report, and, that all material assumptions and technical parameters underpinning these estimates (ASX announcements dated 23 November 2021 and 17 October 2022) continue to apply and have not materially changed. Minbos confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from that announcement.

Forward looking Statements

Statements contained in this release, particularly those regarding possible or assumed future performance, revenue, costs, dividends, production levels or rates, prices or potential growth of Minbos Resources Limited, are, or may be, forward looking statements. Such statements relate to future events and expectations and, as such, involve known and unknown risks and uncertainties. Actual results and developments may differ materially from those expressed or implied by these forward-looking statements depending on a variety of factors.

Directors' Report

Competent Person Statement

The Competent Person with responsibility for the total Mineral Resources of this report is Mrs Kathleen Body, Pr. Sci. Nat, who is registered as a Professional Natural Scientist with the South African Council for Natural Scientific Professions ("SACNASP"). She is the Director and a Principal Consultant of Red Bush Analytics. Mrs Body was a full-time employee of Coffey Mining at the time the original Mineral Resource estimation was completed in 2013 and an Associate Resource Geologist with SRK Consulting (UK) Limited at the time the 31 October 2021. Mrs Body has 29 years' experience in the mining industry and has sufficient experience which is relevant to the style of mineralization and type of deposit under consideration and to the activity which she is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Mineral Reserves. Kathleen Body consents to the inclusion in the report of the matters based on her information in the form and context in which it appears.

The scientific and technical information in this financial report relates to Ore Reserves estimates for the Project is based on information compiled by Mr Ross Cheyne, a Principal Consultant of Orelogy Consulting Pty Ltd. Mr Cheyne is a Fellow of the Australasian Institute of Mining and Metallurgy (AusIMM). Mr Cheyne has sufficient experience that is relevant to the style of mineralization and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. Mr Cheyne consents to the inclusion in the announcement of the matters related to the Ore Reserve estimate in the form and context in which it appears.

7. Review of Business Risks

There are specific risks associated with the activities of the Group and general risks which are largely beyond the control of the Group and the Directors. The risks identified below, or other risk factors, may have a material impact on the future financial performance of the Group and the market price of the Company's shares.

The Board reviews the risks of the Group and the action plans to address these risks on a regular basis.

a) Operating Risks

The operations of the Company may be affected by various factors, including failure to locate or identify mineral deposits, failure to achieve predicted grades in exploration and mining, operational and technical difficulties encountered in mining. In addition, difficulties in commissioning and operating plant and equipment include mechanical failure or plant breakdown, unanticipated metallurgical problems which may affect extraction costs, adverse weather conditions, industrial and environmental accidents, health incidents including pandemic diseases like COVID-19 (coronavirus), industrial disputes and unexpected shortages or increases in the costs of consumables, spare parts, plant and equipment.

b) Market demand risk

The Company is targeting both the Angolan domestic market and an international export market for its Angolan phosphate fertilizer. The Angolan domestic market has the greatest growth potential, which is inherent in a sector, such as the Angolan agricultural sector, that still has much to develop. The Company has been working to create brand awareness through its marketing events and running many field trials over the recent years and from this work has determined a market does exist to support its business model. There is a risk of slower penetration into the market and a longer time to generate returns for debt and equity holders.

c) Environmental Risks

The operations and proposed activities of the Company are subject to the environmental laws and regulations of Angola. As with most exploration projects and mining operations, the Company's activities are expected to have an impact on the environment, particularly if mine development proceeds. It is the Company's intention to conduct its activities to the highest standard of environmental obligation, including compliance with all environmental laws.

Directors' Report

d) Obtaining environmental permits for the Cabinda Phosphate Project

The Company has two environmental installation licences for both the mine activities and for the construction of the fertilizer plant of the Cabinda Phosphate Project. Post installation and commissioning, the Company will require two environmental operating licences. It has already lodged an application for the operating licence for its mine, and it will only lodge an application for the fertilizer plant near to commencement of its commissioning. If the operating licences are not granted then the Company may need to complete further environmental studies for a new lodgement, which may delay the project, or may cause the project to be postponed indefinitely.

e) Economic

General economic conditions, movements in interest and inflation rates and currency exchange rates may have an adverse effect on the Company's exploration, development and production activities, as well as on its ability to fund those activities.

f) Market conditions

Share market conditions may affect the value of the Company's quoted securities regardless of the Company's operating performance. Share market conditions are affected by many factors such as:

- i. general economic outlook;
- ii. introduction of tax reform or other new legislation;
- iii. interest rates and inflation rates;
- iv. changes in investor sentiment toward particular market sectors;
- v. the demand for, and supply of, capital; and
- vi. terrorism or other hostilities.

The market price of securities can fall as well as rise and may be subject to varied and unpredictable influences on the market for equities in general and resource exploration stocks in particular.

Neither the Company nor the Directors warrant the future performance of the Company or any return on an investment in the Company.

g) Construction cost risk

In October 2022, the Company released the Definitive Feasibility Study for its Cabinda Phosphate Project, which included estimates for the construction of a Beneficiation Plant. These estimates were again reviewed in the beginning of 2024 by two engineering companies. However, all construction projects have the risk of material cost rises, or construction delays that result in increased costs.

h) Additional requirements for capital

The Company must have sufficient capital to fund the construction of a phosphate fertilizer plant for its Cabinda Phosphate Project, as well as to fund the feasibility studies for its Capanda Green Ammonia Project, along with other working capital requirements. At the reporting date, it has cash and cash equivalents of \$2,290,068.

Any additional equity financing will dilute shareholdings, and additional debt financing, if available, may involve restrictions on financing and operating activities. If the Company is unable to obtain additional financing as needed, it may be required to reduce the scope of its operations and scale back its development programmes as the case may be. There is no guarantee that the Company will be able to secure any additional funding or be able to secure funding on terms favourable to the Company.

i) Speculative investment

Potential investors should consider that the investment in the Company is speculative and should consult their professional advisers before deciding whether to invest.

Directors' Report

The above and below list of risk factors ought not to be taken as exhaustive of the risks faced by the Company or by investors in the Company. The above factors, and others not specifically referred to above, may in the future materially affect the financial performance of the Company and the value of the Company's shares.

j) Risks with Operating in Angola

The Company operates out of Angola which historically have been subject to civil unrest. The Company believes that although tension has eased, civil and political unrest and an outbreak of hostilities remains a risk.

The effect of unrest and instability on political, social or economic conditions in Angola could result in the impairment of the exploration, development and mining operations of the Company's projects.

Other possible sovereign risks include, without limitation:

- i. changes in the terms of the relevant mining statutes and regulations;
- ii. changes to royalty arrangements;
- iii. changes to taxation rates and concessions;
- iv. changes in the ability to enforce legal rights;
- v. corruption that influences the awarding of contracts or the granting of licenses;
- vi. expropriation of property rights;
- vii. bureaucratic delays in government and legal processes; and
- viii. restrictions on international money transfers out of the country placed on Angolan commercial banks.

Any of these factors may, in the future, adversely affect the financial performance of the Company and the market price of its Shares.

No assurance can be given regarding the future stability in Angola or any other country in which the Company may have an interest.

k) The Legal Environment in Angola

The Company's projects are located in Angola. Angola is considered to be a developing country and is subject to emerging legal and political systems as compared with the system in place in Australia. This could result in the following risks:

- i. political difficulties in obtaining effective legal redress in the courts whether in respect of a breach of law or regulation or in an ownership dispute;
- ii. a higher degree of discretion held by various government officials or agencies;
- iii. the lack of political or administrative guidance on implementing applicable rules and regulations, particularly in relation to taxation and property rights;
- iv. inconsistencies or conflicts between and within various laws, regulations, decrees, orders and resolutions; or
- v. relative inexperience of the judiciary and court in matters affecting the Company.

On 13 February 2026, the Company released an operational update on certain administrative challenges relating to its mining licence in Angola that have affected progress on certain activities. While such matters are not unusual for companies operating in emerging markets, they require coordinated engagement with relevant government authorities to resolve. While the Company's Mining Investment Contract for the Cácata phosphate deposit remains valid and enforceable under Angolan law, the associated mining licence contains clerical inconsistencies relating to its stated term and expiry date that require formal correction by the relevant Ministry. Although the Company has received assurances that these matters are administrative in nature, the required amendments have not yet been finalised. In addition, delays in completing certain governance and corporate administrative processes relating to the Company's Angolan subsidiary, including matters required to satisfy conditions precedent to project financing, have arisen due to difficulties in obtaining support from certain local shareholders. There is a risk that regulatory, administrative or stakeholder-related delays in Angola may adversely affect the timing of project development, financing, and operations.

Directors' Report

l) Lack of Specific Infrastructure

The Company's projects are located in areas of Angola. Generally, these areas lack specific infrastructure such as:

- i. sources of third party supplied power; and
- ii. sources of third party supplied water.

The lack of availability of this infrastructure may affect mining feasibility.

The Phosphate Project is reliant on the commissioning of Porto do Caio to access the export market and to reduce its ship loading costs for the domestic market. The Cabinda Port Authority is targeting project commissioning in the second half of 2026, however this program is outside the control of the Company.

m) Workforce and Labour risks

The skill base of the local labour force in Angola is extremely limited. There is a severe shortage of workers with good managerial or technical skills.

HIV/AIDS, malaria and other diseases represent a serious threat to maintaining a skilled workforce in the mining industry throughout Africa. HIV/AIDS, malaria and other diseases are a major healthcare challenge faced by the Company's operations in Angola. There can be no assurance that the Company will not lose members of its workforce, workforce man hours or incur increased medical costs which may have a material adverse effect on the Company's operations.

Additionally, given the current high level of activity in the global mining industry, the Company may be unable to source personnel and equipment to meet its objectives.

n) Resource Estimates

Resource estimates are expressions of judgement based on knowledge, experience and industry practice. Estimates which were valid when originally calculated may alter significantly when new information or techniques become available. In addition, by their very nature, resource estimates are imprecise and depend to some extent on interpretations, which may prove to be inaccurate. As further information becomes available through additional fieldwork and analysis, the estimates are likely to change. This may result in alterations to development and mining plans which may, in turn, adversely affect the Company's operations.

o) Commodity Price Volatility and Exchange Rate Risks

If the Company achieves success leading to mineral production, the revenue it will derive through the sale of phosphate rock and potential later sales of phosphate fertilizers and blended nitrogen-phosphate-potassium fertilizers, exposes the potential income of the Company to commodity price and exchange rate risks. Commodity prices fluctuate and are affected by many factors beyond the control of the Company. Such factors include supply and demand fluctuations for precious and base metals, technological advancements, forward selling activities and other macro-economic factors.

8. SIGNIFICANT CHANGES IN THE STATE OF AFFAIRS

On 7 March 2025, Phobos Ltd received the second tranche of funding, totalling US\$2.43M, with the Angolan Sovereign Wealth Fund (Fundo Soberano de Angola or FDSEA) acquiring 4.7% of Phobos Ltd, thus reducing Minbos equity in Phobos Ltd from 84.8% to 80.1%.

On 24 April 2025, Phobos Ltd received the final tranche of funding, totalling US\$1.17M, with the Angolan Sovereign Wealth Fund (Fundo Soberano de Angola or FDSEA), acquiring 2.1% of Phobos Ltd, thus reducing Minbos equity in Phobos Ltd from 80.1% to 78%.

There were no other significant changes in the state of affairs of the consolidated entity during the financial year.

- 21,567,235 options to Alpine Capital Pty Ltd for lead manager to the December 2025 placement. These options were issued following shareholder approval received at a General Meeting held by the Company on 16 February 2026.
- 11,538,462 options to Directors, Graeme Robertson and Valentine Chitalu, who participated in the placement. Options are free attaching to SPP shares on a 1-for-1 basis.

No other matter or circumstance has arisen since 31 December 2025 that has significantly affected, or may significantly affect the Group's operations, the results of those operations, or the Group's state of affairs in future financial years.

10. LIKELY DEVELOPMENTS AND EXPECTED RESULTS OF OPERATIONS

Future developments of the Company are anticipated to include:

- Complete construction of the Phosphate Fertilizer Plant by Q1 2027;
- Commence mining activities in Q3 of 2026;
- Long-term fertilizer sales contracts agreed for majority of first-phase plant production; and
- Significant progress made in the Capanda Green Ammonia Project Pre-feasibility Study.

Matters typically dealt with by these Committees are, for the time being, managed by the Board. For details of the function of the Board please refer to the Corporate Governance Statement.

13. CORPORATE GOVERNANCE

The Board recognises the recommendations of the Australian Securities Exchange Corporate Governance Council and has disclosed its level of compliance with those guidelines within the Corporate Governance Statement which is included as part of this financial report.

Directors' Report

14. ENVIRONMENTAL REGULATIONS

The Directors have considered compliance with the National Greenhouse and Energy Reporting Act 2007 which requires entities to report annual greenhouse gas emissions and energy use. The Directors have assessed that there are no current reporting requirements under the National Greenhouse and Energy Reporting Act 2007.

The Group is subject to environmental regulation in respect to its activities in Angola. The Group aims to ensure that appropriate standard of environmental care is achieved, and in doing so, that it is aware of and is in compliance with all environmental legislation. The Directors of the Group are not aware of any breach of environmental legislation as they apply to the Group during the financial year ended 31 December 2025.

15. REMUNERATION REPORT (Audited)

This report for the financial year ended 31 December 2025 outlines the remuneration arrangements of the Group in accordance with the requirements of the Corporations Act 2001 ('the Act') and its regulations. This information has been audited as required by section 308(3C) of the Act.

The remuneration report details the remuneration arrangements for key management personnel ('KMP') who are defined as those persons having authority and responsibility for planning, directing and controlling the major activities of the Group, directly or indirectly, including any Director (whether executive or otherwise) of the Parent company.

For the purposes of this report, the term 'Executive' includes the former Managing Director, the Chief Operating Officer ('COO'), former Chief Strategy & Marketing Officer and now Chief Executive Officer ('CEO') and Chief Financial Officer ('CFO'), whilst the term 'NED' refers to Non-Executive Directors only.

Directors' Report

The Remuneration Report is set out under the following main headings:

- A Remuneration Philosophy
- B Remuneration Governance, Structure and Approvals
- C Remuneration and Performance
- D Details of Remuneration
- E Contractual Arrangements
- F Share-based Compensation
- G Equity Instruments Issued on Exercise of Remuneration Options
- H Value of Shares to KMP
- I Voting and comments made at the Company's 2024 Annual General Meeting
- J Loans to KMP
- K Loans from KMP
- L Other transactions with KMP

A Remuneration Philosophy

KMP have authority and responsibility for planning, directing and controlling the activities of the Group. KMP of Minbos comprise the Board of Directors, the CFO, the COO and the former Chief Strategy & Marketing Officer and now CEO.

The performance of the Group depends upon the quality of its KMP. To prosper the Company must attract, motivate and retain appropriately skilled Directors and Executives.

The Group's broad remuneration policy is to ensure the remuneration package properly reflects the person's duties and responsibilities and that remuneration is competitive in attracting, retaining and motivating people of the highest quality.

B Remuneration Governance, Structure and Approvals

Remuneration of Directors is currently set by the Board of Directors. The Board has not established a separate Remuneration Committee at this point in the Group's development, nor has the Board engaged the services of an external remuneration consultant. It is considered that the size of the Board along with the level of activity of the Group renders this impractical. The Board is primarily responsible for:

- The over-arching executive remuneration framework;
- Operation of the incentive plans which apply to executive directors and senior executives (the executive team), including key performance indicators and performance hurdles;
- Remuneration levels of executives, and
- Non-executive director fees.

Their objective is to ensure that remuneration policies and structures are fair and competitive and aligned with the long-term interests of the Company.

➤ Non-Executive Remuneration Structure

The remuneration of Non-Executive Directors consists of Directors' fees, payable in arrears. The Board, in accordance with the Company's Constitution and the ASX listing rules specify that the Non-Executive Directors fee pool shall be determined from time to time by a general meeting. The latest determination was at the 2010 Annual General Meeting ('AGM') held on 30 November 2010 when shareholders approved an aggregate fee pool of \$300,000 per year (in accordance with the terms and conditions set out in the Explanatory Statement that accompanied the Notice of Meeting). The Board will not seek any increase for the Non-Executive Director pool at the 31 December 2025 AGM.

Directors' Report

Remuneration of Non-Executive Directors is based on fees approved by the Board of Directors and is set at levels to reflect market conditions and encourage the continued services of the Directors. Non-Executive Directors do not receive retirement benefits but are able to participate in share-based incentive programmes in accordance with Company policy.

The remuneration of Non-Executives is detailed in **Table 1a** and **Table 1b**, and their contractual arrangements are disclosed in "Section E – Contractual Arrangements".

➤ Non-Executive Remuneration Approvals

The Board, in accordance with the Company's Constitution, sets the aggregate remuneration of Non-Executive Directors, subject to shareholder approval. Within this pre-approved aggregate remuneration pool, fees paid to Non-Executive Directors are approved by the Board of Directors in the absence of the Remuneration Committee and is set at levels to reflect market conditions and encourage the continued services of the Directors.

Remuneration may also include an invitation to participate in share-based incentive programmes in accordance with Company policy.

The nature and amount of remuneration is collectively considered by the Board of Directors with reference to relevant employment conditions and fees commensurate to a company of similar size and level of activity, with the overall objective of ensuring maximum stakeholder benefit from the retention of high performing Directors.

➤ Executive Remuneration Structure

The nature and amount of remuneration of executives are assessed on a periodic basis with the overall objective of ensuring maximum stakeholder benefit from the retention of high performing Executives.

The main objectives sought when reviewing executive remuneration is that the Company has:

- Coherent remuneration policies and practices to attract and retain Executives;
- Executives who will create value for shareholders;
- Competitive remuneration offered benchmarked against the external market; and
- Fair and responsible rewards to Executives having regard to the performance of the Group, the performance of the Executives and the general pay environment.

The remuneration of Executives is detailed in **Table 1a** and **Table 1b**, and their contractual arrangements are disclosed in "Section E – Contractual Arrangements".

➤ Executive Remuneration Approvals

The Company aims to reward Executives with a level and mix of remuneration commensurate with their position and responsibilities within the Company and aligned with market practice. Executive contracts are reviewed annually by the Board, in the absence of a Remuneration Committee, for their approval. The process consists of a review of company, business unit and individual performance, relevant comparative remuneration internally and externally and, where appropriate, external advice independent of management.

Executive remuneration and incentive policies and practices must be aligned with the Company's vision, values and overall business objectives. Executive remuneration and incentive policies and practices must be designed to motivate management to pursue the Company's long-term growth and success and demonstrate a clear relationship between the Company's overall performance and the performance of executives.

Directors' Report

Share Price (\$)	0.024	0.059	0.097	0.099	0.135

Relationship between Remuneration and Company Performance

Given the current phase of the Company's development the Board does not consider earnings during the current year and previous financial years when determining, and in relation to, the nature and amount of remuneration of KMP.

Short Term Incentive Package

During the current financial year, the Company paid Blair Snowball (CFO) a performance bonus of \$27,101. There were no other short-term incentive-based payments made during the financial year ended 31 December 2025 (31 December 2024: \$nil).

Long Term Incentive Package

On 23 November 2022, shareholders approved the Company's adoption of the employee incentive scheme titled "Employee Incentive Securities Plan" (Incentive Plan) and for the issue of equity securities, such as performance rights and options, in accordance with Listing Rule 7.2 (Exception 13(b)).

The objective of the Incentive Plan is to attract, motivate and retain key employees and the Company considers that the adoption of the Incentive Plan and the future issue of equity securities under the Incentive Plan will provide selected employees with the opportunity to participate in the future growth of the Company.

The Board considers that for each KMP who receives equity incentives, their high-calibre experience will greatly assist the Company in achieving its strategy to develop the Cabinda Phosphate Project, located in Angola.

The Board is of the opinion that the terms of equity incentives currently on issue to the Directors, other KMP and its Executives is a sufficient, long-term incentive to reward Executives in a manner which aligns the element of remuneration with the creation of shareholder wealth.

18. PROCEEDINGS ON BEHALF OF THE COMPANY

No person has applied to the Court under section 237 of the Corporations Act 2001 for leave to bring proceedings on behalf of the Company, or to intervene in any proceedings to which the Company is a party, for the purposes of taking responsibility on behalf of the Company for all or part of those proceedings.

19. INDEMNITY AND INSURANCE OF OFFICERS

During the financial year, the Company paid a premium in respect of a contract insuring all its Directors and current and former executive officers against a liability incurred as such a Director or executive officer to the extent permitted by the Corporations Act 2001. The contract of insurance prohibits disclosure of the nature of the liability and the amount of the premium.

The Company has indemnified the directors and executives of the Company for costs incurred, in their capacity as a director or executive, for which they may be held personally liable, except where there is a lack of good faith.

20. INDEMNITY AND INSURANCE OF AUDITOR

During the financial year, the Company has not paid a premium in respect of a contract to insure the auditor of the Company or any related entity.

The Company has not, during or since the end of the financial year, indemnified or agreed to indemnify the auditor of the Company or any related entity against a liability incurred by the auditor.

Directors' Report

21. NON-AUDIT SERVICES

The Company may decide to employ the auditor on assignments additional to their statutory audit duties where the auditor's expertise and experience with the Company and/or the group are important.

There were no non-audit services provided by the auditor, BDO Audit Pty Ltd, during the year.

22. ROUNDING OF AMOUNTS

The company is of a kind referred to in Corporations Instrument 2016/191, issued by the Australian Securities and Investments Commission, relating to 'rounding-off'. Amounts in this report have been rounded off in accordance with that Corporations Instrument to the nearest dollar.

23. LEAD AUDITOR'S INDEPENDENCE DECLARATION

The Lead Auditor's Independence Declaration is set out on page 28 and forms part of the Directors' Report for the financial year ended 31 December 2025.

Signed in accordance with a resolution of the Board of Directors.

Mr Paul McKenzie
Non-Executive Chairman
31 March 2026

DECLARATION OF INDEPENDENCE BY DAVE ANDREWS TO THE DIRECTORS OF MINBOS RESOURCES LIMITED

As lead auditor of Minbos Resources Limited for the year ended 31 December 2025, I declare that, to the best of my knowledge and belief, the only contraventions of:

1. The auditor independence requirements of the *Corporations Act 2001* in relation to the audit; or
2. Any applicable code of professional conduct in relation to the audit;

are those contraventions, details of which are set out below:

BDO Audit Pty Ltd has identified that the previous engagement partner, due to an administrative oversight following the company's financial year-end change in 2022, signed the half-year review report for the period ended 30 June 2025. This involvement occurred after the expiry of the permitted five-year time on period under Section 324DA of the Corporations Act 2001 and during a period when the partner was required to be subject to rotation and cooling-off in accordance with the Corporations Act 2001 and APES 110: Code of Ethics for Professional Accountants (including Independence Standards).

Upon identifying this matter, a new partner had already been assigned to the engagement. BDO Audit Pty Ltd has assessed that this breach did not compromise our independence or our ability to issue an audit opinion for the year ended 31 December 2025.

This declaration is in respect of Minbos Resources Limited and the entities it controlled during the year.

Notes to the Consolidated Financial Statements

1. CORPORATE INFORMATION

Minbos Resources Limited (referred to as '**Minbos**' or the '**Company**' or '**Parent Entity**') is a company domiciled in Australia. The address of the Company's registered office and principal place of business is disclosed in the Corporate Directory of this report. The consolidated financial statements of the Company at the end of, or during, twelve months ended 31 December 2025 comprise the Company and its subsidiaries (together referred to as the '**Consolidated Entity**' or the '**Group**'). The Group is an ASX-listed exploration and development company with a vision to build a nutrient supply and distribution business that stimulates agricultural production and promotes food security in Angola and the broader Middle Africa region, through development of its Cabinda Phosphate Project and its Capanda Green Ammonia Project, both in Angola.

The primary focus in the financial year has been on the development of the Cabinda Phosphate Project and the Capanda Green Ammonia Project.

2. MATERIAL ACCOUNTING POLICY INFORMATION

BASIS OF PREPARATION

The financial report is a general purpose financial report which has been prepared in accordance with Australian Accounting Standards and Interpretations issued by the Australian Accounting Standards Board and the Corporations Act 2001. Minbos Resources Limited is a for-profit entity for the purpose of preparing the financial statements.

The financial report was authorised for issue by the Directors on 31 March 2026.

(a) Compliance with IFRS

The consolidated financial statements of the Consolidated Entity also comply with International Financial Reporting Standards ('**IFRS**') as issued by the International Accounting Standards Board ('**IASB**').

(b) Basis of measurement

The consolidated financial statements have been prepared on a going concern basis in accordance with the historical cost convention, unless otherwise stated.

(c) Going Concern

These financial statements have been prepared on a going concern basis, which contemplates the continuity of normal business activities and the realisation of assets and settlement of liabilities in the normal course of business.

The Group is not currently generating material revenues and will not do so until after construction and commissioning of its phosphate fertilizer plant has completed. As at 31 December 2025, the Group has cash and cash equivalents of \$2,290,068. This sum is anticipated to be materially less than the estimated capital expenditure required for completion of construction and working capital requirements. These conditions indicate the existence of a material uncertainty that may cast significant doubt about the group's ability to continue as a going concern and, therefore, that it may be unable to realise its assets and discharge its liabilities in the normal course of business.

The Directors foresee that the Group must secure additional funding through a capital raising and/or debt raising, or other fund-raising activities in order to continue as a going concern. The Directors consider it is reasonable to assume that additional funds will be able to be raised as required and that the Group will continue as a going concern. As such, the financial report has been prepared on 'a going concern' basis. In arriving at this position, the Directors have considered the following matters:

Notes to the Consolidated Financial Statements

- On 2 March 2026, the Company announced the USD 16M loan facility provided by the Industrial Development Corporation of South Africa was signed by both parties. Drawdown of this facility will be available at completion of the remaining conditions precedent regarding security, which the Company expects to satisfy in April 2026.
- On 5 December 2025, the Company announced it had applied for a loan with Banco de Formento Angola (BFA), the third largest Angolan commercial bank. It is now awaiting Credit Committee approval for a USD 5M loan.
- On 6 December 2024, the Company announced a term sheet was signed with Banco BAI, the largest Angolan commercial bank, for a loan of approximately USD 12M (11 billion Kwanza). On 5 December 2025 the company announced final condition precedent to the loan, that the Angolan subsidiary and borrower of the loan must be converted to a public limited company had faced delays with local partners. The directors believe these delays are resolvable and it can lead to finalising the loan agreement.
- On 14 November 2024, the Company announced that the Angolan Sovereign Fund (FSDEA) made an investment of USD 10M into its phosphate project and it has committed to continue to support development of the project.
- The Directors are satisfied that the Company could raise additional funds via a capital raising or further debt to fund the remaining capital expenditure for the Group's phosphate project in Angola and meet the Group's working capital commitments over the next 12 months. This is based on existing discussions with potential lenders and strategic cornerstone investors.

Should the Group not be able to continue as a going concern, it may be required to realise its assets and discharge its liabilities other than in the ordinary course of business, and at amounts that differ from those stated in the financial statements. This financial report does not include any adjustments relating to the recoverability and classification of recorded asset amounts or liabilities that might be necessary should the Group not continue as a going concern.

PRINCIPALS OF CONSOLIDATION

(a) Subsidiaries

The consolidated financial statements incorporate the assets and liabilities of all subsidiaries of Minbos Resources Limited ('**Company**' or '**Parent Entity**') as at 31 December 2025 and the results of all subsidiaries for the financial year. Minbos Resources Limited and its subsidiaries together are referred to in this financial report as the Group or the Consolidated Entity.

Subsidiaries are all entities (including structured entities) over which the group has control. The group controls an entity when the group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power to direct the activities of the Group. Subsidiaries are fully consolidated from the date on which control is transferred to the group. They are deconsolidated from the date that control ceases.

Intercompany transactions, balances and unrealised gains on transactions between group companies are eliminated. Unrealised losses are also eliminated unless the transaction provides evidence of the impairment of the asset transferred. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the group.

Non-controlling interests in the results and equity of subsidiaries are shown separately in the Consolidated Statement of Profit or Loss & Other Comprehensive Income and Consolidated Statement of Financial Position respectively.

Notes to the Consolidated Financial Statements

(b) Changes in ownership interests

The Group treats transactions with non-controlling interests that do not result in a loss of control as transactions with equity owners of the Group. A change in ownership interest results in an adjustment between the carrying amounts of the controlling and non-controlling interests to reflect their relative interest in the subsidiary. Any differences between the amount of the adjustment to non-controlling interests and any consideration paid or received is recognised in a separate reserve within equity attributable to owners of Minbos Resources Limited.

When the Group ceases to have control, joint control or significant influence, any retained interest in the entity is remeasured to its fair value with the change in carrying amount recognised in profit or loss. The fair value is the initial carrying amount for the purposes of subsequently accounting for the retained interest as an associate, jointly controlled entity or financial asset. In addition, any amounts previously recognised in other comprehensive income in respect of that entity are accounted for as if the Group had directly disposed of the related assets or liabilities. This may mean that amounts previously recognised in other comprehensive income are reclassified to profit or loss.

If the ownership interest in a jointly-controlled entity or an associate is reduced but joint control or significant influence is retained, only a proportionate share of the amounts previously recognised in other comprehensive income are reclassified to profit or loss where appropriate.

FOREIGN CURRENCY TRANSLATION

Functional and presentation currency

These consolidated financial statements are presented in Australian dollars. The functional and presentation currency of the Company is Australian dollars (AUD). The functional currency of the subsidiaries is United States dollars (USD) and Angolan Kwanza (AOA).

Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in profit or loss, except when they are deferred in equity as qualifying cash flow hedges and qualifying net investment hedges or are attributable to part of the net investments in a foreign operation.

Foreign exchange gains and losses that relate to borrowings are presented in the Consolidated Statement of Profit or Loss and Other Comprehensive Income, within finance costs. All other foreign exchange gains and losses are presented in the Consolidated Statement of Profit or Loss and Other Comprehensive Income on a net basis within other income or other expenses.

Group companies

The results and financial position of foreign operations (none of which has the currency of a hyperinflationary economy) that have a functional currency different from the presentation currency are translated into the presentation currency as follows:

- Assets and liabilities for each Statement of Financial Position presented are translated at the closing rate at the date of that Statement of Financial Position,
- Income and expenses for each Statement of Profit or Loss and Other Comprehensive Income are translated at average exchange rates (unless this is not a reasonable approximation of the cumulative effect of the rates prevailing on the transaction dates, in which case income and expenses are translated at the dates of the transactions), and
- All resulting exchange differences are recognised in other comprehensive income.

On consolidation, exchange differences arising from the translation of any net investment in foreign entities, and of borrowings and other financial instruments designated as hedges of such investments, are recognised in other comprehensive income. When a foreign operation is sold or any borrowings forming part of the net investment are repaid, the associated exchange differences are reclassified to profit or loss, as part of the gain or loss on sale.

Notes to the Consolidated Financial Statements

GOODS AND SERVICES TAX (GST) AND VALUE ADDED TAX (VAT)

Revenues and expenses are recognised net of the amount of GST or value added tax (VAT), except where the amount of GST or VAT is not recoverable from the taxation authority. In these circumstances the GST or VAT is recognised as part of the item of expense to which it relates.

Assets are recognised net of the amount of GST or VAT, except where the tax is not recoverable from the taxation authority. In these circumstances the tax is recognised as part of the cost of acquisition of the asset. Receivables and payables are stated with the amount of GST or VAT included. The net amount of GST or VAT recoverable from, or payable to, the taxation authority is included as a current asset or liability.

Cash flows are reported on a gross basis. The GST or VAT components of cash flows arising from investing and financing activities which are recoverable from, or payable to, the taxation authority are classified as operating cash flows.

NEW AND REVISED ACCOUNTING STANDARDS ADOPTED BY THE GROUP

The Group has adopted all the new or amended Accounting Standards and Interpretations issued by the Australian Accounting Standards Board (“AASB”) that are mandatory for the current reporting period.

NEW AND REVISED ACCOUNTING STANDARDS FOR APPLICATION IN FUTURE PERIODS

Australian Accounting Standards and Interpretations that have recently been issued or amended but are not yet mandatory, have not been early adopted by the consolidated entity for the annual reporting period ended 31 December 2025. The Group's assessment of the impact of these new or amended Accounting Standards and Interpretations, most relevant to the Group, are set out below.

AASB 18 Presentation and Disclosure in Financial Statements

This standard is applicable to annual reporting periods beginning on or after 1 January 2027 and early adoption is permitted. The standard replaces IAS 1 'Presentation of Financial Statements', with many of the original disclosure requirements retained and there will be no impact on the recognition and measurement of items in the financial statements. But the standard will affect presentation and disclosure in the financial statements, including introducing five categories in the statement of profit or loss and other comprehensive income: operating, investing, financing, income taxes and discontinued operations. The standard introduces two mandatory sub-totals in the statement: 'Operating profit' and 'Profit before financing and income taxes'. There are also new disclosure requirements for 'management-defined performance measures', such as earnings before interest, taxes, depreciation and amortisation ('EBITDA') or 'adjusted profit'. The standard provides enhanced guidance on grouping of information (aggregation and disaggregation), including whether to present this information in the primary financial statements or in the notes. The consolidated entity will adopt this standard from 1 January 2027, and it is expected that there will be a significant change to the layout of the statement of profit or loss and other comprehensive income.

OTHER MATERIAL ACCOUNTING POLICIES

Other material accounting policies that summarise the measurement basis used and are relevant to an understanding of the financial statements are provided throughout the notes to the financial statements.

Notes to the Consolidated Financial Statements

3. KEY JUDGEMENTS AND ESTIMATES

The preparation of a financial report in conformity with Australian Accounting Standards requires management to make judgments, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities, income and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgements about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates. These accounting policies have been consistently applied by each entity in the Group.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the year in which the estimate is revised if the revision affects only that year or in the year of the revision and future years if the revision affects both current and future years. In particular, information about significant areas of estimation uncertainty and critical judgments in applying accounting policies that have the most significant effect on the amount recognised in the financial statements are described in the following notes:

Useful lives of depreciable assets

Management reviews its estimate of the useful lives of depreciable assets at each reporting date, based on the expected utility of the assets.

Impairment of non-financial assets and other indefinite life intangible assets

The consolidated entity assesses impairment of non-financial assets other than goodwill and other indefinite life intangible assets at each reporting date by evaluating conditions specific to the consolidated entity and to the particular asset that may lead to impairment. If an impairment trigger exists, the recoverable amount of the asset is determined. This involves fair value less costs of disposal or value-in-use calculations, which incorporate a number of key estimates and assumptions.

It is reasonably possible that the underlying commodity price assumption may change which may then impact the estimated life of mine determinant and may then require a material adjustment to the carrying value of mining plant and equipment, mining infrastructure and mining development assets. Furthermore, the expected future cash flows used to determine the value-in-use of these assets are inherently uncertain and could materially change over time. They are significantly affected by a number of factors including reserves and production estimates, together with economic factors such as commodity spot prices, discount rates, estimates of costs to produce reserves and future capital expenditure.

Share based payments

The Group measures the cost of equity settled transactions with Directors, employees and consultants, where applicable, by reference to the fair value of the instruments at the date at which they are granted. The fair value is determined using the black-scholes, binomial or other appropriate model, taking into account the terms and conditions upon which the instruments were granted. The accounting estimates and assumptions relating to equity-settled share-based payments would have no impact on the carrying amounts of assets and liabilities within the next annual reporting period but may impact profit or loss and equity.

Consolidation of entity for which there is less than majority ownership

The Group will consolidate an entity, as a subsidiary, in its consolidated financial statements where it judges it has control over the entity. In the absence of direct ownership and/or voting rights over the entity, judgement is based on indicators of having other forms of power, including power delegated to an agent or power derived from an entity's dependence on the Group company for critical services, knowledge, personnel, licences, guarantees or funding. Where there is power it is necessary to assess if decisions directing the relevant activities of the entity are made by and/or for the benefit of the Group company and to identify how the Group company has exposure, or rights, to the entity's variable returns. There is control where all three elements are judged to exist: the power, the exposure or rights to variable returns and the evidence that the power can be used to affect the returns for the Group company.

5. INCOME TAX EXPENSE

(a) Numerical reconciliation of accounting losses to income tax expense

A reconciliation between income tax expense and the accounting loss before income tax multiplied by the Group's applicable income tax rate is as follows:

	31-Dec-25	31-Dec-24
	\$	\$
Accounting loss before income tax	(8,453,591)	(10,580,758)
At the entity's Australian statutory income tax rate of 30% (31 Dec 2024: 30%)	(2,536,077)	(3,174,227)
Adjusted for tax effect of the following amounts:		
Non-deductible / taxable items	251,171	390,826
Income tax benefits not brought to account	2,235,927	2,775,997
Income tax expense	(48,979)	(7,404)

(b) Deferred tax assets and liabilities not brought to account

The Company estimates that the potential deferred tax assets and liabilities carried forward but not brought to account at year end at the Australian corporate tax rate of 30% are made up as follows:

	31-Dec-25	31-Dec-24
	\$	\$
On income tax account:		
Carried forward tax losses	8,530,757	7,060,981
Unrecognised deferred tax assets	8,530,757	7,060,981

Notes to the Consolidated Financial Statements

The Group has Australian carried forward tax losses of \$28,435,856 (tax effected at 30%, \$8,530,757) as at 31 December 2025 (31 December 2024: \$23,536,604 (tax effected at 30%, \$7,060,981)). In view of the Group's trading position, the Directors have not included this tax benefit in the Group's Consolidated Statement of Financial Position. A tax benefit will only be recognised to the extent that it has become probable that future taxable profit will allow the deferred tax asset to be recovered.

The tax benefits of the above deferred tax assets will only be obtained if:

- (a) The Consolidated Entity derives future assessable income of a nature and of an amount sufficient to enable the benefits to be utilised;
- (b) The Consolidated Entity continues to comply with the conditions for deductibility imposed by law; and
- (c) No changes in income tax legislation adversely affect the Consolidated Entity from utilising the benefits.

6. EARNINGS PER SHARE

(a) Basic loss per share

	31-Dec-25	31-Dec-24
Net loss attributable to the ordinary equity holders of the Group (\$)	(7,795,829)	(9,738,056)

Continuing operations		
- Basic and diluted loss per share (\$)	(0.008)	(0.011)

RECOGNITION AND MEASUREMENT

Basic earnings per share is calculated by dividing the profit attributable to equity holders of the Company, excluding any costs of servicing equity other than ordinary shares, by weighted average number of ordinary shares outstanding during the financial year, adjusted for the bonus elements in ordinary shares issued during the year.

Diluted earnings per share adjusts the figures used in the determination of basic earnings per share to take into account the after income tax effect of interest and other financing costs associated with dilutive potential ordinary shares and the weighted average number of shares assumed to have been issued for no consideration in relation to dilutive potential ordinary shares.

7. CASH AND CASH EQUIVALENTS

RECOGNITION AND MEASUREMENT

Plant and equipment is stated at historical cost less accumulated depreciation and impairment. Historical cost includes expenditure that is directly attributable to the acquisition of the items.

Depreciation is calculated on a straight-line basis to write off the net cost of each item of plant and equipment over their expected useful lives as follows:

Building and infrastructure	3-10 years
Furniture and Fittings	3-7 years
IT hardware and software	3-7 years
Machinery and equipment	3-7 years

The Group will commence depreciating the equipment of the phosphate fertilizer plant when the items have been delivered on site and are ready for use.

Notes to the Consolidated Financial Statements

The residual values, useful lives and depreciation methods are reviewed, and adjusted if appropriate, at each reporting date.

Leasehold improvements and plant and equipment under lease are depreciated over the unexpired period of the lease or the estimated useful life of the assets, whichever is shorter.

An item of plant and equipment is derecognised upon disposal or when there is no future economic benefit to the consolidated entity. Gains and losses between the carrying amount and the disposal proceeds are taken to profit or loss. Any revaluation surplus reserve relating to the item disposed of is transferred directly to retained profits.

The Group assesses at each reporting date whether there are any indicators that an asset or group of assets may be impaired in accordance with applicable accounting standards. Such indicators include, but are not limited to, significant declines in market value, adverse changes in the technological, market, economic or legal environment, evidence of obsolescence or physical damage, and underperformance relative to expected future cash flows.

As at 31 December 2025, management has performed an assessment of potential impairment indicators for property, plant and equipment. Based on this assessment, no indicators of impairment were identified. Accordingly, no impairment testing was required, and no impairment loss has been recognised in the current reporting period.

Management will continue to monitor for impairment indicators in future reporting periods.

Foreign exchange translation	(643,197)	402,040
Balance at the end of the financial year	8,007,450	8,542,077

RECOGNITION AND MEASUREMENT

Mine Properties under development

Mine properties under development represents the costs incurred in preparing mines for production and includes plant and equipment under construction and operating costs incurred before production commences. These costs are capitalised to the extent they are expected to be recouped through successful exploitation of the related mining leases.

Once production commences, these costs are transferred to property, plant and equipment and mine properties, as relevant, and are depreciated and amortised using the units-of-production method based on the estimated economically recoverable reserves to which they relate or are written off if the mine property is abandoned. All care and maintenance costs are expensed.

Mine properties deemed "in development" are not amortised however are assessed for impairment. A regular review is undertaken of each area of interest to determine the appropriateness of continuing to carry forward costs in relation to that area of interest. An impairment exists when the carrying value of mine properties exceeds its estimated recoverable amount. The asset is then written down to its recoverable amount and the impairment losses are recognised in profit or loss. The Company determined that at the reporting date the estimated recoverable value of the development asset far exceeded its carrying value.

Notes to the Consolidated Financial Statements

11. LOAN TO AND FROM RELATED PARTIES

Loans to and received from minority shareholders of Soul Rock Lda:

During the 2024 financial year, Phobos Ltd (Phobos), the subsidiary of Minbos and the parent (with a holding of 85%) of Angolan subsidiary Soul Rock Lda (Soul Rock), provided three loans each of USD 580,000 to the three minority shareholders (each holding 5%) of Soul Rock. This was to fulfil an agreement to provide financial assistance to the minority shareholders so they would not be diluted during the construction phase. During 2023 Phobos made an investment of approximately USD 7M in Soul Rock to meet its own contractual commitment for foreign investment under the Private Investment Contract, and this meant the three minority shareholders each required a contribution of USD 412,244 to the company's share capital to avoid dilution.

The additional money that each minority shareholder borrowed from Phobos (making the sum of USD 580,000 each) was lent by them to Soul Rock as a shareholder loan. The terms of the shareholder loan stipulate that Soul Rock will make principal repayments that matched the amount of interest (and withholding tax) that each minority shareholder will need to pay to Phobos on their loan with that company.

The interest on the Phobos loan to minority shareholders is 5% p.a. The loans were provided in June 2024 and interest has been accrued to 31 December 2025.

There is no interest on the shareholder loans to Soul Rock.

The minority shareholders are only required to repay principal on the Phobos Loan when they receive dividends from Soul Rock. The minority shareholder must pay to Phobos 80% of each dividend they receive from Soul Rock, until the loan is fully repaid. Consequently, the loans do not have a fixed term.

Soul Rock is required to repay its loan to minority shareholders when they are called upon to pay interest on their Phobos loan, and the amount Soul Rock repays is equal to the interest due to Phobos plus withholding taxes applicable to the interest.

The loans from Phobos to the minority shareholders are secured by their shares in Soul Rock. The shareholder loans to Soul Rock are unsecured. At the reporting date, all loans have been assessed as fully recoverable.

(c) Capital risk management

The Group's objectives when managing capital are to:

- safeguard their ability to continue as a going concern, so that it can continue to provide returns for shareholders and benefits for other stakeholders, and
- maintain an optimal capital structure to reduce the cost of capital.

In order to maintain or adjust the capital structure, the Group may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares or sell assets to reduce debt.

Given the stage of the Company's development there are no formal targets set for return on capital. There were no changes to the Company's approach to capital management during the period. The Company is not subject to externally imposed capital requirements. The net equity of the Company is equivalent to capital. Net capital is obtained through capital raisings on the Australian Securities Exchange.

RECOGNITION AND MEASUREMENT

Ordinary shares are classified as equity.

Incremental costs directly attributable to the issue of new shares or options are shown in equity as a deduction, net of tax, from the proceeds. Incremental costs directly attributable to the issue of new shares or options for the acquisition of a business are not included in the cost of the acquisition as part of the purchase consideration.

If the entity reacquires its own equity instruments, for example as a result of a share buy-back, those instruments are deducted from equity and the associated shares are cancelled. No gain or loss is recognised in the profit or loss and the consideration paid including any directly attributable incremental costs (net of income taxes) is recognised directly in equity.

Notes to the Consolidated Financial Statements

Nature and purpose of reserves

Employee share plan reserve

The reserve represents the value of shares and rights issued under the Group's Employee Share Plan and incentive Performance Rights Plan as approved by shareholders, that the Consolidated Entity is required to include in the consolidated financial statements. No gain or loss is recognised in the profit or loss on the purchase, sale, issue or cancellation of the Consolidated Entity's own equity instruments.

Foreign currency translation reserve

The translation reserve comprises all foreign exchange differences arising from the translation of the financial statements of foreign operations where their functional currency is different to the presentation currency of the reporting entity.

Transactions with Non-Controlling Interest:

In December 2024, the Angolan Sovereign Wealth Fund (Fundo Soberano de Angola or FDSEA), acquired 15.2% of Phobos Ltd with a cash investment of US\$6.40 million, thus reducing Minbos equity in Phobos Ltd from 100% to 84.8% at 31 December 2024.

On 7 March 2025, Phobos Ltd received the second tranche of funding, totalling US\$2.43M, with the Angolan Sovereign Wealth Fund (Fundo Soberano de Angola or FDSEA) acquiring 4.7% of Phobos Ltd, thus reducing Minbos equity in Phobos Ltd from 84.8% to 80.1%.

On 24 April 2025, Phobos Ltd received the final tranche of funding, totalling US\$1.17M, with the Angolan Sovereign Wealth Fund (Fundo Soberano de Angola or FDSEA), acquiring 2.1% of Phobos Ltd, thus reducing Minbos equity in Phobos Ltd from 80.1% to 78%.

Notes to the Consolidated Financial Statements

As at 31 December 2025, the Angolan Sovereign Wealth Fund (Fundo Soberano de Angola or FDSEA) have acquired 22% of Phobos Ltd.

Phobos Ltd is incorporated in Mauritius and has a functional and reporting currency in US dollars.

At the time of investment, the carrying amount of the non-controlling interest was \$211,422 (31 December 2024: \$3,791,661), which included other comprehensive income of \$18,355 (31 December 2024: \$19,448) related to exchange differences on the foreign operation. The excess of consideration paid for the non-controlling interest was recognised in the Company's Accumulated Losses.

18. FINANCIAL RISK MANAGEMENT

The Group's activities expose it to a variety of financial risks: market risk (including foreign exchange risk and interest rate risk), credit risk and liquidity risk. The Group's overall risk management programme focuses on the unpredictability of the financial markets and seeks to minimise potential adverse effects on the financial performance of the Group. The Group uses different methods to measure and manage different types of risks to which it is exposed. These include monitoring levels of exposure to interest rate and foreign exchange risk and assessments of market forecasts for interest rate and foreign exchange prices. Ageing analyses and monitoring of specific credit allowances are undertaken to manage credit risk. Liquidity risk is monitored through the development of future cash flow forecasts.

Risk management is carried out by Management and overseen by the Board of Directors with assistance from suitably qualified external advisors.

The main risks arising for the Group are foreign exchange risk, interest rate risk, credit risk and liquidity risk. The Board reviews and agrees policies for managing each of these risks and they are summarised below.

The carrying values of the Group's financial instruments are as follows:

	31-Dec-25	31-Dec-24
	\$	\$
Financial assets		
Cash and cash equivalents	2,290,068	12,862,626
Loan to related parties	2,802,195	2,881,779
	5,092,263	15,744,405
Financial liabilities

Loans from related parties	751,035	750,125
	1,790,232	3,277,520
Net exposure	3,302,031	12,466,885

Notes to the Consolidated Financial Statements

(a) Market Risk

(i) Foreign exchange risk

The Group operates internationally and is exposed to foreign exchange risk arising from various currency exposures, primarily with respect to the US dollar, the Euro and Angolan Kwanza.

Foreign exchange risk arises from future commercial transactions and recognised assets and liabilities denominated in a currency that is not the entity's functional currency.

The carrying amount of the consolidated entity's foreign currency denominated financial assets and financial liabilities at the reporting date were as follows:

	Assets		Liabilities	
	31-Dec-25	31-Dec-24	31-Dec-25	31-Dec-24
	\$	\$	\$	\$
US dollars	103,813	8,926,523	233,182	671,056
EURO	1,154	3,019	-	-
Angolan Kwanza	44,032	137,741	414,723	1,469,778
	148,999	9,067,283	647,905	2,140,834

The consolidated entity had net liability denominated in foreign currencies of \$498,906 (assets of \$148,999 less liabilities of \$647,905 as at 31 December 2025 (in the 2024FY the consolidated entity had a net asset position denominated in foreign currencies of \$6,926,449 (assets of \$9,067,283 less liabilities of \$2,140,834)). Based on this exposure, had the Australian dollar weakened by 10% / strengthened by 5% (2024: weakened by 10% / strengthened by 5%) against these foreign currencies with all other variables held constant, the consolidated entity's loss before tax for the year would have been \$49,891 lower / \$24,945 higher (2024: profit \$692,645 lower / \$346,322 higher). The expected change is the expected overall volatility of the significant currencies, which is based on management's assessment of reasonable possible fluctuations taking into consideration movements over the last 6 months each year and the spot rate at each reporting date.

(ii) Interest rate risk

The Group is exposed to interest rate risk due to variable interest being earned on its interest-bearing bank accounts. At the end of the reporting period, the Group had the following interest-bearing financial instruments:

	31-Dec-25		31-Dec-24	
	Weighted average interest rate	Balance \$	Weighted average interest rate	Balance \$
Cash and cash equivalents	0.45%	2,290,068	0.34%	12,862,626

Sensitivity

Within this analysis, consideration is given to potential renewals of existing positions and the mix of fixed and variable interest rates. The following sensitivity analysis is based on the interest rate risk exposures in existence at the reporting date. The 1% increase and 1% decrease in rates is based on reasonably expected possible changes over a financial year, using the observed range of historical rates for the preceding five-year period.

Notes to the Consolidated Financial Statements

At 31 December 2025, if interest rates had moved, as illustrated in the table below, with all other variables held constant, post-tax losses and equity would have been affected as follows:

	Pre-tax profit/(loss) higher/(lower)	
	31-Dec-25	31-Dec-24
	\$	\$
Judgements of reasonably possible movements:		
+ 1.0% (100 basis points)	16,030	90,038
- 1.0% (100 basis points)	(16,030)	(90,038)

The other financial instruments of the Group that are not included in the above tables are non-interest bearing and are therefore not subject to interest rate risk.

(b) Credit risk

Credit risk is the risk of financial loss to the Group if a counter party to a financial instrument fails to meet its contractual obligations. During the financial year credit risk has principally arisen from the financial assets of the Group, which comprise cash and cash equivalents and trade and other receivables. The Group's exposure to credit risk arises from potential default of the counter party, with the maximum exposure equal to the carrying amount of these instruments.

The carrying amount of financial assets included in the Consolidated Statement of Financial Position represents the Group's maximum exposure to credit risk in relation to those assets. The Group does not hold any credit derivatives to offset its credit exposure. The Group trades only with recognised, credit worthy third parties and as such collateral is not requested nor is it the Group's policy to securitise its trade and other receivables. Receivable balances are monitored on an ongoing basis with the result that the Group does not have a significant exposure to bad debts.

The Group has no significant concentrations of credit risk within the Group except for the following:

- Note 7: Cash and cash equivalents: Cash is held with the following banks at 31 December 2025:
 - National Australia Bank: \$2,138,036,
 - MauBank Ltd: \$97,157,
 - Banco de Fomento Angola: \$51,843,
 - Petty cash: \$3,033

(i) Cash

The Group's primary bankers are National Australia Bank and MauBank Ltd. The Board considers the use of these financial institutions to be sufficient in the management of credit risk with regards to these funds.

	31-Dec-25	31-Dec-24
	\$	\$
Cash at bank and short-term bank deposits:		
Financial institutions – Standard & Poor's rating of AA-	2,138,036	3,792,332
Financial institutions – Other	152,032	9,070,294
	2,290,068	12,862,626

Notes to the Consolidated Financial Statements

(ii) Trade Debtors

While the Group has policies in place to ensure that transactions with third parties have an appropriate credit history, the management of current and potential credit risk exposures is limited as far as is considered commercially appropriate. Up to the date of this report, the Board has placed no requirement for collateral on existing debtors.

The credit quality of financial assets that are neither past due nor impaired can be assessed by reference to external credit ratings (if available) or to historical information about counterparty default rates.

(c) Liquidity risk

Prudent liquidity risk management implies maintaining sufficient cash and marketable securities and the availability of funding through an adequate amount of committed credit facilities to meet obligations when due and to close out market positions.

The Directors and Management monitor the cash outflow of the Group on an on-going basis against budget and the maturity profiles of financial assets and liabilities to manage its liquidity risk.

The financial liabilities the Group had at reporting date were trade payables and employee provisions incurred in the normal course of the business. Trade payables were non-interest bearing and were paid within the normal 30-60 day terms of creditor payments.

The table below reflects the undiscounted cash flows for financial liabilities existing at 31 December 2025.

19. SEGMENT INFORMATION

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision makers. The chief operating decision makers, who are responsible for allocating resources and assessing performance of the operating segments, have been identified as the Board of Directors, the former Managing Director and the Chief Financial Officer.

The Board considers its business operations in phosphate to be its primary reporting function. Results are analysed as a whole by the chief operating decision maker, this being the former Managing Director, the Chief Financial Officer and the Board of Directors. Consequently revenue, profit, net assets and total assets for the operating segment are reflected in this financial report.

22. COMMITMENTS

Mining Investment Contract

In 2021, the Company executed the Mining Investment Contract (MIC) for the exploration, feasibility studies and exploitation of phosphate rock at the Cácata deposit in Cabinda. In the MIC the Company has made a commitment to the Angolan Ministry of Mineral Resources, Petroleum and Gas (MIREMPET) to spend approximately US\$3,953,000 (AUD\$6.39 million) over the term of the contract. As at the reporting date the Company has met this investment obligation. The duration of the contract is established under the Mining Code as being 35 years.

Private Investment Contract

On 22 December 2022, the Company's wholly owned subsidiary, Phobos Ltd, executed its Private Investment Contract with Angola's Agency for Private Investment and Promotion of Angolan Exports (Agencia de Investimento Privado e Promoção das Exportações de Angola or AIPLEX), for the investment in the Angolan company, Soul Rock-Prospecção, Exploração De Fosfato, Produção e Comercialização de Fertilizantes, Lda (Soul Rock Lda), which is established for the purpose of the manufacture and distribution of phosphate fertilizer. The Private investment Contract defines the level of minimum investment required and confirms certain tax incentives and local employment requirements. Some key points of the contract as follows:

- Phobos Ltd must make a minimum investment, in the form of loans, capital and equipment, that total US\$21,360,000. As at reporting date the remaining investment required is approximately US\$11,960,000 (AUD\$19,300,000). The loans from commercial and development banks to fund the construction project will count to satisfying this commitment.
- The Angolan entity will receive a 90% reduction in Corporation Tax for the first 12 years of operations and, for the same period, have a 90% reduction in withholding tax on disbursement of dividends abroad.
- Other tax incentives include a Tax Credit for six years, equivalent to 30% of the investment, and a deferral period on the payment of taxes.

Construction for the Cabinda Phosphate Project

In December 2024, the Group entered into a contract for the civils works of the construction project. During 2025, the majority of this work was completed. At the reporting date the remaining commitment was USD 1,647,540. Other contracts of the construction project have 4-week termination notices with only a commitment to pay for services performed. There are no other existing commitments for the construction project.

Basis of preparation

This consolidated entity disclosure statement (CEDs) has been prepared in accordance with the Corporations Act 2001 and includes information for each entity that was part of the consolidated entity as at the end of the financial year in accordance with AASB 10 Consolidated Financial Statements.

Determination of tax residency

Section 295 (3B)(a) of the Corporation Act 2001 defines tax residency as having the meaning in the Income Tax Assessment Act 1997. The determination of tax residency involves judgement as there are different interpretations that could be adopted, and which could give rise to a different conclusion on residency. In determining tax residency, the consolidated entity has applied the following interpretations:

- **Australian tax residency**

The consolidated entity has applied current legislation and judicial precedent, including having regard to the Tax Commissioner's public guidance in Tax Ruling TR 2018/5

- **Foreign tax residency**

Where necessary, the consolidated entity has used independent tax advisers to assist in its determination of tax residency to ensure applicable foreign tax legislation has been complied with.

Directors' Declaration

The Directors of the company declare that:

- 1 The financial statements, comprising the consolidated statement of profit or loss and other comprehensive income, consolidated statement of financial position, consolidated statement of cash flows, consolidated statement of changes in equity and accompanying notes, are in accordance with the Corporations Act 2001; and
 - (a) comply with Accounting Standards, Corporations Regulations 2001 and other mandatory professional reporting requirements;
 - (b) comply with the International Financial Reporting Standards as issued by the International Accounting Standards Board as described in note 2 to the financial statements; and
 - (c) give a true and fair view of the Consolidated Entity's financial position as at 31 December 2025 and of its performance for the period ended on that date.
- 2 In the Directors opinion, there are reasonable grounds to believe that the company will be able to pay its debts as and when they become due and payable.
- 3 In the Directors opinion, the information disclosed in the note of Consolidated Entity Disclosure Statement is true and correct.
- 4 The Directors have been given the declarations required by section 295A of the Corporations Act 2001.

This declaration is made in accordance with a resolution of the Board of Directors, made pursuant to section 295(5)(a) of the Corporations Act 2001, and is signed on behalf of the Directors by:

INDEPENDENT AUDITOR'S REPORT

To the members of Minbos Resources Limited

Report on the Audit of the Financial Report

Opinion

We have audited the financial report of Minbos Resources Limited (the Company) and its subsidiaries (the Group), which comprises the consolidated statement of financial position as at 31 December 2025, the consolidated statement of profit or loss and other comprehensive income, the consolidated statement of changes in equity and the consolidated statement of cash flows for the year then ended, and notes to the financial report, including material accounting policy information, the consolidated entity disclosure statement and the directors' declaration.

In our opinion the accompanying financial report of the Group, is in accordance with the *Corporations Act 2001*, including:

- i) Giving a true and fair view of the Group's financial position as at 31 December 2025 and of its financial performance for the year ended on that date; and
- ii) Complying with Australian Accounting Standards and the *Corporations Regulations 2001*.

Basis for opinion

We conducted our audit in accordance with Australian Auditing Standards. Our responsibilities under those standards are further described in the *Auditor's responsibilities for the audit of the Financial Report* section of our report. We are independent of the Group in accordance with the auditor independence requirements of the *Corporations Act 2001* and the ethical requirements of the Accounting Professional and Ethical Standards Board's APES 110 *Code of Ethics for Professional Accountants (including Independence Standards)* (the Code) that are relevant to audits of the financial report of public interest entities in Australia. We have also fulfilled our other ethical responsibilities in accordance with the Code.

We confirm that the independence declaration required by the *Corporations Act 2001*, which has been given to the directors of the Company, would be in the same terms if given to the directors as at the time of this auditor's report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Material uncertainty related to going concern

We draw attention to Note 2(c) in the financial report which describes the events and/or conditions which give rise to the existence of a material uncertainty that may cast significant doubt about the group's ability to continue as a going concern and therefore the group may be unable to realise its assets and discharge its liabilities in the normal course of business. Our opinion is not modified in respect of this matter.

Key audit matters

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the financial report of the current period. These matters were addressed in the context of our audit of the financial report as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. In addition to the matter described in the *Material uncertainty related to going concern* section, we have determined the matters described below to be the key audit matters to be communicated in our report.

Recoverability of the Cabinda Project

Key audit matter	How the matter was addressed in our audit
<p>As at 31 December 2025, material mine properties under development and capital work in progress relating to the Cabinda Project were disclosed in Notes 9 and 10 to the financial report.</p> <p>The Company is required to assess the recoverability of mine properties under development in accordance with AASB 136 Impairment of Assets, which involves significant judgement in determining whether indicators of impairment exist and, where applicable, estimating the recoverable amount. Note 3 sets out the key judgements and estimates applied by management in performing this assessment.</p> <p>This matter was considered to be a key audit matter due to the materiality of the mine properties under development to the Company's financial position, together with the significant judgement and estimation uncertainty involved in assessing their recoverability.</p>	<p>Our audit procedures regarding this matter included, but were not limited to:</p> <ul style="list-style-type: none"> • Obtaining and evaluating management's reconciliation of capitalised mine properties and capital work in progress to the general ledger to assess the completeness and accuracy of recorded balances; • Evaluating management's assessment of whether indicators of impairment existed requiring an assessment of the Cabinda Phosphate Project's recoverable value as at 31 December 2025; • Evaluating the reasonableness of management's assessment of recoverable value in accordance with Australian Accounting Standards, including: <ul style="list-style-type: none"> ○ Assessing management's phosphate price assumptions by reference to external market data, industry forecasts and observable trends; ○ Challenging management's key assumptions used in their value-in-use / life-of-mine model, including forecast production profiles, operating costs, development timelines, capital expenditure, and discount rate assumptions; ○ Evaluating the reasonableness of forecast cash flows and the consistency of assumptions applied with the expected development status of the Cabinda Phosphate Project;

- Reviewing Directors' minutes, public announcements and other relevant documentation for consistency with management's assessment of asset recoverability.
- Verifying documentation to confirm that the rights to tenure under the Mining Investment Contract for the Cabinda Project were valid and current at the reporting date; and
- Assessing the adequacy and appropriateness of the related disclosures included in Notes 3, 9, and 10 to the financial report.

Other information

The directors are responsible for the other information. The other information comprises the information in the Group's annual report for the year ended 31 December 2025 but does not include the financial report and the auditor's report thereon.

Our opinion on the financial report does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial report, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial report or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the directors for the Financial Report

The directors of the Company are responsible for the preparation of:

- a) the financial report that gives a true and fair view in accordance with Australian Accounting Standards and the Corporations Act 2001 and
- b) the consolidated entity disclosure statement that is true and correct in accordance with the Corporations Act 2001, and

for such internal control as the directors determine is necessary to enable the preparation of:

- i) the financial report that gives a true and fair view and is free from material misstatement, whether due to fraud or error; and
- ii) the consolidated entity disclosure statement that is true and correct and is free of misstatement, whether due to fraud or error.

In preparing the financial report, the directors are responsible for assessing the ability of the group to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

Auditor's responsibilities for the audit of the Financial Report

Our objectives are to obtain reasonable assurance about whether the financial report as a whole is free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Australian Auditing Standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of this financial report.

A further description of our responsibilities for the audit of the financial report is located at the Auditing and Assurance Standards Board website (<http://www.auasb.gov.au/Home.aspx>) at:

https://www.auasb.gov.au/media/bwvjcgre/ar1_2024.pdf

This description forms part of our auditor's report.

Report on the Remuneration Report

Opinion on the Remuneration Report

We have audited the Remuneration Report included in pages 17 to 26 of the directors' report for the year ended 31 December 2025.

In our opinion, the Remuneration Report of Minbos Resources Limited, for the year ended 31 December 2025, complies with section 300A of the *Corporations Act 2001*.

Responsibilities

The directors of the Company are responsible for the preparation and presentation of the Remuneration Report in accordance with section 300A of the *Corporations Act 2001*. Our responsibility is to express an opinion on the Remuneration Report, based on our audit conducted in accordance with Australian Auditing Standards.
