Dear Jakub,

DELTA LITHIUM LIMITED (DLI) – Correction to information published in media article

Delta Lithium refers to the article titled ‘The \$93B secret in the Australian dust’ published in the Australian Financial Review on 1 April 2026.

The article refers to the in-ground valuation of the Rubidium at the Company’s Mt Ida project. Providing in-ground valuations is a breach of the JORC code guidance clause 51 for the reporting of mineral resources.

Delta **does not endorse** the valuation of \$93B and warns investors that they **should not rely on the valuation information** contained within the article when making their investment decisions as the information was prohibited under the JORC Code (2012).

Delta requests that this announcement lift the trading halt in its securities.

This request has been authorised for release to the ASX by the James Croser, Managing Director of Delta Lithium Limited.

Yours sincerely

[sent electronically without signature]

Peter Gilford Company Secretary

About Delta Lithium

Delta Lithium (ASX: DLI) is an exploration and development company focused on bringing high-quality, lithium-bearing pegmatite deposits, located in Western Australia, into production. With current global JORC compliant resources of 36.5Mt@1.0% Li₂O, strong balance sheet and an experienced team driving the exploration and development workstreams, Delta Lithium is rapidly advancing its Projects.

The Mt Ida Project has coincident gold and lithium orebodies and holds a critical advantage over other developers with existing Mining Leases and an approved Mining Proposal. Delta Lithium is pursuing a development pathway to unlock maximum value for shareholders. Delta has recently spun out its gold assets into Ballard mining on 14th July 2025 and retains a 34% equity stake in this company.

Delta Lithium also holds the highly prospective Yinnetharra Lithium Project, with exciting lithium discoveries at the Malinda and Jamesons prospects. The Company is currently conducting exploration activities at Yinnetharra with fieldwork commenced for 2026 across our large tenure package, testing additional targets and aiming to build on the Maiden Resource at Malinda.
