

8 APRIL 2026

ASX/MEDIA RELEASE

**Trek Metals to present at RRS Gather Round Conference,
Adelaide**

Trek Metals Limited (ASX: TKM) is pleased to provide an updated Corporate Presentation which will be delivered by its Chief Executive Officer, Derek Marshall, to the Resources Rising Stars Gather Round Investor Conference in Adelaide (Thursday 9 April 2026).

Shareholders, investors, brokers, fund managers and media are welcome to register to attend the Conference either in-person or virtually:

In-Person Event

Adelaide Convention Centre, Hall E

www.rrsinvestor.com/events

Event Livestream – Virtual

https://www.bigmarker.com/series/rrs-gather-round-2026/series_summit

Authorised by the Board.

A World Class Manganese Discovery?

Christmas Creek, Western Australia

Investor Presentation | RRS Gather Round | April 2026

Christmas Creek Manganese Discovery

A Potential Company Maker?

Field work targeted REE (not Mn) based on radiometric anomalism

Extensive black outcrops discovered and samples taken

Extremely high-grade rock chips in first pass outcrop sampling

Outcrop showed scale, with ~750m of continuous Mn in an area 750 x 400m, constrained by recent sand cover

58.37% Mn
Sample ID
TKMCCR2506

Immediate Follow-up to Assess the Potential

1. Gravity

2. AEM/Mag

3. Sampling

Additional Rock Chip Sampling

Discovery Outcrop

View to the East

View to the West

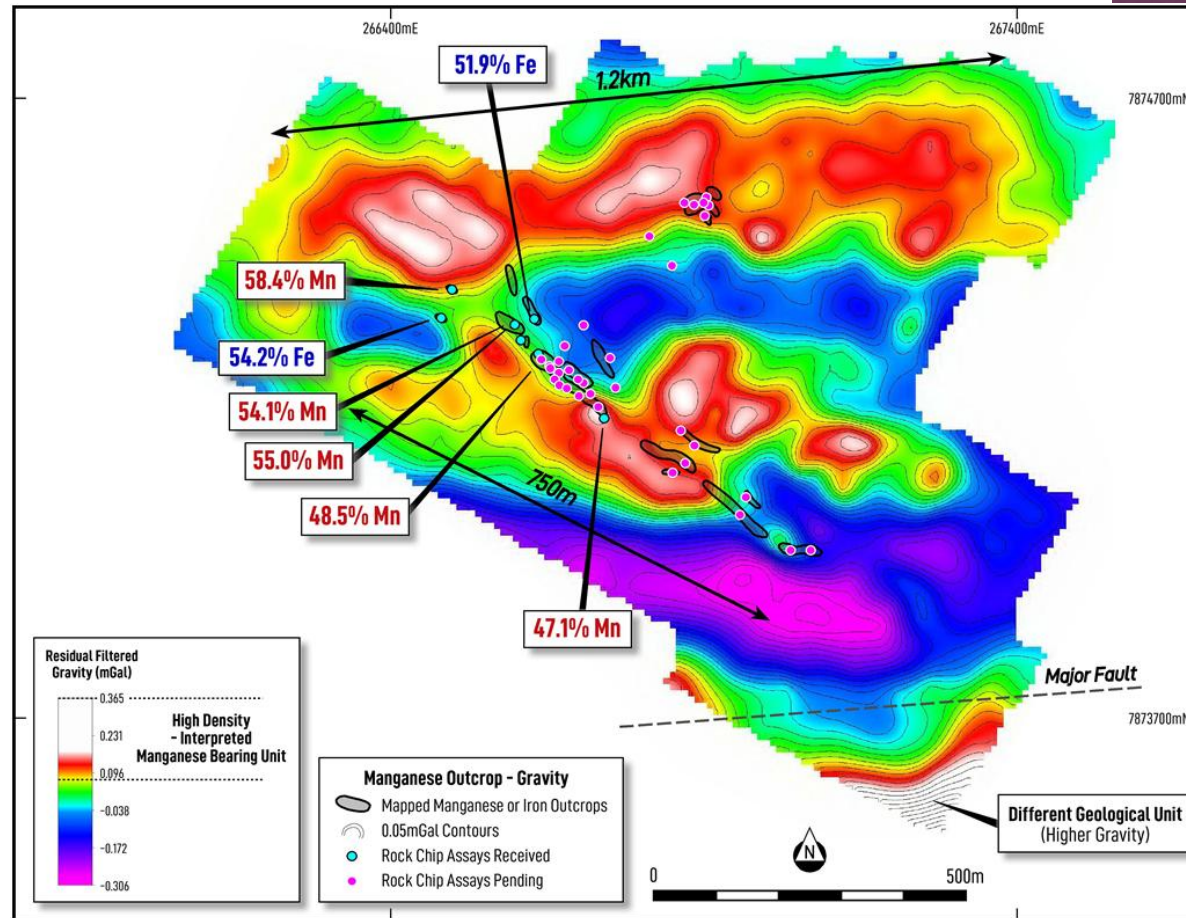

Geophysics Indicates Significant Scale Potential Beyond the Outcrop

High dry bulk density average of **4.03 g/cc** (3.31 - 4.47 g/cc) from representative rock chips

Manganese-rich material at depth likely to present as a **gravity high**

Gravity data shows a good correlation with the known outcrop

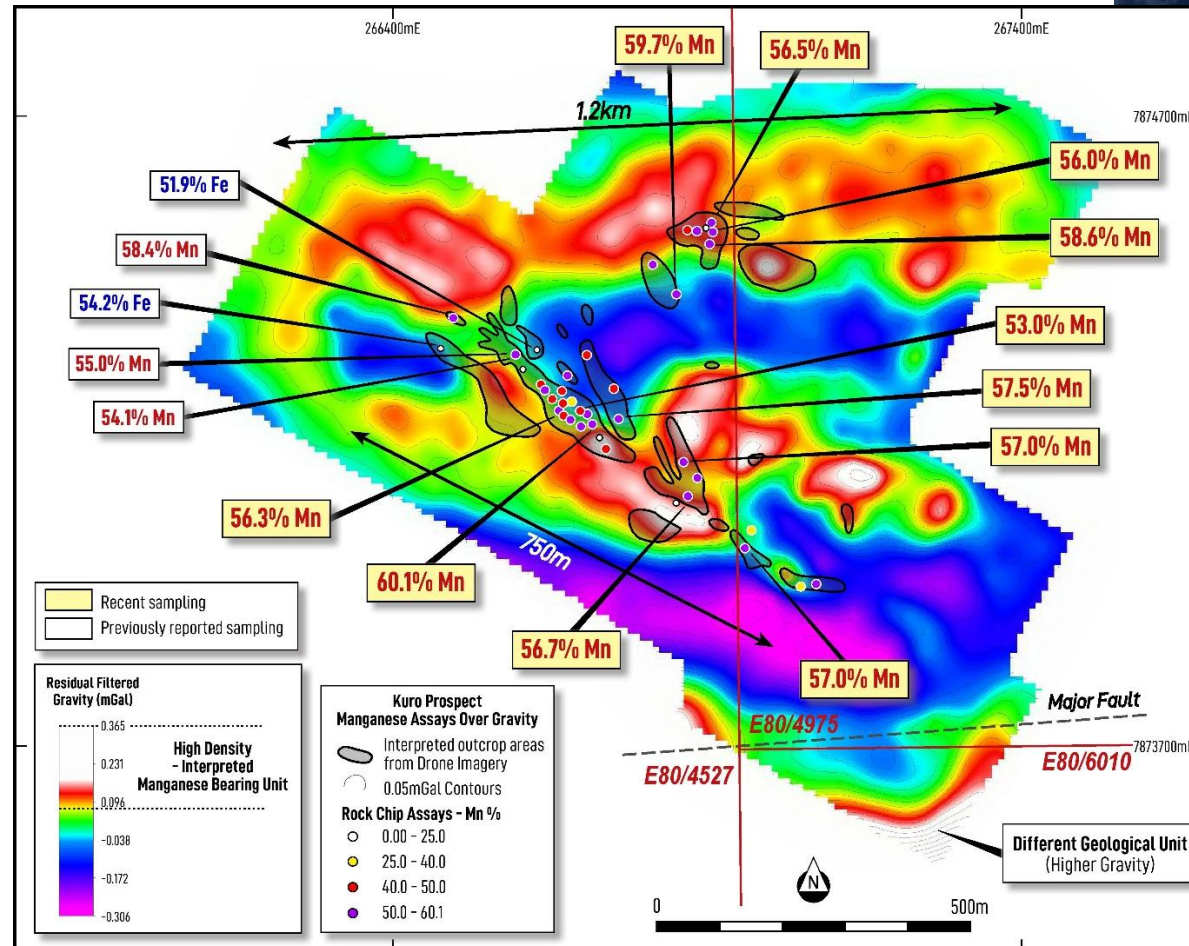

Data also shows significant anomalous that extends well beyond the outcrop

Second 'northern' trend identified under cover... could it represent more manganese?

Additional Rock Chip Sampling Assays Confirm Extensive High-Grade

Manganese-rich sample
56.7% Mn
 Sample ID OS0063065

Assays average 50% Mn, confirming high-grade nature of mineralisation

Grades up to 60.1% Mn (approaching theoretical maximum in Mn-oxide)

Only one question remains: How much is down there?

Drilling set to commence in April to answer this question!

Manganese Fundamentals

Grade Matters

A critical mineral hiding in plain sight

- ◆ Essential for steel production (~90% of global Mn demand)
- ◆ Increasingly critical for lithium-ion batteries (NMC, LFP, LMFP)
- ◆ Designated a critical mineral in multiple Western jurisdictions

Manganese Pricing

- ◆ Current manganese price of ~US\$5.58/dmtu*^ for 38% material, which equates to US\$212 per tonne of ore
- ◆ Manganese is approximately 2x as valuable as iron ore (~US\$107 per tonne of ore^)

Grade is king

- ◆ >44% Mn ore trades at a significant premium to lower-grade material
- ◆ Only two high-grade producers in Australia: Woodie Woodie (ConsMin) & Groote Eylandt (S32)

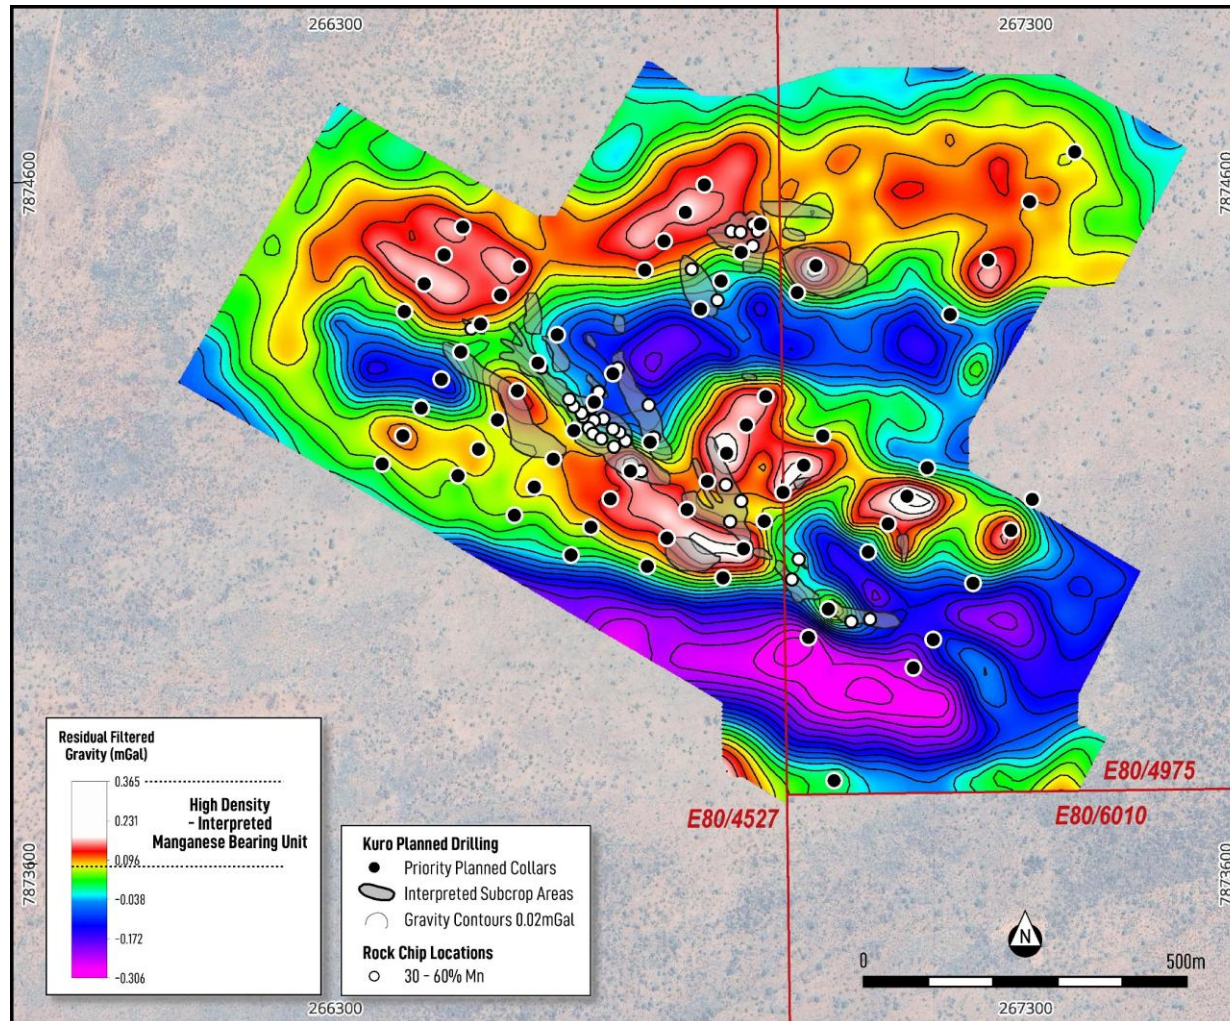

*A Dry Metric Tonne Unit (dmtu) represents 1% of a dry metric tonne.

Price conversion to AU\$/tonne for ore grading 38% Mn is $US\$5.58 \times 38\% = US\$212/\text{tonne}$, converted to AU\$ $\times 1.45 = AU\$307/\text{tonne}$.

^Price sources: Manganese: Shanghai Metal Market & Iron Ore: Market Index

Thorough Land Surveys Equate To Better Planned Drilling

70 Planned Priority 1 Drill Holes
for 9,100m

100m - 150m Drill Line Spacing

Selected 50m Spaced Drill Holes

Targeting Gravity Highs and Down Dip
Extensions of High-Grade Manganese
Mineralisation at Surface

Scope for follow-up drilling based on
results

Location

Kimberley Region

- ◆ Kuro sits 50km south of the Great Northern Highway
- ◆ Three ports with bulk handling facilities nearby (Derby, Wyndham & Broome)
- ◆ 5,608km² new tenement applications

Key

- Trek Christmas Creek Project
- New Tenement Applications
- Main Road
- Road
- Town
- Port
- Mine/Deposit

Distances

- Kuro → Highway 50km
- Kuro → Derby 480km
- Kuro → Wyndham 563km
- Kuro → Broome 622km

Activity Timeline

CORPORATE SUMMARY

Strong Balance Sheet, Leveraged to Success

Capital Structure

ASX Code	TKM.ASX
Share Price (1 st April 2026)	\$0.170
Ordinary Shares	716.38m
Unlisted Options (\$0.225 exp 24 Feb 2028)	7.86m
Performance Rights	44.72m
Market Cap.	\$121.78m
Cash and cash equivalents (31 st Mar 2026 - unaudited)	\$14.63m
Debt	nil
Enterprise Value	\$107.15m

Share Price and Volume

Board & Management

Top 100 Holders

A Rare Opportunity at an Early Stage

High-grade

Rock chip assays average
~50% Mn, up to 60.1% Mn

Premium manganese (>44% Mn)
is rare and drives value

Large, under-explored system

Extensive >1,200km² package of highly
prospective, under-explored ground

Potential for multiple manganese
positions

Clear near-term catalyst

Maiden drilling scheduled to
commence in May

Designed to test grade, width and depth
& provide metallurgical samples

Scale potential

750m of continuous, high-grade
manganese at surface

Strong gravity response indicates
significant scale beyond the outcrop

Join us on the Journey

The right team

- ◆ Proven track record in discovery, delivery & serious value creation
- ◆ Pilbara Minerals (ASX:PLS) lithium discovery and project delivery driven by the current TKM board from penny stock to >AU\$15B market cap*
- ◆ Deep global connections, especially in the lithium-ion battery market

The right time

- ◆ Strong tailwinds within the resource sector provide momentum
- ◆ Early-stage entry still available

Disclaimer

This presentation prepared by Trek Metals Limited (“Company”) does not purport to contain all the information that a prospective investor may require in connection with any potential investment in the Company. You should not treat the contents of this presentation, or any information provided in connection with it, as financial advice, financial product advice or advice relating to legal, taxation or investment matters. No representation or warranty, express or implied, is made as to the fairness, accuracy, completeness or correctness of the information, opinions and conclusions contained in this presentation. This presentation is provided expressly on the basis that you will carry out your own independent inquiries into the matters contained in the presentation and make your own independent decisions about the affairs, financial position or prospects of the Company. The Company reserves the right to update, amend or supplement the information at any time in its absolute discretion (without incurring any obligation to do so). To the maximum extent permitted by law, none of the Company its directors, employees or agents, advisers, nor any other person accepts any liability, including, without limitation, any liability arising from fault or negligence on the part of any of them or any other person, for any loss arising from the use of this presentation or its contents or otherwise arising in connection with it. This presentation is not an offer, invitation, solicitation or other recommendation with respect to the subscription for, purchase or sale of any security, and neither this presentation nor anything in it shall form the basis of any contract or commitment whatsoever.

Forward Looking Statements

This presentation may contain forward looking statements that are subject to risk factors associated with mineral exploration, mining and production businesses. It is believed that the expectations reflected in these statements are reasonable but they may be affected by a variety of variables and changes in underlying assumptions which could cause actual results or trends to differ materially, including but not limited to price fluctuations, actual demand, currency fluctuations, drilling and production results, reserve estimations, loss of market, industry competition, environmental risks, physical risks, legislative, fiscal and regulatory changes, economic and financial market conditions in various countries and regions, political risks, project delay or advancement, approvals and cost estimates. This presentation also contains reference to certain intentions, expectations, future plans, strategy and prospects of the Company. Those intentions, expectations, future plans, strategy and prospects may or may not be achieved. They are based on certain assumptions, which may not be met or on which views may differ and may be affected by known and unknown risks. In particular, there is a risk that the Company will not be able to expand or upgrade its existing JORC resource. The performance and operations of the Company may be influenced by a number of factors, many of which are outside the control of the Company. No representation or warranty, express or implied, is made by the Company, or any of its directors, officers, employees, advisers or agents that any intentions, expectations or plans will be achieved either totally or partially or that any particular rate of return will be achieved. Given the risks and uncertainties that may cause the Company’s actual future results, performance or achievements to be materially different from those expected, planned or intended, recipients should not place undue reliance on these intentions, expectations, future plans, strategy and prospects. The Company does not warrant or represent that the actual results, performance or achievements will be as expected, planned or intended. These forward-looking statements are expressed in good faith and believed to have a reasonable basis. These statements reflect current expectations, intentions or strategies regarding the future and assumptions based on currently available information. Should one or more risks or uncertainties materialise, or should underlying assumptions prove incorrect, actual results may vary from the expectations, intentions and strategies described in this announcement. The forward-looking statements are made as at the date of this announcement and the Company disclaims any intent or obligation to update publicly such forward looking statements, whether as the result of new information, future events or results or otherwise.

Competent Person’s Statement - Exploration Results

The information in this announcement relating to Exploration Results is based on information compiled by the Company’s Chief Executive Officer, Mr Derek Marshall, a competent person, who is a Member of the Australian Institute of Geoscientists. Mr Marshall has sufficient experience relevant to the style of mineralisation and to the type of activity described to qualify as a competent person as defined in the 2012 Edition of the “Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves.” Mr Marshall holds or controls share and Performance Rights in the Company. The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcement. Mr Marshall consents to the inclusion in this announcement of the matters based on his information in the form and content in which it appears.
