

8th APRIL 2026

NINNIS DRILLING DEMOBILISATION

Vita Resources NL (**ASX: VTA, Vita** or the **Company**) provides an update pertaining to the ongoing maiden exploration programme at the Company's Ninnis Gold Project (**Ninnis Project**) in Western Australia. Owing to the inclement weather experienced as a direct result of Tropical Cyclone Narelle, the Company's drilling contractors GYRO Drilling Australia have temporarily demobilised from site.

To date 850 auger holes of the targeted 1,200 holes have been drilled. These samples will be sent to LabWest Minerals Analysis in WA for assaying and the Company looks forward to advising the market upon receipt of these results.

GYRO Drilling anticipates being able to return to site later in April 2026 to complete the remaining budgeted 350 holes in the programme, which is designed to infill previous gold-in-soil results generated from very widely spaced sub-surface soil sampling completed by the previous owner-operator. GYRO's remobilisation is contingent on their projects schedule and ground conditions and will occur as soon as those factors allow.

Non-Executive Chairman Gavin Rutherford commented:

"Whilst it is disappointing our maiden programme at Ninnis has been interrupted owing to ground conditions simply being too wet following Cyclone Narelle, we are pleased to report that so far 850 holes of the anticipated 1,200 have been completed and we are in the process of sending samples to LabWest for assaying. GYRO Drilling have been fantastic in keeping us abreast of the conditions at Ninnis and we look forward to their return to complete the programme later this month."

Ninnis (E39/2110) is an early-stage gold exploration project located approximately 30km west of Laverton in the Eastern Goldfields region, acquired by Vita in November 2025¹.

Ninnis covers 25km² and presents a similar geological setting to several multi-million-ounce gold discoveries in the region, including Genesis Minerals Limited's (ASX: GMD) Mount Morgans Gold Mining Centre². The contained variety of differing geological gold deposits are only a few kilometres to the south of Ninnis and cluster about the regional Celia and Ninnis fault systems.

Following completion of the drilling programme and submission of samples to the LabWest laboratory for assaying, Vita intends to conduct a geochemistry review at Ninnis.

This announcement has been authorised for release by the Board of Vita Resources NL.

Statements and Disclaimers

Competent Person Statement

The information in this report that relates to gold exploration results, is based on information compiled by Ray Muskett who is a Member of the Australasian Institute of Mining and Metallurgy (**AusIMM**). Ray Muskett is a Director of the Company and holds shares in the Company. Ray Muskett has sufficient experience relevant to the style of mineralisation and type of deposit under consideration and to the activity currently being undertaken to qualify as a Competent Person as defined in the 2012 edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves". Ray Muskett consents to the inclusion in this report of the matters based on his information in the form and context in which it appears.

The information in this report that references previously reported exploration results is extracted from the Company's ASX market announcements released on the date noted in the body of the text where that reference appears. The previous market announcements are available to view on the Company's website (www.vitaresources.au) or on the ASX website (www.asx.com.au). The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcements. The Company confirms that the form and context in which the Competent Person's findings are presented have not been materially modified from the original market announcements.

Forward-Looking Statements

Certain statements contained in this Announcement, including information as to the future financial or operating performance of Vita Resources and its projects may also include statements which are 'forward-looking statements' that may include, amongst other things, statements regarding targets, estimates and assumptions in respect of mineral reserves and mineral resources and anticipated grades and recovery rates, production and prices, recovery costs and results, capital expenditures and are or may be based on assumptions and estimates related to future technical, economic, market, political, social and other conditions. These 'forward-looking statements' are necessarily based upon a number of estimates and assumptions that, while considered reasonable by Vita Resources, are inherently subject to significant technical, business, economic, competitive, political and social uncertainties and contingencies and involve known and unknown risks and uncertainties that could cause actual events or results to differ materially from estimated or anticipated events or results reflected in such forward-looking statements.

Vita Resources disclaims any intent or obligation to update publicly or release any revisions to any forward-looking statements, whether as a result of new information, future events, circumstances or results or otherwise after the date of this Announcement or to reflect the occurrence of unanticipated events, other than required by the Corporations Act 2001 (Cth) and the Listing Rules of the Australian Securities Exchange (ASX). The words 'believe', 'expect', 'anticipate', 'indicate', 'contemplate', 'target', 'plan', 'intends', 'continue', 'budget', 'estimate', 'may', 'will', 'schedule' and similar expressions identify forward-looking statements.

All 'forward-looking statements' made in this Announcement are qualified by the foregoing cautionary statements. Investors are cautioned that 'forward-looking statements' are not guarantee of future performance and accordingly investors are cautioned not to put undue reliance on 'forward-looking statements' due to the inherent uncertainty therein.
